## 1 NEW WINDOWS ON THE EARTH'S DEEP INTERIOR

Ho-kwang Mao, R. J. Hemley

INTRODUCTION.....	1
The reconnaissance period.....	2
Period of exploration.....	3
New opportunities and beyond.....	3
PRESSURE AND TEMPERATURE.....	4
High-pressure techniques.....	4
High pressure.....	12
Variable temperature.....	15
HIGH-PRESSURE MINERAL PHYSICS AND CHEMISTRY.....	18
Quenching high <i>P-T</i> samples.....	18
In situ probes at high pressure and variable temperature.....	18
New opportunities with synchrotron radiation.....	21
CONCLUDING PROLEGOMENON.....	25
ACKNOWLEDGMENTS.....	26
REFERENCES.....	28

## 2 HIGH-PRESSURE MINERALS FROM DEEPLY SUBDUCTED METAMORPHIC ROCKS

J. G. Liou, R. Y. Zhang, W. G. Ernst, D. Rumble III, S. Maruyama

INTRODUCTION.....	33
DEFINITION AND P-T REGIMES FOR VHP METAMORPHISM.....	34
GLOBAL DISTRIBUTION OF VHP METAMORPHIC TERRANES.....	36
The Dora Maira Massif, Western Alps, 35 Ma.....	41
The Kokchetav Massif, Northern Kazakhstan, 540-530 Ma.....	41
The Sulu-Dabie Terrane, East-Central China, 210-240 Ma.....	42
The Western Gneiss Region, Norway, 408-425 Ma.....	42
DESCRIPTION OF VHP ROCKS.....	44
Eclogites from East-Central China.....	44
Garnet peridotites.....	44
Metasediments.....	47
GEOCHEMICAL CHARACTERISTICS—EXAMPLES FROM CHINA.....	47
Diamond.....	52
VHP HYDROUS SILICATES.....	55
Phengitic mica.....	55
Zoisite and epidote.....	57
Talc.....	59
Ti-Clinohumite.....	62
Nyböite and glaucophane.....	62
Discussion.....	63
CHIEFLY DABIE-SULU VHP CARBONATE PHASES.....	65
Magnesite.....	65
Dolomite.....	67
Calcite pseudomorphs after aragonite.....	69
Phase relations.....	69
EXSOLUTION LAMELLAE IN DABIE-SULU AND OTHER ROCKS.....	70
Ilmenite rods in olivine.....	70
Magnetite lamellae in olivine and clinohumite.....	73
Ilmenite rods in clinopyroxene.....	75
K-feldspar lamellae in clinopyroxene.....	75
Silica rods in omphacite and clinopyroxene.....	78
Monazite lamellae in apatite.....	79
OTHER UNUSUAL MINERALS.....	79
CONCLUSIONS.....	83
ACKNOWLEDGMENTS.....	85
REFERENCES.....	85

### 3 THE UPPER MANTLE NEAR CONVERGENT PLATE BOUNDARIES

B. O. Mysen, P. Ulmer, J. Konzett, M. W. Schmidt

INTRODUCTION.....	97
SEISMIC DEFINITION OF SUBDUCTION.....	99
NATURAL EXAMPLES OF THE UPPER MANTLE	
NEAR CONVERGENT PLATE BOUNDARIES.....	99
Accretionary subduction complexes.....	102
High and very high pressure terranes.....	102
Peridotite massifs.....	103
Upper mantle xenoliths.....	104
Natural evidence for the role of H <sub>2</sub> O in subduction zones.....	104
Metasomatically altered xenoliths.....	105
H <sub>2</sub> O content of arc magmas and melt inclusions in arc-derived minerals.....	106
Water contents inferred from experimental phase equilibria.....	106
Oxygen fugacity in the mantle near convergent plate boundaries.....	107
PHASE RELATIONS AMONG METASEDIMENTS, GABBRO,	
AND ULTRAMAFIC COMPOSITIONS NEAR SUBDUCTION ZONES.....	108
Phase relations in metabasalt, basalt and metasediments.....	109
Phase relations in ultramafic compositions.....	110
Phase relations in mantle compositions with additional components.....	116
H <sub>2</sub> O in nominally anhydrous minerals.....	120
WATER IN PERIDOTITE.....	120
DENSE HYDROUS MAGNESIUM SILICATES (DHMS).....	122
EXPERIMENTAL STUDIES OF METASOMATIC ALTERATION	
OF THE MANTLE WEDGE.....	123
Materials transport—silicate solubility in aqueous solutions.....	123
Silica enrichment and mineralogical alteration during flushing of the mantle	
above subducting slabs.....	124
Phase relations among K-rich, hydrous phases	
—results of metasomatism of peridotite?.....	125
Phase relations in K <sub>2</sub> O-Na <sub>2</sub> O-CaO-MgO-Al <sub>2</sub> O <sub>3</sub> -SiO <sub>2</sub> -H <sub>2</sub> O (KNCMASH).....	127
Phase relations in the natural lherzolite system.....	129
Hydrous potassic phase stability in subduction zone settings.....	131
CONCLUDING REMARKS.....	131
REFERENCES.....	132

