

Table of contents

Foreword	3
Executive summary	13
1. Citizens' views on lifelong learning in the new Member States: aim of the opinion poll and general findings.....	17
1.1. Lifelong learning in European policies	17
1.2. Overall purpose of the 2005 Eurobarometer and structure of the report.....	18
1.3. Methodological issues and caveats.....	19
1.4. Creating a world of lifelong learning – the general opinion of citizens	21
1.4.1. What do citizens think about lifelong learning?	21
1.4.2. Do citizens think lifelong learning is for everyone?	23
1.4.3. Further/other general opinions on lifelong learning.....	24
2. Skills for a knowledge-based Europe	26
2.1. Which skills are seen as very useful?	26
2.1.1. Most skills are seen to be very useful in private and public life – but there are some notable exceptions	27
2.1.2. The majority considers social skills very useful – the exception is the ability to manage people.....	29
2.1.3. Half the citizens in the 10 new Member States consider ICT skills very useful – but there are considerable country differences	30
2.1.4. The majority thinks intercultural skills are very useful, but this does not hold for foreign languages	31
2.1.5. Only four in 10 citizens in the 10 new Member States consider scientific/technological skills very useful	32
2.2. Do people think they have the necessary knowledge and skills?	33
2.2.1. Almost half the citizens in the new Member States admit a deficit in ICT skills.....	34
2.2.2. Most important skill gap is associated with use of foreign languages.....	35
2.2.3. Scientific/technological skills gap comparable to ICT skills gap	36
2.3. How do citizens' views differ?.....	37
2.3.1. Some views differ between women and men in the normal status group	38
2.3.2. Impressive age differences for five skills.....	40
3. Lifelong learning and diverse learning contexts	41

3.1.	In which context do people prefer to learn?	41
3.1.1.	The majority of new Member States' citizens think they learn best in an informal context	41
3.2.	Who learns in which contexts?.....	43
3.2.1.	Most people in the new Member States think they have learned in various contexts, but views differ per country, age and education	43
3.2.2.	More men than women have learned something at the workplace	45
3.3.	Where do people like to pursue work-related learning?	46
3.3.1.	New Member States' citizens tend to prefer taking courses and receiving professional guidance and support for learning.....	46
3.3.2.	Taking courses is not equally popular in all new Member States	47
3.3.3.	Work-related learning environment preferences differ greatly between countries.....	48
3.3.4.	Only a minority consider mobility as a learning instrument	49
3.3.5.	Citizens in the new Member States agree more on situations in private life in which they learn something new than on situations in public life	50
3.4.	What kind of new learning opportunities have appeared in the past five years?.....	51
3.4.1.	ICT-related learning technologies: the most important learning opportunity	51
3.5.	How do citizens' views differ?.....	52
3.5.1.	Selecting learning contexts varies according to the social status of citizens	52
3.5.2.	Can gender be considered a discriminatory factor for learning contexts?.....	53
4.	Participation and motivation: patterns, obstacles and incentives	55
4.1.	Previous education and training experiences, motivation and benefits.....	55
4.1.1.	About 57 % of citizens in the new Member States did not participate in education and training	55
4.1.2.	Motivation to take part in education and training tends to be of a mixed nature.....	56
4.1.3.	Reasons to participate in education and training are extrinsic for a majority of citizens.....	57
4.1.4.	Personal benefits outweigh work-related benefits	59
4.1.5.	Initial motives for training are to some extent also seen as benefits.....	60
4.1.6.	Those whose participation in education or training was initiated, tend to recognise work-related benefits afterwards.....	61

4.2.	Future plans for learning: obstacles and incentives.....	62
4.2.1.	Motives to take part in future education and training are diverse, but personal motives slightly dominate.....	62
4.2.2.	Age is the most important barrier to take up future education.....	64
4.2.3.	Flexible working hours seen as most effective incentives	65
4.3.	Non-participants	66
4.3.1.	The typical non-participant is more likely not to be particularly interested in education and training	67
4.4.	How do citizens' views differ?.....	69
4.4.1.	Motivations, reasons and decisions to participate in learning vary among socioeconomic status groups	69
5.	Other spotlights.....	72
5.1.	Citizens and financing lifelong learning.....	72
5.2.	Citizens and guidance and counselling.....	74
5.3.	Citizens and vertical mobility.....	75
6.	Citizens' views on lifelong learning: outlook for the EU-25.....	77
Annex 1.	Methodological and technical information.....	81
Annex 2.	Additional tables.....	83
Annex 3.	The questionnaire	101
Annex 4.	Bibliography	112

