

Contents

Preface	5
1. Introduction	7
2. Magnesium alloys	9
3. Types of scrap	11
4. Material flow of magnesium	13
5. Recycling model	17
6. Preparation of magnesium alloy scrap	19
7. Remelting of scrap magnesium	25
7.1 The formation of particles, dross and sludge	25
7.2 Protecting the melt from oxidation	35
7.2.1 Fluxes	35
7.2.2 Protective cover gases	42
7.3 Refining of magnesium	46
7.3.1 Refining by precipitation	46
7.3.2 Refining by chlorination and gassing	48
7.3.3 Distillation processes for magnesium winning and recycling	49
7.4 Secondary alloys	59
8. Steel crucibles and linings for magnesium melts	81
9. Transport of liquid magnesium	87
10. Evaluation of scrap	89

11. Recycling of compact scrap	91
11.1 Flux-free melting	91
11.2 Remelting plants for type 1 scrap	95
11.2.1 Central inhouse recycling, version 1	95
11.2.2 Central inhouse recycling, version 2, dross and shredder fines processing.	98
11.2.3 Central inhouse recycling, version 3, liquid metal transfer.	98
11.2.4 Central inhouse recycling, version 4, combined melting of primary ingots and type 1 scrap with liquid metal transfer.	98
11.2.5 Local inhouse recycling, version 1.	100
11.2.6 Cost of inhouse recycling	101
11.3 Melting and refining processes with only a little salt.	102
11.4 Melting processes with a lot of salt	103
12. Processing of chips	107
13. Processing of materials containing rare earth elements, lithium, calcium and strontium	113
13.1 Magnesium-lithium alloys	113
13.2 WE-alloys	113
13.3 Magnesium alloys containing strontium and calcium	117
13.3.1 Melting salts for strontium and calcium alloys	117
13.3.2 Cover gases for magnesium alloys containing strontium and calcium ..	129
13.3.3 Recycling of magnesium alloys containing strontium and calcium.	129
13.4 Hydrometallurgical recovery of scandium.	132
14. Recycling of composite material scrap	133
15. Processing of dross and sludge, processing of black dross	135
16. Processing of oxide-salt fractions	139
17. Utilising magnesium scrap in other sectors	141
17.1 Utilisation in the cast iron sector.	141
17.2 Utilisation in the desulphurisation sector	141
17.3 Utilisation in the aluminium sector	142
17.4 Utilisation in the corrosion protection sector	142
18. Recycling companies	143
19. Mass flow occurring during the remelting of scrap	145
20. Safety in magnesium plants	155
21. Summary	159
22. Literature	161
23. Index	171
