

## TABLE OF CONTENTS

CHAPTER	Page
1. MEASURES OF CENTRAL TENDENCY AND DISPERSION . . . . .	1
Objectives . . . . .	1
Introduction . . . . .	2
Measures of Central Tendency . . . . .	2
Mean . . . . .	3
Median . . . . .	4
Mode . . . . .	6
Relative Advantages of the Mean, Median, Mode . . . . .	7
Measures of Variability . . . . .	9
Range . . . . .	10
Quartile Deviation . . . . .	11
Standard Deviation . . . . .	14
Normal Distribution . . . . .	18
Summary . . . . .	20
Suggested Readings and References . . . . .	21
2. NORM SCORES . . . . .	23
Objectives . . . . .	23

2. NORM SCORES (continued)	
Introduction . . . . .	23
Standard Scores . . . . .	24
z Scores . . . . .	24
Transformed Standard Scores . . . . .	29
Advantages and Disadvantages . . . . .	30
Percentile Ranks and Percentiles . . . . .	31
Stanines . . . . .	35
Grade and Age Equivalence Scores . . . . .	36
Grade Equivalence . . . . .	37
Age Equivalence . . . . .	39
Summary . . . . .	42
Suggested Readings and References . . . . .	43
3. CORRELATION ANALYSIS . . . . .	45
Objectives . . . . .	45
Introduction . . . . .	46
Scattergram . . . . .	46
Line Drawn Through the Elliptical Ring . . . . .	49
Narrowness of the Elliptical Ring . . . . .	51
Extreme Degrees of Relationships . . . . .	52
Curvilinear Relationships . . . . .	54
Correlation Coefficient . . . . .	55

## 3. CORRELATION ANALYSIS (continued)

Calculation of $r$ --	
a Correlation Coefficient . . . . .	55

Interpretation of a	
Correlation Coefficient . . . . .	60

Summary . . . . .	61
-------------------	----

Suggested Readings and References . . . . .	62
---	----

## 4. RELIABILITY . . . . . 63

Objectives . . . . .	63
----------------------	----

Concept of Test Reliability . . . . .	64
---------------------------------------	----

Consistency Coefficient . . . . .	65
-----------------------------------	----

Split-Half Method . . . . .	65
-----------------------------	----

KR-21 Formula . . . . .	68
-------------------------	----

Simultaneous Equivalent Form . . . . .	71
--	----

Interpretation of $R_c$ . . . . .	72
-----------------------------------	----

Stability Coefficient . . . . .	73
---------------------------------	----

Interpretation of $R_g$ . . . . .	76
-----------------------------------	----

Issues of Equivalency Forms,	
Test-Retest, Time Interval . . . . .	77

Standard Error of Measurement . . . . .	78
---	----

Ways to Increase Reliability . . . . .	80
--	----

Summary . . . . .	81
-------------------	----

Suggested Readings and References . . . . .	82
---	----

5. VALIDITY . . . . .	83
Objectives . . . . .	83
Introduction . . . . .	84
Content Validity . . . . .	85
Measurement of Content Validity . . . . .	85
Criterion-Related Validity . . . . .	88
Predictive Validity . . . . .	88
Concurrent Validity . . . . .	91
Construct Validity . . . . .	95
Ways to Increase Validity . . . . .	97
Summary . . . . .	98
Suggested Readings and References . . . . .	100
6. SAMPLING . . . . .	101
Objectives . . . . .	101
Population . . . . .	102
Sampling . . . . .	103
Introduction . . . . .	103
Nonrandom Samples . . . . .	103
Random Samples . . . . .	105
Random Assignment . . . . .	116
Summary . . . . .	117
Suggested Readings and References . . . . .	117

7. RESEARCH DESIGNS . . . . .	119
Objectives . . . . .	119
Selection of a Research Design . . . . .	120
Internal Validity . . . . .	121
External Validity . . . . .	125
Research Designs Used in Education . . . . .	127
True Experimental Designs . . . . .	127
Quasi-Experimental Designs . . . . .	132
Ex Post Facto Design . . . . .	134
Norm-Reference Design . . . . .	135
Summary . . . . .	136
Suggested Readings and References . . . . .	138
8. HYPOTHESIS TESTING . . . . .	139
Objectives . . . . .	139
Hypothesis Testing: An Example . . . . .	140
Step 1 of Hypothesis Testing . . . . .	140
Step 2 of Hypothesis Testing . . . . .	144
Step 3 of Hypothesis Testing . . . . .	151
Step 4 of Hypothesis Testing . . . . .	152
Step 5 of Hypothesis Testing . . . . .	152
Step 6 of Hypothesis Testing . . . . .	153
Summary of the Six Steps . . . . .	153

