Preface xvii

1. INTRODUCTION 1

1.1. Instead of definition 1

1.1.1. Context, frame and point of view 1

1.1.2. Systems and meta-levels: The two predicaments 2

1.2. The scope of pragmatics: Recurrent themes 5

1.2.1. Gradation, continuum and non-discreteness 5

1.2.2. Relevance and importance 6

1.2.3. Similarity and analogy 6

1.2.4. Kind vs. degree: The arbitrariness of taxonomy 6

1.2.5. Abductive inference and analogic reasoning 7

1.2.6. The semeiotic relation 8

1.2.7. Purpose, function explanation and understanding 8

1.2.8. Norm, ground, saliency, frequency and markedness 8

1.3. Early roots 9

1.3.1. The dialecticians 9

1.3.2. Socrates 10

1.3.3. Aristotle 10

1.3.3.1. Non-discrete gradual change 11

1.3.3.2. 'The mean' 11

1.3.3.3. Aristotle's functionalism 12

1.3.3.4. Abductive inference 13

1.4. Kant 14

1.4.1. Extreme reductionism in Western Epistemology 14

1.4.2. Kant's middle-ground alternative 16

1.5. Peirce and Pragmatism 20

1.5.1. Abductive inference 20

1.5.2. The interpretant as a third term in semeiotics 21

1.5.3. Non-Platonic categorization 21

1.5.3.1. The multi-dimensionality of semantic space 21

1.5.3.2. The non-discreteness of semantic dimensions 22

1.6. Ludwig Wittgenstein 23

1.6.1. The rejection of deductive logic as a means for transacting new information 24

1.6.2. The attack on Platonic categorization 25

- 1.7. Other strands of pragmatics 25**
 - 1.7.1. The language-and-culture tradition 25
 - 1.7.2. Early functionalism: The communicative context 26
 - 1.7.3. The Speech-act tradition: Purposive context 27
 - 1.7.4. The presupposition tradition: Shared knowledge 28
 - 1.7.5. Modal logic and possible worlds: The indexing of context 29
 - 1.7.6. Ethnography of Speech: Social interaction as context 30
 - 1.7.7. Developmental pragmatics 30
 - 1.7.8. Pragmatics and machines: Plans, Goals, Scripts 31
 - 1.7.9. Gestalt, prototypes and metaphors 31
 - 1.7.10. Biology and evolution 31
- 1.8. Projections: Toward an integrated, pragmatics of organism, mind and behavior 32**

2. CATEGORIES AND PROTOTYPES: BETWEEN PLATO AND WITTGENSTEIN 35

- 2.1. Discrete categories, fuzzy gradations and prototypes 35**
 - 2.1.1. Preamble 35
 - 2.1.2. Extreme Platonic categorization 36
 - 2.1.3. Extreme Wittgensteinean categorization 37
 - 2.1.4. The prototype approach to categorization 38
 - 2.1.5. Categorization and frequency distribution 40
- 2.2. Ludwig Wittgenstein and categorization 43**
 - 2.2.1. Preamble 43
 - 2.2.2. The context-dependence of meaning 44
 - 2.2.3. The non-discreteness of meaning 48
 - 2.2.4. Exemplars, norms and prototypes 51
- 2.3. Prototypes and metaphoric extension 54**
 - 2.3.1. Preamble 54
 - 2.3.2. Metaphoric induction into a lexical prototype 54
 - 2.3.3. Metaphoric extension of a lexical prototype 56
 - 2.3.4. Prototypes, metaphoric extension and grammaticalization 57
- 2.4. Metaphoric extension in the grammar of transitivity 59**
- 2.5. The functional motivation for a hybrid system of categories 64**
- 2.6. Closure 67**

