

Contents

Preface to the Fifth Edition	xix
Chapter 1. Sound and Numbers	1
Physics of Sound	1
Sound pressure level	3
Harmonics	4
Digital Basics	5
Number systems	6
The binary number system	8
Binary Codes	9
Weighted binary codes	10
Unweighted binary codes	11
Two's complement	11
Boolean Algebra	14
Analog Versus Digital	18
Chapter 2. Fundamentals of Digital Audio	21
Discrete Time Sampling	21
The Sampling Theorem	22
The Nyquist frequency	23
Aliasing	28
Quantization	31
Signal-to-error ratio	32
Quantization distortion	37
Other architectures	39
Dither	40
Types of dither	45
Conclusion	50
Chapter 3. Digital Audio Recording	51
Pulse-Code Modulation	51
Dither Generator	54
Input Lowpass Filter	54
Sample-and-Hold Circuit	57

Analog-to-Digital Converter	61
Successive approximation A/D converter	64
Oversampling A/D converter	66
Record Processing	68
Channel Codes	70
Simple codes	74
Group codes	76
Code applications	80
Chapter 4. Digital Audio Reproduction	83
Reproduction Processing	83
Digital-to-Analog Converter	85
Weighted-resistor digital-to-analog converter	88
R-2R ladder digital-to-analog converter	89
Zero-cross distortion	91
High-bit D/A conversion	92
Output Sample-and-Hold Circuit	93
Output Lowpass Filter	97
Impulse Response	98
Digital Filters	103
FIR oversampling filter	105
Noise Shaping	109
Output Processing	111
Alternate Coding Architectures	111
Floating-point systems	112
Block floating-point systems	114
Nonuniform companding systems	115
μ -Law and A-law companding	116
Differential PCM systems	117
Delta modulation	118
Adaptive delta modulation	120
Companded predictive delta modulation	122
Adaptive differential pulse-code modulation	122
Timebase Correction	124
Jitter	124
Eye pattern	125
Interface jitter versus sampling jitter	127
Jitter in storage media	128
Jitter in data transmission	130
Jitter in converters	132
Chapter 5. Error Correction	137
Sources of Errors	138
Objectives of Error Correction	141
Error Detection	141
Single-bit parity	142
ISBN	143
Cyclic redundancy check code	145
Error-Correction Codes	151
Block codes	151
Hamming codes	155
Convolutional codes	157

Interleaving	160
Cross-interleaving	161
Reed-Solomon Codes	163
Cross-Interleave Reed-Solomon Code	168
Product Codes	173
Error Concealment	175
Interpolation	176
Muting	176
Duplication	178
Chapter 6. Magnetic Storage Media	179
Recording Bandwidth	179
Digital Magnetic Media	180
Intersymbol interference	182
Longitudinal magnetic recording	182
Vertical magnetic recording	184
Stationary Head Tape Recorders	184
The DASH format	186
Rotary Head Tape Recorders	187
Operation of a videotape recorder	187
Professional digital video formats	191
Consumer digital video formats	194
Modular digital multitrack	194
Hard-Disk Drives	196
Chapter 7. Digital Audio Tape (DAT)	201
DAT Tape Cassette	201
DAT Modes	203
DAT Hardware Design	205
Rotary head	206
Track Format	208
Azimuth recording	212
Automatic track following	213
Eight-to-Ten Modulation	214
DAT Error Correction	216
Serial Copy Management System	220
Prerecorded DAT	220
Professional DAT	221
DAT timecode	221
Chapter 8. Optical Disc Media	225
Optical Phenomena	225
Diffraction	228
Resolution of optical systems	230
Polarization	232
Design of Optical Media	235
Nonerasable Optical Storage	236
Read-only optical storage	236
Write-once optical recording	239
Erasable Optical Storage	240

