About the Authors xxxi

Chapter 1 Data and Statistics 1

Statistics in Practice: *BusinessWeek* 2

1.1 Applications in Business and Economics 3

Accounting 3

Finance 3

Marketing 4

Production 4

Economics 4

1.2 Data 5

Elements, Variables, and Observations 5

Scales of Measurement 6

Categorical and Quantitative Data 7

Cross-Sectional and Time Series Data 7

1.3 Data Sources 10

Existing Sources 10

Statistical Studies 11

Data Acquisition Errors 13

1.4 Descriptive Statistics 13

1.5 Statistical Inference 15

1.6 Statistical Analysis Using Microsoft Excel 17

Data Sets and Excel Worksheets 17

Using Excel for Statistical Analysis 19

1.7 Ethical Guidelines for Statistical Practice 20

Summary 21

Glossary 22

Supplementary Exercises 23

Appendix An Introduction to StatTools 30

Chapter 2 Descriptive Statistics: Tabular and Graphical Presentations 33

Statistics in Practice: *Colgate-Palmolive Company* 34

2.1 Summarizing Categorical Data 35

Frequency Distribution 35

Using Excel's COUNTIF Function to Construct a Frequency Distribution 36

Relative Frequency and Percent Frequency Distributions	36
Using Excel to Construct Relative Frequency and Percent Frequency Distributions	37
Bar Charts and Pie Charts	39
Using Excel's Chart Tools to Construct a Bar Chart and a Pie Chart	39
2.2 Summarizing Quantitative Data	44
Frequency Distribution	44
Using Excel's PivotTable Report to Construct a Frequency Distribution	46
Relative Frequency and Percent Frequency Distributions	48
Dot Plot	49
Histogram	49
Using Excel's PivotChart Report to Construct a Frequency Distribution and a Histogram	51
Cumulative Distributions	52
Ogive	53
2.3 Exploratory Data Analysis: Stem-and-Leaf Display	58
2.4 Crosstabulations and Scatter Diagrams	62
Crosstabulation	63
Using Excel's PivotTable Report to Construct a Crosstabulation	65
Simpson's Paradox	69
Scatter Diagram and Trendline	70
Using Excel's Chart Tools to Construct a Scatter Diagram and a Trendline	71
Summary	78
Glossary	79
Key Formulas	80
Supplementary Exercises	80
Case Problem 1 Pelican Stores	86
Case Problem 2 Motion Picture Industry	87
Appendix 2.1 Using Excel's PivotTable Report and PivotChart Report to Summarize Categorical Data	88
Appendix 2.2 Using StatTools for Tabular and Graphical Presentations	91
Chapter 3 Descriptive Statistics: Numerical Measures	93
Statistics in Practice: <i>Small Fry Design</i>	94
3.1 Measures of Location	95
Mean	95
Median	96
Mode	97
Using Excel to Compute the Mean, Median, and Mode	98
Percentiles	98
Quartiles	100
Using Excel's Rank and Percentile Tool to Compute Percentiles and Quartiles	101

3.2 Measures of Variability	106
Range	107
Interquartile Range	107
Variance	107
Standard Deviation	109
Using Excel to Compute the Sample Variance and Sample Standard Deviation	110
Coefficient of Variation	111
Using Excel's Descriptive Statistics Tool	111
3.3 Measures of Distribution Shape, Relative Location, and Detecting Outliers	115
Distribution Shape	115
z-Scores	116
Chebyshev's Theorem	117
Empirical Rule	118
Detecting Outliers	119
3.4 Exploratory Data Analysis	122
Five-Number Summary	122
Box Plot	123
3.5 Measures of Association Between Two Variables	127
Covariance	127
Interpretation of the Covariance	129
Correlation Coefficient	131
Interpretation of the Correlation Coefficient	132
Using Excel to Compute the Covariance and Correlation Coefficient	133
3.6 The Weighted Mean and Working with Grouped Data	137
Weighted Mean	137
Grouped Data	138
Summary	142
Glossary	143
Key Formulas	144
Supplementary Exercises	146
Case Problem 1 Pelican Stores	149
Case Problem 2 Motion Picture Industry	151
Case Problem 3 Business Schools of Asia-Pacific	151
Appendix Descriptive Statistics and Box Plot Using StatTools	153

