

# Contents

<b>Preface</b>	<b>xiii</b>
<b>List of Contributors</b>	<b>xv</b>
<b>1 History of Obesity</b>	<b>3</b>
<i>George A. Bray</i>	
Early human history	3
History of the biology of obesity	6
Descriptions and measurements of obesity	7
Metabolism and energy balance	8
Health hazards of obesity	10
Causes of obesity	12
Treatment of obesity	15
Growth of the scientific community	16
References	17
<b>2 Epidemiology and Social Impact of Obesity</b>	<b>21</b>
<i>Neville Rigby, Rachel Leach, Tim Lobstein, Rachel Huxley, and Shiriki Kumanyika</i>	
Definitions of obesity	21
Current and recent prevalences of obesity	25
Childhood obesity	31
Predicted increases in obesity in adults	34
Comorbidities of obesity	35
Costs of obesity to society	37
Conclusions	39
References	39
<b>3 Key Methodologies in Obesity Research and Practice</b>	<b>45</b>
<i>Susan A. Jebb, Alexandra M. Johnstone, Janet Warren, Gail R. Goldberg, and Les Bluck</i>	
Anthropometric indices	45
Measurements of body composition	49
Measurements of fat distribution	53
Measuring energy balance	55
Assessing insulin sensitivity	66
References	72
<b>4 Adipose Tissue: Development, Anatomy and Functions</b>	<b>79</b>
<i>Dominique Langin, Gema Frühbeck, Keith N. Frayn, and Max Lafontan</i>	
Introduction	79
Development of white adipose tissue	79
Structure of white adipose tissue	82
Fat storage and mobilization	88
Adipokines	93
Receptors expressed by adipose tissue	98
Brown adipose tissue	98
Adipose tissue development and dynamics	102
References	103

<b>5</b>	<b>The Regulation of Energy Balance: An Overview</b>	<b>111</b>
	<i>Gareth Williams</i>	
	Regulation of body fat and composition	111
	Regulation of energy intake and expenditure	118
	Lessons from other species: informative or misleading?	120
	Causes of obesity	121
	References	124
<b>6</b>	<b>Control of Eating</b>	<b>127</b>
	<i>Wolfgang Lanhans, Joanne Harrold, Gareth Williams, and Nori Geary</i>	
	Flavour and orosensory signals	127
	Gut signals	129
	Metabolic signals	133
	Adiposity signals	136
	The neuroanatomy of eating regulation	140
	The neuropharmacology of eating control	147
	Modulating factors	151
	References	152
<b>7</b>	<b>Energy Balance in Humans</b>	<b>167</b>
	<i>Ellen E. Blaak</i>	
	Energy balance	167
	Energy intake	167
	Energy expenditure	171
	Altered sympathetic activity in obesity	178
	Substrate oxidation and predisposition to obesity	179
	References	181
<b>8</b>	<b>Aetiology of Human Obesity</b>	<b>187</b>
	<i>John R. Speakman and David Levitsky</i>	
	Lifestyle-related obesity	187
	Changes in the prevalence of obesity over time	196
	Drug-induced obesity	202
	Endocrine causes of obesity	204
	Specific genetic disorders	205
	References	208
<b>9</b>	<b>Health Hazards of Obesity: An Overview</b>	<b>215</b>
	<i>Ronald C.W. Ma, Gary T.C. Ko, and Juliana C.N. Chan</i>	
	Measures of obesity as predictors of morbidity and mortality	215
	Obesity and premature mortality	217
	Cardiovascular disease	221
	Type 2 diabetes	225
	Malignancy	228
	Gall-bladder disease	229
	Osteoarthritis	229
	Chronic renal failure	230
	Ethnic differences in obesity-related predictors of disease	230
	Conclusions	231
	References	232

