

CONTENTS

Preface

v

PART I INTRODUCTION TO MOTOR BEHAVIOR

- 1 EVOLUTION OF A FIELD OF STUDY** 3
Understanding Movement • Origins of the Field • Summary
- 2 METHODOLOGY FOR STUDYING MOTOR PERFORMANCE** 19
Classification of Motor Skills • Basic Considerations in Measurement • Measuring Motor Behavior • Measuring and Evaluating Relationships • Summary
- 3 HUMAN INFORMATION PROCESSING** 52
The Information-Processing Model • Three Stages of Information Processing • Anticipation • Signal Detection Theory • Memory • Summary
- 4 ATTENTION AND PERFORMANCE** 89
Types of Attention • Theories of Attention • Attention and Patterns of Interference Among Tasks • Attention and Interference During Movement • Cell Phones, Attention, and Driving • Directed Attention in Action • Attention, Arousal, and Anxiety • Summary

PART II MOTOR CONTROL

- 5 SENSORY CONTRIBUTIONS TO MOTOR CONTROL** 125
Closed-Loop Control Systems • Vision • Audition • Proprioceptors • Proprioception and Motor Control • Feedforward Influences on Motor Control • Summary
- 6 CENTRAL CONTRIBUTIONS TO MOTOR CONTROL** 163
Open-Loop Processes • Central Control Mechanisms • Central Control of Rapid Movements • Motor Program Issues • Generalized Motor Programs • Summary
- 7 PRINCIPLES OF SPEED AND ACCURACY** 207
Fitts' Law: The Logarithmic Speed–Accuracy Trade-Off • The Linear Speed–Accuracy Trade-Off • The Temporal Speed–Accuracy Trade-Off • Central Contributions to the Speed–Accuracy Trade-Off • Correction Models of the Speed–Accuracy Trade-Off • Summary

8	COORDINATION	243
	Discrete Tasks • Continuous Tasks • Summary	
9	INDIVIDUAL DIFFERENCES AND CAPABILITIES	271
	Experimental Versus Differential Approaches • Abilities • Taxonomies • Prediction • Individual-Difference Variables • Summary	

PART III MOTOR LEARNING

10	MOTOR LEARNING CONCEPTS AND RESEARCH METHODS	301
	Motor Learning Defined • Measuring Motor Learning • Designing Experiments on Learning • Alternative Methods for Measuring Learning • Issues About the “Amount” of Learning • Understanding Learning and Performance Variables • Summary	
11	CONDITIONS OF PRACTICE	321
	The Power Law of Practice • Prepractice Considerations • Distribution of Practice • Variability of Practice • Scheduling Practice With Several Different Tasks • Mental Practice • Part Versus Whole Practice • Guidance • Principles of Practice Specificity • Summary	
12	AUGMENTED FEEDBACK	364
	Classifications and Definitions • Research on Augmented Feedback • Evaluating the Effects of Augmented Feedback • Knowledge of Performance • Knowledge of Results • Theoretical Issues: How Does Augmented Feedback “Work”? • Summary	
13	THE LEARNING PROCESS	401
	Characteristics of the Learning Process • Two Theories of Motor Learning • Differing Theoretical Perspectives of Motor Learning • Summary	
14	RETENTION AND TRANSFER	432
	Fundamental Distinctions and Definitions • Measuring Retention and Transfer • Retention and Motor Memory • Retention Loss • Transfer of Learning • Summary	

Appendix	461
Glossary	462
Credits	470
