Introduction

F. Mathey

	Introduction	1
42.1	Product Class 1: Phosphinidenes and Terminal Phosphinidene Complexes J. C. Slootweg and K. Lammertsma	
42.1	Product Class 1: Phosphinidenes and Terminal Phosphinidene Complexes	15
42.1.1	Product Subclass 1: Free Phosphinidenes	15
42.1.1.1	Synthesis of Product Subclass 1	16
42.1.1.1.1	Method 1: Elimination	16
42.1.1.1.1.1	Variation 1: Thermal Generation	16
42.1.1.1.1.2	Variation 2: Photolytic Generation	16
42.1.1.1.2	Method 2: Reduction	17
42.1.1.1.3	Method 3: Phospha-Wittig Reagents	17
42.1.1.2	Applications of Product Subclass 1 in Organic Synthesis	18
42.1.1.2.1	Method 1: Trapping Reactions	18
42.1.2	Product Subclass 2: Neutral Electrophilic Phosphinidene Complexes	19
42.1.2.1	Synthesis of Product Subclass 2	20
42.1.2.1.1	Method 1: Chelotropic Elimination	20
42.1.2.1.1.1	Variation 1: From 7-Phosphanorbornadienes	20
42.1.2.1.1.2	Variation 2: From Phosphiranes	22
42.1.2.1.1.3	Variation 3: From Phosphirenes	22
42.1.2.1.2	Method 2: Salt Metathesis	23
42.1.2.2	Applications of Product Subclass 2 in Organic Synthesis	24
42.1.2.2.1	Method 1: Trapping Reactions	24
42.1.3	Product Subclass 3: Cationic Electrophilic Phosphinidene Complexes	24
42.1.3.1	Synthesis of Product Subclass 3	24
42.1.3.1.1	Method 1: Chloride Abstraction	24
42.1.4	Product Subclass 4: Nucleophilic Phosphinidene Complexes	25
42.1.4.1	Synthesis of Product Subclass 4	25
42.1.4.1.1	Method 1: Salt Metathesis/Elimination	25
42.1.4.1.1.1	Variation 1: Of Metal Hydrides	26
42.1.4.1.1.2	Variation 2: Of Alkali Metal Phosphides	26
42.1.4.1.1.3	Variation 3: Of Transition Metal Phosphides	28
42.1.4.1.2	Method 2: Addition/Elimination	29
42.1.4.1.3	Method 3: Dehydrohalogenation/Ligation	30
42.1.4.1.4	Method 4: α -Hydrogen Migration	31
42.1.4.1.5	Method 5: Oxidation/Deprotonation	32

42.1.4.2	Applications of Product Subclass 4 in Organic Synthesis	33
42.1.4.2.1	Method 1: Phosphinidene-Transfer Reactions	33
42.2	Product Class 2: Oxo-, Thioxo-, Selenoxo-, and Iminophosphines and Diphosphenes M. Yoshifuji	
<hr/>		
42.2	Product Class 2: Oxo-, Thioxo-, Selenoxo-, and Iminophosphines and Diphosphenes	37
42.2.1	Product Subclass 1: Oxophosphines	37
42.2.1.1	Synthesis of Product Subclass 1	37
42.2.1.1.1	Method 1: Elimination Reactions	37
42.2.1.1.2	Method 2: Cycloreversion Reactions	38
42.2.2	Product Subclass 2: Thioxophosphines and Selenoxophosphines	39
42.2.2.1	Synthesis of Product Subclass 2	40
42.2.2.1.1	Method 1: Elimination Reactions	40
42.2.2.1.2	Method 2: Cycloreversion Reactions	40
42.2.2.1.3	Methods 3: Miscellaneous Reactions	42
42.2.3	Product Subclass 3: Iminophosphines	44
42.2.3.1	Synthesis of Product Subclass 3	44
42.2.3.1.1	Method 1: Elimination Reactions	44
42.2.3.1.2	Method 2: Substitution Reactions	45
42.2.3.1.3	Method 3: Cycloreversion Reactions	46
42.2.4	Product Subclass 4: Diphosphenes	47
42.2.4.1	Synthesis of Product Subclass 4	47
42.2.4.1.1	Method 1: Elimination and/or Condensation Reactions	47
42.2.4.1.2	Method 2: Rearrangement Reactions	51
42.2.4.1.3	Method 3: Substitution Reactions	52
42.2.5	Product Subclass 5: Heteroatom-Substituted Diphosphenes	53
42.2.6	Product Subclass 6: Stereodefined Diphosphenes	54
42.2.7	Product Subclass 7: Heteroatom-Substituted Iminophosphines	56
42.2.7.1	Synthesis of Product Subclass 7	56
42.2.7.1.1	Method 1: Elimination Reactions	56
42.2.7.1.2	Method 2: Substitution Reactions	58
42.2.8	Product Subclass 8: Tetraphosphenes	58
42.2.8.1	Synthesis of Product Subclass 8	58
42.2.8.1.1	Method 1: Activation of White Phosphorus	58

