Preface	xvii
Chapter 1 Introduction	1
1.1 Setting the Stage	1
1.2 Water Supply, Use, and Wastewater Treatment	2
1.3 Animal Feeding Operations and Animal Waste Treatment	4
1.3.1 Manure Treatment	5
1.3.1.2 An Example: Animal Waste Treatment: Lagoons.....	5
1.4 “Get Big or Get Out”.....	6
1.5 CAFOs: Current Trend.....	7
1.6 Definitions of Key Terms.....	8
1.7 Summary.....	23
Chapter Review Questions.....	23
Thought-Provoking Questions.....	24
References.....	24
Chapter 2 CAFO Regulations and CNMPs	27
2.1 Introduction.....	27
2.2 Federal Regulations: Clean Water Act.....	27
2.2.1 NPDES Program.....	28
2.2.2 Effluent Limitation Guidelines for CAFOs	29
2.2.3 Importance of the Regulations	29
2.2.4 Other Laws That Regulate CAFOs.....	30
2.2.5 Applicability of the Regulation	30
2.2.5.1 Animal Feeding Operations Covered by the Regulations.....	30
2.2.6 CAFO Thresholds for Specific Animal Sectors.....	33
2.2.7 Other Kinds of Operations Considered to Be CAFOs	40
2.2.8 CAFOs That Do Not Need Permits.....	40
2.2.9 Exclusion from Regulations.....	40
2.2.10 Parts of a CAFO That Are Regulated	41
2.2.11 Federal NPDES Permit.....	41
2.2.11.1 NPDES General Permit.....	42
2.2.11.2 NPDES Individual Permit	42
2.2.11.3 Information to Include in the NOI or Permit Application.....	42
2.2.11.4 Permit Application Deadline.....	43
2.3 State Regulations.....	46
2.3.1 Right-to-Farm Laws.....	47
2.3.1.1 Types of Right-to-Farm Laws.....	48
2.3.1.2 Right-to-Farm Laws: Attributes	49
2.3.2.3 Right-to-Farm Laws: Criticisms.....	50
2.3.2.4 Right-to-Farm Laws: Case Law.....	50
2.4 Local Regulations and the Public’s Role	62
2.4.1 Public Involvement	62

2.5	CNMPs.....	63
2.5.1	Livestock Operations Expected to Need a CNMP.....	63
2.5.2	CNMP Technical Guidance.....	68
2.6	Summary.....	70
	Chapter Review Questions.....	70
	Thought-Provoking Questions.....	71
	References.....	71
Chapter 3 Manure Characteristics		73
3.1	Introduction.....	73
3.2	Livestock Waste Characterization Variables	73
3.2.1	Definitions of Manure/Waste Characterization Terms.....	74
3.2.2	Units of Measure and Conversion Factors.....	77
3.2.2.1	Sampling Techniques	81
3.2.2.2	After Sampling.....	84
3.2.2.3	Lab Analysis.....	84
3.3	Manure Characteristics.....	84
3.3.1	As-Excreted Manure.....	84
3.3.2	Foreign Material in Manure	85
3.3.2.1	Bedding	85
3.3.2.2	Wasted Feed and Water	86
3.3.2.3	Soil.....	86
3.3.3	Dairy	87
3.3.4	Beef.....	89
3.3.5	Swine	89
3.3.6	Poultry	91
3.3.7	Veal.....	93
3.3.8	Sheep.....	94
3.3.9	Horse.....	94
3.3.10	Rabbit.....	95
3.3.11	Flush Water.....	96
3.4	Summary.....	97
	Chapter Review Questions.....	97
	Thought-Provoking Questions.....	97
	References.....	97
Chapter 4 Manure Storage		99
4.1	Introduction.....	99
4.2	Types of Manure Storage and Handling Systems	101
4.2.1	Runoff Holding Ponds	101
4.2.2	Lagoons.....	102
4.2.3	Earthen Slurry Basins or Pits	102
4.2.4	Slurry Pits or Tanks	102
4.2.5	Below Building Pits.....	103
4.2.6	Slurry Pits, Reception Pits, or Roofed Tanks	103
4.2.7	Solid Manure	103
4.2.8	Roofed or Covered Solid Manure.....	103

