

CONTENTS

	Preface	vii
1.	Achieving high dry-matter intake from pasture with grazing dairy cows <i>P. Dillon (Ireland)</i>	1
2.	Species-rich swards of the Alps: constraints and opportunities for dairy production <i>H.A. van Dorland, H.-R. Wettstein and M. Kreuzer (Switzerland)</i>	27
3.	Cultivar effects of perennial ryegrass on herbage intake by grazing dairy cows <i>H.J. Smit (The Netherlands)</i>	45
4.	Nutrient management under grazing <i>O. Oenema, T.V. Vellinga and H. van Keulen (The Netherlands)</i>	63
5.	Grazing systems and feed supplementation <i>A.M. van Vuuren and A. van den Pol-van Dasselaar (The Netherlands)</i>	85
6.	Grassland management with emphasis on nitrogen flows <i>J.L. Peyraud and L. Delaby (France)</i>	103
7.	Nitrogen utilization of perennial ryegrass in dairy cows <i>B. Tas (The Netherlands)</i>	125
8.	Grassland management with emphasis on grazing behaviour <i>M. Gibb (United Kingdom)</i>	141

9. **Improving dry-matter intake of perennial-ryegrass pasture by dairy cows** 159
H.Z. Taweel (The Netherlands)
10. **Lipids in herbage: their fate in the rumen of dairy cows and implications for milk quality** 175
A. Elgersma, S. Tamminga and J. Dijkstra (The Netherlands)