List of tables and figures

Tables

Table 1:	Citizens considering intercultural skills very useful in public life and in private life, by country.....	83
Table 2:	Citizens considering ICT skills very useful in public life and in private life, by age and level of education	83
Table 3:	Citizens considering intercultural skills very useful in their lives as a whole, by age and level of education.....	83
Table 4:	Citizens considering scientific/technological skills very useful in their lives as a whole, by age and level of education	83
Table 5:	Citizens considering social skills very useful, by country.....	84
Table 6:	Self-reports on possession of general knowledge and the capacity to prove it, by country.....	84
Table 7:	Self-reports on possession of social skills and the capacity to prove it, by country.....	85
Table 8:	Self-reports on possession or lack of ICT skills, by country.....	85
Table 9:	Self-reports on possession of ICT skills, by age and level of education	85
Table 10:	Self-reports on the ability to use foreign languages and the capacity to prove it, by country.....	85
Table 11:	Self-reports on the ability to get on with people from other cultures/countries and the capacity to prove it, by country	86
Table 12:	Citizens considering intercultural skills very useful in their lives as a whole, but reporting they do not have these skills, by age and level of education	86
Table 13:	Citizens considering intercultural skills very useful in public life, but reporting they do not have these skills, by age and level of education.....	86
Table 14:	Self-reports on possession of intercultural skills, by age and level of education	87
Table 15:	Citizens considering scientific/technological skills very useful in public life, but reporting they do not have these skills, by age and level of education	87
Table 16:	Citizens considering traditional skills and social skills very useful, by gender and socioeconomic status	87
Table 17:	Self-reports on possession of traditional skills and social skills, by gender and socioeconomic status	88
Table 18:	Citizens considering intercultural skills very useful, by gender and socioeconomic status.....	88

Table 19:	Citizens seeking guidance and support of a teacher or trainer to update their professional skills, by country.....	88
Table 20:	Citizens seeking guidance and support of a teacher or trainer to update their professional skills, by age and level of education.....	89
Table 21:	Citizens preferring taking courses of any kind to update their professional skills, by age and level of education.....	89
Table 22:	Citizens preferring different kinds of courses to update their professional skills, by age and level of education.....	89
Table 23:	Citizens preferring different environments for updating their professional skills, by occupation.....	89
Table 24:	Citizens preferring learning at the workplace for updating their professional skills, by country.....	89
Table 25:	Citizens preferring different environments for updating their professional skills, by age and level of education.....	90
Table 26:	Citizens having learned something in different contexts in the preceding year; by country.....	90
Table 27:	Citizens having learned something on a company training placement or as part of an exchange programme in the preceding year, by country.....	90
Table 28:	Citizens having learned something on a company training placement or as part of an exchange programme in the preceding year, by age and level of education.....	90
Table 29:	Looking for information on something that attracts one's interest as the best opportunity to learn new things, by age, level of education and life sphere.....	90
Table 30:	The single most important learning opportunity in the past five years; citizens' views, by country.....	91
Table 31:	The single most important learning opportunity in the past five years: citizens' views, by age and level of education.....	91
Table 32:	Preferred ways to update professional skills: citizens' views, by gender and socioeconomic status.....	92
Table 33:	Citizens having learned something while working and at home, in the preceding year, by different classifications.....	93
Table 34:	Situations offering the best opportunity to learn new things: citizens' views by life sphere and by gender and socioeconomic status.....	94
Table 35:	Main cited motivation for undertaking education or training in the preceding year, by country.....	94
Table 36:	Extrinsic source of decision to take part in education or training in the preceding year, by country.....	95
Table 37:	Intrinsic source of decision to take part in education or training in the preceding year, by country.....	95

Table 38: Main benefits gained from past education or training experience, by country.....	95
Table 39: Main motivation for future education or training, by country.....	96
Table 40: Main obstacles for future education or training, by country.....	96
Table 41: Main incentives for future education or training, by country.....	96
Table 42: Main type of source of advice or request, by socioeconomic group.....	96
Table 43: Citizens agreeing with a list of statements about lifelong learning, by country.....	97
Table 44: Citizens agreeing with ‘lifelong learning is mainly for people who did not do well at school’, by country.....	97
Table 45: Citizens ready to pay towards the cost of their learning, by country and learning purpose.....	97
Table 46: Citizens not willing to pay towards the cost of their learning, by selected age group and learning purpose.....	98
Table 47: Citizens not willing to pay towards the cost of their learning, by gender, socioeconomic status and learning purpose.....	98
Table 48: Citizens’ views on the most useful sources of information to improve learning and career prospects, by country.....	99
Table 49: Changes which happened in the life of citizens within the past two years, by gender, age and occupation.....	100

