8 Explaining and explanations	111
9 Teachers' questions	137
10 Teachers' subject knowledge	153
11 Student teachers' professional skills	164
12 Training skilful teachers	186
Bibliography	197
Index	205

Figures

2.1	A conceptual model of classroom management	20
2.2	Time circles: a model of time management	25
4.1	Three photographs used in the interviews	62
8.1	Island of Zarg	116

Tables

3.1	Degree of formality and chaos during opening session of the year	43
3.2	Analysis of rule establishment or maintenance in first session	51
3.3	Patterns of entry into the classroom during first three days	53
3.4	Chaos post-entry compared with actual entry	54
3.5	Number of instances of inappropriate behaviour per session	55
4.1	Number of teachers and lessons observed in present sample	58
4.2	Predominant type of activity in each of 1,195 lesson segments	61
4.3	Number of pupils involved in misbehaviour	63
4.4	Percentage of lesson segments in which various kinds of misbehaviour occurred	64
4.5	Teachers' responses to misbehaviour	65
4.6	Outcomes of teachers' interactions	65
4.7	Different categories of teacher and pupil behaviour of experienced teachers in three regions	66
4.8	Different categories of teacher and pupil behaviour with three age groups	67
4.9	Teacher and pupil behaviour in mornings and afternoons	69
4.10	Range of involvement and deviance scores for total sample	70
7.1	Responses in ten most frequently occurring categories to photograph 1	103
7.2	Responses in ten most frequently occurring categories to photograph 2	104
7.3	Responses in ten most frequently occurring categories to photograph 3	105
7.4	Replies to question, 'Should children be allowed to talk to each other in lessons?'	107
8.1	Three typologies of explaining	113
8.2	Ten most frequently occurring categories for all explanations	119
8.3	Ten least frequently occurring categories for all explanations	119
8.4	Highest correlations between most frequently occurring process variables	120

8.5	Most significant differences between insects and Zarg explanations	121
8.6	Most significant differences between insects and Zarg lesson	122
8.7	Comparison between explanations to average and above-average pupils	125
8.8	Mean scores of average ability pupils on tests about insects and creative writing	129
8.9	Correlations between frequency of mention of insect features and number of pupils correctly answering relevant item on post-test	131
9.1	Responses of teachers to attitude statements	143
9.2	Frequency of questioning behaviour	143
9.3	Percentage of questions in each of three categories	145
9.4	Percentage of questions to different targets	145
9.5	Percentage of questions over categories and targets	146
9.6	Types of pupil response	148
9.7	Teacher reply frameworks following pupil responses	149
10.1	Teachers feeling competent with existing knowledge and skills	154
11.1	Percentage of each activity during observation of 200 lesson segments in the classes of experienced and 200 in the classes of student teachers	173
11.2	Percentage of lesson segments in which different numbers of pupils were observed misbehaving	174
11.3	Percentage of lesson segments when four categories of pupil misbehaviour occurred	175
11.4	Comparison of experienced and student teachers' responses to misbehaviour	175
11.5	Outcomes of experienced and student teachers' interventions	176
11.6	Average on-task and deviance index scores for experienced and student teachers	176
11.7	Means and correlated t tests of sixty-four students' attitude scores before and after teaching practice for photograph 1	180
11.8	Means and correlated t tests of sixty-four students' attitude scores before and after teaching practice for photograph 2	181
11.9	Means and correlated t tests of sixty-four students' attitude scores before and after teaching practice for photograph 3	182
11.10	Mean number of strategies for each situation given before and after teaching practice	183