Chapter 4 Introduction to Probability 155

Statistics in Practice: Rohm and Haas Company	156
4.1 Experiments, Counting Rules, and Assigning Probabilities	157
Counting Rules, Combinations, and Permutations	158
Assigning Probabilities	162
Probabilities for the KP&L Project	164

4.2	Events and Their Probabilities	168
4.3	Some Basic Relationships of Probability	171
	Complement of an Event	171
	Addition Law	172
4.4	Conditional Probability	177
	Independent Events	181
	Multiplication Law	181
4.5	Bayes' Theorem	185
	Tabular Approach	188
	Using Excel to Compute Posterior Probabilities	189
	Summary	191
	Glossary	192
	Key Formulas	193
	Supplementary Exercises	193
	Case Problem Hamilton County Judges	197

Chapter 5 Discrete Probability Distributions 200

	Statistics in Practice: Citibank	201
5.1	Random Variables	202
	Discrete Random Variables	202
	Continuous Random Variables	203
5.2	Discrete Probability Distributions	204
5.3	Expected Value and Variance	210
	Expected Value	210
	Variance	210
	Using Excel to Compute the Expected Value, Variance, and Standard Deviation	211
5.4	Binomial Probability Distribution	215
	A Binomial Experiment	216
	Martin Clothing Store Problem	217
	Using Excel to Compute Binomial Probabilities	221
	Expected Value and Variance for the Binomial Distribution	223
5.5	Poisson Probability Distribution	226
	An Example Involving Time Intervals	226
	An Example Involving Length or Distance Intervals	227
	Using Excel to Compute Poisson Probabilities	228
5.6	Hypergeometric Probability Distribution	231
	Using Excel to Compute Hypergeometric Probabilities	233
	Summary	235
	Glossary	235
	Key Formulas	236
	Supplementary Exercises	237

Chapter 6 Continuous Probability Distributions 240

Statistics in Practice: Procter & Gamble 241

6.1 Uniform Probability Distribution 242

Area as a Measure of Probability 243

6.2 Normal Probability Distribution 246

Normal Curve 246

Standard Normal Probability Distribution 248

Computing Probabilities for Any Normal Probability Distribution 253

Great Tire Company Problem 254

Using Excel to Compute Normal Probabilities 256

6.3 Exponential Probability Distribution 261

Computing Probabilities for the Exponential Distribution 262

Relationship Between the Poisson and Exponential Distributions 263

Using Excel to Compute Exponential Probabilities 263

Summary 266

Glossary 266

Key Formulas 266

Supplementary Exercises 267

Case Problem Specialty Toys 269

Chapter 7 Sampling and Sampling Distributions 271

Statistics in Practice: Meadwestvaco Corporation 272

7.1 The Electronics Associates Sampling Problem 274

7.2 Selecting a Sample 274

Sampling from a Finite Population 274

Sampling from a Process 277

7.3 Point Estimation 280

Practical Advice 282

7.4 Introduction to Sampling Distributions 283

7.5 Sampling Distribution of \bar{x} 286

Expected Value of \bar{x} 286

Standard Deviation of \bar{x} 287

Form of the Sampling Distribution of \bar{x} 288

Sampling Distribution of \bar{x} for the EAI Problem 289

Practical Value of the Sampling Distribution of \bar{x} 290

Relationship Between Sample Size and the Sampling
Distribution of \bar{x} 292

7.6 Sampling Distribution of \bar{p} 295

Expected Value of \bar{p} 296

Standard Deviation of \bar{p} 296

Form of the Sampling Distribution of \bar{p} 297

Practical Value of the Sampling Distribution of \bar{p} 298

7.7 Other Sampling Methods	301
Stratified Random Sampling	301
Cluster Sampling	302
Systematic Sampling	302
Convenience Sampling	303
Judgment Sampling	303
Summary	304
Glossary	304
Key Formulas	305
Supplementary Exercises	305
Appendix Random Sampling with StatTools	307