Magneto-optical recording	241
Phase-change optical recording	244
Dye-polymer erasable optical recording	245
Digital Audio for Theatrical Film	245
Chapter 9. The Compact Disc	249
Invention of the Compact Disc	249
Compact Disc Overview	250
Disc Design	252
Disc specifications	252
Data encoding	256
Player Optical Design	261
Optical pickup	261
Autofocus design	263
Autotracking design	265
One-beam pickup	267
Pickup control	268
Player Electrical Design	269
EFM demodulation	270
Error detection and correction	272
Output processing	273
Subcode	274
Disc Manufacturing	278
Premastering	278
Disc mastering	279
Electroforming	282
Disc replication	282
Alternative CD Formats	285
CD-ROM	286
CD-R	291
CD-RW	299
CD-MO	301
Other erasable formats	301
CD-i	302
Photo CD	302
CD+G and CD+MIDI	304
CD-3	304
Video CD	305
Super Audio CD	306
Disc design	306
DSD modulation	309
DST lossless coding	313
Player design	313
Chapter 10. Perceptual Coding	315
Psychoacoustics	315
Physiology of the Human Ear and Critical Bands	319
Threshold of hearing, and masking	323
Temporal masking	328
Rationale for Perceptual Coding	329
Perceptual Coding in Time and Frequency	332
Subband coding	334
Transform coding	338

Filter Banks	341
Quadrature mirror filters	342
Polyphase filters	343
MDCT	345
Multichannel Coding	346
Tandem Codecs	347
Spectral Band Replication	349
MPEG-1 Audio Standard	350
Psychoacoustic Models	354
MPEG-1 model 1	356
MPEG-1 model 2	358
Spreading Function	361
Tonality	364
MPEG-1 Layer I	365
Example of MPEG-1 Layer I algorithm	367
MPEG-1 Layer II	370
MPEG-1 Layer III (MP3)	374
MP3 transform coding	374
MP3 bit allocation and Huffman coding	376
MP3 stereo coding	378
MPEG-2 Audio Standard	378
MPEG-2 AAC	381
AAC main profile	382
AAC allocation loops	383
AAC temporal noise shaping	385
AC-3 (Dolby Digital) Codec	387
AC-3 overview	388
AC-3 theory of operation	390
AC-3 exponent strategies and bit allocation	391
AC-3 multichannel coding	395
AC-3 bitstream and decoder	397
DTS Codec	401
Perceptual Coding Performance Evaluation	403
Critical listening	407
Listening test evaluation	412
Conclusion	413
Chapter 11. DVD	415
Introduction	415
Disc Design	418
Disc specification	419
Disc manufacturing and playback	422
Optical playback	424
Data Coding	427
Reed-Solomon product code	429
EFMPlus modulation	430
Universal Disc Format (UDF) Bridge	430
DVD-Video	433
DVD-Video video coding	433
DVD-Video audio coding	435
DVD-Video playback features	438
DVD-Video authoring	440
DVD-Video developer's summary	441

DVD-Audio	446
DVD-Audio coding and channel options	447
DVD-Audio disc contents	452
DVD-Audio developer's summary	455
Data Compression	460
Entropy coding	461
Audio data compression	463
Meridian Lossless Packing	468
Other DVD Disc Formats	472
DVD-ROM	473
DVD-R and DVD+R	474
DVD-RW and DVD+RW	476
DVD-RAM	477
DVD Content Protection	478
DVD-Video copy protection	479
DVD-Audio copy protection	481
Content protection for recordable media	482
Secure digital transmission	483
DVD watermarking	483
HD-DVD and Blu-ray	484
Chapter 12. The MiniDisc	487
System Overview	487
Signal Format	489
Disc Design	490
Optical Pickup	493
MO Recording and Field Modulation	496
ATrac Data Reduction	500
Disc Mastering and Manufacture	507
Chapter 13. Audio Interconnection	511
Audio Interfaces	511
SDIF-2 Interconnection	512
Alesis Multichannel Optical Digital Interface	515
AES3 (AES/EBU) Professional Interface	515
AES3 frame structure	516
AES3 channel status block	518
AES3 implementation	521
AES10 (MADI) Multichannel Interface	523
S/PDIF Consumer Interconnection	524
Serial copy management system	527
Musical Instrument Digital Interface (MIDI)	529
AES11 Digital Audio Reference Signal	531
AES18 User Data Channels	534
AES24 Control of Audio Devices	535
Sample Rate Converters	536
Fiber-Optic Cable Interconnection	537
Fiber-optic systems	538
Fiber-optic cable	540
Interconnection and installation	544

