List of Abbreviations xiii
Preface and Acknowledgments xv

1. An Anthropological Perspective on HIV/AIDS 1
   The HIV/AIDS Crisis 1
   Anthropology, Medical Anthropology, and AIDS 4
   Medical Anthropology 5
   Concepts 7
   Methodology 8
   Theoretical Orientations 12
   Summary 18
   Thought Questions 18
   Resources 18

2. The Changing Face of AIDS: A Historical and Epidemiological Overview 19
   Epidemiology Overview 20
   Applying Epidemiology to HIV/AIDS 28
   Age 34
   Gender 36
   Ethnicity 37
   Modes of Transmission 38
   Cofactors 40
   Political and Economic Cofactors 41
   Origins of HIV/AIDS 44
   Ethics 49
   Summary 51
   Thought Questions 52
   Resources 52

3. The Biomedical Aspects of HIV/AIDS, Thomas Budd 54
   The Course of AIDS Begins with the Viruses 55
   Human Immunodeficiency Virus (HIV) Components 56
Does HIV Really Cause AIDS? 58
HIV Variations 58
HIV Infection 59
Immunology 60
ELISA—Enzyme-Linked Immunosorbent Assay 63
Progression to AIDS 65
Cellular Production of HIV 67
HAART—Highly Active Antiretroviral Therapy 70
The Cultural Dimensions of HAART/ARVs and Vaccines 72
Vaccines 73
Summary 75
Thought Questions 76
Resources 76

4. HIV Testing 77
HIV Tests 77
HIV Test Counseling 82
Mandatory and Voluntary Testing 94
Ethics and Controversies of HIV Testing 97
Summary 105
Thought Questions 106
Resources 106

5. Sex and AIDS 108
Sexuality 109
Marriage and Kinship Systems 110
Gender 111
Sexual Orientation 113
Sexual Orientation outside of the United States 115
The Sexual Risk Continuum 116
Sex and HIV in the United States 123
Sexual Communities in the United States 126
Sex Workers 129
HIV, Sex, and Ethnicity in the United States 130
Sex and HIV/AIDS outside the United States 138
Summary 149
Thought Questions 150
Resources 150
6. Drugs and AIDS 153

Drugs and the United States 154
Alternative and Complementary Drugs and Therapies 155
Recreational Drug Use and HIV 155
HIV, Blood, Drugs, and Needles Cross-Culturally 169
Successful Harm Reduction Programs 174
Summary 175
Thought Questions 176
Resources 176

7. AIDS and Women 177

Women as Caregivers 178
Women as Sexual Beings 179
Biology, Women, and Sexual Risks of HIV Infection 180
Sociocultural Factors in Women's Risk of HIV Infection 181
Female Sex Workers and HIV 183
Psycho-emotional Factors and Women's Sexuality 186
Sexual Practices and Women's Risk of HIV Infection 189
Women as Reproductive Beings 190
HIV+ Women and Reproduction 192
Poverty, Politics, HIV/AIDS, and Women 196
Ethics, Women, and HIV/AIDS 201
Summary 203
Thought Questions 203
Resources 203

8. The Politics and Economics of AIDS 205

Overview of Politics and Economics 206
Economics, Politics, and HIV/AIDS in the United States 206
Economics, Politics, Risks, and Subcultures 208
The Economics and Politics of HIV Testing 211
The Economics and Politics of Vaccine and Drug Development and Treatment 213
Politics, Economics, and HIV/AIDS Cross-Culturally 219
Fear and HIV/AIDS 221
Politics, Economics, and HIV Decision Making 222
HIV/AIDS and Human Rights 230
Summary 231
9. The Sociopsychological Aspects of AIDS 233
   The Sociopsychological Aspects of Stigma 233
   Stigma, Sex, Gender, Orientation, and Drugs 234
   Stigma, Illness, and Death 236
   Stigma and Grief 238
   Sociopsychological Issues for People with HIV/AIDS 239
   Sexuality and PLWH/As in the United States 242
   Cross-Cultural Sociopsychological Factors 244
   Sociopsychological Factors for the Caregivers and Survivors 245
   Summary 251
   Thought Questions 251
   Resources 251

10. Conclusion: AIDS in the Twenty-First Century 253
    Overview of the Pandemic 253
    HIV/AIDS in the United States in the Twenty-First Century 254
    HIV/AIDS in the Nonindustrialized World in the Twenty-First Century 256
    Successful Intervention Efforts 258
    The Value of an Anthropological Approach in HIV Interventions 259
    Summary 261
    Thought Questions 261
    Resources 262

Glossary 263
Bibliography 273
Index 339
Illustrations

Figures

1.1. Adults and children living with HIV in 2006  
1.2. Percentage of adults and children living with HIV in 2006  
1.3. Predicted HIV cases in key countries by 2010  
2.1a. Adults and children living with HIV in 2006  
2.1b. Adults and children newly infected with HIV during 2006  
2.1c. Deaths of adults and children from AIDS during 2006  
2.2a. HIV/AIDS around the world  
2.2b. Women as a percentage of adults living with HIV/AIDS in 2006  
2.3. New AIDS cases, AIDS deaths, and people living with AIDS in the United States, 1985–2006  
2.4. Incidence and prevalence of AIDS in the United States, by epicenters  
2.5. Persons living with AIDS in the United States  
2.7. U.S. people living with AIDS in 2006  
2.8. Women as a proportion of new AIDS diagnoses, 1985–2005  
2.9. Ethnicities of U.S. people living with AIDS in 2006  
2.10. Transmission categories and race/ethnicity of women living with HIV/AIDS in 2005  
3.1. The course of AIDS  
3.2. The human immunodeficiency virus (HIV)  
3.3. HIV  
3.4. Time course to AIDS  
3.5. HIV infection of cells  
3.6. Transcription process  
4.1. “Why Should I Worry about HIV?” pamphlet  
4.2. “Being HIV Negative” pamphlet  
4.3. “Being HIV Positive” pamphlet  
5.1. “Don’t Die of Embarrassment” pamphlet  
5.2. “Safer Sex” pamphlet  
6.1. “Don’t Die of Ignorance” pamphlet
Tables

2.1. AIDS cases by race/ethnicity  23
2.2. Top ten U.S. states/territories in number of AIDS cases, 2005  34
2.3. AIDS cases in the United States by age, 2005  35
2.4. AIDS timeline  43
