<i>List of figures</i>	vii
<i>List of tables</i>	ix
<i>Notation</i>	xi
<i>Acknowledgement</i>	xii
<b>CHAPTER ONE MAPS AND MODELS</b>	<b>1</b>
Introduction	1
The nature of maps	2
Why do we draw maps?	5
What maps cannot do	6
Recommended reading	10
Worksheet	10
<b>CHAPTER TWO A TYPOLOGY OF MAPS</b>	<b>15</b>
Introduction	15
Levels of measurement	15
Dimensions and units	18
The geographical dimension of distance	20
Types of data and types of map	23
Recommended reading	26
Worksheet	26
<b>CHAPTER THREE POINTS ON MAPS</b>	<b>29</b>
Introduction	29
Theory and practice in point symbol mapping	29
Some descriptors of pattern	36
Processes that generate point patterns: the independent random process	48
Testing observed patterns against those generated by the independent random process	55

Processes that generate point patterns: dependence in space	60
Recommended reading	63
Worksheet	65
<b>CHAPTER FOUR LINES ON MAPS</b>	67
Introduction	67
Theory and practice in line symbol mapping	67
Describing lines on maps	72
Analysing lines on maps	93
Some conclusions	106
Recommended reading	107
Worksheet	109
<b>CHAPTER FIVE AREAS ON MAPS</b>	111
Introduction	111
Theory and practice in area-symbol mapping	111
The estimation of area and shape	125
Properties of area patterns	131
Conclusions	145
Recommended reading	146
Worksheet	148
<b>CHAPTER SIX SURFACES ON MAPS</b>	153
Introduction	153
Theory and practice in surface mapping	154
Describing surfaces	161
Interpolation of surfaces	169
Trend surface analysis	175
Conclusions	181
Recommended reading	183
Worksheet	185
<b>CHAPTER SEVEN MAP COMPARISON</b>	187
Introduction	187
Visual comparison	188
Numerical comparison	189
The difference map approach	201
Conclusions	205
Recommended reading	206
Worksheet	206
<i>Index</i>	209
