## Part I Introduction

<b>1 Nature of Behavioral Economics</b>	<b>3</b>
1.1 Behavioral economics and the standard economic model	4
<i>What is behavioral economics?</i>	4
<i>The standard economic model</i>	5
<i>Shortcomings of the standard economic model</i>	7
<i>Evaluating theories</i>	8
1.2 History and evolution of behavioral economics	10
<i>The classical and neoclassical approaches</i>	10
<i>Post-war economic approaches</i>	11
<i>The resurgence of psychology</i>	11
<i>Behavioral economics, experimental economics, and neuroeconomics</i>	12
1.3 Methods	14
<i>Economists' methods</i>	14
<i>Psychologists' methods</i>	15
<i>Methodological issues</i>	16
<i>Consilience</i>	21
<i>Reductionism</i>	23
1.4 Objectives, scope, and structure	25
<i>Objectives</i>	25
<i>Evolutionary psychology</i>	25
<i>Normative aspects</i>	27
<i>Structure</i>	28

1.5 Summary	29
1.6 Applications	29
Case 1.1 Loss-aversion in monkeys	30
Case 1.2 Money illusion	32
Case 1.3 Altruism	35

## Part II Foundations

<b>2 Values, Attitudes, Preferences, and Choices</b>	<b>39</b>
2.1 The standard economic model	41
<i>Consumer behavior</i>	41
<i>Preferences</i>	41
<i>Indifference curves</i>	42
<i>Equilibrium</i>	42
2.2 Axioms, assumptions, and definitions	44
<i>Axioms</i>	44
<i>Assumptions</i>	45
<i>Definitions</i>	47
2.3 Weaknesses of the standard economic model	49
<i>Happiness is a three-act tragedy</i>	49
<i>Discrepancies between objective causes and subjective effects</i>	50
<i>Expectations effects</i>	51
<i>Addiction and abstention</i>	51
<i>Endowment effects</i>	52
<i>Framing effects</i>	53
2.4 Nature of utility	54
<i>Historical evolution</i>	54
<i>Cardinal and ordinal utility</i>	55
<i>Decision utility</i>	55
<i>Experienced utility</i>	58
<i>Endowment and contrast effects</i>	58
<i>Anticipatory utility</i>	61
<i>Residual utility</i>	61
<i>Diagnostic utility</i>	62
2.5 Measurement of utility	62
<i>Total utility and objective happiness</i>	62
<i>Dimensions of utility</i>	63
<i>Criteria for measurement</i>	64
2.6 An expected psychological utility model	68
<i>Foundations in evolutionary neurobiology</i>	68
<i>Nature of the model</i>	69

2.7	Policy implications	70
	<i>Jury awards of punitive damages</i>	70
	<i>The Contingent Valuation Method (CVM) and public goods</i>	72
	<i>Crime and Punishment</i>	73
2.8	Summary	75
2.9	Applications	76
Case 2.1	When abstention is better than moderate consumption	76
Case 2.2	Environmental protection	80
Case 2.3	Anti-Social Behaviour Orders (ASBOs), punishment and happiness	81
<b>3</b>	<b>Decision-Making under Risk and Uncertainty</b>	<b>84</b>
3.1	Background	86
	<i>Expected utility theory</i>	86
	<i>Anomalies in expected utility theory</i>	90
3.2	Conventional approaches to modifying expected utility theory	93
	<i>Weighted utility theory</i>	93
	<i>Disappointment theory</i>	93
	<i>Betweenness models</i>	94
	<i>Nonbetweenness models</i>	94
	<i>Decision-weighting theories</i>	95
	<i>Rank-dependent expected utility theory</i>	96
	<i>Conclusions</i>	97
3.3	Prospect theory	98
	<i>Editing</i>	99
	<i>Evaluation</i>	100
3.4	Reference points	102
	<i>Nature</i>	102
	<i>Psychological foundation</i>	103
	<i>Empirical evidence</i>	104
3.5	Loss-aversion	105
	<i>Nature</i>	105
	<i>Psychological foundation</i>	106
	<i>Empirical evidence</i>	106
3.6	Shape of the utility function	108
	<i>Nature</i>	108
	<i>Psychological foundation</i>	111
	<i>Empirical evidence</i>	112
3.7	Decision weighting	114
	<i>Nature</i>	114

