Zusammenfassung	17
Forward (D. Gaimster)	19
Preface (G. Krause)	20
1. Introduction	
1.1 The study of post-medieval ceramics in the Lower Rhineland: an archaeological review	25
1.1.1 The history and scope of changing approaches	25
1.1.2 Salt-glazed stoneware	25
1.1.3 Lead-glazed earthenware and slipware	28
1.1.4 Stove-tiles	30
1.1.5 Tin-glazed earthenware	31
1.1.6 Oriental porcelain	31
1.1.7 Staffordshire finewares	31
1.1.8 Bias in the archaeological sample	32
1.1.9 Limitations of methodology and interpretation	32
1.2 Nature and aims of the survey	34
1.2.1 A problem-orientated research strategy for the region	34
1.2.2 A decade of rescue archaeology in the Duisburg Altstadt: the establishment of a ceramic sequence	34
1.2.3 The chronological range of survey	39
1.2.4 Area of study: excavations & collections in the region	39
1.2.5 The establishment of a regional ceramic type-series: macroscopic and chemical characterisation	39
1.2.6 Ceramic group composition: quantification on an intra-site and intersite basis	41
1.2.7 International significance of the study	41
1.2.8 The use of pottery as an historical source	41
2. Methodology 1: a multi-disciplinary research strategy for the study of post-medieval ceramics in the Lower Rhineland	
2.1 Introduction	43
2.2 Recording & presenting the information	43
2.2.1 The nature of the sample: evaluation of the excavated evidence	43
2.2.2 Dating the groups	45
2.2.3 Classification of the pottery	47
2.2.4 Quantifying the groups	47
2.2.5 Pottery illustration strategy	49
2.3 Scientific analysis	49
2.3.1 Neutron Activation Analysis: the establishment of a regional database	49
2.3.2 NAA Methodology	50
2.4. Contextual analysis	51
2.4.1 The use of contemporary graphical sources: towards an understanding of the changing social value and function of ceramics	51
3. Methodology 2: a ceramic type-series for the Lower Rhineland	
3.1 Introduction: The classification of Wares	52
3.1.1 The characterisation of Ware-types	52
3.2 Ware-type definitions	53
3.2.1 Lead-glazed earthenware & Slipware	53
3.2.2 Stoneware	57
3.2.3 Tin-glazed earthenware	59
3.2.4 Porcelain	59

3.2.5	Creamware	61
3.3	The classification of forms	61
3.3.1	Form typology	61
3.3.2	Published typologies	61
3.3.3	Correlation of principal form terms with published typologies (Table 1)	62
3.4	The functional classification of form-types	64
3.4.1	Functional typology	64
3.4.2	Principal form-types according to functional category (Table 2)	64
4.	Neutron activation analysis	
4.1	Introduction: A probabilistic sampling strategy	67
4.1.1	The manipulation of the database: the hypothesis-testing approach	67
4.2	Discussion of the analytical strategy	67
4.2.1	Introduction	67
4.2.2	Lead-glazed earthenware c. 1400–1500	68
4.2.3	Stove-tiles c. 1400–1600	68
4.2.4	Lead-glazed earthenware c. 1500–1700	69
4.2.5	Lead-glazed earthenware c. 1700–1800	69
4.2.6	Significance of the analysis and implications for future research	70
5.	Post-medieval ceramic “traditions” in the Lower Rhineland c. 1400–1800	
5.1	Introduction	77
5.1.1	Defining regional ceramic “traditions”	77
5.2	Lead-glazed earthenwares	77
5.2.1	Whiteware	77
5.2.2	Greyware	80
5.2.3	Redware	81
5.2.4	Polychrome earthenware and slipware	84
5.2.5	Regional imports	87
5.2.6	Stove-tiles	88
5.3	Rhenish stonewares	92
5.3.1	Siegburg	92
5.3.2	Langerwehe	93
5.3.3	Raeren	93
5.3.4	Cologne	93
5.3.5	Frechen	94
5.3.6	Westerwald	94
5.4	Tin-glazed earthenwares	95
5.4.1	North Netherlands maiolica	95
5.4.2	Netherlands faience	96
5.4.3	Rhenish faience	97
5.5	Porcelain	98
5.5.1	Oriental porcelain	98
5.5.2	German porcelain	98
5.6	English finewares	99
5.6.1	Staffordshire creamware	99
5.6.2	Staffordshire earthenware	99
5.6.3	Staffordshire stoneware	100
6.	Intra-site analysis: a selection of ceramic assemblages from the town of Duisburg	
6.1	Introduction	111
6.1.1	Intra-site analysis	111
6.2	The Duisburg groups	111
6.2.1	Schwanenstr. 85: 135/5a-d (Contexts 3-6)	111
6.2.2	85: 135/15a-g (Contexts 7-13)	112

