List of contributors xi

1. An introduction to the nature of language and to the central themes and issues in the study of language development 1
   Martyn Barrett
   The nature of language 1
   The task facing the language-learning child 8
   The topics covered by the chapters in this book 9
   Recurrent themes and issues in the study of children’s language development 17
   References 23

2. Prelinguistic communication 25
   Vasudevi Reddy
   How do we look for the prelinguistic? 25
   Intentionality in communication 26
   Reasons for the emergence of communication 29
   Continuities in communicative development 31
   Embodiment in communication 33
   Landmarks in the changing nature of prelinguistic communication 35
   Understanding prelinguistic communication:
     Continuity and embodiment 45
   References 47

3. Early speech perception and word learning 51
   Kim Plunkett and Graham Schafer
   Introduction 51
   Early speech perception 51
Word detection 57
Word learning 63
Summary 67
References 68

4. **Phonological acquisition** 73
   
   *David Ingram*
   
   Introduction 73
   A phonological case study: The data 74
   Theoretical issues 74
   Phonological analysis 81
   Summary 93
   References 95

5. **Early lexical development** 99
   
   *Esther Dromi*
   
   Introduction 99
   The size of the one-word lexicon and the rate of accumulating new words 101
   The distribution of early words in various word-classes 105
   The content of early words 110
   Semantic processes in the acquisition of early word meanings 111
   The role of context and experience in the acquisition of word meanings 114
   Theoretical models on word meaning acquisition 116
   Epilogue 125
   Acknowledgements 126
   References 126

6. **The world of words: Thoughts on the development of a lexicon** 133
   
   *Stan A. Kuczaj II*
   
   The word as unit 134
   What's in a word? 136
   The representation of meaning 136
   Reference 138
   Denotation 140
   Are object words basic? 142
   The denotation of early object words 143
   The problem of too many possibilities 145
   Is children's acquisition of word meaning constrained? 146
   The acquisition of paradigmatic relations 150
   Syntagmatic relations 152
   The interaction of language and cognitive development 153
   Conclusions 154
   References 155
7. Early syntactic development: A Construction Grammar approach 161
   Michael Tomasello and Patricia J. Brooks
   Major steps in early syntactic development 163
   Processes of development 177
   Conclusion 184
   Acknowledgements 186
   References 186

8. Some aspects of innateness and complexity in grammatical acquisition 191
   Michael Maratsos
   Introduction: Some basic ideas about complexity, innateness, and heterogeneity 191
   Thematic relation mapping in English and other languages:
   Massive complexity in some systems 196
   Formal categories: Some developmental issues 205
   Chomskyan acquisitions: Formal and abstruse properties of grammar 215
   Some general conclusions about complex grammatical acquisition 224
   References 225

9. The development of conversational and discourse skills 229
   Barbara A. Pan and Catherine E. Snow
   Development of conversational skills 230
   Development of discourse skills 237
   Conclusion 245
   References 246

10. Bilingual language development 251
    Suzanne Romaine
    Introduction 251
    Types of childhood bilingualism 252
    Theoretical issues in childhood bilingualism 256
    Input and social context as factors affecting rate and order of acquisition 267
    Is there cognitive advantage to bilingualism? 271
    References 273

11. Sign language development 277
    John D. Bonvillian
    Introduction 277
    Early sign language acquisition: Similarities and differences with spoken language development 279
    Hand preference in early signing 291
    The development of gestural communication in the absence of a language model 294
    The emergence of a new sign language 296
    Is there a critical period for sign language acquisition? 298
CONTENTS

Sign communication training for mute, low-functioning children 300
Concluding remarks 305
References 305

12. Language development in atypical children 311
   Helen Tager-Flusberg
   Introduction 311
   Down syndrome 312
   Williams syndrome 321
   Autism 328
   Other atypical populations 335
   Conclusions 338
   Acknowledgements 340
   References 340

13. Specific language impairment 349
    Paul Fletcher
    Introduction 349
    Subject description 350
    The LAD deficit hypothesis 352
    SLI in other languages 355
    How specific is specific language impairment? 359
    Residual issues 363
    Conclusion 368
    References 368

14. Towards a biological science of language development 373
    John L. Locke
    Introduction 373
    Explaining language development 376
    Ontogenetic phases 379
    A proposed goal-directed model 386
    Concluding remarks 390
    Acknowledgements 391
    References 391
