

Contents

1	Introduction	1
2	Object Attention and Learning in Mindful Robots	9
2.1	Theories of Attention	12
2.2	Architectural Aspects for Robotic Systems with Object Awareness	16
2.2.1	Unimodal Attention Processing	16
2.2.2	Multimodal Attention Processing	20
2.3	Robots paying Attention to Objects	27
2.4	Summary	31
3	Selected Modalities as Sources for Multimodal Object Attention	33
3.1	Person Data	34
3.2	Touch Screen	42
3.3	Textual Input Editor	43
3.4	Summary	45
4	Development of an Object Attention System	47
4.1	Related Work	47
4.2	Hardware Platforms used for the Integration of the Object Attention System	56
4.3	Data Representation for Intra- and Inter-module Communication	59
4.4	Short-Term Memory	61
4.5	Perception and Representation of Objects	62
4.5.1	Modality Converter	62
4.5.2	Determination of the Region-Of-Interest	64
4.5.3	Visual Object Representation	69

4.5.4	Graphical User Interface	77
4.5.5	Sound Collector	78
4.5.6	Ontological Textual Object Representation	80
4.6	Processing Strategy	82
4.7	Summary	86
5	Integration of the Object Attention System in a Robot	89
5.1	Related Work	89
5.2	Knowledge Representation	91
5.3	System Infrastructure	95
5.4	Summary	99
6	Evaluation	101
6.1	Determination of the Region-Of-Interest	102
6.2	Object Selection by their Color-based Appearance	108
6.3	Qualitative Measurement of Object-related Depth Values	110
6.4	Summary	113
7	Summary and Outlook	115
A	Details on Implementation	119
A.1	Flexible Communication Formats	119
A.2	Modality Converter	121
A.3	Sound Collector	124
A.4	Short-Term Memory	125
B	Evaluation Tables	129
	Bibliography	135
	List of Publications	148
	Index	149
