

## CONTENTS

Preface . . . . .	ix
<b>PART I. CLAY MINERALS AND POLYMER ADSORPTION . . . . .</b>	<b>1</b>
<i>Chapter</i> 1. The clay minerals . . . . .	3
1.1. Structural aspects . . . . .	3
1.2. Swelling properties . . . . .	22
<i>Chapter</i> 2. Polymer behaviour at clay and solid surfaces . . . . .	37
2.1. Introduction . . . . .	37
2.2. Adsorption isotherms . . . . .	39
2.3. Theoretical aspects . . . . .	44
2.4. Colloid chemical aspects . . . . .	49
<b>PART II. INTERACTIONS OF CLAY MINERALS WITH SYNTHETIC POLY- MERS . . . . .</b>	<b>63</b>
<i>Chapter</i> 3. Uncharged or non-ionic polymers . . . . .	65
3.1. Introduction . . . . .	65
3.2. Formation and properties of complexes . . . . .	65
<i>Chapter</i> 4. Negatively charged polymers (polyanions) . . . . .	95
4.1. Introduction . . . . .	95
4.2. Formation and properties of complexes . . . . .	97
<i>Chapter</i> 5. Positively charged polymers (polycations) . . . . .	109
5.1. Introduction . . . . .	109
5.2. Formation and properties of complexes . . . . .	110
<i>Chapter</i> 6. Some practical applications of the clay—polymer interaction . . . . .	123
6.1. Introduction . . . . .	123
6.2. Soil conditioning . . . . .	127
6.3. Clays as fillers of polymer systems . . . . .	133
<b>PART III. INTERACTIONS OF CLAY MINERALS WITH NATURALLY OC- CURRING POLYMERS . . . . .</b>	<b>155</b>
<i>Chapter</i> 7. Proteins and enzymes . . . . .	157
7.1. Introduction . . . . .	157
7.2. General aspects of the clay—protein interaction . . . . .	161
7.3. Formation and properties of complexes . . . . .	164
7.4. Complex formation and enzyme activity . . . . .	188
7.5. Enzyme behaviour in soils . . . . .	211
<i>Chapter</i> 8. Nucleic acids . . . . .	227
8.1. Introduction . . . . .	227
8.2. Formation and properties of complexes . . . . .	228
<i>Chapter</i> 9. Nucleoproteins and viruses . . . . .	237
9.1. Introduction . . . . .	237
9.2. Formation and properties of complexes . . . . .	238
<i>Chapter</i> 10. Polysaccharides . . . . .	243
10.1. Introduction . . . . .	243
10.2. General aspects of the clay—polysaccharide interaction . . . . .	245

10.3. Formation and properties of complexes . . . . .	246
10.4. Polysaccharides and soil/clay aggregate stability . . . . .	262
<i>Chapter 11. Lignosulphonates . . . . .</i>	<i>275</i>
11.1. Introduction . . . . .	275
11.2. Formation and properties of complexes . . . . .	275
<i>Chapter 12. Humic substances . . . . .</i>	<i>283</i>
12.1. Introduction . . . . .	283
12.2. Bonding mechanisms . . . . .	289
12.3. Formation and properties of complexes . . . . .	292
12.4. Miscellaneous reactions . . . . .	314
APPENDIX . . . . .	327
AUTHOR INDEX . . . . .	331
SUBJECT INDEX . . . . .	353
