Foreword xxiii

one Contemporary emerging and re-emerging communicable diseases: challenges to control 1
Richard Coker, Rifat Atun, Martin McKee

two The changing face of transitional societies 21
Martin McKee, Jane Falkingham

three Effective governmental responses to communicable disease challenges in transitional societies 47
Kelley Lee, John Wyn Owen

four A continuing evolutionary struggle: microbes and man 61
Anthony McMichael

five Communicable disease in Europe 75
Shazia Karmali, Andrew Amato-Gauci, Andrea Ammon, Martin McKee
six  Communicable disease in Latin America and the Caribbean  95
   Oscar Echeverri, Patricio Marquez, Enis Baris

seven  Health systems and systems thinking  121
      Rifat Atun, Nata Menabde

eight  International and European responses to the threat of communicable disease  141
       Ralph Reintjes

nine  HIV/AIDS and tuberculosis control in post-Soviet Union countries  154
      Nina Schwalbe, Jeffrey Lazarus, Olusoji Adeyi

ten   Enabling health systems in tuberculosis control: challenges and opportunities for the former Soviet Union countries  171
      Andrei Mosneaga, Elena Yurasova, Richard Zaleskis, Wieslaw Jakubowiak

eleven  Health systems and communicable disease control: emerging evidence and lessons from central and eastern Europe  193
       Rifat Atun, Richard Coker

twelve  Health system reforms and communicable disease in Latin America and the Caribbean  209
        Patricio Marquez, Oscar Echeverri, Enis Baris

thirteen  Brazil's response to AIDS and tuberculosis: lessons from a transitional economy  217
        Eduardo Gómez

fourteen  Health financing and communicable disease control: conceptual issues and implications  231
       Rifat Atun, Claudio Politti, Ipek Gurol-Urganci, Joseph Kutzin

fifteen  Health systems and communicable diseases: predicting and responding to future challenges  251
       Richard Coker, Ana Mensua, Rifat Atun, Martin McKee

Index  257
## List of tables

1.1 Deaths by cause in WHO Regions, 2002 estimates | 7
1.2 Burden of disease in disability-adjusted life years by cause in WHO Regions, 2002 estimates | 8
1.3 Examples of newly recognized pathogenic microbes and the diseases they cause, 1973–2003 | 9
1.4 Diseases associated with infectious agents | 10
1.5 Examples of economic impact of major infectious disease outbreaks | 10

2.1 Summary of economic and social statistics for 8 of the European Union Member States joining the EU since May 2004, selected years | 26
2.2 Summary of economic and social statistics for selected countries in South-eastern Europe, selected years | 28
2.3 Summary of economic and social statistics for the Russian Federation and selected neighbouring countries, selected years | 31
2.4 Summary of economic and social statistics for selected countries in the Caucasus and central Asia, selected years | 34
2.5 Summary of economic and social statistics for selected countries in Central America, selected years | 37
2.6 Summary of economic and social statistics for selected countries in South America, selected years | 40
2.7 Summary of economic and social statistics for selected countries in the Caribbean, selected years | 43
3.1 Basic principles for ensuring public health resilience to communicable disease outbreaks | 51
5.1 Newly diagnosed cases of HIV infection, by year of report (rate/million population) 79
5.2 Trends in the incidence of syphilis in central Asia 86
6.1 Coverage of the DOTS Strategy by country, the Americas, 2002 109
6.2 Prevalence of co-infection tuberculosis/AIDS in some Latin American countries, 1999–2002 110
8.1 A selection of evolving threats to human health from infectious diseases 142
8.2 Overview of a selection of European networks for the surveillance and control of communicable diseases 146
9.1 Reported HIV/AIDS cases and tuberculosis incidence, selected countries, 2005 155
13.1 The process of decentralization of health structures in Brazil 218
14.1 Purchasing and provision of HIV and tuberculosis services in Estonia, by pooling agent, 2005 240
List of figures

6.1 Malaria mortality rate in the world and in Latin America and the Caribbean, 2000 97
6.2 Malaria morbidity in Latin America and the Caribbean, 1994–2004 98
6.3 Notified cases of dengue in Latin America and the Caribbean, 1996–2005 100
6.4 Dengue haemorrhagic fever trends in Latin America and the Caribbean, 1987–2005 101
6.5 Notified cholera cases in Latin American countries, 1991–2004 103
6.7 Estimated tuberculosis incidence in continental Latin American countries, 1990–2003 105
6.8 Tuberculosis incidence in the Caribbean countries, 1990–2003 106
6.9 Tuberculosis mortality in continental American countries, 1990–2003 107
6.10 Tuberculosis mortality in the Caribbean countries, 1990–2003 108
6.11 AIDS incidence rates in the Americas, 1982–2002 113
6.12 Immunization coverage in children aged 1 year in the Americas, 1999–2004 115
6.13 OPV3 vaccination coverage and incidence of paralytic poliomyelitis, the Americas, 1969–2001 116
7.1 A framework for analysing health systems and the context 133
9.1 Tuberculosis incidence per 100 000 population in selected countries of the former Soviet Union, 1994–2004 161
13.1 Brazil: number of cases and deaths from tuberculosis and AIDS, 1980–2003 220
14.1 Financing of HIV, tuberculosis and drug abuse services in Estonia 236
14.2 Flow of funds in the health system of the Russian Federation’s Samara Region 242
List of boxes

1.1 The plague of Athens .................................................... 3
1.2 The Black Death, the reformation, and the division of Europe ... 4
1.3 Diphtheria epidemics in the former Soviet Union: what were the causes? .......................................................... 16
1.4 Endemic avian influenza in Asia: what are the causes? ............ 17
4.1 Genetic profile of the avian influenza A virus .................... 63
4.2 The recent procession of (apparently) emerging infectious diseases .......................................................... 67
4.3 Major factors affecting probabilities of infectious disease emergence and spread .................................................. 68
6.1 Contributions of the PAHO Revolving Fund for Vaccine Procurement .......................................................... 114
7.1 Early definitions of health systems .................................... 123
7.2 World Health Organization Performance Assessment Framework .......................................................... 124
7.3 Frenk’s dimensions of health reform .................................. 125
7.4 Analysis of health reform: Hsiao’s control knobs .................. 126
7.5 Dynamic complexity ...................................................... 128
7.6 Systems dynamics modelling ........................................... 131
7.7 Systemic Rapid Assessment toolkit .................................. 134
7.8 Health system barriers to sustainable tuberculosis control ........ 135
7.9 How the health system context influences HIV control ........... 136
9.1 Improving national HIV estimates in Ukraine .......................... 158
9.2 A case study of tuberculosis control in Latvia ................... 166
10.1 High-level tuberculosis coordinating body in the Russian Federation 177
10.2 Local governments’ support for tackling multidrug-resistant tuberculosis in Latvia 180
10.3 Ensuring supply of anti-tuberculosis drugs in Belarus 181
10.4 Optimizing tuberculosis laboratory services in Georgia 182
10.5 Functions of primary health care providers in tuberculosis control 185
10.6 Primary health care involvement in TB control in the Republic of Moldova and Georgia 186
14.1 Financing of the Tuberculosis Control System in the Samara Region of the Russian Federation 243