Chapter 14. Desktop Audio	549
PC Buses and Interfaces	550
IEEE 1394 “FireWire”	551
Universal Serial Bus (USB)	555
Sound Cards	558
Music synthesis	559
Surround sound processing	561
Audio Codec '97 (AC '97)	562
Windows Multimedia API and DirectX API	563
MMX	565
File Formats	565
WAV and BWF	566
MP3, AIFF, QuickTime, and other file formats	568
Open Media Framework Interchange (OMFI)	571
Advanced Authoring Format (AAF)	572
Material eXchange Format (MXF)	573
AES31	574
Digital Audio Extraction	574
Hard-Disk Recording	578
System features	578
Flash Memory	581
Desktop Audio Software Applications	582
Hard-disk editing	584
Audio for video workstations	586
Chapter 15. Internet Audio	589
Networks and File Transfers	589
Telephone services	590
ISDN	592
Asymmetric Digital Subscriber Line (ADSL)	594
Computer Networks	595
Ethernet	598
Asynchronous Transfer Mode (ATM)	598
MediaNet	599
Wireless networking, WiFi, and Bluetooth	600
The Internet and Internet Audio	602
MP3	605
Music downloading and digital rights management	607
Streaming Audio	609
RealAudio G2 music codec	612
Audio webcasting	614
MPEG-4	615
MPEG-4 interactivity	615
MPEG-4 audio coding	616
MPEG-7	623
Encryption	623
Watermarking	625
Chapter 16. Digital Radio and Television Broadcasting	629
Satellite Communication	629
Digital transmission	633
Direct broadcast satellites	635

Digital Audio Radio	636
Transmission methods	636
Spectral space	637
Data reduction	639
Technical considerations	639
Eureka 147/DAB	643
In-Band Digital Radio	648
HD Radio	651
HD Radio FM-IBOC	652
HD Radio AM-IBOC	656
Direct Satellite Radio	660
XM Satellite Radio	661
Sirius Satellite Radio	662
Perceptual Audio Coding (PAC) algorithm	662
Digital Television (DTV)	664
Video data reduction	665
MPEG video	666
MPEG-1 video standard	674
MPEG-2 video standard	674
ATSC Digital Television	675
ATSC standard	677
DTV implementation	682
Chapter 17. Digital Signal Processing	685
Fundamentals of Digital Signal Processing	685
DSP applications	686
Discrete Systems	687
Linearity and time-invariance	687
Impulse response and convolution	688
Complex numbers	692
Mathematical Transforms	693
Unit Circle and Region of Convergence	697
Poles and zeros	698
DSP elements	700
Digital Filters	701
FIR filters	702
IIR filters	706
Filter applications	709
Sources of Errors	711
DSP Integrated Circuits	714
Processor architecture	714
Fixed point and floating point	716
DSP Programming	718
Filter programming	719
Texas Instruments code	720
Motorola code	721
Analog Devices SHARC code	725
Specialized DSP Applications	726
Digital delay	726
Digital reverberation	728
Digital mixing consoles	730
Loudspeaker correction	733
Noise removal	734

Chapter 18. Sigma-Delta Conversion and Noise Shaping	739
Sigma-Delta Conversion	739
Delta modulation	742
Sigma-delta modulation	744
Analysis of first-order sigma-delta modulator	745
Higher-order noise shaping	747
Idle Tones and Limit Cycles	749
One-Bit D/A Conversion with Second-Order Noise Shaping	750
Multi-bit D/A Conversion with Third-Order Noise Shaping	754
Multi-bit D/A Conversion with Quasi Fourth-Order Noise Shaping	757
Sigma-Delta A/D Conversion	758
Sigma-delta A/D modulator	761
Digital filtering and decimation	763
Sigma-Delta A/D Converter Chip	768
Sigma-Delta D/A Converter Chip	770
Sigma-Delta A/D-D/A Converter Chip	771
Noise Shaping of Nonoversampling Quantization Error	772
Psychoacoustically optimized noise shaping	774
Buried data technique	779
Appendix. The Sampling Theorem	783

Bibliography	789
Index	817