<b>10 Metabolic Complications of Obesity</b>	<b>237</b>
<i>Ronald Ma and Juliana Chan</i>	
Type 2 diabetes	237
The metabolic syndrome	241
Obesity and insulin resistance	244
Obesity and the development of type 2 diabetes	254
Dyslipidaemia in obesity and the metabolic syndrome	258
References	261
<b>11 Liver Disease in Obesity</b>	<b>273</b>
<i>Nimantha de Alwis and Chris Day</i>	
Epidemiology	273
Pathogenesis of NAFLD in obesity	273
Pathology of NAFLD	275
Natural history of NAFLD	275
Clinical presentation	276
Investigation of suspected NAFLD	277
Management of patients with NAFLD	279
References	282
<b>12 Cardiovascular Disease and Obesity</b>	<b>287</b>
<i>Gianluca Iacobellis and Arya M. Sharma</i>	
General links between obesity and cardiovascular disease	287
Impact of obesity on the heart	290
Obesity and hypertension	296
Obesity and congestive heart failure	299
Obesity and coronary artery disease	300
Obesity and arrhythmias	300
Cardiac-associated adipose tissue	301
Peripheral vascular disease	304
Cardiovascular disease in 'metabolically healthy obesity'	306
Investigation of cardiovascular disease in obesity	307
Management of cardiovascular disease in obese subjects	308
References	311
<b>13 Obesity and Other Diseases</b>	<b>323</b>
<i>Mimi Chen and Robert Andrews</i>	
Musculoskeletal disorders	323
Respiratory system	324
Endocrine system	328
Gastrointestinal tract	336
Obesity and cancer	336
Psychological and psychiatric disorders	339
References	339
<b>14 Social and Psychological Factors in Obesity</b>	<b>347</b>
<i>Andrew J. Hill</i>	
Stereotyping of obesity	347
Adult attitudes	349
Social disadvantage	349

Psychological well-being	354
The way forward	359
References	360
<b>15 Assessment and Investigation of Obesity</b>	<b>367</b>
<i>Luc Van Gaal and Ilse Mertens</i>	
Causes of obesity	367
Comorbidities and health risks of obesity	370
Practical assessment of obesity	375
Personal history	375
Review of systems	380
Clinical examination	380
Screening investigations	384
Assessment of the overweight patient	385
References	385
<b>16 Managing Obesity: General Approach and Lifestyle Intervention</b>	<b>393</b>
<i>Susanne Wiesner and Jens Jordan</i>	
Selection of patients for obesity management	393
Treatment targets	394
Lifestyle modification	398
Physical activity	407
References	411
<b>17 Pharmacological Approaches for Treating Obesity</b>	<b>421</b>
<i>John Wilding</i>	
Historical context	421
Defining the efficacy of anti-obesity drugs	424
Potential targets for intervention	425
Indications for pharmacotherapy in obesity	432
Currently available treatments	433
Use of anti-obesity drugs in children and adolescents	441
Drugs causing weight gain	441
Future directions	441
References	442
<b>18 Surgical Approaches to the Management of Obesity</b>	<b>449</b>
<i>Mervyn Deitel</i>	
Rationale of bariatric surgical procedures	449
History of bariatric surgery	449
Bariatric operations in current use	454
General aspects of bariatric surgery	460
Conclusions	464
References	464
<b>19 Special Considerations in Managing Obesity</b>	<b>471</b>
<i>Mimi Chen and Robert Andrews</i>	
Managing causes of secondary obesity	471
Management of intercurrent conditions in obesity	474
Managing type 2 diabetes in obese patients	479
Management of IFG and IGT	488

Management of dyslipidaemia	489
Complementary therapies and obesity	490
References	492
<b>20 Eating Disorders in Obesity</b>	<b>499</b>
<i>Susan M. Byrne and Emma R. Dove</i>	
Binge eating and binge eating disorder	499
Night eating syndrome	502
Psychopathology associated with BED and NES in obese individuals	502
Body dissatisfaction and preoccupation with weight and shape	503
Assessment and treatment of eating disorders in obese individuals	503
References	505
<b>21 Obesity in Childhood</b>	<b>509</b>
<i>Julian Shield and Carolyn Summerbell</i>	
Defining obesity in children	509
Aetiology of childhood obesity	512
Consequences of childhood obesity	520
Investigation and assessment	522
Treatment of childhood obesity	525
Prevention of childhood obesity	531
References	533
<b>22 Prevention of Obesity</b>	<b>543</b>
<i>Tim Lobstein</i>	
Primary and secondary obesity prevention	543
Extending the evidence base through future studies	554
Tertiary prevention	554
Cost-effectiveness of obesity prevention strategies	556
Investing in health	557
Inequalities and health promotion	557
Conclusions	558
References	558
<b>23 A Look to the Future</b>	<b>565</b>
<i>Gareth Williams and Gema Frühbeck</i>	
Obesity and its fellow-travellers: here to stay	565
More secrets from fat?	566
Energy balance and obesity: signals and noise	567
Managing obesity: must do better	567
Prevention: better than cure, but ...	569
Whose problem is it anyway?	569
<b>Index</b>	<b>571</b>
