<b>Preface and Acknowledgements</b>	13
<b>Chapter 1. <i>What is tutoring and why is it needed?</i></b>	
<b>Summary</b>	15
<b>Introduction</b>	16
1.1 The need for tutoring	17
(a) Reconciling traditional and progressive approaches to education	17
(b) Moral education through the exercise of responsibility	18
(c) Flexibility of education at reasonable cost	19
(d) Easing the strain on teachers: Two vignettes	19
1.2 The arrangement of the chapters	22
<b>Chapter 2. <i>What uses have been made of tutoring?</i></b>	
<b>Summary</b>	25
2.1 Early uses: Andrew Bell and Joseph Lancaster	26
2.2 Tutoring schemes using college students as tutors	30
(a) Project Technology Power, University of Minnesota	30
(b) ASPIRA-MACE Bilingual Tutorial Reading Project, Chicago	33
(c) Some other tutoring schemes using college students as tutors	35
2.3 Tutoring schemes using children to teach children	39
(a) The National Commission on Resources for Youth Inc. "Youth Tutoring Youth programme"	39
(b) New York High School Homework Helper Programme	41

	(c) The Tutorial Community Project, Pacoima School, California	42
2.4	Tutoring schemes using adults other than students	44
	(a) Project SEED (Special Elementary Edu- cation for the Disadvantaged), Berkeley, California	44
	(b) Project STEP (Senior Tutors for Edu- cational Progress), Redding, Connecticut	46
	(c) STAR (Supplementary Teaching Assistance in Reading) Programme	47
	(d) The United Kingdom Adult Literacy Programme	48
2.5	Some other United Kingdom schemes, including summer projects	49
	(a) Community Service Volunteers Projects	50
	(b) York University English for Immigrants	51
	(c) Holland Park School Supportive English Teaching	51
	(d) The Haverstock Tutoring Scheme	51
	(e) De Burgh County Secondary School, Tadworth	51
	(f) Other schools projects	53

### Chapter 3. *What benefits are expected from the main types of tutoring?*

	<b>Summary</b>	55
3.1	Educational theories underlying the use of tutoring	57
	(a) Role-model theory	57
	(b) Behaviourist theory	58
	(c) Socio-linguistic theory	59
	(d) Gestalt theory	60
3.2	General benefits sought for participants in tutoring schemes	60

(a) Benefits to Tutors	60
(1) Tutors develop their sense of personal adequacy	
(2) Tutors find a meaningful use of the subject-matter of their studies	
(3) Tutors reinforce their knowledge of fundamentals	
(4) Tutors, in the adult role and with the status of teacher, experience being productive	
(5) Tutors develop insight into the teaching/learning process and can co-operate better with their own teachers	
(b) Benefits to Tutees	62
(1) Tutees receive individualised instruction	
(2) Tutees receive more teaching	
(3) Tutees may respond better to their peers than to their teachers	
(4) Tutees can receive companionship from tutors	
3.3 Specific benefits sought from different types of tutoring	64
(a) Peer Tutoring: interactive pairs	64
(b) The Monitor System	64
(c) Unstructured Tutoring	65
(d) Structured Tutoring	65
(e) Semi-Structured Tutoring	66
3.4 Benefits to the teacher in using tutoring	67

## Chapter 4. *How effective is tutoring?*

<b>Summary</b>	69
4.1 Problems of conducting research on tutoring	70
(a) Choosing an appropriate method of evaluation: tensions between Action and Research in evaluating tutoring	72
(b) The particular problem of measuring attitude change	73

