Introduction	ix
Chapter 1. Graded Lie Algebras	1
1.1. Introduction	1
1.2. The Weisfeiler radical	2
1.3. The minimal ideal \mathfrak{J}	4
1.4. The graded algebras $\mathcal{B}(V_{-t})$ and $\mathcal{B}(V_t)$	5
1.5. The local subalgebra	8
1.6. General properties of graded Lie algebras	9
1.7. Restricted Lie algebras	15
1.8. The main theorem on restrictedness (Theorem 1.63)	17
1.9. Remarks on restrictedness	17
1.10. The action of \mathfrak{g}_0 on \mathfrak{g}_{-j}	18
1.11. The depth-one case of Theorem 1.63	20
1.12. Proof of Theorem 1.63 in the depth-one case	21
1.13. Quotients of \mathfrak{g}_0	22
1.14. The proof of Theorem 1.63 when $2 \leq q \leq r$	24
1.15. The proof of Theorem 1.63 when $q > r$	25
1.16. General setup	25
1.17. The assumption $[[\mathfrak{g}_{-1}, \mathfrak{g}_1], \mathfrak{g}_1] \neq 0$ in Theorem 1.63	30
Chapter 2. Simple Lie Algebras and Algebraic Groups	31
2.1. Introduction	31
2.2. General information about the classical Lie algebras	31
2.3. Representations of algebraic groups	38
2.4. Standard gradings of classical Lie algebras	41
2.5. The Lie algebras of Cartan type	42
2.6. The Jacobson-Witt algebras	43
2.7. Divided power algebras	44
2.8. Witt Lie algebras of Cartan type (the W series)	45
2.9. Special Lie algebras of Cartan type (the S series)	47
2.10. Hamiltonian Lie algebras of Cartan type (the H series)	50
2.11. Contact Lie algebras of Cartan type (the K series)	54
2.12. The Recognition Theorem with stronger hypotheses	56
2.13. \mathfrak{g}_ℓ as a \mathfrak{g}_0 -module for Lie algebras \mathfrak{g} of Cartan type	57
2.14. Melikyan Lie algebras	66

Chapter 3. The Contragredient Case	69
3.1. Introduction	69
3.2. Results on modules for three-dimensional Lie algebras	69
3.3. Primitive vectors in \mathfrak{g}_1 and \mathfrak{g}_{-1}	74
3.4. Subalgebras with a balanced grading	77
3.5. Algebras with an unbalanced grading	86
Chapter 4. The Noncontragredient Case	97
4.1. General assumptions and notation	97
4.2. Brackets of weight vectors in opposite gradation spaces	98
4.3. Determining \mathfrak{g}_0 and its representation on \mathfrak{g}_{-1}	99
4.4. Additional assumptions	105
4.5. Computing weights of \mathfrak{b}^- -primitive vectors in \mathfrak{g}_1	105
4.6. Determination of the local Lie algebra	115
4.7. The irreducibility of \mathfrak{g}_1	125
4.8. Determining the negative part when \mathfrak{g}_1 is irreducible	133
4.9. Determining the negative part when \mathfrak{g}_1 is reducible	137
4.10. The case that \mathfrak{g}_0 is abelian	141
4.11. Completion of the proof of the Main Theorem	142
Bibliography	143