### 4 MINERALOGY AND COMPOSITION OF THE UPPER MANTLE

W. F. McDonough, R. L. Rudnick

INTRODUCTION.....	139
ROCKS OF THE UPPER MANTLE.....	139
Peridotites.....	140
Mafic rocks.....	151
Inclusions in diamonds.....	152
THE SAMPLES.....	153
Orogenic massifs.....	153
Mantle xenoliths.....	154
Oceanic peridotites.....	157
A MODEL COMPOSITION FOR THE UPPER MANTLE.....	158
ACKNOWLEDGMENTS.....	159
REFERENCES.....	159

### 5 PHASE TRANSFORMATIONS AND SEISMIC STRUCTURE IN THE UPPER MANTLE AND TRANSITION ZONE

C. B. Agee

INTRODUCTION.....	165
OLIVINE AND THE Mg <sub>2</sub> SiO <sub>4</sub> -Fe <sub>2</sub> SiO <sub>4</sub> .....	166

HIGH-PRESSURE PHASE TRANSITIONS.....	166
High pressure polymorphism in $Mg_2SiO_4$ .....	167
Phase equilibria of the system $Mg_2SiO_4$ - $Fe_2SiO_4$ .....	169
$Fe_2SiO_4$ -rich compositions.....	171
$Fo_{90}$ .....	172
Physical properties in the system $Mg_2SiO_4$ - $Fe_2SiO_4$ .....	177
THE "410" KILOMETER DISCONTINUITY.....	183
The size of the velocity jump at 410.....	183
The thickness of the 410.....	185
Absolute velocities near the 410.....	187
Peridotite (pyrolite) at the 410?.....	188
Eclogite at 410?.....	191
Compositional layering at 410?.....	192
THE "520" KILOMETER DISCONTINUITY AND THE MID-TRANSITION ZONE.....	193
Which phase transformation could cause 520?.....	194
Is an intermittent 520 symptomatic of variable "olivine" content?.....	196
The $dV_{s,p}/dZ$ in the mid-transition zone.....	198
THE "660" KILOMETER DISCONTINUITY.....	199
Subducted slabs at 660.....	199
REFERENCES.....	200

## 6 LOWER MANTLE MINERALOGY AND THE GEOPHYSICAL PERSPECTIVE

C. R. Bina

INTRODUCTION.....	205
RADIAL DENSITY AND VELOCITY PROFILES.....	206
Geophysical background.....	206
Mineralogical interpretation.....	209
LATERAL SEISMIC VELOCITY HETEROGENEITY.....	215
Geophysical background.....	215
Mineralogical interpretation.....	218
SEISMIC VELOCITY ANISOTROPY.....	220
Geophysical background.....	220
Mineralogical interpretation.....	222
ANELASTIC ATTENUATION AND VISCOSITY.....	223
Geophysical background.....	223
Mineralogical interpretation.....	226
ELECTRICAL CONDUCTIVITY.....	227
Geophysical background.....	227
Mineralogical interpretation.....	228
CONCLUDING REMARKS.....	229
ACKNOWLEDGMENTS.....	232
REFERENCES.....	232

