## PART I

### THE EIGHTEENTH CENTURY

#### CHAPTER I

##### THE SOCIAL ENVIRONMENT ON THE EVE OF THE INDUSTRIAL REVOLUTION

	PAGE
1688-1760: economic development and change in social ideals— Mental cleavage between the 'educated' and the 'uneducated' classes—Consciousness of social evil; its bearing on the educa- tion problem—Varieties of social culture in different areas; connection between 'progress' and degeneracy; dangers aris- ing from increased plenty coupled with economic displacement .	3
<i>The Heritage of the Rural Peasantry</i> : Pre-eminence ascribed to the 'agricultural life' in eighteenth-century literature—The peasant's outlook; continuity of rural custom—Statement of an educational test to be applied in studying social evolution —Educational tendency of medieval institutions; peasant prosperity and culture in the fifteenth century; contrast with eighteenth-century phase of rural prosperity; intervening changes in the social environment; dissolvent forces acting on rural society; national movements and reforms affecting the peasantry; absence of a 'rural policy'—Normal type of social formation in rural districts, paternal government; exceptional quasi-democratic communities; their social and ethical char- acteristics; potential nucleus of a new rural civilisation .	15
<i>The Growth of Industrialism; Manufactures, Towns and Mining Settle- ments</i> : Comparison between the 'agricultural life' and the 'condition of manufacturers'—Moral and mental effects of quality of occupation—Urban influences; new towns and old cities; intellectual side of urban civilisation—The mining population; Methodist influence . . . . .	39
<i>Regional Survey; Historic Factors in the Social Evolution of Different Areas</i> : Alien elements in the population—Local peculiarities,	

social, ethical and economic; racial, geographical and other influences; local variations modified by centralising political and economic forces—Attempt to explain social variations in different areas as denoting differences in 'degree of development'; e.g. the North reproducing characteristics which appeared in the South at an earlier period; limitations to this hypothesis—Circumstances permanently differentiating local characteristics and traditions; traces of earlier customs and institutions persisting after growth of national law—Historic division between 'Anglo-Saxon' and 'Anglo-Danish' territories; Domesday inquest, relatively 'free' condition of the Danelaw; survival of 'independency' in the North, its bearing on the social character of the North before the Industrial Revolution . . . . .	48
<i>North and West</i> : The Northern character, illustrations from the Lake District; superiority of popular education in the North; the Industrial Revolution as an expression of character—The West country, compared with the North; mental condition of the Welsh related to their history; the Welsh revival . . . . .	61

## CHAPTER II

## SCHOOLS AND LITERATURE

<i>Schools</i> : Order of development in the educational system—Changes at the Reformation—Grammar schools, open to the poor; difficulty of maintaining the 'free grammar school'; failure to establish a graduated scheme of schools—Elementary parochial instruction; private adventure schools—Administrative defects—Charity schools; 'associated philanthropy,' and voluntary organisation—Early examples of State intervention . . . . .	80
<i>Literature</i> : Eighteenth-century cheap literature—Transition from medieval to modern forms of popular entertainment and culture—Chap-books—The newspaper press . . . . .	97

## CHAPTER III

## THE ERA OF REVOLUTIONS

Educational related to social ideals—Medieval theory of class-relations and its educational corollary—Tudor paternal government—Decay of Tudor ideals; effect on eighteenth-century views of popular education—Contrast with modern ideals—Transition following the decay of paternalism; new tendencies heralding the labour democracy; comparison of fourteenth and eighteenth-century trade combinations, etc. . . . .	103
<i>The Religious Revival</i> : Comparison with movements in the medieval Church—Methodism, its intellectual influence; connection with the political awakening . . . . .	117

	PAGE
<i>Political Unrest</i> : Public meetings and propaganda—Extent of the political awakening . . . . .	121
<i>The Industrial Revolution</i> : General tendencies—Social philosophy in defence of economic changes—Criticism from an ethical and educational standpoint—Educational problems, and intellectual influences, connected with the revolution . . . . .	126
Remedial measures—The 'social conscience'—Popular instruction movements and higher adult education . . . . .	135

## PART II

## THE FIRST HALF OF THE NINETEENTH CENTURY

## CHAPTER IV

## ELEMENTARY EDUCATION

Historic causes for the delay of State intervention—Influence of the Reformation—The Commonwealth—Voluntary effort, and hostility to education, in the eighteenth century—Characteristics of the education movement at the commencement of the nineteenth century; Bell and Lancaster . . . . .	145
<i>General Lines of Development</i> : Day schools—Education and industrial training—Rescue work—Sunday schools—Evening classes . . . . .	151
<i>Success and Failure</i> : Evidence of periodical inquiries examined—Examples of progress . . . . .	157
<i>Sources of Improvement</i> : Work of the Societies—Work of individuals—Employers—Robert Owen at New Lanark—Continental influences—Combe and secular education . . . . .	161

## CHAPTER V

## THE MECHANICS' INSTITUTES AND HIGHER EDUCATION

Stimulus of the Industrial Revolution—Popular lectures—Mutual Improvement Societies—Mechanics' Institutes and Schools of Design . . . . .	170
<i>The Mechanics' Institute Movement</i> : Early enthusiasm and its decline—Administrative difficulties, etc.—Defective arrangement of studies—Extent of the demand—Finance . . . . .	172
<i>Attempts at Reconstruction</i> : Federation of Mechanics' Institutes—'differential grading'; the Lyceums—General defects—The new spirit—Working Men's Colleges and Clubs . . . . .	179

## CHAPTER VI

## LIBRARIES AND LITERATURE

	PAGE
Literature and self-education—Scarcity of Public Libraries; growth of private and institutional libraries—The book-supply; book-stalls; Tract Societies and publishing firms; Charles Knight and the 'diffusion of useful knowledge'; failure of attempt to create an instructive literature for the people; working-class readers and students—The newspaper press; news-rooms and political propaganda; the Stamp Duty; the Chartist press and after—Composition; Samuel Bamford and Thomas Cooper	185

## CHAPTER VII

## ' EDUCATION BY COLLISION '

John Stuart Mill's defence of democracy from an educational standpoint; influence of political discussion; danger lest numerical strength prevail against intelligence—Intelligence required ( <i>a</i> ) to win political rights, ( <i>b</i> ) to render them effective—Advance of democracy accompanied by evolution of political consciousness—Illustration from nineteenth-century history . . . . .	206
<i>1816 to 1846</i> : Characteristics of the period as regards the aim of working-class movements; contrast with the period which followed; yet the former is a preparation for the latter—Political state of the industrial classes in 1816; London handicrafts, and textile industries; the rise of democracy in the North; the Hampden Clubs—The democratic ideal ( <i>a</i> ) political, ( <i>b</i> ) social—Political agitation; limits to its educational influence; Chartism—Social agitation; Robert Owen—The point at issue between Owen and the Chartists; Lovett on education and moral force—The Working Men's Association; its educational programme . . . . .	210

## CHAPTER VIII

## THE SOCIAL OUTLOOK

<i>Social Conditions, 1850</i> : Agriculture—Mines—Manufactures, 1790–1860; later evidence of the Booth survey and the Poor Law Commission (1909)—Growth of casual labour—Problems of adolescence—Social aspect of the education problem . . . . .	228
Position of educational movements, 1850—The new phase of adult education . . . . .	240
Modern criticisms of organised education considered in the light of earlier history, with special reference to adult education—Fluctuations in the demand for knowledge—Recent progress . . . . .	244
INDEX . . . . .	253
