

TABLE OF CONTENTS

Introduction	1
I. The Semiotics of Human Communication	
1. The Object of Semiotics. The Sign-producing Reduction of Messages	6
2. The Signatum, the Signans, and the Semiotic Problems of Natural Human Languages	7
3. Sign and Meta-sign. Sign in Language and Sign in Speech	13
4. Semiology and Interdisciplinary Research	17
5. The Semiotic Systems which are not based on Graphic or Phonic Substance and the Problem of the "Silent Language"	24
II. The Logic of Natural Languages and the "Naturalness" of Logical Languages	
1. Concerning the "Pragmatics of Descriptor Languages"	33
2. The Syntax of Natural Languages and the Syntactics of the Information-logical Languages	44
3. The "Law of the Sign" and Rational Semantics	50
III. Approaches to the Optimal Reduction of the Speech Signal	
1. The Typology of Abbreviations	67
2. Compression of the Speech Signal in Stenography	75
3. The Compression of Speech in Technical Communication Channels and the Linguistic Means of Reducing the Speech Signal	81
IV. On the Use of Computers in Linguistic Research	
1. The Problem of Processing Linguistic Material for the Machine	87
2. Computational Statistics	93
3. Computer Processing in Terms of	

Classification and Grouping	96
4. Modelling and Simulation	97
5. Organisation of Work	99
