Preface ..................................................................................................................... vii

Introduction

Magmatic and hydrothermal processes in ore-bearing systems ......................... 1
Judith L. Hannah and Holly J. Stein

Theoretical and Experimental Studies

Theoretical constraints on the chemistry of the magmatic aqueous phase ................ 11
Philip A. Candela

Partitioning of F and Cl between magmatic hydrothermal fluids and highly evolved granitic magmas ................................................................. 21
James D. Webster and John R. Holloway

Internal differentiation of rare-element pegmatites;
A synthesis of recent research .............................................................................. 35
David London

Fluorine-rich Granite-Rhyolite Systems

The petrogenetic and metallogenic significance of topaz granite from the southwest England orefield ................................................................. 51
D.A.C. Manning and P. I. Hill

The role of fluorine in the petrogenesis of magmatic segregations in the St. Francois volcano-plutonic terrane, southeastern Missouri .............................. 71
P. I. Nabelek and C. Russ-Nabelek

Melt inclusions in the quartz phenocrysts of rhyolites from Topaz and Keg Mountains, Thomas Range, Utah ............................................................. 89
Christine Payette and Robert F. Martin
Contents

Rare-metal enriched peraluminous rhyolites in a continental arc, Sierra Blanca area, Trans-Pecos Texas; Chemical modification by vapor-phase crystallization .................................................. 103
Jonathan G. Price, Jeffrey N. Rubin, Christopher D. Henry, Thomas L. Pinkston, Steven W. Tweedy, and David W. Koppenaal

Tin and Tungsten-bearing Granitoids

Comparative petrologic evolution of the Sn and W granites of the Fairbanks-Circle area, interior Alaska .......................................................... 121
R. J. Newberry, L. E. Burns, S. E. Swanson, and T. E. Smith

Mineralogical variation as a guide to the petrogenesis of the tin granites and related skarns, Seward Peninsula, Alaska ........................................ 143
Samuel E. Swanson, Rainer J. Newberry, Gary A. Coulter, and Thomas M. Dyehouse

Geochemistry of highly fractionated I- and S-type granites from the tin-tungsten province of western Tasmania ........................................... 161
W. N. Sawka, M. T. Heizler, R. W. Kistler, and B. W. Chappell

Genesis and fluid evolution of the East Kemptville greisen-hosted tin mine, southwestern Nova Scotia, Canada ................................................. 181
Jean M. Richardson, Keith Bell, David H. Watkinson, and John Blenkinsop

Mica chemistry as an indicator of oxygen and halogen fugacities in the CanTung and other W-related granitoids in the North American Cordillera .......................................................... 205
W. T. van Middelaar and J. D. Keith

The Black Pearl mine, Arizona; Wolframite veins and stockscheider pegmatite related to an albitic stock .............................................. 221
Christopher Schmitz and Donald M. Burt

Tin-bearing Rhyolites, Black Range, New Mexico

Genesis of the rhyolite-hosted tin occurrences in the Black Range, New Mexico, as indicated by stable isotope studies ........................................... 233
Robert O. Rye, John L. Lufkin, and Michael D. Wasserman

Eruptive fountains of silicic magma and their possible effects on the tin content of fountain-fed lavas, Taylor Creek Rhyolite, New Mexico .......................................................... 251
Wendell A. Duffield

Origin of Taylor Creek rhyolite magma, Black Range, New Mexico, based on Nd-Sr isotope studies .......................................................... 263
Cadi Reece, Joaquin Ruiz, Wendell A. Duffield, and P. Jonathan Patchett
Contents

Other Pre-Tertiary Granitoid Examples

Petrogenesis of the Proterozoic rapakivi granites of Finland .......................... 275
Ilmari Haapala and O. Tapani Rämö

The Topsails igneous suite, western Newfoundland; Fractionation and magma mixing in an “orogenic” A-type granite suite .......................... 287
Joseph B. Whalen and Kenneth L. Currie

Anorogenic, bimodal emplacement of anorthositic, charnockitic, and related rocks in the Adirondack Mountains, New York .......................... 301
James McLelland and Philip Whitney

Geochemistry and metallogeny of Arizona peraluminous granitoids with reference to Appalachian and European occurrences .......................... 317
Anne L. Shaw and John M. Guilbert

Index ................................................................. 357
