

Contents

Preface..... xi

1. Green Engineering: Introduction1

Paul T. Anastas, Lauren G. Heine, and Tracy C. Williamson

Green Processing

2. Novel Waterborne Coatings via Hybrid Miniemulsion

Polymerization8

H. Dong, J. W. Gooch, G. W. Poehlein, S. T. Wang, X. Wu,
and F. J. Schork

3. Pollution Prevention in the Magnetic Tape Industry: Solventless

Coating Formulations for Magnetic Tape Manufacture18

David E. Nikles, Matthew M. Ellison, Jin Young Huh,
James P. Parakka, and Adam Power

4. Eliminating Solvents and Acids in Wafer Processing.....29

Richard L. Bersin

5. Qualitative and Quantitative Analysis for Environmentally Benign

Electroplating Operations42

H. H. Lou and Y. L. Huang

6. Emission Reduction of Perfluorocompounds in Semiconductor

Manufacturers via Capture and Recycle.....62

Y. E. David Li, Joseph E. Paganessi, and Denis Rufin

Green Applications of Carbon Dioxide

7. Combined Reaction–Separation Processes in CO₂.....78

D. Hâncu, C. Powell, and E. J. Beckman

- 8. Green Process Concepts for the Pharmaceutical Industry.....96**
 Bala Subramaniam, Said Saim, Roger Rajewski, and
 Valentino J. Stella
- 9. Two-Stage Drawing of Poly(ethylene terephthalate) Fibers
 Using CO₂.....111**
 Terry Hobbs and Alan J. Lesser
- 10. Supercritical CO₂ Carbonation of Cement and Cement–Fiber
 Composites: The Supramics Process124**
 Roger Jones

Environmentally Benign Catalysis

- 11. Low-Pressure Oxidative Carbonylation of Aniline with Pd/C
 and Ag-Pd/C.....136**
 Steven S. C. Chuang, Pisanu Toochinda, and
 Mahesh V. Konduru
- 12. Clean Combustion: Catalyst Challenges149**
 Robert J. Farrauto
- 13. Zeolite Technologies for a Greener Environment.....159**
 B. K. Marcus and W. E. Cormier
- 14. Catalytic Recovery of Elemental Sulfur from Sulfur
 Dioxide-Laden Gas Streams174**
 Maria Flytzani-Stephanopoulos and Tianli Zhu
- 15. Kinetics for the Hydrodechlorination of Chlorofluorocarbons
 over Model Palladium Catalysts192**
 Fabio H. Ribeiro and Gabor A. Somorjai

Separations

- 16. Green Separation Science and Technology: Replacement of
 Volatile Organic Compounds in Industrial Scale Liquid–Liquid
 or Chromatographic Separations206**
 Scott K. Spear, Ann E. Visser, Heather D. Willauer,
 Richard P. Swatloski, Scott T. Griffin, Jonathan G. Huddleston,
 and Robin D. Rogers

17. Separations Research at the U.S. Environmental Protection Agency: Toward Recovery of VOCs and Metals Using Membranes and Adsorption Processes.....	222
Teresa M. Harten, Leland M. Vane, and David Szlag	
Author Index.....	237
Subject Index	239