3. THE LINGUISTIC CODE AND THE ICONICITY OF GRAMMAR 69

3.1. Preamble 69

3.2. The interpretant as context 70

3.2.1. Background 70

3.2.2. Steps to an ecology of contexts 73

3.3. 'Code' and 'designatum' 76

3.3.1. The designatum: Some background 76

3.3.2. Language as a complex coding system 81

3.3.3. Functional realms coded by language 82

3.3.4. In search of the designatum 84

3.3.4.1. The lexical code 84

3.3.4.2. The propositional code 86

3.3.4.3. The discourse-pragmatic code 91

3.4. Iconicity and isomorphism in grammar 94

3.4.1. Background 94

3.4.2. Preliminaries 96

3.4.2.1. Iconicity and isomorphism 96

3.4.2.2. Motivation and explanation 97

3.4.2.3. Degree of conscious access
to iconic code relations 98

3.4.3. Isomorphism, abstraction and prototypicality 99

3.4.4. Iconicity in syntax: Case studies 104

3.4.4.1. Propositions and temporal order 104

3.4.4.2. Quantity scales in the grammar of
referential identification 105

3.4.4.3. The use of word-order in the grammar of referential
identification 107

3.4.4.4. The grammatical coding of complement clauses 108

3.4.4.5. Passivization and the coding of transitivity 112

3.4.4.6. Antipassivization and the coding of transitivity 115

3.4.4.7. Stereotypicality, predictability
and coding saliency 117

3.4.4.8. Linear ordering, proximity and scope 118

3.4.5. Some meta-iconicity considerations 120

3.4.5.1. Arbitrary grammatical norms vs.
natural iconic principles 120

3.4.5.2. Conflicts between iconicity principles 121

3.5. Some bio-adaptive considerations 122

3.5.1. The difference of Man 122

3.5.2. The biological basis of isomorphic coding 123

3.5.2.1. Function, teleology and organisms 123

3.5.2.2. Ontogeny, phylogeny, language change and the iconicity of language 124

3.5.2.3. From icon to symbol 125

4. PROPOSITIONAL MODALITIES: TRUTH, CERTAINTY, INTENT, AND INFORMATION 127

4.1. Propositions, sentences and information 127

4.2. Epistemic modalities: The logico-semantic tradition 128

4.3. Epistemic modalities and the communicative contract 129

4.3.1. Preamble: Epistemic vs. other modalities 129

4.3.2. The epistemic space and evidentiality 130

4.3.2.1. The communicative contract 130

4.3.2.2. Evidentiality and epistemic modes 131

4.3.2.3. Subjective certainty 133

4.3.2.4. Source of information and defensibility 135

4.3.2.5. Rules of evidence 137

4.3.2.6. Certainty, challenge and response 139

4.4. The continuum space of propositional modalities 141

4.4.1. Preliminaries 141

4.4.2. The non-discreteness of presupposition 142

4.4.2.1. General considerations 142

4.4.2.2. Truth, knowledge, belief or familiarity? 144

4.4.2.3. Presupposition vs. backgroundedness 146

4.4.3. The non-discreteness of assertions 147

4.4.4. Epistemic modalities and manipulative speech-acts 148

4.4.4.1. Preamble 148

4.4.4.2. From unrealis to intent to power 148

4.4.4.3. Subjunctives: From certainty to manipulation 149

4.4.5. The speech act continuum 151

4.4.5.1. Preamble 151

4.4.5.2. From imperative to interrogative 153

4.4.5.3. From imperative to declarative 154

4.4.5.4. From declarative to interrogative 155

4.5. The pragmatics of NEG-assertion 156

4.5.1. Preamble 156

4.5.2. Negation as a speech act 156

4.5.3. Explicit and implicit normative expectations 158

- 4.5.4. The ontology of negative states and events 159
 - 4.5.4.1. The pragmatic status of negative events 159
 - 4.5.4.2. The pragmatics of negative states 161
- 4.5.5. Negation and irrealis 162
- 4.6. Certainty, power and deference 164**
 - 4.6.1. Preamble 164
 - 4.6.2. Certainty and authority 164
 - 4.6.3. Authority, negation and politeness 165
 - 4.6.4. Certainty, modesty and politeness 166
 - 4.6.5. Knowledge, certainty, responsibility and blame 166
- 4.7. The hybrid nature of propositions: Between Tautology and contradiction 167**
- 4.8. The negotiation of modality 170**

5. THE PRAGMATICS OF REFERENCE: EXISTENCE, REFERENTIAL INTENT AND THEMATIC IMPORT 173

- 5.1. Reference and existence 173**
 - 5.1.1. The Real World vs. the Universe of Discourse 173
 - 5.1.2. Reference vs. referential intent 174
- 5.2. The semantics of indefinite reference 175**
 - 5.2.1. Referential opacity 175
 - 5.2.2. Reference and propositional modalities 177
 - 5.2.3. The grammatical marking of indefinite reference 179
- 5.3. The pragmatics of reference: Denotation vs. referential import 181**
 - 5.3.1. The numeral 'one' in Hebrew 181
 - 5.3.2. Methodological preliminaries: The empirical measurement of the importance of referents in discourse 183
 - 5.3.3. The numeral 'one' in Krio 183
 - 5.3.4. The numeral one in Mandarin Chinese 186
 - 5.3.5. The unstressed indefinite 'this' in spoken English 189
- 5.4. Normative action and referential interpretation: The context-sensitivity of referential intent 192**
- 5.5. The non-discreteness of reference and definiteness 193**
 - 5.5.1. Preamble 193
 - 5.5.2. Non-discreteness of reference: Vague speaker's intent 194
 - 5.5.3. Gradation of referential intent 196
 - 5.5.4. Scales of definiteness: Degree of specification 197

