

## CONTENTS

---

<i>Preface</i>	vii
<i>Acknowledgment</i>	ix
<i>List of Tables</i>	xiii
1. Introduction	1
2. Concept of Sustainable Development and Bio-Diversity	51
3. Soil Degradation and Management	71
4. Soil Fertility Assessment and Management	95
5. Soil Toxicology	129
6. Sustainable Water Management	141
7. Results and Discussion	169
8. Conclusions and Recommendations	175
<i>Bibliography</i>	177

## LIST OF TABLES

<i>Table No.</i>	<i>Description</i>	<i>Page No.</i>
1.1	Important spectral ranges of electromagnetic energy used in remote sensing with principal applications.	12
1.2	Satellite Multispectral data characteristics & their possible applications in vegetation mapping.	13
2.1	A to E: Species of secondary succession and their number on burnt soil due to brick industry (detailed studied Brick kiln No. 1 to 5).	64
3.1	Spectral reflectance radiometer readings (in %) for brick kiln complex during clear sky.	81
3.2	Changes in utilization of land in Delhi (in Hectares).	83
3.3	Suitability rating for construction and conservation.	86
4.1	Diffusion Constants of CO <sub>2</sub> , O <sub>2</sub> , and N <sub>2</sub> in air and water, and their Solubility in water at 20°C.	106
4.2	A to I: Estimated NPK content and pH of soil in dis-used brick kilns.	108
6.1	A to L: Groundwater depth level.	147
6.2	Hydromorphogeology of study area.	160
6.3	Water consumption in Delhi.	166
6.4	Spectral reflectance radiometer readings (in %) for check dam sites during clear sky.	167
