

## TABLE OF CONTENTS

EDITORIAL NOTE	ix
INTRODUCTION: 'GRANGER'S PHILOSOPHY OF SCIENCE' (Alexander Rosenberg)	xi
PREFACE: TO THE READER: ON STRUCTURALISMS (1967)	xxiii
CHAPTER I. THE PROBLEM OF FORMS AND THE PHILOSOPHY OF THE SCIENCES	1
<i>The Possibility of Science and the Fact of Science</i>	2
Perception and Science	4
Linguistic Expression and Scientific Forms	5
<i>Coordination and Subordination of Forms</i>	8
A 'Ptolemaic' Revolution	9
CHAPTER II. LANGUAGE AS A VEHICLE OF INFORMATION	13
Rhetoric and Contents	13
Epistemology, Genetic Psychology and Axiomatization	16
Critique of the Notion of 'Grouping' as a Form of Logical Thought	17
Ordinary Language and Formalized Language	22
Pure Informational Language	23
Semantics and Syntax	27
CHAPTER III. SCIENTIFIC LANGUAGES AND FORMALISMS	31
The 'Mixed' Language of Science	31
The Formation of the Language of Chemistry	33
Reversal of the Relations between Oral Language and Writing	38
Multi-Dimensionality and Spatiality of Signs	39
Semantic Polyvalence	42

CHAPTER IV. THE <i>DÉCOUPAGE</i> OF PHENOMENA	48
The Myth and the Concept	48
Experienced Meanings and Scientific Objects	50
Organized Practice, the Cultural Environment of the Concept	52
An Example of Structural Objectivation: the 'Wager'	54
Two Apparently Opposed Movements: 'Formalist' <i>Découpage</i> and 'Operational' <i>Découpage</i>	57
The Saussurian Reduction	59
The Phonological <i>Découpage</i>	60
Hierarchy of Phonological Structures	64
Dynamics of Linguistic Structures	66
'Language Engineering'	71
The Theory of Queues	80
Theories of Learning [ <i>apprentissage</i> ] as Dynamic Games	81
CHAPTER V. QUALITY AND QUANTITY	85
Quality of the Object and Quality of the Lived Experience [ <i>vécu</i> ]	86
Difference and Similarity	88
Qualitative Responses and Information	91
Probability of Response, and Division into Latent Classes	93
Scaling Structure	96
Search for a Metric	98
The Interpretation of 'Principal Components.' Return to Structural Organization	99
The General Theme of Linear Structures	102
Disorder and Order	105
Classifications	107
Linear Structures, Vectorial Spaces	109
The Random Schemata	112
Conclusion: Dialectic of Quality and Axiomatization	115
CHAPTER VI. STRUCTURING AND AXIOMATIZING	117
'Energetic' Models and 'Cybernetic' Models	118
Causality in the Models	124
Meanings and Functions of Axiomatization in Mathematics	130
Axiomatization in the Natural Sciences	134
Axiomatization in the Sciences of Man	136

The Evaluative Structure of Random Situations	139
The Definition of a Norm of Decision	142
Conclusions: Consciousness and Concept	145
CHAPTER VII. THE UNDERSTANDING OF THE INDIVIDUAL	150
The Clinical Situation and Structures in Psychoanalysis	152
Diachronic and Synchronic: Personalities as Informational Systems	160
Practice as Art and the Individual	163
Individual and Alienation	167
History as a <i>Clinical Undertaking without Practice</i>	168
History and the Present	170
Individual and Field	174
Conclusions	175
POSTFACE TO THE ENGLISH EDITION (1982)	181
NOTES	194
BIBLIOGRAPHY OF WORKS CITED	201
INDEX OF NAMES	208