5.6. Coreference, topicality and evocation: The pragmatic grey margins of Russell's Theory of Types 198

5.6.1. Preamble 198

5.6.2. The pragmatics of coreference 198

5.6.3. Coreference and a non-Platonic theory of types 202

6. THE PRAGMATICS OF ANAPHORIC REFERENCE: DEFINITENESS AND TOPICALITY 205

6.1. Introduction: Definiteness, presupposition and knowing other minds 205

6.2. Sources of definiteness: Grounds for knowing other minds 206

6.3. Definiteness and topicality 208

6.3.1. Topic and theme 208

6.3.2. In search of the elusive topic 209

6.3.3. Interim summary: Searching for the cognitive base of topicality 213

6.4. The measurement of topicality: Predictability, importance and attention 214

6.4.1. Preliminaries: Anaphoric predictability and cataphoric importance of topics in discourse 214

6.4.2. Predictability and the code-quantity scale 216

6.4.3. Code quantity and referential confusion 218

6.4.4. Code quantity and thematic predictability 219

6.4.5. Subject, object and transitivity: Referential predictability and referential importance 220

6.4.5.1. Preamble: Referential importance 220

6.4.5.2. Subject and object 220

6.4.5.3. Direct and indirect object 221

6.4.5.4. Grammatical marking of important definites 222

6.4.6. Word-order and topicality 222

6.4.6.1. The topic-comment ordering principle 222

6.4.6.2. Word-order flexibility and referential predictability 223

6.4.6.3. Dislocated order and anaphoric predictability 225

6.4.7. Word order and topic importance 226

6.4.7.1. Preamble 226

6.4.7.2. Definiteness and word-order in Papago 226

6.4.7.3. Word-order and topic persistence in Klamath 227

6.4.7.4. Direct and indirect object 228

6.4.7.5. Contrastive NPs and pre-posed order 228

- 6.4.7.6. Predictability, importance and pre-posed subject pronouns 230
- 6.4.7.7. Pre-posed indefinite subjects in verb-first languages: Where predictability and importance coincide 231
- 6.4.7.8. Cleft-focus constructions: Counter-expectancy and word-order 232
- 6.4.7.9. Word order and thematic predictability 233

6.5. Discussion 234

- 6.5.1. The pragmatic nature of definite reference 234
- 6.5.2. Task urgency, code quantity, linear order and attention 235

7. MODES OF KNOWLEDGE AND MODES OF PROCESSING: THE ROUTINIZATION OF BEHAVIOR AND INFORMATION 237

7.1. Introduction 237

7.2. The philosophical tradition: Modes of inference 238

- 7.2.1. Preamble 238
- 7.2.2. The 'early' Wittgenstein on induction and deduction 238
- 7.2.3. Peirce and abduction 242
 - 7.2.3.1. Abduction and hypothesis 242
 - 7.2.3.2. Abduction, causation and teleology 244
 - 7.2.3.3. Abduction, similarity and relevance 244
- 7.2.4. Interim summary 245

7.3. The linguistic tradition: Grammar and modes of information processing 246

- 7.3.1. Grammatical vs. pre-grammatical speech 246
- 7.3.2. Pre-grammatical rules 247
- 7.3.3. Grammar and automated processing 248
- 7.3.4. Routinized processing and context 249
- 7.3.5. Interim summary 249

7.4. The psychological tradition: Attended vs. automated processing 250

- 7.4.1. Preamble 250
- 7.4.2. Cognitive psychology: Perception, memory and attention 251
 - 7.4.2.1. Consciousness vs. automation 251
 - 7.4.2.2. Levels of consciousness and automaticity 252
- 7.4.3. Kinesiology and motor skills 253
- 7.4.4. Neurological aspects of automated processing 254
 - 7.4.4.1. Routinization learning 254
 - 7.4.4.2. Genetically determined routinization 255