6.2.3	85: 135/3 (Context 14)	113
6.2.4	86: 4a-b (Contexts 15, 16, 31, 33)	114
6.2.5	86: 2 (Contexts 17, 34)	114
7.	Inter- and multi-site analysis: the composition of ceramic assemblages in the Lower Rhine region	
7.1	Introduction	116
7.1.1	A quantitative study of the regional pottery supply	116
7.2	Ceramic group composition by phase	116
7.2.1	Phase c. 1400–1450	116
7.2.2	Phase c. 1450–1500	117
7.2.3	Phase c. 1500–1580	117
7.2.4	Phase c. 1580–1650	118
7.2.5	Phase c. 1650–1700	119
7.2.6	Phase c. 1700–1750	120
7.2.7	Phase c. 1750–1800	120
8.	Discussion: the consumption of ceramics in the Lower Rhineland c. 1400–1800	
8.1	Introduction	132
8.1.1	The potential of pottery as a historical source	132
8.2	Organisation of the regional pottery supply	132
8.2.1	Introduction	132
8.2.2	Transport and distribution mechanisms	133
8.2.3	Modes of production in the Lower Rhineland	134
8.2.4	Competition for customers	135
8.3	Ceramics as an index of consumer habit, taste and social emulation in the Lower Rhineland c. 1400–1800	136
8.3.1	Introduction	136
8.3.2	The role of ceramics in the evolution of material comfort, culinary practice and dining habits	137
8.3.3	Ceramics as an index of changing fashions and social emulation	141
8.3.4	The social curation of ceramics in post-medieval society	145
8.3.5	Future priorities for socio-economic analysis	145
	Bibliography	147
	Appendices	
	1. Concordance of principal contexts from Duisburg containing postmedieval pottery (key to Plan 2)	169
	2. Pottery information table: stratified and associated groups of pottery from the Duisb. Altstadt	169
	3. Pottery information table: stratified and associated groups of pottery from the Duisburg hinterland and Lower Rhine sites	172
	4. Pottery information table: published excavation reports from the Lower Rhineland	176
	5. Pottery information table: examples of Lower Rhine earthenware found in Cologne	178
	6. List of dated shipwrecks containing with Rhenish ceramics and imported pottery found in the region	178
	7. Selected list of contemporary graphical sources depicting Rhenish pottery or imported wares found in the region	180
	8. Figures: Concordance of Ware-types & forms by context	187
	Colour Code Symbols	194
	Figures 1–73	195

