

Contents

Series Editor's note	viii
Preface	ix
Acknowledgments	xvii
 Chapter One	 1
Elizabeth Bernhardt	
If reading is reader-based, can there be a computer-adaptive test of reading?	
 Chapter Two	 11
William Grabe	
Developments in reading research and their implications for computer-adaptive reading assessment	
 Chapter Three	 49
J. Charles Anderson	
Reading constructs and reading assessment	
 Chapter Four	 71
Jerry Larson	
Considerations for testing reading proficiency via computer-adaptive testing	
 Chapter Five	 91
Patricia Dunkel	
Research and development of a computer-adaptive test of listening comprehension in the less-commonly taught language Hausa	
 Chapter Six	 122
Michael Laurier	
The development of an adaptive test for placement in French	

Chapter Seven	136
T. F. McNamara	
Computer-adaptive testing: A view from outside	
Chapter Eight	150
Carol Chapelle	
From reading theory to testing practice	
Chapter Nine	167
Daniel Eignor	
Selected technical issues in the creation of computer-adaptive tests of second language reading proficiency	
Chapter Ten	182
John M. Linacre	
A measurement approach to computer-adaptive testing of reading comprehension	
Chapter Eleven	196
Richard Luecht	
The practical utility of Rasch measurement models	
Chapter Twelve	224
Bruno D. Zumbo and Peter D. MacMillan	
An overview and some observations on the psychometric models used in computer-adaptive language testing	
Subject index	239