- 7.5. The rise and function of automated processing 256**
 - 7.5.1. Properties of automated processing: Interim summary 256
 - 7.5.2. The functional motivation for automated processing 257
 - 7.5.2.1. The adaptive tradeoff 257
 - 7.5.2.2. Task urgency, predictability and economy 258
 - 7.5.2.3. The automaticity continuum 258
 - 7.5.3. Evolutionary aspects of automated processing 259
 - 7.5.3.1. Rise of consciousness vs. rise of automation 259
 - 7.5.3.2. Pre-conditions for routinization: Taxonomy and frequency of experience 260
 - 7.5.3.3. Bottom-up routinization 260
 - 7.5.3.4. The biological unity of automation 261
 - 7.5.3.5. Linguistic parallelisms 261
- 7.6. Some experimental evidence of grammar as an automated language processing mode 262**

8. FACT, LOGIC AND METHOD: THE PRAGMATICS OF SCIENCE 269

- 8.1. Introduction 269**
 - 8.1.1. Epistemology and organized science 269
 - 8.1.2. The legacy of reductionism 270
 - 8.1.3. What is an apt metaphor for behavioral and cognitive science? 270
- 8.2. Reductionism in the philosophy of science 271**
 - 8.2.1. Theory vs. practice in science 271
 - 8.2.2. Inductivism 273
 - 8.2.2.1. Extreme inductivism in philosophy 273
 - 8.2.2.2. Extreme inductivism in the behavioral sciences 277
 - 8.2.3. Deductivism 279
 - 8.2.3.1. Popper and the Hypothetico-Deductive (HD) method 279
 - 8.2.3.2. Pragmatic elements in Popper's method 281
 - 8.2.3.3. Deductivism in a social science 283
- 8.3. Pragmatic accounts of the scientific method 286**
 - 8.3.1. Preamble 286
 - 8.3.2. The fact-driven nature of hypothesis formation 286
 - 8.3.3. The status of 'observable' facts 289
 - 8.3.4. The relevance of data 291
 - 8.3.5. The impetus for an empirical cycle: Puzzling facts 293
 - 8.3.6. Intermezzo: A case-study of an empirical cycle 293

- 8.4. The pragmatics of explanation 300**
 - 8.4.1. Preamble 300
 - 8.4.2. Deductivism: Generalization as explanation 301
 - 8.4.3. Causal explanation: Co-occurrence, dependency and complex patterns 304
 - 8.4.3.1. Preamble 304
 - 8.4.3.2. The context-dependent, theory-laden nature of 'cause' 304
 - 8.4.3.3. The multi-variable empirical environment 305
 - 8.4.3.4. The bio-ontology of causal reasoning 306
- 8.5. Functional explanation 308**
 - 8.5.1. Preamble 308
 - 8.5.2. Structure and function in biology 310
 - 8.5.3. Some features of bio-behavior 311
 - 8.5.3.1. Adaptive tasks and survival imperatives 311
 - 8.5.3.2. The law-governed behavior of bio-organisms: Uniformity and adaptive choice 311
 - 8.5.3.3. Bio-organisms as interactive systems: Mutual dependencies and cross-constraints 312
 - 8.5.3.4. Higher-level interaction governing bio-behavior 313
 - 8.5.3.5. Some examples of law-governed behavior in bio-culture 314
 - 8.5.4. The reductionist attack on functional explanation 317
 - 8.5.4.1. Motive as 'cause' in socio-behavior 317
 - 8.5.4.2. The denial of bio-teleology 319
- 8.6. Closure: Explanatory domains, ranges of facts and the legacy of structuralism 320**

9. LANGUAGE, CULTURE AND TRANSLATION 323

- 9.1. Introduction 323**
- 9.2. Modern extreme reductionists 325**
 - 9.2.1. Preamble 325
 - 9.2.2. The anti-universalism of modern empiricists 325
 - 9.2.3. The anti-universalism of modern mentalists 327
 - 9.2.4. The universalism of modern Rationalists 329
- 9.3. Grammar and translation 330**
 - 9.3.1. Serial verb constructions 331
 - 9.3.2. Pre-posed adverbial clauses in strict verb-final language 333
 - 9.3.3. Verb complement structure 334
 - 9.3.4. Co-lexicalized complement-taking verbs 335
 - 9.3.5. Non-embedded background clauses 336

