

CONTENTS

| | |
|--|-----|
| Preface | vi |
| Introduction | 1 |
| Władysław KRAJEWSKI, May We Identify Reduction and Explanation of Theories ? | 11 |
| Günther LUDWIG, Restriction and Embedding | 17 |
| W. HOERING, Anomalies of Reduction | 33 |
| C. Ulises MOULINES, Ontological Reduction in the Natural Sciences | 51 |
| E. SCHEIBE, Explanation of Theories and the Problem of Progress in Physics | 71 |
| Joseph D. SNEED, Reduction, Interpretation and Invariance | 95 |
| Gerhard VOLLMER, Reduction and Evolution - Arguments and Examples, | 131 |
| David PEARCE and Veikko RANTALA, Limiting Case Correspondence between Physical Theories | 153 |
| Dieter MAYR, Contact Structures, Predifferentiability and Approximation | 187 |
| Heinz-Jürgen SCHMIDT, Tangent Embedding - A Special Kind of Approximate Reduction | 199 |
| A. KAMLAH, A Logical Investigation of the Phlogiston Case | 217 |
| Theo A.F. KUIPERS, Utilistic Reduction in Sociology: The Case of Collective Goods | 239 |

| | |
|---|-----|
| David PEARCE and Michele TUCCI, Intertheory Relations in Growth Economics: Sraffa and Wicksell | 269 |
| L. HAMMINGA, Possible Approaches to Reduction in Economic Theory | 295 |
| Haim GAIFMAN, Why Language ? | 319 |
| W. BALZER, On the Comparison of Classical and Special Relativistic Space-Time | 331 |
| Othman Q. MALHAS, Space-Time Geometries for One-Dimensional Space | 359 |
| Pekka J. LAHTI, Quantum Theory as a Factualization of Classical Theory | 381 |
| Ernst-Walter STACHOW, Classical and Non Classical Limiting Cases of Quantum Logic | 397 |
| Reinhard WERNER, Bell's Inequalities and the Reduction of Statistical Theories | 419 |
| Name Index | 443 |