Figures

Figure 1: Lifelong learning is not important: new Member States citizens who agree and disagree, by country.....	21
Figure 2: New Member States citizens who disagree that lifelong learning is only for the young or mainly for the middle-aged, by country.....	23
Figure 3: Very useful knowledge and skills: new Member States citizens’ views by life sphere.....	27
Figure 4: New Member States citizens considering the following range of different skills very useful in public life, but less so in private life.....	29
Figure 5: New Member States citizens considering ICT skills very useful in their lives as a whole, by country.....	30
Figure 6: New Member States citizens considering ICT skills very useful in their lives as a whole, by age.....	30
Figure 7: New Member States citizens considering intercultural skills very useful in their lives as a whole, by country.....	31
Figure 8: New Member States citizens considering scientific/technological skills very useful in their lives as a whole, by country.....	32
Figure 9: Comparison between possessing knowledge and skills and whether they are very useful for public life in new Member States.....	33

Figure 10: New Member States citizens who think they cannot use computers, by country.....	34
Figure 11: New Member States citizens who think they cannot use foreign languages, by country.....	35
Figure 12: New Member States citizens who think they cannot use scientific/technological equipment, by country.....	37
Figure 13: New Member States citizens considering ICT skills very useful in their lives as a whole, by gender and socioeconomic status.....	39
Figure 14: New Member States citizens considering foreign language skills very useful in public life, by gender and status.....	39
Figure 15: New Member States citizens considering ICT, technological, foreign language and learning skills very useful, by contrasting age groups and life sphere.....	40
Figure 16: The context in which new Member States citizens think they have learned something in the preceding year ().....	42
Figure 17: New Member States citizens having learned something in the preceding year, by learning context and country.....	44
Figure 18: New Member States citizens having learned something in the preceding year, by learning context and level of education.....	44
Figure 19: New Member States citizens having learned something in the preceding year, by learning context and age.....	45
Figure 20: The contexts in which new Member States citizens think they have learned something in the preceding year, by gender.....	45
Figure 21: New Member States citizens who prefer courses for updating professional skills, by country.....	47
Figure 22: New Member States citizens who prefer working or non-working environments for updating professional skills, by country.....	48
Figure 23: New Member States citizens having learned at the workplace in the preceding year and new Member States citizens preferring workplace learning, by country.....	49
Figure 24: Situations offering the best opportunity to learn new things: new Member States citizens' views, by life sphere.....	50
Figure 25: Distribution of self-perceived single most important opportunity that came about in the past five years, new Member States citizens' views.....	51
Figure 26: New Member States citizens selecting ICT tools and methods as the most important new learning opportunity, by country ().....	52
Figure 27: New Member States citizens' views on how they have learned something in the preceding year, by gender and socioeconomic status.....	54
Figure 28: New Member States citizens' participation in education or training in the preceding year, by country.....	56

Figure 29: New Member States citizens' participation in education or training in the preceding year, by country.....	58
Figure 30: Citizens' participation in education or training in the preceding year, by country and source of decision.....	58
Figure 31: Non-participation rate in the preceding year, by country.....	67
Figure 32: Non-participation in education or training in the preceding year, by country and by reason.....	67
Figure 33: Motivated and unmotivated non-participants, by gender, age and level of education.....	68
Figure 34: Motivated and unmotivated non-participants, by occupation.....	69
Figure 35: New Member States citizens' main learning motivations, by gender and socioeconomic status.....	69
Figure 36: New Member States citizens' main learning motivations, by gender and socioeconomic status.....	70
Figure 37: New Member States citizens' main learning obstacles, by gender and socioeconomic status.....	71
Figure 38: New Member States citizens' willingness to pay for education or training, by purpose.....	72
Figure 39: Willingness to pay with respect to specific aims.....	73
Figure 40: New Member States citizens' views on the most useful sources of information to improve learning and career prospects.....	74
Figure 41: New Member States citizens having changed their main activity during the preceding two years.....	76
Figure 42: Lifelong learning is not important', citizens who disagree.....	77
Figure 43: Citizens who disagree that lifelong learning is 'only for the young' or 'only for the middle aged'.....	77
Figure 45: Citizens considering intercultural skills very useful in their lives as a whole.....	78
Figure 47: Citizens having learned something in the preceding year, by learning context.....	78
Figure 48: Citizens having learned at the workplace in the preceding year and citizens preferring workplace learning.....	79
Figure 49: Citizens selecting ICT tools and methods as the most important new learning opportunities.....	79
Figure 50: Participation in education and training in the preceding year.....	79
Figure 51: Non-participation in education or training in the preceding year.....	79
