
Contents

Contributors	xiii
Preface	xvii
Foreword	xxi
Introduction	1
Joseph Psotka, L. Dan Massey, Sharon A. Mutter	
AI, CAI, and Cognitive Science, 2	
Knowledge Representation and ITS	
Levels of Knowledge, 2	
Structure of the Book, 7	
Conclusion, 13	
<hr/>	
SECTION I Knowledge Acquisition	15
Joseph Psotka, L. Dan Massey, Sharon A. Mutter	
1	
Developing Expert System Knowledge Bases in Technical Training Environments	21
William B. Johnson	
Introduction, 21	
Studying Human Problem Solving, 22	
Knowledge Base Development in ITS, 28	
Summary, 32	
References, 32	

2

Cognitive Task Analysis as a Basis for Tutor Development: Articulating Abstract Knowledge Representations

35

Barbara Means and Sherrie P. Gott

Introduction, 35

Need for Analyses of Expert Troubleshooters, 36

Preview of the Approach, 39

Development of Troubleshooting Problems, 40

Problem-Solving Sessions: The Two-Expert Model, 48

Less-Than-Expert Problem Solutions, 50

A Sample Analysis, 51

Abstracting Expert Knowledge, 54

Acknowledgments, 56

References, 56

3

The Development of Troubleshooting Expertise in Radar Mechanics

59

Yvette J. Tenney and Laura C. Kurland

Introduction, 59

Study 1: Mental Models of the Radar
as a Function of Experience, 60Studies 2 and 3: Troubleshooting Strategies
of Novice and Expert Mechanics, 68

General Discussion, 78

A Scenario, 80

References, 82

4

What Mental Model Should Be Taught: Choosing Instructional Content for Complex Engineered Systems

85

David E. Kieras

Introduction, 85

Mental Models of Engineered Systems, 86

How to Choose a Mental Model, 95

Conclusion, 110

Acknowledgment, 110

References, 110

SECTION II Intelligent Instructional Design 113

Joseph Psotka, L. Dan Massey, Sharon A. Mutter

5

**Issues in Developing an Intelligent Tutor
for a Real-World Domain: Training in Radar Mechanics 119**

Laura C. Kurland and Yvette J. Tenney

Introduction, 119

Cognitive Task Analysis, 123

Addressing Instructional Needs with an ITS, 157

Conclusion, 178

Acknowledgment, 179

References, 179

6

The Problem Space of Instructional Design 181

Peter L. Pirolli and James G. Greeno

Introduction, 181

The Problem Space, 183

Theory and Methodology in the Instructional-Design
Problem Space Framework, 191

Acknowledgments, 198

References, 199

7

The Instructional-Design Environment 203

Daniel M. Russell, Thomas P. Moran, Daniel S. Jordan

The Problems of Creating Instruction, 203

IDE, 204

IDE Description, 205

- Using IDE, 211
Putting It All Together, 227
Summary, 228
Acknowledgments, 228
References, 228

8

Instructional Planners: Lessons Learned **229**

Stuart A. Macmillan, David Emme, Melissa Berkowitz

- Introduction, 229
Background, 230
SIIP: A Blackboard Architecture
for Instructional Planning, 233
An Example of SIIP Planning Behavior, 241
Lessons Learned, 243
Unresolved Issues: Lessons We Need to Learn, 252
Acknowledgments, 254
References, 254

9

Using and Evaluating Differential Modeling in Intelligent Tutoring and Apprentice Learning Systems **257**

David C. Wilkins, William J. Clancey, Bruce G. Buchanan

- The Process of Differential Modeling, 258
Performance Evaluation Issues, 261
Synthetic Agent Method of Validation, 266
Application of Synthetic Expert Method, 271
Summary, 274
Acknowledgments, 275
References, 275