- 9.3.6. The grammatical coding of evidentiality 337
 - 9.3.7. Manipulative speech acts in Korean 338
 - 9.4. Meaning, culture and translation 339**
 - 9.4.1. Preamble: Meaning, understanding and context 339
 - 9.4.2. Translating across lexical gaps: Case studies 340
 - 9.4.2.1. The red herring of technological vocabulary 340
 - 9.4.2.2. Cosmology and the physical universe 342
 - 9.4.2.3. Spatial orientation in Guugu Yimidhirr 345
 - 9.4.2.4. Science and popular culture: Righteous food 349
 - 9.4.2.5. Sin, taboo and Christianity 350
 - 9.4.2.6. Ute leadership 351
 - 9.4.2.7. You 'owe', I 'pay': Obligation and exchange in Melanesia 352
 - 9.4.2.8. Culture and grammar: Deference 354
 - 9.5. The kinship controversy: An old battlefield revisited 355**
 - 9.5.1. Preamble 355
 - 9.5.2. Kroeber's incipient structuralism 355
 - 9.5.3. Malinowski and Leach: Naive ('biological') vs. complex ('socio-cultural') functionalism 357
 - 9.5.4. Structural universalism: The kinship semantics of Scheffler and Lounsbury 359
 - 9.5.5. The crux of the matter: Kinship terms and translation 361
 - 9.6. The methodological conundrum: Navigating between untenable extremes 362**
 - 9.7. A pragmatic approach to translation 364**
 - 9.7.1. The mirage of reductionism 364
 - 9.7.2. The illusion of perfect communication 364
 - 9.7.3. The negotiation of 'shared' context 365
 - 9.7.4. Relative overlap of contexts 365
- 10. ADAPTIVE BEHAVIOR, GROUP VARIABILITY AND THE GENETIC CODE: THE PRAGMATICS OF BIO-EVOLUTION 369**
- 10.1. Prospectus 369
 - 10.2. Pre-evolutionary biology 371
 - 10.3. The rise of evolutionary thinking: Biological diversity, embryology and the fossil record 373
 - 10.3.1. Preamble 373
 - 10.3.2. Biological diversity 373
 - 10.3.3. Embryonic development 374
 - 10.3.4. The fossil record 375

- 10.4. Rear-guard defense of Platonism 376**
 - 10.4.1. Preamble 376
 - 10.4.2. Naturphilosophie 377
 - 10.4.3. Lamarck's adaptive functionalism 378
 - 10.4.4. Darwin 379
- 10.5. The siren-call of Lamarckism 380**
- 10.6. The transfer mechanism: Adaptive behavior, population dynamics and species evolution 384**
 - 10.6.1. Preamble 384
 - 10.6.2. The software of adaptive behavior: Skilled user strategies 384
 - 10.6.3. The adaptive advantage of skilled learning and automated processing 386
- 10.7. Socio-cultural, transmitted learning and evolutionary continuity 389**
 - 10.7.1. Background 389
 - 10.7.2. The interaction between individual learning and group transmission in evolution 391
 - 10.7.2.1. Role of the individual's routinized behavior in gaining adaptive-selectional advantage 391
 - 10.7.2.2. The role of socio-cultural transmission in accelerating the spread of favorable genetic traits 392
 - 10.7.3. Summary 392
- 10.8. The difference of mind and the difference it makes 393**
 - 10.8.1. The difference of Man 393
 - 10.8.2. Darwin, Wallace and evolutionary contiguity 394
 - 10.8.3. More rear guard skirmishes of Platonism: The abduction of Gould's punctuated equilibrium 396
 - 10.8.4. Modularity and the Platonization of mental faculties 399
- 10.9. Closure: The language parallels 400**
 - 10.9.1. Variation and change 400
 - 10.9.2. History, diachrony and recapitulation 401
 - 10.9.3. The evolution of communicative context 403

11. THE MYSTIC AS PRAGMATIST: LAO TSE AND TAOISM 405

11.1. Introduction 405

11.2. Taoist metaphysics: Unity in diversity 406

11.2.1. The One 406

11.2.2. The Two 408

11.2.3. The circle: Tao as drift 412

11.3. Taoist epistemology 413

11.3.1. Two realities, two modes of knowledge 413

11.3.2. Yin and Yang: The context-dependence of categories

11.4. Taoist ethics 416

11.4.1. The ethics of entropy 416

11.4.2. Wu-Wei and Tao: The water metaphor 417

11.4.3. Wu-Wei as a utilitarian creed 419

11.4.4. The Code: Li vs. natural kinship 420

11.4.5. The doctrine of Straw Dogs 421

11.5. Closure 423

BIBLIOGRAPHY 425

INDEX 453