Chapter 8 Interval Estimation 309

Statistics in Practice: Food Lion	310
8.1 Population Mean: σ Known	311
Margin of Error and the Interval Estimate	311
Using Excel	315
Practical Advice	317
8.2 Population Mean: σ Unknown	319
Margin of Error and the Interval Estimate	320
Using Excel	323
Practical Advice	324
Using a Small Sample	324
Summary of Interval Estimation Procedures	326
8.3 Determining the Sample Size	329
8.4 Population Proportion	332
Using Excel	333
Determining the Sample Size	335
Summary	339
Glossary	340
Key Formulas	340
Supplementary Exercises	341
Case Problem 1 <i>Young Professional Magazine</i>	344
Case Problem 2 <i>Gulf Real Estate Properties</i>	345
Case Problem 3 <i>Metropolitan Research, Inc.</i>	346
Appendix Interval Estimation with StatTools	347

Chapter 9 Hypothesis Tests 349

Statistics in Practice: John Morrell & Company	350
9.1 Developing Null and Alternative Hypotheses	351
Testing Research Hypotheses	351
Testing the Validity of a Claim	351

Testing in Decision-Making Situations	352
Summary of Forms for Null and Alternative Hypotheses	352
9.2 Type I and Type II Errors	353
9.3 Population Mean: σ Known	356
One-Tailed Tests	356
Two-Tailed Test	362
Using Excel	365
Summary and Practical Advice	367
Relationship Between Interval Estimation and Hypothesis Testing	368
9.4 Population Mean: σ Unknown	372
One-Tailed Tests	373
Two-Tailed Test	374
Using Excel	375
Summary and Practical Advice	378
9.5 Population Proportion	381
Using Excel	383
Summary	385
Summary	388
Glossary	388
Key Formulas	389
Supplementary Exercises	389
Case Problem 1 Quality Associates, Inc.	391
Case Problem 2 Unemployment Study	393
Appendix Hypothesis Testing with StatTools	393

Chapter 10 Comparisons Involving Means, Experimental Design, and Analysis of Variance 395

Statistics in Practice: U.S. Food and Drug Administration	396
10.1 Inferences About the Difference Between Two Population Means: σ_1 and σ_2 Known	397
Interval Estimation of $\mu_1 - \mu_2$	397
Using Excel to Construct a Confidence Interval	400
Hypothesis Tests About $\mu_1 - \mu_2$	402
Using Excel to Conduct a Hypothesis Test	403
Practical Advice	404
10.2 Inferences About the Difference Between Two Population Means: σ_1 and σ_2 Unknown	407
Interval Estimation of $\mu_1 - \mu_2$	408
Using Excel to Construct a Confidence Interval	409
Hypothesis Tests About $\mu_1 - \mu_2$	411
Using Excel to Conduct a Hypothesis Test	413
Practical Advice	415
10.3 Inferences About the Difference Between Two Population Means: Matched Samples	419
Using Excel to Conduct a Hypothesis Test	422

10.4	An Introduction to Experimental Design and Analysis of Variance	426
	Data Collection	428
	Assumptions for Analysis of Variance	429
	Analysis of Variance: A Conceptual Overview	429
10.5	Analysis of Variance and the Completely Randomized Design	432
	Between-Treatments Estimate of Population Variance	433
	Within-Treatments Estimate of Population Variance	434
	Comparing the Variance Estimates: The F Test	434
	ANOVA Table	436
	Using Excel	437
	Testing for the Equality of k Population Means: An Observational Study	439
	Summary	443
	Glossary	444
	Key Formulas	444
	Supplementary Exercises	446
	Case Problem 1 Par, Inc.	450
	Case Problem 2 Wentworth Medical Center	451
	Appendix Comparisons Involving Means Using StatTools	452

Chapter 11 Comparisons Involving Proportions and a Test of Independence 455

	Statistics in Practice: United Way	456
11.1	Inferences About the Difference Between Two Population Proportions	457
	Interval Estimation of $p_1 - p_2$	457
	Using Excel to Construct a Confidence Interval	459
	Hypothesis Tests About $p_1 - p_2$	460
	Using Excel to Conduct a Hypothesis Test	462
11.2	Hypothesis Test for Proportions of A Multinomial Population	467
	Using Excel to Conduct a Goodness of Fit Test	471
11.3	Test of Independence	474
	Using Excel to Conduct a Test of Independence	478
	Summary	482
	Glossary	482
	Key Formulas	483
	Supplementary Exercises	484
	Case Problem A Bipartisan Agenda for Change	488