## 7 THE CORE-MANTLE BOUNDARY REGION

R. Jeanloz, Q. Williams

INTRODUCTION.....	241
MINERALOGY OF THE CORE-MANTLE BOUNDARY REGION.....	243
Lower-mantle mineralogy and temperature.....	243
Outer-core fluid and temperature at the core-mantle boundary.....	246
Chemical reactions at the core-mantle boundary.....	247
DETAILED OBSERVATIONS OF THE CORE-MANTLE BOUNDARY REGION.....	248
Velocity gradients and the D" region.....	248
Seismic tomography.....	249
Seismic waveform modeling.....	249
Seismic constraints on ultra-low velocity zones.....	250
Seismic anisotropy: A signature of deep mantle flow?.....	252

IGNEOUS AND METAMORPHIC PROCESSES OF THE CORE-MANTLE BOUNDARY.....	253
ACKNOWLEDGMENTS.....	255
REFERENCES.....	256

## 8 THE EARTH'S CORE

L. Stixrude, J. M. Brown

INTRODUCTION.....	261
GEOPHYSICAL BACKGROUND.....	262
Structure.....	262
Energetics.....	265
METHODS.....	267
Experimental.....	267
Theoretical.....	269
SOME ISSUES OF CURRENT INTEREST.....	270
Composition and temperature.....	270
Crystalline structure of the inner core.....	273
Origin of inner core anisotropy.....	276
CONCLUSIONS AND OUTLOOK.....	279
REFERENCES.....	280

## 9 HIGH-PRESSURE CRYSTAL CHEMISTRY

C. T. Prewitt, R. T. Downs

INTRODUCTION 283	
HIGH-PRESSURE EFFECTS ON BONDING AND.....	284
COORDINATION NUMBER.....	284
Rules of thumb.....	284
COMPARATIVE COMPRESSIBILITIES.....	286
MECHANISMS OF PHASE TRANSITIONS.....	287
ANALYTICAL TECHNIQUES.....	288
Powder x-ray diffraction.....	289
Synchrotron radiation sources.....	290
Neutron powder diffraction.....	290
HIGH-PRESSURE PHASES.....	291
Iron.....	291
Magnesiowüstite.....	292
Perovskite, ilmenite.....	293
Stishovite, coesite, quartz.....	294
FeS.....	297
Garnet.....	297
Spinel.....	298
Wadsleyite.....	300
Dense hydrous magnesium silicates.....	301
Pyroxenes.....	303
Olivine.....	304
Feldspars.....	305
Hollandite.....	306
REFERENCES.....	307
APPENDIX.....	313
APPENDIX REFERENCES.....	317

## 10 THERMODYNAMICS OF HIGH PRESSURE PHASES

Alexandra Navrotsky

INTRODUCTION.....	319
FUNDAMENTAL RELATIONS.....	320
THERMODYNAMIC DATA FROM HIGH PRESSURE PHASE EQUILIBRIA.....	321
THERMOCHEMICAL STUDIES OF HIGH PRESSURE PHASES.....	324

ILLUSTRATIVE CASE STUDIES .....	328
Quartz-coesite-stishovite .....	328
Phase transitions in titanates .....	330
Dense hydrous magnesium silicates .....	333
DIRECTIONS FOR FUTURE WORK .....	335
CONCLUSIONS .....	336
ACKNOWLEDGMENTS .....	336
REFERENCES .....	336

## 11 SOLID SOLUTIONS AND ELEMENT PARTITIONING AT HIGH PRESSURES AND TEMPERATURES

Yingwei Fei

INTRODUCTION .....	343
SOLID SOLUTION MODELS .....	344
EXPERIMENTAL TECHNIQUES .....	345
Mg-Fe <sup>2+</sup> PARTITIONING DATA .....	347
Magnesiowüstite-olivine (-wadsleyite, and -spinel) .....	348
Magnesiowüstite-perovskite .....	350
Ilmenite-perovskite (-majorite, -spinel, and -wadsleyite) .....	352
Majorite-perovskite (-spinel, and -wadsleyite) .....	353
Olivine-wadsleyite, wadsleyite-spinel, and olivine-spinel .....	354
Olivine-garnet (-pyroxene, and -aluminat spinel), and garnet-pyroxene .....	355
MgSi-AlAl AND Al-Fe <sup>3+</sup> SUBSTITUTIONS .....	356
MINOR AND TRACE ELEMENT PARTITIONING .....	358
THERMODYNAMICS OF ION-EXCHANGE REACTIONS .....	359
SUMMARY .....	361
ACKNOWLEDGMENTS .....	362
REFERENCES .....	362