List of illustrations

- Maps**
- Map 1 Principal earthenware production sites in the Lower Rhineland c. 1600–1900 (from M. Scholten-Neess & W. Jüttner 1971, 8) 35
- Map 2 Situation of principal ceramic production and consumer sites in the Lower Rhineland c. 1400–1800 36
- Map 3 Sources and relative distances of the pottery supply to Duisburg c. 1400–1500 108
- Map 4 Sources and relative distances of the pottery supply to Duisburg c. 1500–1600 108
- Map 5 Sources and relative distances of the pottery supply to Duisburg c. 1600–1700 109
- Map 6 Sources and relative distances of the pottery supply to Duisburg c. 1700–1800 109
- Map 7 Location of principal assemblages of Rhenish post-medieval pottery in The Netherlands and Belgium 110
- Plans**
- Plan 1 Duisburg Altstadt in 1566; Town plan by Johannes Corputius 37
- Plan 2 Plot of principal ceramic assemblages from Duisburg on town plan of 1823–25 (see Appendix 1 for key to sites) 38
- Plan 3 Duisburg Alter Markt and Schwanenstraße. Location of main contexts up to July 1986 110
- Diagrams**
- Diag. 1 Date range of individual pottery types 60
- Diag. 2 Principal components plot: lead-glazed earthenware c. 1400–1500 74
- Diag. 3 Principal components plot: stove-tiles c. 1400–1600 75
- Diag. 4 Principal components plot: lead-glazed earthenware c. 1500–1700 75
- Diag. 5 Principal components plot: lead-glazed earthenware c. 1500–1700 (expanded version) 75
- Diag. 6 Principal components plot: lead-glazed earthenware c. 1700–1800 75
- Diag. 7 Hierarchy of potting technologies applied to the Lower Rhineland c. 1400–1800 (after Blake 1980; Orton 1985) 145
- Diag. 8a Summary of principal forms c. 1400–1450 (1:8) 101
- Diag. 8b Summary of principal forms c. 1450–1500 (1:8) 102
- Diag. 8c Summary of principal forms c. 1500–1600 (1:8) 103
- Diag. 8d Summary of principal forms c. 1600–1650 (1:8) 104
- Diag. 8e Summary of principal forms c. 1650–1700 (1:8) 105
- Diag. 8f Summary of principal forms c. 1700–1750 (1:8) 106
- Diag. 8g Summary of principal forms c. 1750–1800 (1:8) 107
- Graphs**
1. Pie chart showing relative frequency of wares from Duisburg c. 1400–1450 122
2. Pie chart showing relative frequency of wares from Duisburg c. 1450–1500 122
3. Pie chart showing relative frequency of wares from Duisburg c. 1500–1580 122
4. Pie chart showing relative frequency of wares from Duisburg c. 1580–1650 122
5. Pie chart showing relative frequency of wares from Duisburg c. 1650–1700 123
6. Pie chart showing relative frequency of wares from Duisburg c. 1700–1750 123
7. Pie chart showing relative frequency of wares from Duisburg c. 1750–1800 123
8. Pie chart showing relative frequency of wares from Krefeld-Linn c. 1700–1740 123
9. Pie chart showing relative frequency of wares from Krefeld-Linn c. 1740–1784 124
10. Pie chart showing relative frequency of wares from Wesel c. 1580–1620 124
11. Pie chart showing relative frequency of Whiteware forms from Duisburg c. 1400–1500 124
12. Pie chart showing relative frequency of Greyware forms from Duisburg c. 1400–1500 124
13. Pie chart showing relative frequency of Redware forms from Duisburg c. 1400–1500 125
14. Pie chart showing relative frequency of Siegburg stoneware forms from Duisburg c. 1400–1500 125
15. Pie chart showing relative frequency of Plain redware forms from Duisburg c. 1500–1600 125
16. Pie chart showing relative frequency of Plain redware forms from Duisburg c. 1600–1700 125
17. Pie chart showing relative frequency of Whiteware forms from Duisburg c. 1500–1700 126
18. Pie chart showing relative frequency of Slipware forms from Duisburg c. 1500–1700 126
19. Pie chart showing relative frequency of Stoneware forms from Duisburg c. 1500–1600 126
20. Pie chart showing relative frequency of Stoneware forms from Duisburg c. 1600–1700 126

21. Pie chart showing relative frequency of Tin-glazed earthenware (NL Maiolica) forms from Duisburg c. 1580–1650	127
22. Pie chart showing relative frequency of Plain redware forms from Duisburg c. 1700–1800	127
23. Pie chart showing relative frequency of Slipware forms from Duisburg c. 1700–1800	127
24. Pie chart showing relative frequency of Stoneware forms from Duisburg c. 1700–1800	127
25. Pie chart showing relative frequency of assorted fineware forms from Duisburg c. 1700–1800	128
26. Pie chart showing relative frequency of Slipware forms from Krefeld-Linn c. 1700–1740	128
27. Pie chart showing relative frequency of Slipware forms from Krefeld-Linn c. 1740–1784	128
28. Pie chart showing relative frequency of Plain redware forms from Krefeld-Linn c. 1700–1740	128
29. Pie chart showing relative frequency of Plain redware forms from Krefeld-Linn c. 1740–1784	129
30. Pie chart showing relative frequency of Stoneware forms from Krefeld-Linn c. 1700–1740	129
31. Pie chart showing relative frequency of Stoneware forms from Krefeld-Linn c. 1740–1784	129
32. Pie chart showing relative frequency of Faience forms from Krefeld-Linn c. 1700–1740	129
33. Pie chart showing relative frequency of assorted fineware forms from Krefeld-Linn c. 1740–1784	130
34. Stacked bar chart showing the relative proportion of functional categories from three Duisburg phases (c. 1400–1450, c. 1450–1500, c. 1500–1580)	130
35. Stacked bar chart showing the relative proportion of functional categories from Wesel (c. 1580–1620) and Duisburg (c. 1580–1650 and c. 1650–1700)	130
36. Stacked bar chart showing the relative proportion of functional categories from Duisburg (c. 1700–1750, c. 1750–1800) and Krefeld-Linn (c. 1700–1740, 1740–1784)	131
