| Preface | 9 |
| 1. Introduction | 11 |
| 2. The Alternative-course System and its Status in Swedish Schools ... | 21 |
| Compulsory Education in Sweden | 21 |
| The Character of the Alternative-course System | 28 |
| Consequences of the Alternative-course System | 30 |
| Historical retrospect | 30 |
| The use of resources | 33 |
| The free choice and the group homogeneity | 35 |
| Differentiation by method and content | 42 |
| Choice as a function of socio-economic background and sex | 49 |
| The qualifying value of the marks | 55 |
| Expectancy effects | 56 |
| 3. Engsam: An Attempt to Replace the Alternative Courses by Flexible Grouping | 63 |
| The Background of the Engsam Experiment | 64 |
| The Organizational Framework of the Engsam System | 68 |
| Working units and instruction groups | 69 |
| Resource Allocation and Other Preconditions | 75 |
| The team of teachers | 75 |
| The school environment | 77 |
| 4. The Methods of Working in the Engsam Experiment | 80 |
| What did the Teamwork Involve? | 80 |
| Working in Method Groups | 82 |
| The general and special courses in the curriculum | 85 |
| Summary | 87 |
| Pupil Participation and Independent Work | 88 |
| The topic of "Environmental Pollution" in the pupil-directed group | 88 |
| Independent work in other forms | 92 |
| The Period of the "Australia" Topic | 93 |
| The preparatory work | 94 |
| Execution | 95 |
| Example: The field of interest entitled "Sport" | 96 |
| Comments | 98 |

| | |
|--|-----|
| 5. The Expected Consequences of the Engsam Experiment | 101 |
| The Teachers' Premisses | 101 |
| The aims formulated in the experimental plan | 104 |
| Differences between the Systems | 106 |
| Two Kinds of Effects | 109 |
| The effects of the team-work on the pupils | 110 |
| Effects of the forms of differentiation | 113 |
| Cognitive Development | 114 |
| Method of working and size of group | 114 |
| Group changes and learning climate | 116 |
| The "costs" of experimental work and training | 118 |
| Social Development and Character Training | 119 |
| The pupils' ability to work in groups | 119 |
| Ability to follow instruction and to plan and carry out tasks independently | 121 |
| The ability to assess oneself and one's own study situation | 122 |
| Attitudes to differences in achievement | 125 |
| 6. The Instruction Groups and their Compositions in Grades 7 and 8 . | 133 |
| Problems | 133 |
| Instruments and Data | 134 |
| Information about the instruction | 134 |
| Information about the pupils | 135 |
| Types of Grouping Arrangements | 138 |
| The Composition of Groups in the Free Groupings | 140 |
| Some technical problems of reporting | 140 |
| Selection points and group sizes in the method groups | 144 |
| Other grouping arrangements based on pupil choice | 148 |
| The Method Grouping as an Instrument for Differentiation | 149 |
| A two-dimensional differentiating model | 149 |
| Differentiation and homogeneity in the method grouping | 152 |
| The variations within the rapid and slow method groups | 159 |
| Desirable versus Actual Distribution into Method Groups | 160 |
| The teachers' opinion as a criterion of an ideal distribution | 161 |
| The characteristics of pupils who belonged to one or more categories | 163 |
| The significance of sex and social class | 167 |
| Differences between social groups | 168 |
| Sex as a governing factor | 172 |
| Summary | 174 |
| 7. The Effects of the Growth of Achievement in Grades 7 and 8 | 180 |
| Changes in Achievement within the Engsam Group | 181 |
| Method of determining relative change | 181 |
| Method-group affiliation and relative change | 182 |

| | |
|--|-----|
| Relative change, motivation and compensatory measures | 186 |
| The effects of the supplementary course | 191 |
| Comparison with the Alternative-course System | 192 |
| The conditions for comparing the systems | 192 |
| Criteria for choice of control group | 195 |
| Characteristics of the groups compared at the start of the experiment | 197 |
| The growth of achievement according to the results of the standard test in grade 8 | 200 |
| Summary | 202 |
| 8. At the End of the Senior Level | 204 |
| Changes in the Composition of the Pupil Group | 206 |
| The Free Groupings in Grade 9 | 207 |
| The method groups | 208 |
| The topic grouping | 218 |
| Effects on the Growth of Achievement | 223 |
| Comparisons with the Alternative-course System | 228 |
| Summary | 233 |
| 9. Preconditions and Consequences of Teamwork | 236 |
| For and against Teamwork | 240 |
| 10. Epilogue | 249 |
| Starting-points for the Investigation | 249 |
| The Generalizability of the Results | 256 |
| Our Involvement in the Engsam Experiment | 262 |
| Developing and Changing | 266 |
| Bibliography | 269 |
| Appendix | 274 |
