Preface	xi
Acknowledgements	xiii
1 Assessment in Higher Education: An Introduction	1
Attending to assessment in higher education: an historical note—Selection for higher education and the system of education—Meanings of assessment, evaluation and appraisal in higher education—Assessment by students of teacher performance—The idea of multiple-objective and multiple-strategy assessment	
2 En Route to a Degree	27
Introduction—Systems approaches to the study of the impact of college on the student pursuit of grades—Society, education and grades—Grades, professionalism and the system of education—Admissions policies—The meaning that grades have for employers	
3 Grades and Grading	45
Introduction—The pervasive influence of examinations and tests—Differential grading between subjects—Grading: absolute or relative?—The perceptions of examiners and the combination of their marks—Differential subject performance: the problem of comparability—Grading practices and problems of selection—External examining	
4 Temperament and Testing	76
Introduction—Test anxiety—Temperament and performance—Examination strain (testing and mental health)—Coursework, motivation and stress—Course anxiety—The short- and long-term goals of students and achievement—Implications for assessment, course structure and the role of the teacher	
5 Defining the Task of Assessment: Implications for Teaching	105
Introduction—The importance of aims—A problem of terminology: meanings of the term 'objective'—The taxonomy of educational objectives—To declare or not to declare objectives—Intended versus unintended outcomes—Critic and connoisseur: the art of self-assessment in teaching	

6 Finding Objectives for Learning and Competency **123**

Introduction—Critical thinking: a philosophical perspective—Critical thinking: a psychological perspective—Using the *Taxonomy* in evaluation and assessment research—Goal clarification using the Delphi technique and other methods of group problem-solving—A critical thinking project—Using the *Taxonomy* in job analysis—Deriving education and training programmes from job analyses—The value-added dimension of assessment—Work and proficiency: the Critical Incident Technique as a means of deriving objectives—Competency-based assessment and learning—Conclusions

7 Concept Learning and Curriculum Objectives **157**

Introduction: towards the clarification and assembly of goals—Learning theories—Introducing chapters 7–9—The importance of concepts and principles: instruction and the curriculum—The entering characteristics of students—Alternative instructional strategies—Curriculum structures for concept learning

8 Perception, Learning and Studying **177**

Introduction—Learning and experience—Interpreting the outer world—Meaningful learning and the acquisition of concepts—Value dispositions and cognitive dissonance—Meeting the goals of perceptual learning in the curriculum—Spatial ability—Field-dependence and field-independence—Convergent and divergent thinking styles—Kolb's learning styles—Study skills: learning how to learn—Depth and surface approaches to learning

9 Learning and the Role of the Teacher **203**

Introduction—Personal and intellectual development—Piaget's theory of cognitive development—Kohlberg's theory of moral development—Perry's theory of development in higher education—Lonergan's theory of human knowing—A general criticism of theories of development—The language of subjects: the implication of development theory for the curriculum—Learning, personality and the teacher—Assessment, instruction and the role of the teacher in higher education

10 Written Examinations and Assignments (content, structure and marking) **225**

Introduction—Literacy and numeracy—The marking of essays and problem-solving examinations—An approach to the marking of large numbers of

scripts—Question design and the design of essay examinations—Question spotting: perceptions of assessment and performance—Student perceptions of essay writing—Feedback—Short-answer questions—Open-book examinations—The timing of examinations: prior notice (seen) questions

11 Practicals, Projects, Profiles and Self-assessment **247**

Introduction—Aurals and orals in foreign-language teaching—Oral examinations in dentistry and medicine—Simulations—Laboratory practicals—Projects and project work—Projects in subjects other than technology and science—Profiles—Self- and peer assessment

12 Objective Tests **285**

Introduction—The language of objective testing—Machine marking and computation—Analysing objective tests—Reliability of objective tests—Test length and test structure—Unusual responses: guessing—Strategies in solving objective items—Intelligent guessing—The question of triviality—Lottery techniques—Item and test construction—Test-wiseness and test preparation—Objective tests in higher education

13 Toward Multiple-Strategy Assessment **317**

Retrospect and prospect—From comprehensive to multiple-objective examinations—Case studies—Conclusions
