

Contents

Preface	vii
Part I Introduction	
1. The Evaluation of Instruction: Cause-and-Effect Relations in Naturalistic Data M. C. WITTROCK	3
Part II Theory of Evaluation of Instruction	
2. Toward a Theory of Testing Which Includes Measure- ment-Evaluation-Assessment BENJAMIN BLOOM	25
<i>Comments on Professor Bloom's Paper</i>	
Michael Scriven	50
Gene V Glass	56
J. P. Guilford	62
<i>Open Discussion</i>	66
3. Evaluation of Instruction and Changing Educational Models ROBERT GLASER	70
<i>Comments on Professor Glaser's Paper</i>	
Robert Stake	86
Arthur Lumsdaine	91
<i>Open Discussion</i>	95
Part III Instructional Variables	
4. Instructional Variables and Learning Outcomes ROBERT GAGNÉ	105
<i>Comments on Professor Gagné's Paper</i>	
Richard Anderson	126
Leo Postman	133
John Bormuth	139
<i>Open Discussion</i>	143

Part IV **Contextual Variables**

5. The Cracked Cake of Educational Customs and Emerging Issues in Evaluation 149
 DAN LORTIE
Comments on Professor Lortie's Paper
 C. Wayne Gordon 165
 N. L. Gage 167
Open Discussion 172

Part V **Criterion Variables**

6. The Criterion Problem in the Evaluation of Instruction: Assessing Possible, Not Just Probable, Intended Outcomes 183
 SAMUEL MESSICK
Comments on Dr. Messick's Paper
 Paul Blommers 202
 Leonard Cahen 204
Open Discussion 210
7. Evaluating Net Cost-Effectiveness of Instructional Programs 221
 MARVIN ALKIN
Comments on Professor Alkin's Paper
 Marvin Hoffenberg 238
 John Bormuth 243
Open Discussion 246

Part VI **Methodological Issues**

8. Design and Analysis of Evaluation Studies 259
 DAVID E. WILEY
Comments on Professor Wiley's Paper
 Chester Harris 269
 Theodore Husek 271
Open Discussion 273
9. Methodological Problems in the Evaluation of Innovation 289
 MARTIN TROW
Comments on Professor Trow's Paper
 Eugene Litwak 305
 David Nasatir 317
Open Discussion 321

Open Discussion of the Symposium 332

APPENDIX

- Causal inference from observational data: A review of ends and means 351
 HERMAN O. A. WOLD

The approach of model building HERMAN O. A. WOLD	391
Path analysis: Sociological examples OTIS D. DUNCAN	439
Techniques for estimating the source and direction of causal influence in panel data A. H. YEE and N. L. GAGE	462
Index	487