4.3	Manure Handling and Storage Costs	104
4.3.1	Mortality Management	108
4.3.1.1	Poultry	108
4.3.1.2	Swine	109
4.3.2	Feedlot Upgrades	109
4.3.3	Clean Water Diversions	109
4.3.3.1	Roof Runoff Management	110
4.3.3.2	Earthen Berms with Underground Pipe Outlets.....	110
4.3.3.3	Grassed Waterways	111
4.3.3.4	Earthen Berms with Surface Outlet	112
4.3.4	Liquid Treatment	112
4.3.5	Collection and Transfer	113
4.3.5.1	Solids Collection	113
4.3.5.2	Liquid Collection with Flush Systems.....	114
4.3.5.3	Contaminated Runoff Collection	115
4.3.5.4	Pumping Transfer System.....	117
4.3.6	Storage of Solid Wastes	118
4.3.7	Storage of Slurry Wastes, Liquid Wastes, and Contaminated Runoff	118
4.3.7.1	Liquid Storage	119
4.3.7.2	Slurry Storage.....	120
4.3.7.3	Runoff Storage Ponds	121
4.3.8	Settling Basins	122
4.3.9	Conservation Practices for Pastured Livestock	123
4.3.9.1	Fencing	124
4.3.9.2	Water Wells	124
4.3.9.3	Sanitary Protection.....	125
4.3.9.4	Water Facility	126
4.3.9.5	Heavy Use Area Protection.....	127
4.3.9.6	Windbreak or Shelterbelt Establishments	127
4.3.9.7	Solids Storage	128
4.3.9.8	Filter Strip.....	129
4.3.10	Summary of Operational Needs Costs for Manure Handling and Storage.....	129
4.4	Summary.....	129
	Chapter Review Questions.....	131
	Thought-Provoking Questions	133
	References.....	133
Chapter 5	AFO/CAFO Siting: Physical Factors	135
5.1	Introduction.....	135
5.2	Role of Soils in Manure Management	135
5.2.1	Soil Basics.....	136
5.2.1.1	Soil Phases.....	136
5.2.2	Soil–Animal Waste Interaction	137
5.2.2.1	Filtration	138
5.2.2.2	Biological Degradation.....	138
5.2.2.3	Chemical Reactions.....	139
5.2.3	Soil–Animal Waste Mineralization Relationship.....	140
5.2.3.1	Microbial Activity	140

5.2.3.2	Nitrogen Mineralization	140
5.2.3.3	Phosphate Mineralization.....	141
5.2.3.4	Potassium, Calcium, and Magnesium Mineralization	141
5.2.3.5	Heavy Metal and Trace Element Mineralization	141
5.2.4	Soil Characteristics.....	142
5.2.4.1	Available Water Capacity	143
5.2.4.2	Bulk Density	143
5.2.4.3	Cation-Exchange Capacity	144
5.2.4.4	Depth to Bedrock or Cemented Pan.....	144
5.2.4.5	Depth to High Water Table.....	145
5.2.4.6	Flooding.....	145
5.2.4.7	Fraction Greater than 3 in. in Diameter—Rock Fragments, Stones, and Boulders.....	145
5.2.4.8	Intake Rate.....	146
5.2.4.9	Permeability Rate	147
5.2.4.10	Soil pH.....	147
5.2.4.11	Ponding.....	147
5.2.4.12	Salinity	148
5.2.4.13	Slope	148
5.2.4.14	Sodium Adsorption.....	148
5.3	Role of Plants in Animal Waste Management	153
5.3.1	Animal Waste as a Resource for Plant Growth.....	154
5.3.2	The Plant–Soil System.....	154
5.3.2.1	Nutrient Transformation	154
5.3.2.2	Soil Supports Plant Growth.....	155
5.3.3	Plant Nutrient Cycling	156
5.3.3.1	Essential Plant Macronutrients.....	156
5.3.3.2	Nonessential Elements.....	156
5.3.4	Balancing Plant Nutrient Needs with Animal Waste Application	161
5.3.4.1	Deficiencies of Plant Nutrients	162
5.3.4.2	Excesses of Plant Nutrients, Total Dissolved Solids, and Trace Elements	162
5.3.5	Application of Animal Waste	166
5.3.5.1	Field and Forage Crops.....	166
5.3.5.2	Horticultural Crops.....	168
5.3.5.3	Vegetated Filter Strips for Animal Waste Treatment	168
5.3.5.4	Forestland for Animal Waste Treatment	170
5.3.6	Nutrient Removal by Harvesting of Crops	170
5.3.6.1	Nutrient Uptake Calculation.....	171
5.3.6.2	Nutrient Uptake Example	174
5.4	Geologic and Groundwater Considerations	175
5.4.1	Geologic Material and Groundwater.....	175
5.4.1.1	Geologic Material: Material Properties and Mass Properties.....	175
5.4.1.2	Groundwater.....	177
5.4.1.3	Aquifers	179
5.4.1.4	Porosity	181
5.4.1.5	Specific Yield	182
5.4.1.6	Groundwater Quality	182
5.4.2	Engineering Geology Considerations.....	183
5.4.2.1	Corrosivity.....	184
5.4.2.2	Location of Water Table	184

