

TABLE OF CONTENTS

Foreword	5
Foreword to the English Edition	7

PART ONE

STRUCTURAL LINGUISTICS: ITS OBJECT OF STUDY AND METHODS

1. The Subject Matter of Structural Linguistics	13
1.1 The Concept of Linguistic Structure.	13
1.2 The Need for Redefining the Subject Matter of Structural Linguistics: Structural Linguistics as the Science of the Dynamic Aspect of Synchrony	15
1.3 Structural and Taxonomic Linguistics	18
1.4 Structural Linguistics and the Typology of Languages	24
1.5 Structural and Historical Linguistics	28
1.6 Structural Linguistics and the Theory of Machine Translation	30
1.7 The Theoretical and Practical Importance of Structural Linguistics	35
2. The Hypothetico-Deductive Method as the Logical Basis of Structural Linguistics	39
2.1 The Logical Characterization of the Hypothetico-Deductive Method	39
2.2 Theory and Model	52
2.3 The Concept 'Model' in Linguistics	64

PART TWO

GENERATIVE GRAMMARS AND PHONOLOGICAL CODING

3. The Semiotic and Linguistic Foundations of Generative Grammars and Phonology	69
3.1 The Semiotic Two-Stratum Structure of Natural Languages and the System of Fundamental Phonological Concepts.	69
3.2 The Consequences of the Two-Stratum Semiotic Structure of Natural	

Languages and the Two-Level Principle for the Construction of Generative Grammars	74
3.3 The Two-Level Theory of Generative Grammars	78
3.4 Phonological Coding	81
3.5 The Concept of a Grammatical Phrase	85
3.6 Syntactic and Semantic Definitions of Grammatical Concepts	96
3.7 The Theory of Generative Grammars and Operational Research	106
3.8 On the Verifiability of Theoretical Propositions.	110
3.9 The Role of Mathematics	114
4. The Phrase Structure and Transformational Models	118
4.1 Introductory Remarks.	118
4.2 The Basic Concepts.	119
4.3 The Formal Characteristics of the Phrase Structure Model	124
4.4 Some Limitations of the Phrase Structure Model	126
4.5 The Transformational Model.	129
4.6 The Phrase Structure and Transformational Models as Types of Concatenative Generative Grammars	133
5. The Applicational Model	143
5.1 Preliminary Remarks	143
5.2 The Logical Characteristics of Abstract Derivational Systems.	144
5.3 Virtual and Actual Calculus of Semions	155
5.4 Relator Grammar and the Relator Language	158
5.5 Interpretation of the Relator Language and Some Processes of Phrase Generation	170
5.6 Derivation of Phrases by Replacement of Variables	189
5.7 The Transformational-Field Generator	201
5.8 On the Empirical Interpretation of the T-Generator.	252
5.9 The Formalization of Grammatical Synonymy	273
5.10 The Applicational Model and the Problem of Correlations Between Language and Thought.	301
5.11 The Applicational Model as a Possible Meta-language in Structural Typology.	306
5.12 Foundations of Phenotype Grammar.	310
5.13 Concluding Remarks.	323
Results of Investigation	337
Literature	343
Name Index	348
Subject Index	350