	<i>Psychological foundation</i>	120
	<i>Empirical evidence</i>	123
3.8	Criticisms of prospect theory	127
	<i>Lack of normative status</i>	127
	<i>The nature of the utility function</i>	128
	<i>The determination of reference points</i>	129
	<i>Endowment effects and experience in the market</i>	130
	<i>The discovered preference hypothesis and misconceptions</i>	131
	<i>The nature of framing effects</i>	134
3.9	Conclusions	137
	<i>Violations of monotonicity</i>	137
	<i>Violations of transitivity</i>	138
	<i>Event-splitting effects</i>	139
	<i>Other factors</i>	139
3.10	Summary	141
3.11	Applications	143
Case 3.1	The endowment effect	143
Case 3.2	Insensitivity to bad income news	145
Case 3.3	Fears of terrorist attacks	146
<b>4</b>	<b>Mental Accounting</b>	<b>149</b>
4.1	Nature and components of mental accounting	150
4.2	Framing and editing	150
	<i>Implications of prospect theory</i>	150
	<i>Hedonic editing</i>	151
	<i>Evaluation of outcomes and decision-making</i>	155
4.3	Budgeting and fungibility	157
	<i>Consumption budgeting</i>	158
	<i>Income budgeting</i>	160
	<i>Wealth budgeting</i>	161
	<i>Time budgeting</i>	164
	<i>Policy implications</i>	164
4.4	Choice bracketing and dynamics	167
	<i>Opening and closing accounts</i>	168
	<i>Prior outcome effects</i>	172
	<i>Myopic Loss-Aversion (MLA)</i>	173
	<i>The diversification heuristic</i>	175
4.5	Summary	176
4.6	Applications	177
Case 4.1	The equity premium puzzle	178

Case 4.2	Why you can't find a cab on a rainy day?	181
Case 4.3	Consumer spending and housing wealth	184

### Part III Intertemporal Choice

<b>5</b>	<b>The Discounted Utility Model</b>	<b>189</b>
5.1	Introduction	190
5.2	Origins of the discounted utility model	190
	<i>John Rae and the desire for accumulation</i>	191
	<i>Two different approaches</i>	191
	<i>Böhm-Bawerk and trade-offs</i>	192
	<i>Irving Fisher and indifference curve analysis</i>	192
	<i>Samuelson and the discounted utility model</i>	193
5.3	Features of the discounted utility model	194
	<i>Integration of new alternatives with existing plans</i>	195
	<i>Utility independence</i>	195
	<i>Consumption independence</i>	195
	<i>Stationary instantaneous utility</i>	196
	<i>Stationary discounting</i>	196
	<i>Constant discounting</i>	197
	<i>Independence of discounting from consumption</i>	197
	<i>Diminishing marginal utility and positive time preference</i>	198
5.4	Methodology	198
	<i>Types of empirical study</i>	199
	<i>Methodological issues</i>	203
	<i>Calculation of the discount rate</i>	205
5.5	Anomalies in the Discounted Utility Model	206
	<i>The "sign effect"</i>	206
	<i>The "magnitude effect"</i>	207
	<i>The "delay-speedup" asymmetry</i>	208
	<i>Preference for improving sequences</i>	208
	<i>The "date/delay effect"</i>	209
	<i>Violations of independence and preference for spread</i>	210
	<i>Implications of anomalies</i>	211
5.6	Summary	212
5.7	Applications	213
Case 5.1	Empirical estimates of discount rates	213
<b>6</b>	<b>Alternative Intertemporal Choice Models</b>	<b>218</b>
6.1	Time preference	220
	<i>Consumption reallocation</i>	220
	<i>Intertemporal arbitrage</i>	220