5.4.2.3	Depth of Rock.....	184
5.4.2.4	Stability for Embankment and Excavated Cut Slopes.....	185
5.4.2.5	Excavatability.....	185
5.4.2.6	Seismic Stability.....	186
5.4.2.7	Dispersion.....	186
5.4.2.8	Permeability.....	187
5.4.2.9	Puncturability.....	187
5.4.2.10	Settlement Potential.....	187
5.4.2.11	Shrink/Swell.....	188
5.4.2.12	Topography.....	188
5.4.2.13	Availability and Suitability of Borrow Material.....	188
5.4.2.14	Presence of Abandoned Wells and Other Relics of Past Use.....	188
5.4.3	Factors Affecting Groundwater Quality Considered in Planning.....	188
5.4.3.1	Attenuation Potential of Soil.....	189
5.4.3.2	Clay Content.....	189
5.4.3.3	Depth of Soil.....	189
5.4.3.4	Distance between Contaminant Source and Groundwater Supply.....	189
5.4.3.5	Groundwater Flow Direction.....	189
5.4.3.6	Permeability of Aquifer Material.....	190
5.4.3.7	Hydraulic Conductivity.....	190
5.4.3.8	Hydraulic Head.....	190
5.4.3.9	Hydraulic Gradient.....	191
5.4.3.10	Hydrogeologic Setting.....	191
5.4.3.11	Land Topography.....	191
5.4.3.12	Proximity to Designated Use Aquifers, Recharge Areas, and Wellhead Protection Areas.....	191
5.4.3.13	Vadose Zone Material.....	191
5.4.3.14	Type of Aquifer.....	191
5.4.4	Planning and Design: Site Investigations.....	192
5.4.4.1	Preliminary Investigation.....	192
5.4.4.2	Detailed Investigation.....	193
5.4.4.3	Investigation Tools.....	193
5.4.4.4	Logging Geologic Materials.....	193
5.4.4.5	Samples.....	194
5.4.4.6	Guide to Investigation.....	194
5.5	Siting Animal Waste Management Systems.....	195
5.5.1	Process and Principles.....	195
5.5.1.1	Landscape Elements.....	195
5.5.1.2	Structures.....	195
5.5.1.3	Landform.....	196
5.5.1.4	Water.....	196
5.5.1.5	Vegetation.....	196
5.5.1.6	Siting the System.....	196
5.5.1.7	Base Map.....	196
5.5.1.8	Site Analysis.....	198
5.5.1.9	Concept Plan.....	198
5.5.1.10	Site Plan.....	199
5.5.2	Design Options.....	200
5.5.2.1	Water Quality.....	201
5.5.2.2	Odor Reduction.....	202
5.5.2.3	Temperature and Moisture Control.....	202

