

THE Al_2SiO_5 POLYMORPHS

TABLE OF CONTENTS

Page

- ii Copyright; Additional Copies
- iii Dedication; Foreword
- iv Preface and Acknowledgments
- xi List of Symbols

1. INTRODUCTION

- 1 FACIES SERIES AND BARIC REGIMES
- 6 TECTONIC-METAMORPHIC ANALYSIS OF METAMORPHIC BELTS
- 6 CALIBRATION OF OTHER GEOTHERMOMETERS AND GEOBAROMETERS
- 11 RATIONALE FOR TOPICAL ORGANIZATION OF SUCCEEDING CHAPTERS

2. CRYSTAL STRUCTURES, OPTICAL AND PHYSICAL PROPERTIES

- 13 INTRODUCTION
- 14 ANDALUSITE
 - 14 Crystal structure
 - 14 Optical properties
 - 21 Thermal expansion, compressibility and elasticity
- 26 SILLIMANITE
 - 26 Crystal structure
 - 28 Optical properties
 - 38 Thermal expansion, compressibility and elasticity
- 30 KYANITE
 - 30 Crystal structure
 - 34 Optical properties
 - 34 Thermal expansion

3. PHASE EQUILIBRIA

- 37 INTRODUCTION
- 40 EXPERIMENTAL HYDROTHERMAL STUDIES
- 40 Experiments of Evans (1965)
- 43 Experiments of Newton (1966a,b)
- 43 *Kyanite-andalusite equilibrium*
- 43 *Kyanite-sillimanite equilibrium*
- 45 *Al₂SiO₅ phase equilibrium diagram of Newton (1966a)*
- 45 *Critique of Newton's (1966a,b) experiments*
- 47 Experiments of Richardson et al. (1968) and Richardson et al. (1969)
- 47 *Kyanite-sillimanite equilibrium*
- 47 *Kyanite-andalusite equilibrium*
- 47 *Andalusite-sillimanite equilibrium*
- 49 *Al₂SiO₅ phase equilibrium diagram of Richardson et al. (1969)*
- 49 *Critique of the experiments of Richardson et al. (1968) and Richardson et al. (1969)*
- 55 Experiments of Holdaway (1971)
- 55 *Kyanite-andalusite equilibrium*
- 56 *Andalusite-sillimanite equilibrium*
- 57 *Al₂SiO₅ phase equilibrium diagram of Holdaway (1971)*
- 57 *Critique of Holdaway's (1971) experiments*
- 61 Experiments of Brown and Fyfe (1971)
- 62 *Al₂SiO₅ phase equilibrium diagram of Brown and Fyfe (1971)*
- 64 *Critique of Brown and Fyfe's (1971) experiments*
- 65 Experiments of Bowman (1975)
- 65 *Experiments at 0.5 kbar*
- 67 *Experiments at 2 kbar*
- 67 *Al₂SiO₅ phase equilibrium diagram of Bowman (1975)*
- 70 *Critique of Bowman's (1975) experiments*
- 71 Experiments of Heninger (1984)
- 72 *Critique of Heninger's (1984) experiments*
- 73 Experiments of Bohlen et al. (ms.)
- 74 SOLUBILITY STUDIES AT ATMOSPHERIC PRESSURE
- 74 Experimental study of Weill (1966)
- 77 *Al₂SiO₅ phase equilibrium diagram of Weill (1966)*
- 77 Experiments of Bowman (1975)
- 79 Critique of the experimental results of Weill (1966) and Bowman (1975)

- 80 CALORIMETRIC STUDIES
- 81 Heat capacities and vibrational entropies
- 85 Solution calorimetry
- 88 ANALYSIS OF Al_2SiO_5 PHASE EQUILIBRIA UTILIZING THERMODYNAMICALLY CONSISTENT DATA SETS
- 97 CALIBRATION OF THE Al_2SiO_5 PHASE EQUILIBRIA WITH MINERAL PARAGENETIC DATA
- 105 SUMMARY AND CONCLUSIONS
- 107 OTHER EQUILIBRIA IN THE Al_2SiO_5 SYSTEM
- 109 EPILOGUE