	<i>Concave utility</i>	221
	<i>Uncertainty</i>	221
	<i>Inflation</i>	223
	<i>Expectations of changes in utility</i>	223
	<i>Anticipatory utility</i>	223
	<i>Visceral influences</i>	224
	<i>What is time preference?</i>	224
6.2	Hyperbolic discounting	226
	<i>Time-inconsistent preferences</i>	226
	<i>Nature of hyperbolic discounting</i>	227
	<i>Implications of hyperbolic discounting</i>	230
	<i>Criticisms of the hyperbolic discounting approach</i>	235
6.3	Modifying the instantaneous utility function	236
	<i>Habit-formation models</i>	237
	<i>Prospect Theory models</i>	237
	<i>Anticipatory utility models</i>	238
	<i>Visceral influence models</i>	239
6.4	More radical models	240
	<i>Projection bias</i>	240
	<i>Mental accounting models</i>	241
	<i>Multiple-self models</i>	242
	<i>Dual-self models</i>	244
	<i>The procedural approach</i>	246
	<i>Conclusion</i>	248
6.5	Policy implications	249
	<i>Individuals</i>	249
	<i>Firms</i>	250
	<i>Government</i>	252
6.6	Summary	255
6.7	Applications	257
	Case 6.1 Price plans for gym memberships	257
	Case 6.2 The savings problem	258
	Case 6.3 The desire for rising consumption profiles	263

## Part IV Strategic Interaction

<b>7</b>	<b>Behavioral Game Theory</b>	<b>267</b>
7.1	Nature of behavioral game theory	269
	<i>Elements of a game</i>	269
	<i>Types of game</i>	272
	<i>Behavioral game theory and standard game theory</i>	274

7.2	Equilibrium	275
	<i>Discrete strategies</i>	275
	<i>Continuous strategies</i>	279
7.3	Mixed strategies	285
	<i>Pure and mixed strategies</i>	285
	<i>Unpredictability</i>	286
	<i>Randomization</i>	287
	<i>Empirical studies of mixed-strategy equilibrium</i>	290
	<i>Behavioral conclusions</i>	292
7.4	Bargaining	293
	<i>Unstructured bargaining</i>	294
	<i>Structured bargaining</i>	296
	<i>Bargaining with incomplete information</i>	298
7.5	Iterated games	300
	<i>Iteration and dominance</i>	300
	<i>Beauty contest games</i>	302
	<i>Iterations leading to decreased payoffs</i>	303
	<i>Iterations leading to increased payoffs</i>	304
	<i>Behavioral conclusions</i>	305
7.6	Signaling	307
	<i>Nature and functions of signaling</i>	307
	<i>Signaling and competition</i>	307
	<i>Signaling and cooperation</i>	309
	<i>Empirical findings from signaling games</i>	311
7.7	Learning	312
	<i>Learning and game theory</i>	312
	<i>Learning theories and models</i>	313
	<i>Reinforcement learning</i>	315
	<i>Belief learning</i>	316
	<i>Experience-weighted attraction learning</i>	317
	<i>Rule learning</i>	318
	<i>Conclusions regarding learning theory</i>	318
7.8	Summary	319
7.9	Applications	321
	Case 7.1 Bargaining and self-serving bias	321
	Case 7.2 Market entry in monopoly	322
<b>8</b>	<b>Fairness and Social Preferences</b>	<b>325</b>
8.1	The standard economic model	327
	<i>Nature</i>	327
	<i>Anomalies</i>	328