8. HYPOTHESIS TESTING (continued)	
The Six Steps of Hypothesis Testing: Another Example . . . . .	154
Errors in Statistical Testing . . . . .	157
Chances of Committing an Error . . . . .	159
Practical Significance vs. Statistical Significance . . . . .	161
Summary . . . . .	162
Suggested Readings and References . . . . .	163
9. SELECTION OF A STATISTICAL TEST . . . . .	165
Objectives . . . . .	165
Introduction . . . . .	165
Number of Groups . . . . .	166
Four Levels of Measurement . . . . .	168
Selection of the Appropriate Statistical Test . . . . .	171
Summary . . . . .	172
Suggested Readings and References . . . . .	172
10. CORRELATED $t$ TEST . . . . .	173
Objectives . . . . .	173
Criteria for Using a Correlated $t$ Test . . . . .	173
An Application of a Correlated $t$ Test . . . . .	175

10. CORRELATED  $t$  TEST (continued)

Six Steps of Hypothesis Testing  
with a Correlated  $t$  Test . . . . . 176

Correlated  $t$  Test: Another Example . . . . . 182

Computer Printout . . . . . 185

$p$  Value . . . . . 187

Summary . . . . . 189

Suggested Readings and References . . . . . 189

11. INDEPENDENT  $t$  TEST . . . . . 191

Objectives . . . . . 191

Criteria for Using an  
Independent  $t$  Test . . . . . 191

An Application of an  
Independent  $t$  Test . . . . . 192

Six Steps of Hypothesis Testing  
with an Independent  $t$  Test . . . . . 194

Computer Printout of an  
Independent  $t$  Test . . . . . 200

Summary . . . . . 202

Suggested Readings and References . . . . . 203

## 12. ONE-WAY ANALYSIS OF VARIANCE . . . . . 205

Objectives . . . . . 205

Criteria for Using One-Way  
Analysis of Variance . . . . . 206

An Application of One-Way ANOVA . . . . . 207

12.	ONE-WAY ANALYSIS OF VARIANCE (continued)	
	Six Steps of Hypothesis Testing with One-Way ANOVA . . . . .	209
	Multiple Comparisons . . . . .	219
	The Six Steps of the S-Method . . . . .	219
	Computer Printout . . . . .	223
	Summary . . . . .	226
	Suggested Readings and References . . . . .	227
13.	TWO-WAY ANALYSIS OF VARIANCE . . . . .	229
	Objectives . . . . .	229
	Criteria for Using Two-Way Analysis of Variance . . . . .	230
	An Application of Two-Way ANOVA . . . . .	231
	Interpretation of a Two-Way ANOVA Table . . . . .	233
	Summary of the Physical Fitness Study . . . . .	241
	Interaction Effects . . . . .	242
	Interpreting an Interaction Effect . . . . .	243
	Summary . . . . .	246
	Suggested Readings and References . . . . .	247
14.	ANALYSIS OF COVARIANCE . . . . .	249
	Objectives . . . . .	249
	Criteria Used to Select ANCOVA . . . . .	250

<del>14.</del>	ANALYSIS OF COVARIANCE (continued)	
	Advantages of Using ANCOVA . . . . .	251
	An Application of ANCOVA to an Educational Study . . . . .	251
	ANCOVA Table . . . . .	254
	Multiple Linear Regression Analysis . . . . .	261
	Summary . . . . .	266
	Suggested Readings and References . . . . .	267
15.	CHI-SQUARE TEST . . . . .	269
	Objectives . . . . .	269
	Criteria for Using a Chi-Square Test . . . . .	269
	An Application of a Chi-Square Test to a One-Sample Case . . . . .	270
	Six Steps of Hypothesis Testing using a Chi-Square Test . . . . .	272
	An Application of a Chi-Square Test to Two Independent Samples . . . . .	277
	Six Steps of Hypothesis Testing Using a Chi-Square Test . . . . .	279
	Yates' Correction Factor . . . . .	285
	Computer Printouts . . . . .	286
	One-Sample Case . . . . .	286
	Two-Sample Case . . . . .	287
	Summary . . . . .	290
	Suggested Readings and References . . . . .	291