10

Teaching Real-Time Tactical Thinking

285

Frank Ritter and Wallace Feurzeig

Teaching Thinking in Real-Time, 285

An Overview of TRIO, 286

Real-Time Instructional Methods in TRIO, 290

Conclusion, 300

Acknowledgments, 301

References, 301

11

Intelligent Computer Aids for Fault Diagnosis Training of Expert Operators of Large Dynamic Systems

303

T. Govindaraj

Introduction, 303

Simulation Via Qualitative Approximation, 305

Tutor Architecture and Diagnostic Problem Solving, 312

Experimental Evaluation and Evolution of the Tutor, 318

Summary, 319

Acknowledgments, 320

References, 320

12

IDE: The Interpreter

323

Daniel M. Russell

The IDE Interpreter:

A Planner-Based Adaptive Instruction System, 324

Using the IDE Interpreter:

The Interpreter as Tutoring System, 338

Other Systems, 340

Future Directions, 341

Summary, 341

Acknowledgments, 342

References, 342

Appendix A: IDE-Interpreter Languages, 343

Appendix B: Sample Instructional Strategy Rules, 343

Appendix C: Instructional Language Functions, 345

Appendix D: IDE-Interpreter Languages, 346

13

Intelligent Tutoring Systems for Electronic Troubleshooting 351

John R. Frederiksen, Barbara Y. White, Allan Collins, Gary Eggan

Introduction, 351

Intelligent Tutoring Systems Can Improve Training, 352

The Training Systems, 363

Extending the Tutor to Other Jobs in the Air Force, 367

Acknowledgments, 368

References, 368

14

A Training System for System Maintenance 369

L. Dan Massey, Jos de Bruin, Bruce Roberts

Introduction, 369

The HAWK Radar System, 370

Organizational Maintenance
of the HAWK Radar System, 372

Training a Radar Mechanic, 378

Background, 383

Overview of MACH-III Design, 389

Conclusion and Status Report, 400

Acknowledgments, 401

References, 401

SECTION IV Intelligent Tutoring Architectures 403

Joseph Psotka, L. Dan Massey, Sharon A. Mutter

15

Bridge: Tutoring the Programming Process 409

Jeffrey G. Bonar and Robert Cunningham

Introduction, <i>409</i>	
Design Issues for an Intelligent Programming Tutor, <i>411</i>	
An Overview of the Bridge System, <i>415</i>	
Using Bridge with Students, <i>430</i>	
Future Plans, <i>431</i>	
Acknowledgments, <i>433</i>	
References, <i>433</i>	

16

Understanding Reflective Problem Solving	435
Wallace Feurzeig and Frank Ritter	

Student Modeling and the Diagnosis Problem, <i>435</i>	
An Overview of QUEST, <i>437</i>	
Knowledge Acquisition for Student Modeling in QUEST, <i>438</i>	
Conclusions, <i>444</i>	
Acknowledgment, <i>450</i>	
References, <i>450</i>	

17

The Next Wave of Problems in ITS: Confronting the “User Issues” of Interface Design and System Evaluation	451
Douglas Frye, David C. Littman, Elliot Soloway	

Motivation and goals, <i>451</i>	
The Interface Problem in Educational Software, <i>452</i>	
Highlights of Our Studies, <i>454</i>	
Implications of the Research for Interface Design, <i>460</i>	
Summary Remarks, <i>461</i>	
Evaluation of ITSs, <i>462</i>	
The Cognitive Perspective on Evaluation, <i>464</i>	
Conclusion, <i>476</i>	
Acknowledgments, <i>477</i>	
References, <i>477</i>	

18**The Intelligent Maintenance Training System** **479**

Douglas M. Towne and Allen Munro

Introduction, *479*Principles Underlying the Design
of the Training System, *481*The Instructional Environment, *489*Representing Devices for Intelligent Instruction, *498*Modeling the Student, *502*Generating Expert Diagnostic Behaviors, *509*Simulation Issues, *514*Scheduled Future Developments and Applications, *517*Conclusions, *519*Acknowledgments, *526*References, *526*Editors' References, *528***Glossary** **531****Author Index** **535****Subject Index** **541**