5.5.2.4	Aesthetic Quality.....	205
5.5.2.5	Landscape Character.....	205
5.5.2.6	Visibility.....	206
5.5.2.7	Compatibility.....	206
5.5.2.8	Climatic Conditions.....	207
5.5.2.9	Circulation.....	210
5.5.3	Checklist Approach to Siting Animal Waste Management System	
	Components.....	210
5.5.3.1	Checklist of Siting Factors.....	210
5.6	Summary.....	213
	Chapter Review Questions.....	214
	Thought-Provoking Questions.....	216
	References.....	216
Chapter 6	Animal Waste Pollutants.....	219
6.1	Introduction.....	219
6.2	Animal Waste Pollutants of Concern.....	219
6.2.1	Nutrients.....	220
6.2.1.1	Nitrogen.....	220
6.2.1.2	Phosphorus.....	221
6.2.2	Ammonia.....	222
6.2.3	Pathogens.....	223
6.2.4	Organic Matter.....	224
6.2.5	Salts and Trace Elements.....	225
6.2.6	Antibiotics.....	226
6.2.7	Pesticides and Hormones.....	226
6.2.8	Other Pollutants of Concern.....	227
6.3	Manure Pollutants: Surface Water Contamination.....	227
6.3.1	Surface Discharges.....	228
6.3.1.1	Runoff.....	228
6.3.1.2	Erosion.....	228
6.3.1.3	Spills and Dry-Weather Discharges.....	228
6.3.1.4	Direct Contact between Confined Animals and Surface Water.....	229
6.3.2	Other Discharges to Surface Water.....	229
6.3.2.1	Leaching to Groundwater.....	229
6.3.2.2	Discharge to Air and Subsequent Deposition.....	230
6.3.3	Pollutant-Specific Transport.....	230
6.3.3.1	Nitrogen Compounds.....	230
6.3.3.2	Phosphorus Compounds.....	232
6.3.3.3	Ammonia.....	232
6.3.3.4	Pathogens.....	233
6.3.3.5	Organic Matter.....	234
6.3.3.6	Salts and Trace Elements.....	235
6.3.3.7	Antibiotics.....	235
6.3.3.8	Hormones.....	235
6.3.3.9	Other Pollutants.....	236
6.4	Potential Hazards from CAFO Pollutants.....	236
6.4.1	Primary Nutrients.....	237
6.4.1.1	Ecology.....	237
6.4.1.2	Human Health.....	239

6.4.2	Ammonia	240
6.4.2.1	Ecology	240
6.4.2.2	Human Health	241
6.4.3	Pathogens	241
6.4.3.1	Ecology	241
6.4.3.2	Human Health	241
6.4.4	Organic Matter	245
6.4.4.1	Ecology	245
6.4.4.2	Human Health	245
6.4.5	Salts and Trace Elements	246
6.4.5.1	Ecology	246
6.4.5.2	Human Health	246
6.4.6	Solids	247
6.4.7	Antibiotics and Antibiotic Resistance	247
	Case Study 6.1	248
6.4.8	Hormones and Endocrine Disruption	251
6.4.9	Other Pollutants of Concern	251
6.4.9.1	Gas Emissions	251
6.4.9.2	Particulates	252
6.4.9.3	Pesticides	252
6.5	Summary	252
	Chapter Review Questions	252
	Thought-Provoking Questions	254
	References	254
Chapter 7	Animal Waste and Air Quality Problems	261
7.1	Introduction	261
7.2	Air Emissions from Feedlot Operations	262
7.2.1	General Characteristics of Animal Feeding Operations	262
7.2.1.1	Confinement	262
7.2.1.2	Manure Management System	263
7.2.1.3	Land Application	263
7.2.2	Substances Emitted	264
7.2.2.1	Ammonia	265
7.2.2.2	Nitrous Oxide	265
7.2.2.3	Methane	266
7.2.2.4	Carbon Dioxide	267
7.2.2.5	Volatile Organic Compounds	267
7.2.2.6	Hydrogen Sulfide and Other Reduced Sulfur Compounds	267
7.2.2.7	Particulate Matter	268
7.2.2.8	Odors	269
7.2.3	Summary of Factors Affecting Emissions	270
7.3	Emissions from Land Application	271
7.3.1	Short-Term Emissions	272
7.3.1.1	Particulate Matter	272
7.3.1.2	Nitrogen Compounds, Hydrogen Sulfide, and VOCs	272
7.3.1.3	Methane	272
7.3.2	Long-Term Emissions	272
7.3.2.1	Nitrogen Compounds	272
7.3.2.2	Hydrogen Sulfide	273
7.3.2.3	Methane and VOCs	273

