SECTION 1 INTRODUCTION / TEACHING DEFINED	1
Chapter 1 What is Teaching?	2
A definition of teaching	2
Critical assumptions about teachers and teaching	4
An illustration of teaching	7
Analysis of the illustration	13
Summary	18
SECTION 2 INTRODUCTION / THE CURRICULUM-PLANNING PHASE	21
Chapter 2 The Teacher and the Curriculum	23
Factors that determine what is taught	23
Role of the teacher in determining what is taught	30
A curriculum development illustration with analysis	37
Managerial objectives	53
Summary	55
Chapter 3 The Domains of Instructional Objectives	57
Bases for the classification of objectives	59
Objectives in the cognitive domain	64
Objectives in the psychomotor domain	69
Objectives in the affective domain	72
An extension of the classification system	78
Summary	79

Chapter 4	<i>Instructional Objectives</i>	81
	Behavior and assessment—implications for instructional objectives	82
	The behavioral statement of instructional objectives	89
	Instructional objectives for the individual differences and goals of students	93
	Writing instructional objectives in the three domains	99
	Summary	108
SECTION 3	<i>INTRODUCTION / THE INSTRUCTIONAL PHASE</i>	111
Chapter 5	<i>Analyzing Instruction</i>	114
	The observational system for instructional analysis:	
	The classification of behavior	117
	The observational system for instructional analysis:	
	Coding and summarizing behavior	130
	The observational system for instructional analysis:	
	Interpreting data about behavior	145
	Summary	161
Chapter 6	<i>Instruction as a Function of Teacher-Student Interaction</i>	162
	Teacher-initiated substantive interactive strategies	167
	Teacher-initiated managerial interactive strategies	175
	Student-initiated substantive interactive strategies	179
	Student-initiated managerial interactive strategies	183

Principles that guide the use of interactive strategies	186
Summary	195
Chapter 7 Instruction as a Function of Direct Communication	197
Teacher-initiated substantive direct communication strategies	202
Teacher-initiated managerial direct communication strategies	208
Student-initiated substantive and managerial direct communication strategies	211
Principles that guide the use of direct communication strategies.	216
Summary	229
Chapter 8 Instruction as a Function of Independent Student Activity	231
Providing structure and direction for student independent activity	232
Substantive independent strategies	237
Managerial independent strategies	241
Principles that guide the use of independent instructional strategies.	245
Summary	250
Chapter 9 Instruction as a Function of Group Activity	252
Teacher-student substantive group strategies	253
Teacher-student managerial group strategies	257
Student-student substantive group strategies	261
Student-student managerial group strategies	265
Principles that guide the use of group instructional strategies	269
Summary	276

SECTION 4 INTRODUCTION / THE MEASUREMENT PHASE	279
Chapter 10 Developing Measures of Student Learning	281
Validity and reliability in measurement	283
Testing situations in the cognitive domain	289
Testing situations in the psychomotor domain	297
Testing situations in the affective domain	301
Guidelines for the construction of tests and testing situations	313
Summary	320
Chapter 11 Analyzing Measurement Data	322
The concept of central tendency	325
The concept of variability	332
Types of measurement data	338
Analyzing changes in the performance of individuals and groups	339
Analyzing group data for differences	343
Analyzing relationships between two sets of scores	350
The reliability of measures	361
Standardized tests	364
Summary	366
SECTION 5 INTRODUCTION / THE EVALUATION PHASE	369
Chapter 12 Intent, Action, Feedback, Evaluation	371
A pre-service teacher uses intent, action, feedback, evaluation	376
An inservice teacher uses intent, action, feedback, evaluation	388
Summary	400

<i>Appendix A</i>	<i>Adaptations and additional uses of the observational system for instructional analysis</i>	405
<i>Appendix B</i>	<i>Statistical tables</i>	415
	<i>Index</i>	439
