CONTENTS

The Discrete-Ordinates Method for the Transport Equation 1

P.M.Anselone
Oregon State University, Corvallis, Oregon
A.G.Gibbs
Battelle Laboratory, Richland, Washington

The Numerical Solution of the Equations for Rotating Stars 28

J.F.G.Auchmuty
Indiana University, Bloomington, Indiana

Automatic Solution of Differential Equations 61

Y.F.Chang
Indiana University, Bloomington, Indiana

Integral Operators for Parabolic Equations and their Application . 95

David L.Colton
Indiana University, Bloomington, Indiana

Galerkin Methods for Modeling Gas Pipelines. 112

Todd Dupont
University of Chicago, Chicago, Illinois

The Application of Sparse Matrix Methods to the Numerical Solution of Nonlinear Elliptic Partial Differential Equations 131

S.C.Eisenstat
M.H.Schultz
A.H.Sherman
Yale University, New Haven, Connecticut

Collocation Sulutions of Integro-Differential Equations. 154

Ruben J.Espinosa
University of Pittsburgh, Pittsburgh, Pennsylvania

On Dirichlet's Problem for Quasilinear Elliptic Equations. 184

R.Pertsch Gilbert
Indiana University, Bloomington, Indiana
George C.Hsiao
University of Delaware, Newark, Delawere

The Numerical Solution of Some Elliptic Boundary Value Problems by Integral Operator Methods 237

R.Pertsch Gilbert
Indiana University, Bloomington, Indiana
Peter Linz
University of California, Davis, California

Iterative Schemes for Elliptic Systems 253

R.Pertsch Gilbert
Indiana University, Bloomington, Indiana
Richard J.Weinacht
University of Delaware, Newark, Delaware

Extrapolation in the Finite Element Method with Penalty 261

J.Thomas King
University of Cincinnati, Cincinnati, Ohio

Transonic Design in Two Dimensions. 271

D.G.Korn
New York University , New York, N. Y.

Approximate Regularized Solutions to Improperly Posed Linear Integral and Operator Equations 289

Z.Nashed
Georgia Institute of Technology, Atlanta, Georgia

A Majorization Technique for Hyperbolic Equations 333

Edward Newberger
SUNY College, Buffalo, New York

Boundary Layer Methods for Ordinary Differential Equations with Small Coefficients Multiplying the Highest Derivatives. 363

R.E.O'Malley, Jr.
University of Arizona, Tucson, Arizona

Fixed Point Iterations Using Infinite Matrices, II. 390

B.E.Rhoades
Indiana University, Bloomington, Indiana

The Line Method for Parabolic Differential Equations, Problems in Boundary Layer Theory and Existence of Periodic Solutions 395

Wolfgang Walter
Universität Karlsruhe, FRG

An Integral Equation Method for Generalized Analytic Functions. .414

Wolfgang Wendland
Technische Hochschule Darmstadt, FRG

Solving Partial Differential Equations Using ILLIAC IV. 453

Robert Wilhelmson
University of Illinois, Urbana, Illinois