7.4	Emissions from Virtual Farms.....	273
7.4.1	Development of Emission Factors from Literature Sources.....	274
7.4.1.1	Emission Data Review.....	274
7.4.1.2	Emission Factor Development.....	275
7.4.2	Other Methods Used to Calculate Emissions.....	276
7.4.2.1	Ammonia.....	276
7.4.2.2	Nitrous Oxide (N ₂ O).....	281
7.4.2.3	Hydrogen Sulfide.....	282
7.4.2.4	Methane.....	283
7.4.2.5	Volatile Organic Compounds.....	288
7.4.3	Estimation of Nitrogen, Sulfur, and Volatile Solids in Manure.....	289
7.4.3.1	Daily Nitrogen, Sulfur, and Volatile Solids Excretion Rates.....	289
7.4.3.2	Calculation of Nitrogen, Sulfur, and Volatile Solids Excreted Annually.....	289
7.4.4	Emission Factors and Estimates from Virtual Farms.....	292
7.4.4.1	Beef Virtual Farms.....	294
7.4.4.2	Veal Virtual Farms.....	294
7.4.4.3	Dairy Virtual Farms.....	294
7.4.4.4	Swine Virtual Farms.....	298
7.4.4.5	Poultry Virtual Farms.....	299
7.4.5	Comparison of Emission Estimates to Manure Characteristics.....	300
7.5	Emission Control Methods.....	303
7.5.1	Particulate Matter Emission Controls.....	304
7.5.1.1	Water Application.....	305
7.5.1.2	Oil Application.....	306
7.5.1.3	Modification of Feed Handling and Delivery System.....	308
7.5.1.4	Filtration.....	308
7.5.1.5	Ionization.....	309
7.5.1.6	Wet Scrubbing.....	310
7.5.1.7	Covering of Manure Stockpiles.....	310
7.5.2	Gaseous Emissions Controls.....	310
7.5.2.1	Confinement Facility Design and Operating Methods.....	311
7.5.2.2	Acidification of Manure in Confinement Housing.....	311
7.5.2.3	Biofiltration of Confinement Housing Exhaust.....	312
7.5.2.4	Gas Absorption of Confinement Housing Exhaust.....	313
7.5.2.5	Bioscrubbing of Confinement Housing Exhaust.....	313
7.5.2.6	Ozonation of Confinement Housing Air.....	314
7.5.2.7	Chemical Oxidation of Liquid Manure Storage.....	314
7.5.2.8	Manure Additives.....	315
7.5.2.9	Covering of Liquid Manure Storage Tanks and Ponds.....	315
7.5.2.10	Covering of Anaerobic Lagoons with Biogas Collection and Combustion.....	317
7.5.2.11	Anaerobic Digestion.....	317
7.5.2.12	Biocovers for Liquid Manure Storage and Anaerobic Lagoons.....	318
7.5.2.13	Composting of Manure Solids.....	319
7.5.2.14	Diet Manipulation.....	319
7.5.2.15	Carcass Disposal.....	320
7.5.3	Land Application.....	321
7.5.3.1	Particulate Matter Emissions from Land Application.....	321
7.5.3.2	Gaseous Emissions from Land Application.....	321
	Chapter Review Questions.....	322