4. NON-STOICHIOMETRY

- 111 MAJOR ELEMENT NON-STOICHIOMETRY
- 111 Crystal chemistry of sillimanite-mullite solid solution
- 113 Evidence for sillimanite-mullite solid solution
- 120 Thermodynamic analysis of sillimanite-mullite solid solution
- 121 MINOR ELEMENT NON-STOICHIOMETRY
- 121 Transition elements
 - 121 *Kyanite*
 - 124 *Andalusite*
 - 134 *Sillimanite*
 - 137 *Thermodynamic analysis of transition element solid solution*
 - 143 *Partitioning of transition elements between coexisting polymorphs*
- 156 Zoning of transition elements
- 162 Boron
- 165 Hydroxyl
- 168 Other elements

5. LATTICE DEFECTS

- 169 POINT DEFECTS
- 170 Intrinsic point defects
- 171 Extrinsic point defects
- 172 LINE DEFECTS
- 178 PLANAR DEFECTS
- 178 Stacking faults
- 179 Antiphase boundaries
- 181 Twinning and kink bands in kyanite
- 184 Grain boundaries

6. Al/Si DISORDER IN SILLIMANITE

- 187 THERMODYNAMIC MODELING
- 189 PHASE EQUILIBRIUM EXPERIMENTS
- 196 EXPERIMENTAL HEAT TREATMENT
- 199 NATURAL SILLIMANITE AND FIBROLITE
- 199 X-ray diffraction
- 200 Neutron diffraction
- 201 Spectroscopic studies

7. THE FIBROLITE PROBLEM

- 207 INTRODUCTION
- 207 EXPERIMENTAL HYDROTHERMAL STUDIES
- 209 CALORIMETRIC STUDIES
- 211 NON-STOICHIOMETRY
- 214 LATTICE DEFECTS
- 214 Al-Si DISORDER
- 216 GRAIN BOUNDARY ENERGY
- 220 CONCLUSIONS

8. METAMORPHIC REACTIONS

- 223 INTRODUCTION
- 223 THE KYANITE → SILLIMANITE REACTION
- 230 THE ANDALUSITE → SILLIMANITE REACTION
- 236 THE KYANITE → ANDALUSITE REACTION
- 241 THE ANDALUSITE → KYANITE REACTION
- 243 REACTIONS INVOLVING FIBROLITE
- 246 Some fibrolite-forming reaction mechanisms
- 246 Base cation leaching
- 249 Deformation-induced fibrolitization
- 252 Aluminum metasomatism
- 253 The fibrolite \rightleftharpoons *sillimanite* reaction
- 253 RETROGRADE ALTERATION (REPLACEMENT) REACTIONS

9. REACTION KINETICS AND CRYSTAL GROWTH MECHANISMS

- 257 INTRODUCTION
- 257 EXPERIMENTAL REACTION KINETICS

- 261 FIELD EVIDENCE FOR REACTION KINETICS
- 271 Strain-assisted reactions
- 273 FIBROLITE METASTABILITY
- 273 Contact metamorphism
- 276 Regional metamorphism
- 296 Implications for an equilibrium model
- 296 KINETIC MODELING OF POLYMORPHIC REACTIONS
- 302 CHIASTOLITE: CRYSTAL GROWTH MECHANISMS

10. ALUMINUM METASOMATISM

- 311 INTRODUCTION
- 312 Al_2SiO_5 -BEARING VEINS AND SEGREGATIONS FORMED BY REPLACEMENT
- 325 Al_2SiO_5 -BEARING VEINS AND SEGREGATIONS FORMED BY CRYSTALLIZATION WITHIN FRACTURES AND CAVITIES
- 330 Al_2SiO_5 -bearing segregations in the Lepontine Alps, Switzerland: a case study
- 344 Kyanite-bearing veins in eclogites
- 346 FIBROLITE AND ALUMINUM METASOMATISM
- 352 EPILOGUE

11. ALUMINUM SILICATES IN ANATECTIC MIGMATITES AND PERALUMINOUS GRANITOIDS

- 353 INTRODUCTION
- 353 ANATECTIC MIGMATITES
- 354 PERALUMINOUS GRANITOIDS
- 359 MAGMATIC PEGMATITES

- 363 REFERENCES
