Preface	vii		
Contributors	ix		
A Generalities			
a-01 Topological Spaces	3	c-14 Spaces of Functions in Pointwise Convergence	131
a-02 Modified Open and Closed Sets (Semi-Open Set etc.)	8	c-15 Radon–Nikodým Compacta	138
a-03 Cardinal Functions, Part I	11	c-16 Corson Compacta	140
a-04 Cardinal Functions, Part II	15	c-17 Rosenthal Compacta	142
a-05 Convergence	18	c-18 Eberlein Compacta	145
a-06 Several Topologies on One Set	22	c-19 Topological Entropy	147
a-07 Comparison of Topologies (Minimal and Maximal Topologies)	24	c-20 Function Spaces	150
B Basic constructions		D Fairly general properties	
b-01 Subspaces (Hereditary (P)-Spaces)	31	d-01 The Low Separation Axioms T_0 and T_1	155
b-02 Relative Properties	33	d-02 Higher Separation Axioms	158
b-03 Product Spaces	37	d-03 Fréchet and Sequential Spaces	162
b-04 Quotient Spaces and Decompositions	43	d-04 Pseudoradial Spaces	165
b-05 Adjunction Spaces	47	d-05 Compactness (Local Compactness, Sigma-Compactness etc.)	169
b-06 Hyperspaces	49	d-06 Countable Compactness	174
b-07 Cleavable (Splittable) Spaces	53	d-07 Pseudocompact Spaces	177
b-08 Inverse Systems and Direct Systems	56	d-08 The Lindelöf Property	182
b-09 Covering Properties	60	d-09 Realcompactness	185
b-10 Locally (P)-Spaces	65	d-10 k -Spaces	189
b-11 Rim(P)-Spaces	67	d-11 Dyadic Compacta	192
b-12 Categorical Topology	74	d-12 Paracompact Spaces	195
b-13 Special Spaces	76	d-13 Generalizations of Paracompactness	198
C Maps and general types of spaces defined by maps		d-14 Countable Paracompactness, Countable Metacompactness, and Related Concepts	202
c-01 Continuous and Topological Mappings	83	d-15 Extensions of Topological Spaces	204
c-02 Open Maps	86	d-16 Remainders	208
c-03 Closed Maps	89	d-17 The Čech–Stone Compactification	210
c-04 Perfect Maps	92	d-18 The Čech–Stone Compactifications of \mathbb{N} and \mathbb{R}	213
c-05 Cell-Like Maps	97	d-19 Wallman–Shanin Compactification	218
c-06 Extensions of Maps	100	d-20 H -Closed Spaces	221
c-07 Topological Embeddings (Universal Spaces)	103	d-21 Connectedness	223
c-08 Continuous Selections	107	d-22 Connectifications	227
c-09 Multivalued Functions	110	d-23 Special Constructions	229
c-10 Applications of the Baire Category Theorem to Real Analysis	113	E Spaces with richer structures	
c-11 Absolute Retracts	117	e-01 Metric Spaces	235
c-12 Extensors	122	e-02 Classical Metrization Theorems	239
c-13 Generalized Continuities	126	e-03 Modern Metrization Theorems	242
		e-04 Special Metrics	247
		e-05 Completeness	251
		e-06 Baire Spaces	255
		e-07 Uniform Spaces, I	259
		e-08 Uniform Spaces, II	264

e-09	Quasi-Uniform Spaces	266	h-03	Free Topological Groups	372
e-10	Proximity Spaces	271	h-04	Homogeneous Spaces	376
e-11	Generalized Metric Spaces, Part I	273	h-05	Transformation Groups and Semigroups	379
e-12	Generalized Metric Spaces, Part II	276	h-06	Topological Discrete Dynamical Systems	385
e-13	Generalized Metric Spaces III: Linearly Stratifiable Spaces and Analogous Classes of Spaces	281	h-07	Fixed Point Theorems	402
e-14	Monotone Normality	286	h-08	Topological Representations of Algebraic Systems	409
e-15	Probabilistic Metric Spaces	288			
e-16	Approach Spaces	293			
F	Special properties		J	Influencies of other fields	
f-01	Continuum Theory	299	j-01	Descriptive Set Theory	417
f-02	Continuum Theory (General)	304	j-02	Consistency Results in Topology, I: Quotable Principles	419
f-03	Dimension Theory (General Theory)	308	j-03	Consistency Results in Topology, II: Forcing and Large Cardinals	423
f-04	Dimension of Metrizable Spaces	314	j-04	Digital Topology	428
f-05	Dimension Theory: Infinite Dimension	318	j-05	Computer Science and Topology	433
f-06	Zero-Dimensional Spaces	323	j-06	Non Standard Topology	436
f-07	Linearly Ordered and Generalized Ordered Spaces	326	j-07	Topological Games	439
f-08	Unicoherence and Multicoherence	331	j-08	Fuzzy Topological Spaces	443
f-09	Topological Characterizations of Separable Metrizable Zero-Dimensional Spaces	334	K	Connections with other fields	
f-10	Topological Characterizations of Spaces	337	k-01	Banach Spaces and Topology (I)	449
f-11	Higher-Dimensional Local Connectedness	341	k-02	Banach Spaces (and Topology) (II)	454
G	Special spaces		k-03	Measure Theory, I	459
g-01	Extremally Disconnected Spaces	345	k-04	Measure Theory, II	464
g-02	Scattered Spaces	350	k-05	Polyhedra and Complexes	470
g-03	Dowker Spaces	354	k-06	Homology	474
H	Connections with other structures		k-07	Homotopy, I	480
h-01	Topological Groups	359	k-08	Homotopy, II	485
h-02	Topological Rings, Division Rings, Fields and Lattices	365	k-09	Shape Theory	489
			k-10	Manifold	494
			k-11	Infinite-Dimensional Topology	497
				Subject index	503