Thought-Provoking Questions	324
References	324
Chapter 8 Beef Cattle Feeding Operations	331
8.1 Introduction.....	331
8.2 Size and Location of Industry	331
8.3 Beef Production Cycles	333
8.3.1 Cow–Calf Operations	333
8.3.2 Background Operations	335
8.3.3 Finishing or Feedlot Operations	335
8.4 Beef Confinement Practices.....	336
8.5 Feeding Practices	336
8.6 Manure Management Practices.....	337
8.6.1 Manure Collection	337
8.6.2 Manure Storage, Stabilization, Disposal, and Separation	338
8.6.2.1 Storage	338
8.6.2.2 Stabilization.....	338
8.6.2.3 Land Application.....	339
8.6.2.4 Separation.....	339
8.7 Beef Virtual Farms	339
8.7.1 Confinement.....	340
8.7.2 Solids Separation	340
8.7.3 Storage and Stabilization	340
8.7.4 Land Application	341
Chapter Review Questions.....	341
Thought-Provoking Questions	341
References	341
Chapter 9 Dairy Operations.....	343
9.1 Introduction.....	343
9.2 Size and Location of Industry	343
9.3 Production Cycles	347
9.3.1 Mature Cows (Lactating and Dry Cows).....	347
9.3.2 Calves and Heifers	347
9.3.3 Veal Calves	348
9.4 Confinement Practices	348
9.4.1 Mature Cows—Breeding Cycle.....	348
9.4.2 Mature Cows—Milking Center.....	349
9.4.3 Mature Cows—Lactating and Dry Herd	349
9.4.4 Calves.....	350
9.4.5 Heifers.....	350
9.4.6 Veal Calves	350
9.5 Feeding Practices	350
9.6 Manure Management Practices.....	351
9.6.1 Dairy Manure Collection and Transport	351
9.6.1.1 Drylots	351
9.6.1.2 Freestall Barns and Milking Centers	352
9.6.2 Manure Storage, Stabilization, and Separation	353
9.6.2.1 Storage.....	353

	9.6.2.2	Stabilization.....	353
	9.6.2.3	Solids Separation.....	354
9.7		Dairy And Veal Virtual Farms.....	354
	9.7.1	Dairy Virtual Model Farms.....	354
	9.7.1.1	Confinement.....	354
	9.7.1.2	Solids Separation.....	357
	9.7.1.3	Storage and Stabilization.....	357
	9.7.1.4	Land Application.....	357
	9.7.2	Veal Virtual Farms.....	357
	9.7.2.1	Confinement.....	358
	9.7.2.2	Storage and Stabilization.....	358
	9.7.2.3	Land Application.....	358
		Chapter Review Questions.....	359

Chapter 10 Swine Feeding Operations..... 361

10.1		Introduction.....	361
10.2		Size and Location of Swine Industry.....	362
10.3		Swine Production Cycles.....	365
10.4		Swine Confinement Practices.....	367
10.5		Swine Manure Management Practices.....	368
	10.5.1	Collection Practices.....	368
	10.5.2	Swine Manure Storage and Stabilization.....	369
	10.5.2.1	Anaerobic Lagoons.....	369
	10.5.2.2	Storage Facilities.....	370
	10.5.2.3	Anaerobic Lagoon Design.....	371
	10.5.2.4	Regional Differences in Manure Management Systems.....	371
	10.5.3	Swine Manure Land Application.....	372
	10.5.4	Swine Mortality.....	372
10.6		Swine Virtual Farms.....	372
	10.6.1	Confinement.....	374
	10.6.2	Storage and Stabilization.....	374
	10.6.3	Land Application.....	374
		Chapter Review Questions.....	374
		Thought-Provoking Questions.....	375

Chapter 11 Poultry Feeding Operations..... 377

11.1		Introduction.....	377
11.2		Broilers.....	377
	11.2.1	Size and Location of the Broiler Industry.....	378
	11.2.2	Broiler Production Cycles.....	380
	11.2.3	Broiler Confinement.....	381
	11.2.4	Broiler Manure Management.....	381
	11.2.4.1	Broiler Manure Collection.....	382
	11.2.4.2	Broiler Manure Storage.....	382
	11.2.5	Mortality Management.....	383