8.2	Fairness	330
	<i>The nature of fairness</i>	330
	<i>Fairness games</i>	332
	<i>Neuroeconomics and preferences for fairness</i>	339
8.3	Factors affecting social preferences	341
	<i>Methodological and structural variables</i>	341
	<i>Descriptive variables</i>	349
	<i>Demographic variables</i>	350
	<i>Modeling social preferences</i>	353
8.4	Inequality-aversion models	354
	<i>The Fehr–Schmidt model</i>	355
	<i>The Bolton–Ockenfels model</i>	357
8.5	Reciprocity models	359
	<i>The Rabin model</i>	359
	<i>The Falk–Fischbacher model</i>	362
8.6	The role of evolutionary psychology	363
	<i>Competing versus underlying theories</i>	364
	<i>Questionable status as a scientific theory</i>	364
	<i>Individual development variations</i>	364
	<i>Cross-cultural variations</i>	365
	<i>One-shot and repeated games</i>	365
8.7	Policy implications	366
	<i>Market clearing</i>	366
	<i>Public goods</i>	367
	<i>Crowding out of intrinsic incentives</i>	368
8.8	Summary	370
8.9	Applications	371
	Case 8.1 The Wason Test	372
	Case 8.2 Public goods and free riding	376
	Case 8.3 Sales force compensation	378

## Part V Conclusion

<b>9</b>	<b>Rationality</b>	<b>383</b>
9.1	Nature of rationality	385
	<i>Defining rationality</i>	385
	<i>Action and attitude</i>	390
	<i>Criteria for rationality</i>	391
9.2	Types of violation of rationality	392
	<i>Reasoning</i>	393
	<i>Choice</i>	394

	<i>Nature of utility</i>	396
	<i>The role of visceral factors</i>	396
	<i>Self-deception</i>	399
9.3	Objections to violations of rationality	400
	<i>Trivializations</i>	400
	<i>Misinterpretations</i>	403
	<i>Inappropriate tests</i>	405
9.4	Causes of irrationality	408
	<i>Emotional distress</i>	408
	<i>Memory – homeostasis and allostasis</i>	410
	<i>Cognitive dissonance</i>	415
	<i>Threat to self-esteem</i>	416
	<i>Failure of self-regulation</i>	417
	<i>Decision fatigue</i>	417
	<i>Interpersonal rejection</i>	418
	<i>Foundations in evolutionary neurobiology</i>	418
9.5	Consequences of irrationality	422
	<i>Deliberate self-harm</i>	422
	<i>Trade-offs</i>	423
	<i>Counterproductive strategies</i>	424
9.6	Critique of expected utility theory as a normative theory	424
	<i>Limits to hedonic introspection</i>	425
	<i>The adverse effects of hedonic introspection on well-being</i>	426
	<i>The self-defeating nature of happiness-seeking</i>	427
9.7	Summary	430
9.8	Applications	431
Case 9.1	Drug addiction	431
Case 9.2	Don't go to the supermarket when you are hungry	432
Case 9.3	Pursuing happiness	435
<b>10</b>	<b>The Future of Behavioral Economics</b>	<b>438</b>
10.1	The agenda of behavioral economics	439
	<i>Good theories</i>	439
	<i>Examples of behavioral revisions to the SEM</i>	440
10.2	Criticisms of behavioral economics	442
	<i>A profusion of models</i>	442
	<i>Lack of normative status</i>	443
10.3	Methodology	444
	<i>Assumptions and conclusions</i>	444

	<i>The role of evolutionary psychology</i>	445
	<i>Parsimony and universality</i>	447
10.4	Future directions for behavioral economics	449
	<i>Decision-making heuristics</i>	449
	<i>The formation of social preferences</i>	450
	<i>Learning processes</i>	450
	<i>The theory of mental representations</i>	451
	<i>The role of the emotions in decision-making</i>	451
	<i>The role of neurobiology</i>	452
10.5	Policy implications	453
	<i>Individuals</i>	453
	<i>Firms</i>	455
	<i>Governments</i>	457
10.6	Applications	460
Case 10.1	The effects of brain damage on decision-making	460
Case 10.2	Born gay?	462
Case 10.3	The bioeconomic causes of war	464
	<i>References</i>	468
	<i>Index</i>	503
