

TABLE OF CONTENTS

PREFACE	vii
I. SYSTEMATIC ANALYSES	
Evandro Agazzi, <i>Do Experiments Depend on Theories or Theories on Experiments?</i>	3
Risto Hilpinen, <i>On Experimental Questions</i>	15
II. THE ROLES OF EXPERIMENT: THEORY GENERATION AND THEORY TESTING	
Thomas Nickles, <i>Reconstructing Science: Discovery and Experiment</i>	33
Erwin Hiebert, <i>The Role of Experiment and Theory in the Development of Nuclear Physics in the Early 1930's</i>	55
Christoph Meinel, <i>Empirical Support for the Corpuscular Theory in the Seventeenth Century</i>	77
Robert Halleux, <i>Theory and Experiment in the Early Writings of Johan Baptist Van Helmont</i>	93
Nils-Eric Sahlin, <i>The Significance of Empirical Evidence for Developments in the Foundations of Decision Theory</i>	103
Edward Erwin, <i>Testing Freudian Hypotheses</i>	123
Allan Franklin, <i>Experiment, Theory Choice, and the Duhem-Quine Problem</i>	141
III. THE ROLE OF THEORETICAL CONCEPTIONS	
Catherine Chevalley, <i>Physical Reality and Closed Theories in Werner Heisenberg's Early Papers</i>	159
Gerard Simon, <i>Experiment and Theory in Ptolemy's Optics</i>	177
Huldrych M. Koelbing, <i>Newton's and Goethe's Colour Theories - Contradictory or Complementary Approaches?</i>	189
Aristides Baltas, <i>On the Structure of Physics as a Science</i>	207
Silvana Borutti, <i>Models and Interpretation in Human Sciences: Anthropology and the Theoretical Notion of Field</i>	227
Vincenzo Cappelletti, <i>On the Dynamics of Scientific Paradigms</i>	243
Marcello Pera, <i>Breaking the Link between Methodology and Rationality. A plea for Rhetoric in Scientific Inquiry</i>	259
INDEX OF NAMES	277
