Preface	ix
Curriculum Vitae	
<i>Hideki Omori</i>	xiii
<hr/>	
Part I Global Analysis and Infinite-Dimensional Lie Groups	1
<hr/>	
Aspects of Stochastic Global Analysis	
<i>K. D. Elworthy</i>	3
A Lie Group Structure for Automorphisms of a Contact Weyl Manifold	
<i>Naoya Miyazaki</i>	25
<hr/>	
Part II Riemannian Geometry	45
<hr/>	
Projective Structures of a Curve in a Conformal Space	
<i>Osamu Kobayashi</i>	47
Deformations of Surfaces Preserving Conformal or Similarity Invariants	
<i>Atsushi Fujioka, Jun-ichi Inoguchi</i>	53
Global Structures of Compact Conformally Flat Semi-Symmetric Spaces of Dimension 3 and of Non-Constant Curvature	
<i>Midori S. Goto</i>	69
Differential Geometry of Analytic Surfaces with Singularities	
<i>Takao Sasai</i>	85

Part III Symplectic Geometry and Poisson Geometry	91
<hr/>	
The Integration Problem for Complex Lie Algebroids <i>Alan Weinstein</i>	93
Reduction, Induction and Ricci Flat Symplectic Connections <i>Michel Cahen, Simone Gutt</i>	111
Local Lie Algebra Determines Base Manifold <i>Janusz Grabowski</i>	131
Lie Algebroids Associated with Deformed Schouten Bracket of 2-Vector Fields <i>Kentaro Mikami, Tadayoshi Mizutani</i>	147
Parabolic Geometries Associated with Differential Equations of Finite Type <i>Keizo Yamaguchi, Tomoaki Yatsui</i>	161
<hr/>	
Part IV Quantizations and Noncommutative Geometry	211
<hr/>	
Toward Geometric Quantum Theory <i>Hideki Omori</i>	213
Resonance Gyrons and Quantum Geometry <i>Mikhail Karasev</i>	253
A Secondary Invariant of Foliated Spaces and Type III_λ von Neumann Algebras <i>Hitoshi Moriyoshi</i>	277
The Geometry of Space-Time and Its Deformations: A Physical Perspective <i>Daniel Sternheimer</i>	287
Geometric Objects in an Approach to Quantum Geometry <i>Hideki Omori, Yoshiaki Maeda, Naoya Miyazaki, Akira Yoshioka</i>	303