## 12 HIGH-PRESSURE MELTING OF DEEP MANTLE AND CORE MATERIALS

Guoyin Shen, D. L. Heinz

INTRODUCTION .....	369
THEORY .....	369
Characteristics of melting .....	369
Thermodynamics of melting .....	370
Melting equations .....	370
Molecular dynamics simulations .....	372
EXPERIMENTAL TECHNIQUES .....	372
Shock-wave experiments .....	373
Laser-heated diamond cell .....	373
MELTING OF DEEP MANTLE MINERALS .....	376
(Mg,Fe)SiO <sub>3</sub> perovskite .....	376
CaSiO <sub>3</sub> perovskite .....	379
MgO .....	380
SiO <sub>2</sub> , Al <sub>2</sub> O <sub>3</sub> .....	380
MELTING OF CORE MATERIALS .....	382
Iron .....	382
FeO .....	388
FeS .....	389
Melting of iron alloy .....	390
CONCLUDING REMARKS .....	391
ACKNOWLEDGMENTS .....	392
REFERENCES .....	392

### **13 MELT VISCOSITY AND DIFFUSION UNDER ELEVATED PRESSURES**

**D. B. Dingwell**

INTRODUCTION.....	397
GENERAL CONSIDERATIONS .....	398
Newtonian considerations.....	398
Non-Arrhenian considerations.....	399
Geometrical considerations.....	401
Compositional considerations.....	402
VISCOMETRY AT HIGH PRESSURE.....	403
Falling sphere viscometry.....	403
Recent developments in falling sphere methods.....	405
Dilatometric viscometry.....	409
Glass transition determinations .....	410
Diffusivity studies.....	417
REFERENCES.....	422

### **14 PRESSURE-VOLUME-TEMPERATURE EQUATIONS OF STATE**

**T. S. Duffy, Yanbin Wang**

INTRODUCTION.....	425
EQUATIONS OF STATE.....	426
Isothermal equation of state.....	427
Thermal equation of state .....	427
EXPERIMENTAL DETERMINATION OF EQUATIONS OF STATE.....	430
Shock compression.....	430
Multi-anvil press.....	435
Diamond anvil cell.....	441
ACCURACY OF P-V-T EQUATIONS OF STATE.....	445
Pressure calibration at room temperature .....	445
High temperature standards .....	447
Consistency of EOS determinations by different techniques.....	449
SUMMARY .....	452
ACKNOWLEDGMENTS .....	452
REFERENCES.....	452

### **15 ELASTICITY AT HIGH PRESSURES AND TEMPERATURES**

**R. C. Liebermann, Baosheng Li**

INTRODUCTION.....	459
BASIC ELASTICITY THEORY.....	459
STATE OF THE ART IN LABORATORY STUDIES.....	463
OF ELASTICITY OF MINERALS.....	463
Progress in high-temperature experiments at ambient pressure and high-pressure experiments at room temperature .....	463
Progress in experiments at simultaneous high pressures and temperatures.....	465
ULTRASONIC INTERFEROMETRY IN MULTI-ANVIL APPARATUS.....	466
Hot-pressing of polycrystalline aggregates: Experiments to 3 GPa.....	466
Ultrasonics in uniaxial split-cylinder apparatus at room temperature.....	472
Ultrasonics in USCA-1000 apparatus at simultaneous high P and T .....	480
Ultrasonics in multi-anvil apparatus at simultaneous high P and T in conjunction with synchrotron x-radiation.....	482
SUMMARY .....	487
ACKNOWLEDGMENTS .....	488
REFERENCES.....	488

## 16 RHEOLOGICAL STUDIES AT HIGH PRESSURE

D. J. Weidner

INTRODUCTION.....	493
PHYSICAL CONSTRAINTS.....	494
Stress.....	494
Strain.....	496
Material properties.....	497
RECOVERY EXPERIMENTS.....	499
IN SITU MEASUREMENTS WITH SYNCHROTRON X-RAYS.....	503
Micro-scale stress.....	506
Macro-scale stress.....	520
ACKNOWLEDGMENTS.....	522
REFERENCES.....	522

