

Table of Contents

Preface	vii
1 Spoken and written English	1
1.1 Meanings of the terms 'spoken' and 'written' English	2
1.2 Analytical units for the spoken and written codes	9
1.3 Previous research on code differences	14
1.4 Summary	30
2 The structure of the noun phrase and the clause complex	31
2.1 The noun phrase	31
2.1.1 Determiners	33
2.1.2 Premodification	34
2.1.3 Postmodification	37
2.1.4 Distributional differences of complexity of noun phrases	41
2.2 The clause complex	43
2.2.1 Coordination and subordination	43
2.2.2 Distributional differences of complexity of clause complexes	46
2.3 Summary	47
3 Complexity in language	49
3.1 Definitions of complexity in language	49
3.1.1 Cognitive complexity, semantic complexity, complexity of meaning, processing complexity and formal complexity – an overview	49
3.1.1.1 Cognitive complexity	50
3.1.1.2 Processing complexity	51
3.1.1.3 Formal complexity	53
3.2 Measuring formal complexity	57
3.2.1 Complexity metrics	58
3.2.2 Measuring complexity within noun phrases and clause complexes	68
3.3 Summary	74

4	Pattern grammar and complexity	75
4.1	'Open choice' versus 'idiom principle'	77
4.2	Terminological diversity for preconstructed structures	78
4.3	Patterns and complexity	86
4.4	Summary	91
5	Corpus data	93
5.1	The British Component of the International Corpus of English (ICE-GB)	93
5.2	Spoken and written data in ICE-GB	95
5.3	Analysis of corpus data	97
6	Complexity within nominal groups	101
6.1	Noun phrases in spoken English	103
6.2	Noun phrases in written English in comparison to spoken English	110
6.3	Summary	119
7	Complexity within clause complexes	121
7.1	Clause complexes in spoken English	123
7.2	Clause complexes in written English in comparison to spoken English	127
7.3	Summary	137
8	The use of patterns in spoken and written English	139
8.1	Phrasal patterns	140
8.2	Clausal patterns	146
8.3	Comment clauses	150
8.4	Summary	151
9	Summary	153
	List of References	157
	Index	167