4.2	Summary review of some specimen studies	77
(a)	Cloward (1967): 16-year-old school-children improve their own reading skills by tutoring	77
(b)	Klosterman (1970): Tutoring is more effective than an equal amount of normal classroom instruction	79
(c)	Shaver and Nuhn (1971): Improved verbal skills from tutoring persist over two years	79
(d)	Bausell, Moody and Walzl (1972): Hour for hour, tutoring is as effective as teaching by trained teachers	80
4.3	Effects on Tutors of taking part in tutoring	81
(a)	Cognitive gains	81
(b)	Affective gains	81
4.4	Effects on Tutees of being tutored	82
(a)	Cognitive gains	82
(b)	Affective gains	83
4.5	Factors which seem important in making tutoring effective	84
(a)	Sex pairings of tutors and tutees	84
(b)	Age and Ability differences	85
(c)	Number and duration of tutoring sessions	85
(d)	Number of tutees per tutor	86
(e)	Training of tutors	86
(f)	Structured versus unstructured tutoring	87

Chapter 5. *How can tutoring become part of the curriculum in tertiary (higher) education?*

	<b>Summary</b>	89
5.1	Study-Service in Higher Education	90
5.2	Tutoring in Higher Education	93
(a)	Professional education	94
(b)	Teacher training	95

	(c) Non-vocational education: Arts and Pure Sciences	96
	(d) Non-vocational education: Social Sciences	98
5.3	Teaching arrangements which can incorporate tutoring	98
Chapter 6.	<i>How can tutoring become part of the curriculum in secondary education?</i>	
	<b>Summary</b>	102
6.1	Study-Service in the school curriculum	103
6.2	Training of tutors as a focus for the curriculum	104
6.3	Making space in specialist subjects for experience in tutoring	107
6.4	The Assessment of Study-Service	108
6.5	The integrative potential of tutoring	110
Chapter 7.	<i>'The Pimlico Connection'</i>	
	<b>Summary</b>	112
7.1	Tutoring arrangements used	114
7.2	Methods of evaluation used	117
7.3	Opinions of pupils about the tutoring	120
	(a) What the pupils liked best	121
	(b) What the pupils disliked	122
	(c) How pupils thought the tutoring could be improved	124
	(d) 'In every subject they should have some tutors'	124
		125
7.4	Opinions of students about the tutoring	125
	(a) Benefits of being a tutor	
	(1) Reinforcing knowledge of one's subject	
	(2) Practice in the simple communication of scientific ideas	
	(3) Gaining insight into how other people perceive one's subject	

(4) Increasing self-confidence	
(5) Getting to know about people from different backgrounds	
(6) Feeling one was doing something useful with what one had learned	
(7) Effect on tutors' college studies	
(b) What the tutors liked best	131
(c) What the tutors liked least	132
(d) How the tutors thought the tutoring could be improved	132
(e) 'A phenomenal amount of untapped potential'	133
7.5 Opinions of the teachers about the tutoring	135
(a) Value of tutoring for mixed ability classes	136
7.6 Summary of principal findings	137

## Chapter 8. *How to start a tutoring scheme*

<b>Summary</b>	139
8.1 Define aims	140
8.2 Evaluate the tutoring	141
8.3 Structure the content	142
8.4 Ensure proper consultation and define roles	144
8.5 Train the Tutors	146
8.6 Support the Tutors	150
8.7 Logistics: Keep the scheme as simple as possible	152
(1) Time	
(2) Space	
(3) Meetings	
(4) Selection and training of tutors	
(5) Documentation	
(6) Finance	

Chapter 9. <i>What possibilities does tutoring offer for the future?</i>	
<b>Summary</b>	156
9.1 Tutoring within the educational system	
(a) University, Polytechnic, and College of Higher Education Students as Tutors	157
(b) Schoolchildren as tutors	158
9.2 Tutoring as an adjunct to the educational system	159
(a) After-school study centres	159
(b) Adult Education schemes	159
9.3 Tutoring as a therapeutic technique	160
(a) Mental hospitals	160
(b) Prisons and Remand Centres	161
9.4 Tutoring as a model for professional practice	161
<b>Bibliography</b>	163
<b>Appendix A: Notes on tutoring supplied to tutors in 'The Pimlico Connection'</b>	178
<b>Appendix B: Check List for planning tutoring schemes</b>	181
<b>Index of Names</b>	183
