List of Figures and Tables	vi
Foreword	ix
<i>Harriet Mayor Fulbright</i>	
The Editors	xv
1. A Virtual Laboratory for Remote Electronic Engineering Education <i>Andrea Bagnasco, Marco Chirico, Giancarlo Parodi, Andrea Sappia and Anna Marina Scapolla</i>	1
2. A Virtual Secondary School Classroom on the Net <i>Giuseppe Chiazzese, Claudia Cortopassi and Maria Rita Laganà</i>	15
3. The Virtual Student: User Embodiment in Virtual Learning Environments <i>Marc Fabri and Michael Gerhard</i>	32
4. Supporting Flexible Learning over the Net <i>Lynne Hall, Adrian Gordon and Paul Black</i>	56
5. The Potential of Electronic Networking to Provide Effective Learning Environments <i>Dave Hobbs, Rik Taylor and James Armstrong</i>	70
6. Demonstration of how Soft Systems Methodology can be used to Structure the Issues Associated with Distance Learning Activities <i>Barbara Howell and Nimal Jayaratna</i>	91
7. University21 - An Integrated Educational System <i>Jianhua Ma, Runhe Huang and Toshiyasu L. Kunii</i>	109
8. Collaborative Virtual Environments for Problem Based Learning <i>Joze Rugelj</i>	140
9. Factors Affecting Active Participation in a CMC Created for Distance Learners <i>Tina Wilson and Denise Whitelock</i>	156
10. Computer-Mediated Communication in Distance Education <i>Barbara Cannone-Syrcos and George Syrcos</i>	171

# List of Figures and Tables

## Chapter 1

Figure 1	Virtual Laboratory layers	7
Figure 2	Virtual Instrument components	8
Figure 3	Virtual Instrument architecture	9
Figure 4	Virtual Laboratory implementation scheme 1	10
Figure 5	Virtual Laboratory implementation scheme 2	11
Figure 6	Example VL hypertext page	12
Figure 7	Experiment simulation	13

## Chapter 2

Figure 1	Ideal school on the net	18
Figure 2	Communication model	20
Figure 3	The application layer	21
Figure 4	Co-operative learning network model	22
Figure 5	Distribution process of a didactic unit to the pupils	26
Table 1	The API methods	27
Figure 6	The Virtual Secondary School Classroom	28

## Chapter 3

Figure 1	Modes of learning: Learning through guided discovery	34
Figure 2	Collaborative virtual environment with various user embodiments	36
Figure 3	Student's perspective of learning in a VLE	38
Figure 4	Collaborative learning through 'guided discovery' in a VLE	39
Figure 5	Model for the theory of Cognitive Immersion	40
Figure 6	Surprise and sadness face, welcoming and rejection posture	48
Figure 7	Virtual head animation parameters	50

## **Chapter 6**

Figure 1	Virtual-U Environment	93
Figure 2	Virtual-U Conference area	95
Figure 3	Seven stage model	102
Figure 4	Distance Learning system to exploit new markets	102
Figure 5	Root Definition - Computer Conferencing	103
Figure 6	Root Definition - Computer Mediated Conferencing System	104
Figure 7	Conceptual Model - Computer Mediated Conferencing System	105
Figure 8	Level 2 - Conceptual Model - Appreciate facilitator role	106

## **Chapter 7**

Figure 1	Integrated educational systems in relation to scales of educational organisation, functions and tools	112
Figure 2	University21 framework for developing an integrated educational system	114
Figure 3	The general architecture of University21	116
Figure 4a	An example of the private office for a teacher	118
Figure 4b	An example of creating a new course by a teacher	119
Figure 5a	Hyper-environment architecture of the virtual courseroom	120
Figure 5b	The WEB page of a virtual courseroom for C programming	121
Figure 6	An example of lesson authoring	122
Figure 7	An example of a lesson with video, audio and online references	123
Figure 8	An example for a teacher to create different questions	126
Figure 9	Authoring and automatic checking of a C/C++ program	127
Figure 10a	Meeting room administration	130
Figure 10b	Group project administration	131
Figure 11	Network and server configuration for collaboration rooms	132
Figure 12	An example of room layout of the VCR	133
Figure 13	Relations among courses, virtual laboratories, and virtual instruments and simulation tools	134
Figure 14	An example of DFT simulation in learning the Signal Processing course	136
Figure 15	An example of Fourier transform simulation for collaborative multiple users	137

## **Chapter 8**

Figure 1	Two layers of caching	146
----------	-----------------------	-----

## **Chapter 9**

Table 1	Problem areas on the computer science course	161
Table 2	Students who asked their tutor for help	162
Figure 1	Student interest in using M205 - STILE for their revision	163
Table 3	Students' rating of the CMC for revision against course problem areas	163
Figure 2	Students who used M205 - STILE less than expected	165
