Introduction	1
<i>Som Naidu</i>	

Part I. Content representation

1. Model facilitated learning	13
<i>Marcelo Milrad, Michael Spector and Pål Davidsen</i>	
2. Implicit theories of learning and change: their role in the development of e-learning environments for higher education	29
<i>Peter Goodyear and Chris Jones</i>	
3. Designing graphical, interactive simulations to model scientific problem solving	43
<i>Laurie Ruberg and John Baro</i>	
4. Optimizing domain knowledge representation with multimedia objects	55
<i>Kinshuk and Ashok Patel</i>	

Part II. Activation of learning

5. Using interactive video-based multimedia to scaffold learning in teacher education	71
<i>John Baird</i>	

- | | |
|--|------------|
| 6. Using authentic patient encounters to engage medical students in a problem-based learning curriculum | 85 |
| <i>Mike Keppell, Kristine Elliott, Gregor Kennedy, Susan Elliott and Peter Harris</i> | |
| 7. Virtual learning in cultural studies: matching subject content and instructional delivery | 97 |
| <i>Lee Wallace, Annamarie Jagose and Cathy Gunn</i> | |
| 8. Replicating practice complexities – multimedia innovation in social work education | 113 |
| <i>Stuart Evans and Phillip Swain</i> | |

Part III. Providing socialization support

- | | |
|---|------------|
| 9. Technology and second language learning through socialization | 129 |
| <i>Robert Debski</i> | |
| 10. Developing social presence in online course discussions | 147 |
| <i>Karen Swan</i> | |
| 11. Socialization through CMC in differently structured environments | 165 |
| <i>Peter Smith and Elizabeth Stacey</i> | |
| 12. Collaboration and community through simulation/role-play | 177 |
| <i>Karen Murphy and Yakut Gazi</i> | |

Part IV. Assessment of learning outcomes

- | | |
|---|------------|
| 13. Broadening assessment strategies with information technology | 193 |
| <i>Catherine McLoughlin</i> | |
| 14. Applying assessment principles and expanding the focus of assessment to enhance learning online | 209 |
| <i>Alex Radloff and Barbara de la Harpe</i> | |
| 15. The use of online assessment in stimulating a deeper approach to learning | 221 |
| <i>Carol Johnston</i> | |
| 16. Cognitive apprenticeship learning – ensuring far transfer of knowledge through computer-based assessment | 233 |
| <i>Ashok Patel, Kinshuk and David Russell</i> | |

Part V. Providing feedback

- 17. A feedback model and successful e-learning** 249
Yiping Lou, Helena Dedic and Steven Rosenfield
- 18. Interactivity and feedback as determinants of engagement and meaning in e-learning environments** 261
Rod Sims
- 19. Fundamentals for structuring feedback in an online learning environment** 277
Christopher K Morgan
- Commentary. On learning and teaching with technology: principles and practices 289
Andrew Higgins
- Index 293