11.3	Laying Hens	383
11.3.1	Size and Location of the Table Egg Industry	383
11.3.2	Layer Production Cycles.....	385
11.3.3	Layer Confinement Practices.....	387
11.3.4	Layer Manure Management.....	387
11.3.5	Mortality Management.....	388
11.4	Turkeys.....	389
11.4.1	Size and Location of Turkey Industry	389
11.4.2	Turkey Production Cycle	389
11.4.3	Turkey Confinement Practices.....	392
11.4.4	Turkey Manure Management.....	392
11.4.5	Mortality Management.....	393
11.5	Poultry Virtual Model Farms.....	393
11.5.1	Confinement.....	393
11.5.2	Storage and Stabilization.....	393
11.5.3	Land Application	394
	Chapter Review Questions.....	395
	Thought-Provoking Questions	395
	References.....	395
Chapter 12 CAFO Component Design		397
12.1	Introduction.....	397
12.2	Production.....	397
12.2.1	Roof Runoff Management	397
12.2.2	Runoff Control.....	399
12.3	Collection.....	400
12.3.1	Alleys.....	400
12.3.1.1	Scrape Alleys and Open Areas.....	400
12.3.1.2	Flush Alley	401
12.3.2	Gutters	404
12.3.2.1	Gravity Drain Gutters.....	404
12.3.2.2	Step-Dam Gutters.....	404
12.3.2.3	Scrape Gutters	404
12.3.2.4	Flush Gutters	406
12.3.3	Slatted Floors	406
12.4	Storage.....	407
12.4.1	Waste Storage Facilities for Solids	407
12.4.1.1	Design Considerations.....	407
12.4.2	Liquid and Slurry Waste Storage.....	409
12.4.2.1	Design Considerations.....	413
12.4.2.2	Design of Sidewalls and Floors.....	414
12.5	Treatment.....	414
12.5.1	Anaerobic Lagoons.....	414
12.5.1.1	Design.....	414
12.5.1.2	Management	419
12.5.2	Aerobic Lagoons.....	420
12.5.3	Mechanically Aerated Lagoons.....	420
12.5.3.1	Lagoon Loading	422
12.5.3.2	Aerator Design.....	422
12.5.4	Oxidation Ditch	424

12.5.5	Drying/Dewatering.....	425
12.5.6	Composting.....	425
12.5.6.1	Composting Methods	425
12.5.6.2	Method Selection.....	428
12.5.6.3	Siting and Area Considerations.....	429
12.5.6.4	Compost Utilization	430
12.5.6.5	Compost Mix Design.....	430
12.5.6.6	Composting Operational Considerations	436
12.5.6.7	Compost Process Steps.....	438
12.5.6.8	Dead Animal Composting.....	438
12.5.7	Mechanical Separation	444
12.5.8	Settling Basins.....	447
12.5.9	Dilution.....	447
12.5.10	Vegetative Filters	447
12.6	Transfer	448
12.6.1	Reception Pits.....	448
12.6.2	Gravity Flow Pipes	449
12.6.3	Push-off Ramps	449
12.6.4	Picket Dams.....	451
12.6.5	Pumps	452
12.7	Utilization	452
12.7.1	Nutrient Management	452
12.7.2	Land Application Equipment.....	453
12.7.3	Land Application of Municipal Sludge (Biosolids).....	453
12.7.4	Biogas Production.....	453
12.7.4.1	Design Procedure	455
12.7.4.2	Other Considerations.....	458
12.8	Ancillary Components.....	459
12.8.1	Fences.....	459
12.8.2	Dead Animal Disposition	459
12.9	Safety.....	460
12.9.1	Confined Spaces	461
12.9.2	Aboveground Tanks.....	461
12.9.3	Lagoons, Ponds, and Liquid Storage Structures.....	461
12.9.4	Equipment.....	462
12.10	Summary.....	462
	Chapter Review Questions.....	462
	Thought-Provoking Questions.....	464
	References/Recommended Reading	464
	Index	469
