<b>INTRODUCTION</b>	xiii
<b>1 THE PRINCIPLE OF ESSENTIAL CONNECTIVITY</b>	
Section 1	
The topics of this chapter	1
Section 2	
Attempts to define 'disposition'	1
Section 3	
An unjustifiably rejected attempt	4
Section 4	
Extreme nominalism	7
Section 5	
Other views on the status of predicate-pairs	11
Section 6	
A simple extra-linguistic criterion	14
Section 7	
The Principle of Connectivity	16
Section 8	
Independent properties	20
Section 9	
The definition and detection of dispositions	24
<b>2 PRESENT AND ABSENT PROPERTIES</b>	
Section 1	
Property negating terms	27
Section 2	
The asymmetry between presence and absence	28
Section 3	
Possible worlds	29
Section 4	
The presence of negative terms	31
Section 5	
Additional kinds of predicates	34
Section 6	
The individuation of bundles of universals and of bundles of particulars	40

Section 7	
The logical relations among the four definitions and some additional principles	42
Section 8	
Being at different places at the same time	44
Section 9	
Practical implications	48
Section 10	
Conclusion	50

### **3 THE ELEMENTS OF THE UNIVERSE**

Section 1	
The characteristics of C-events	52
Section 2	
C-properties and dispositions	55
Section 3	
C-properties are devoid of all substance	56
Section 4	
The explication of the doctrine of determinism	58
Section 5	
The definition of identity conditions	62
Section 6	
Events and spatial location	64
Section 7	
Conceptual priority	66
Section 8	
Events and causes	67
Section 9	
Events and explanations	69
Section 10	
Events and changes	70
Section 11	
Identity conditions for properties	72
Section 12	
Summary	74

### **4 CONTENT-DEPENDENT AND CONTENT-INDEPENDENT IMPLICATIONS**

Section 1	
Auxiliary hypotheses	75
Section 2	
The ubiquity of auxiliary hypotheses	78

CONTENTS	ix
Section 3	
Confirmation	79
Section 4	
The criterion for admissible auxiliary hypotheses	83
Section 5	
The DN model of explanation	83
Section 6	
A defence of the DN model	88
Section 7	
Understanding and content dependence	91
Section 8	
NR Campbell's explanation	93
Section 9	
Counterfactuals	95
<b>5 THE INDISPENSIBLE PRINCIPLE OF INDIFFERENCE</b>	
Section 1	
Historical highlights	99
Section 2	
The principle of indifference and equiprobability	102
Section 3	
The many objections to the classical interpretation of probability	104
Section 4	
Objections by scientists	108
Section 5	
Interpreting and measuring probability	109
Section 6	
The real status of the principle of indifference	111
Section 7	
The answer to the objections	115
Section 8	
Circumstances in which the principle is inapplicable	116
Section 9	
Justification	119
APPENDIX A	121
APPENDIX B	126
NOTES	130
BIBLIOGRAPHY	133
INDEX	137