Chapter 12 Simple Linear Regression 489

	Statistics in Practice: Alliance Data Systems	490
12.1	Simple Linear Regression Model	491
	Regression Model and Regression Equation	491
	Estimated Regression Equation	492

12.2	Least Squares Method	494
	Using Excel's Chart Tools to Construct a Scatter Diagram and Compute the Estimated Regression Equation	498
12.3	Coefficient of Determination	506
	Using Excel to Compute the Coefficient of Determination	509
	Correlation Coefficient	509
12.4	Model Assumptions	514
12.5	Testing for Significance	516
	Estimate of σ^2	516
	t Test	517
	Confidence Interval for β_1	518
	F Test	519
	Some Cautions About the Interpretation of Significance Tests	521
12.6	Excel's Regression Tool	525
	Using Excel's Regression Tool for the Armand's Pizza Parlors Example	525
	Interpretation of Estimated Regression Equation Output	527
	Interpretation of ANOVA Output	527
	Interpretation of Regression Statistics Output	528
12.7	Using the Estimated Regression Equation for Estimation and Prediction	531
	Point Estimation	531
	Interval Estimation	532
	Confidence Interval for the Mean Value of y	532
	Prediction Interval for an Individual Value of y	533
	Using Excel to Develop Confidence and Prediction Interval Estimates	535
12.8	Residual Analysis: Validating Model Assumptions	540
	Residual Plot Against x	541
	Residual Plot Against \hat{y}	543
	Using Excel's Regression Tool to Construct a Residual Plot	544
	Summary	546
	Glossary	547
	Key Formulas	548
	Supplementary Exercises	550
	Case Problem 1 Measuring Stock Market Risk	556
	Case Problem 2 U.S. Department of Transportation	557
	Case Problem 3 Alumni Giving	558
	Case Problem 4 Major League Baseball Team Values	558
	Appendix Regression Analysis Using StatTools	560

Chapter 13 Multiple Regression 562

Statistics in Practice: International Paper 563

13.1	Multiple Regression Model	564
	Regression Model and Regression Equation	564
	Estimated Multiple Regression Equation	564

13.2	Least Squares Method	565
	An Example: Butler Trucking Company	566
	Using Excel's Regression Tool to Develop the Estimated Multiple Regression Equation	569
	Note on Interpretation of Coefficients	570
13.3	Multiple Coefficient of Determination	576
13.4	Model Assumptions	579
13.5	Testing for Significance	580
	<i>F</i> Test	580
	<i>t</i> Test	583
	Multicollinearity	584
13.6	Using the Estimated Regression Equation for Estimation and Prediction	587
13.7	Categorical Independent Variables	589
	An Example: Johnson Filtration, Inc.	590
	Interpreting the Parameters	592
	More Complex Categorical Variables	594
	Summary	598
	Glossary	598
	Key Formulas	599
	Supplementary Exercises	599
	Case Problem 1 Consumer Research, Inc.	606
	Case Problem 2 Alumni Giving	607
	Case Problem 3 Predicting Winning Percentage for the NFL	607
	Appendix Multiple Regression Analysis Using StatTools	609

Chapter 14 Statistical Methods for Quality Control 610

Statistics in Practice: Dow Chemical 611

14.1 Philosophies and Frameworks 612

 Malcolm Baldrige National Quality Award 612

 ISO 9000 613

 Six Sigma 613

14.2 Statistical Process Control 615

 Control Charts 616

\bar{x} Chart: Process Mean and Standard Deviation Known 617

\bar{x} Chart: Process Mean and Standard Deviation Unknown 619

R Chart 622

 Using Excel to Construct an *R* Chart and an \bar{x} Chart 624

p Chart 626

np Chart 628

 Interpretation of Control Charts 629

14.3 Acceptance Sampling 632

 KALI, Inc.: An Example of Acceptance Sampling 633

 Computing the Probability of Accepting a Lot 634

Selecting an Acceptance Sampling Plan 636

Multiple Sampling Plans 638

Summary 640

Glossary 640

Key Formulas 641

Supplementary Exercises 642

Appendix Control Charts Using StatTools 644

Appendix A: References and Bibliography 645

Appendix B: Tables 648

Appendix C: Summation Notation 659

Appendix D: Self-Test Solutions and Answers to Exercises 661

**Appendix E: Microsoft Excel 2007 and Tools
for Statistical Analysis 693**

Index 705