## 17 VIBRATIONAL PROPERTIES AT HIGH PRESSURES AND TEMPERATURES

P. Gillet, R. J. Hemley, P. F. McMillan

INTRODUCTION.....	525
BASIC CONSIDERATIONS.....	527
Mineral lattice vibrations.....	527
Overview of spectroscopic techniques.....	528
Effects of dispersion.....	533
IN SITU HIGH-PRESSURE MEASUREMENTS.....	534
Diamond cells.....	534
High-pressure Raman spectroscopy.....	536
High-pressure infrared spectroscopy.....	540
High-pressure acoustic spectroscopies.....	543
Other optical techniques.....	547
Dynamical properties from other methods.....	547
Characterization of stress states.....	549
High-temperature vibrational spectroscopy.....	550
PHASE TRANSFORMATIONS.....	550
SiO <sub>2</sub> system as an example.....	550
SiO <sub>2</sub> polymorphs.....	551
Amorphization.....	552
Future work.....	553
P-V-T DEPENDENCE OF VIBRATIONAL FREQUENCIES.....	554
Example of diamond.....	554
Example of NaCl and MgO.....	561
Example of magnesite.....	562
Other correlations between frequency shifts and structural changes.....	564
CALCULATING THERMODYNAMIC PROPERTIES.....	564
Vibrational density of states.....	564
Statistical thermodynamics.....	565
Application to forsterite.....	567
SELECTED HIGH P-T VIBRATIONAL SPECTRA.....	569
(Mg,Fe) <sub>2</sub> SiO <sub>4</sub> polymorphs.....	570
(Mg,Fe)SiO <sub>3</sub> polymorphs.....	572
SiO <sub>2</sub> .....	574
Simple oxides.....	574
Iron oxides.....	575
Hydrous phases.....	575
Nominally anhydrous mantle minerals.....	577
Dense hydrous magnesium silicates.....	578
Brucite.....	578
CONCLUSIONS AND OUTLOOK.....	578
ACKNOWLEDGMENTS.....	581
REFERENCES.....	581

## 18 HIGH-PRESSURE ELECTRONIC AND MAGNETIC PROPERTIES

R. J. Hemley, Ho-kwang Mao, R. E. Cohen

INTRODUCTION.....	591
OVERVIEW OF FUNDAMENTALS.....	592
Bonding in deep Earth materials.....	592
Evolution of bonding with pressure and temperature.....	593
Electronic structure.....	594
Magnetic properties.....	596
ELECTRONIC AND MAGNETIC EXCITATIONS.....	598
Dielectric function.....	598
Electronic excitations.....	599
Magnetic excitations.....	600
OVERVIEW OF EXPERIMENTAL TECHNIQUES.....	601
Optical spectroscopies.....	601
Optical light scattering.....	603
Non-linear optical methods.....	606
Mössbauer spectroscopy.....	606
Elastic x-ray and neutron scattering.....	608
High-pressure synchrotron x-ray spectroscopy.....	608
Transport measurements.....	613
Resonance methods.....	617
SELECTED EXAMPLES.....	619
Silicate perovskite.....	619
Fayalite.....	621
Wüstite.....	622
Fe <sub>2</sub> O <sub>3</sub> and Fe <sub>3</sub> O <sub>4</sub> .....	623
Iron sulfides.....	625
Dense hydrous phases.....	628
Trace elements: Xe.....	628
CONCLUSIONS AND OUTLOOK.....	629
ACKNOWLEDGMENTS.....	631
REFERENCES.....	631

## 19 THEORY OF MINERALS AT HIGH PRESSURE

L. Stixrude, R. E. Cohen, R. J. Hemley

INTRODUCTION.....	639
THEORY.....	640
First-principles level.....	642
Ab initio models.....	647
Semi-empirical atomistic models.....	649
DERIVATION OF OBSERVABLES.....	650
Total energy and band structure.....	650
Forces, stresses, and structures.....	650
Linear response.....	651
COMPUTATION.....	651
Methods.....	651
Convergence.....	653
SELECTED APPLICATIONS.....	654
Bonding and electronic structure.....	654
Equation of state.....	655
Structure and compression mechanisms.....	656
Phase stability.....	657
Elastic moduli.....	661
Magnetic collapse.....	663
Mott insulators.....	665
High-temperature and transport properties.....	666
CONCLUSIONS AND OUTLOOK.....	667
ACKNOWLEDGMENTS.....	667
REFERENCES.....	668
