## **Chapter 1 A Panoramic View of Geometry**

Introduction	2
Geometry in the physical world	3
Geometry as a mathematical system	10
Geometry as a formal axiomatic structure	12
Aesthetic and recreational aspects of geometry	14
Summary	22

---

## **Chapter 2 Points, Lines, and Polygons**

Introduction	26
Points	27
Lines	28
Other basic geometric ideas	29
Polygons	36

Symmetry of polygons	39
Regular polygons	48
Constructions of regular polygons	51
Star polygons	58
Discovering theorems on polygons	63

### Chapter 3 Patterns of Polygons in the Plane

---

Introduction	75
Tessellations of polygons	78
Tessellations with regular polygons	91
*Analysis of semiregular tessellations	97
Three-mirror kaleidoscope	102
Tessellations of curved patterns	104

### Chapter 4 Polyhedra and Tessellations of Space

---

Introduction	110
Regular polyhedra	113
Symmetry in space	127
*Semiregular polyhedra	135
*Tessellations of space	143

### Chapter 5 Motions in the Physical World

---

Introduction	156
Slides	157
Turns	164
Flips	175
Combining slides, turns, and flips	184
Motions as a combination of flips	193

\* An asterisk beside a section title indicates that the section is less basic to an understanding of the material that follows, or is more difficult than usual and may be omitted in a minimal course.

**Chapter 6**  
**Translations, Rotations,**  
**Reflections, and Congruence**

---

Introduction	200
From slides to translations	201
From turns to rotations	203
From flips to reflections	206
Isometries	210
Congruence of plane figures	213
*Congruence of space figures	219
*Symmetry of polyhedra	222
*Symmetry patterns in the plane	224

**Chapter 7**  
**Magnification and**  
**Similarity**

---

Introduction	234
Magnification	237
Properties of magnifications	241
Similarity	244
Similarity of polygons	248

**Chapter 8**  
**Topology**

---

Introduction	259
Topological equivalence	262
Networks	270
Jordan Curve Theorem	275
Contiguous regions	278
Four-color problem	280

**Chapter 9**  
**Number Patterns**  
**in Geometry**

---

Introduction	286
Patterns of points	286

Patterns of lines	298
Pattern and proof	306
Pascal's Triangle and related patterns	309

## **Chapter 10**

### **Measuring with Metric Units**

---

Introduction	316
The measurement process	317
The need for standard units in measuring	321
The metric system of measurement units	323
Measuring length	328
Measuring area	336
Measuring volume and capacity	342
*Measuring mass and weight	347
Relationships among measurements	350

## **Chapter 11**

### **Measurement**

---

Introduction	360
Length	360
Area	368
Volume	378
<b>Appendix A. Compass and Mira constructions</b>	<b>385</b>
<b>Appendix B. Postulates and theorems</b>	<b>405</b>
<b>Hints and answers to selected exercises</b>	<b>413</b>
<b>Bibliography</b>	<b>429</b>
<b>Picture credits</b>	<b>439</b>
<b>Index</b>	<b>441</b>