42.3	Product Class 3: Phosphenium Salts	
	M. Yoshifuji	
<hr/>		
42.3	Product Class 3: Phosphenium Salts	63
42.3.1	Synthesis of Product Class 3	63
42.3.1.1	Method 1: Halogen Abstraction of Halophosphines	63
42.3.1.2	Method 2: Alkylation or Protonation of Diphosphenes	66
42.3.2	Applications of Product Class 3 in Organic Synthesis	67
42.3.2.1	Method 1: Reactions of Phosphenium Cations with Unsaturated Hydrocarbons	67
42.4	Product Class 4: Alkylphosphines	
	E. Hey-Hawkins and A. A. Karasik	
<hr/>		
42.4	Product Class 4: Alkylphosphines	71
42.4.1	Synthesis of Product Class 4	72
42.4.1.1	Method 1: Synthesis from Phosphine, or Primary or Secondary Phosphines, and Alkyl Halides	73
42.4.1.1.1	Variation 1: From Phosphine and Alkyl Halides	73
42.4.1.1.2	Variation 2: From Primary Phosphines and Alkyl Halides	74
42.4.1.1.3	Variation 3: From Secondary Phosphines and Alkyl or Acyl Halides	75
42.4.1.2	Method 2: Synthesis from Metal Organophosphides and Electrophiles	75
42.4.1.2.1	Variation 1: Synthesis from Metal Organophosphides and Alkyl Halides	75
42.4.1.2.2	Variation 2: Synthesis from Metal Organophosphides and Esters	79
42.4.1.2.3	Variation 3: Ring Opening of Tetrahydrofuran	80
42.4.1.3	Method 3: Addition of Phosphines to C—X Multiple Bonds	81
42.4.1.3.1	Variation 1: Addition to Alk-1-enes or Cyclic Alkenes	81
42.4.1.3.2	Variation 2: Addition to Carbonyl Groups	83
42.4.1.3.3	Variation 3: Mannich-Type Reactions of Phosphines, Formaldehyde, and Amines	83
42.4.1.4	Method 4: Synthesis from Halophosphines	83
42.4.1.4.1	Variation 1: From Phosphorus Trihalides or Trialkyl Phosphites and Organometallic Alkali Metal Compounds or Grignard Reagents	83
42.4.1.4.2	Variation 2: From Alkyldihalophosphines and Organometallic Alkali Metal Compounds or Grignard Reagents	86
42.4.1.4.3	Variation 3: From Dialkylhalophosphines and Organometallic Alkali Metal Compounds or Grignard Reagents	87
42.4.1.4.4	Variation 4: From Chlorophosphines and Other Organometallic Reagents	90
42.4.1.5	Method 5: Cleavage of Diphosphines	90
42.4.1.6	Method 6: Synthesis from Elemental Phosphorus and Alkyl Halides, Alcohols, or Alkenes	91
42.4.1.7	Method 7: Reduction of Halophosphines, Phosphinic Acids, Phosphinic Acid Esters or Halides, and Trialkyl- and Dialkylphosphine Oxides	93
42.4.1.7.1	Variation 1: Reduction of Halophosphines with Lithium Aluminum Hydride or Other Metal Hydrides	93

42.4.1.7.2	Variation 2:	Reduction of Alkylphosphonates with Lithium Aluminum Hydride	94
42.4.1.7.3	Variation 3:	Reduction of Dialkylphosphine Oxides, Dialkylphosphinates, or Alkylphosphonates with Aluminum Derivatives	94
42.4.1.7.4	Variation 4:	Reduction of Trialkylphosphine Oxides with Lithium Aluminum Hydride	97
42.4.1.7.5	Variation 5:	Reduction of Dialkylphosphine Oxides, Dialkylphosphinates, or Alkylphosphinates with Silanes	97
42.4.1.8	Method 8:	Reduction of Trialkylphosphine Sulfides and P-Chiral Phosphine–Borane Complexes Bearing an Alkylsulfanyl Group	98
42.4.1.8.1	Variation 1:	With Alkali Metals	98
42.4.1.8.2	Variation 2:	With Lithium Aluminum Hydride	99
42.4.1.9	Method 9:	Synthesis from Quaternary Phosphonium Salts	100
42.4.1.9.1	Variation 1:	Synthesis from Tetrakis(hydroxymethyl)phosphonium Halides	100
42.4.1.10	Method 10:	Disproportionation of Dialkylphosphine Oxides	101
42.4.1.11	Method 11:	Addition Reactions of Unsaturated Tertiary Vinylphosphines	101
42.4.1.12	Method 12:	Enantioselective Cleavage of a P–C Bond in Alkyldimethylphosphine–Borane Complexes	102

42.5 Product Class 5: Bis(alkylphosphino)- and Poly(alkylphosphino)alkanes, and Di- and Polyphosphines with a P–P Bond

E. Hey-Hawkins and A. A. Karasik

42.5	Product Class 5: Bis(alkylphosphino)- and Poly(alkylphosphino)alkanes, and Di- and Polyphosphines with a P–P Bond	109
42.5.1	Product Subclass 1: Bis(alkylphosphino)- and Poly(alkylphosphino)alkanes	109
42.5.1.1	Synthesis of Product Subclass 1	110
42.5.1.1.1	Method 1: Synthesis from Metal Dialkylphosphides and Aliphatic Electrophiles	110
42.5.1.1.1.1	Variation 1: Synthesis from Dialkylphosphides or Dialkylphosphines and Polyhaloalkanes	110
42.5.1.1.1.2	Variation 2: Synthesis from Dialkylphosphides and Cyclic Sulfates	115
42.5.1.1.1.3	Variation 3: Synthesis from Dialkylphosphides and (Dialkylphosphino)alkyl Sulfonates	116
42.5.1.1.1.4	Variation 4: Synthesis from Dialkylphosphines and Polyhaloalkanes, Alkylamines, and Alcohols	118
42.5.1.1.1.5	Variation 5: Synthesis from Alkylphosphides and Dihaloalkanes	119
42.5.1.1.1.6	Variation 6: Synthesis from Bis(alkylphosphides) and Alkyl Halides	120
42.5.1.1.2	Method 2: Synthesis from Metal Phosphinomethanides and Electrophiles Containing Phosphino Groups	120
42.5.1.1.2.1	Variation 1: Synthesis from (Dialkylphosphino)methanides and Dialkylhalophosphines	120
42.5.1.1.2.2	Variation 2: Enantioselective Synthesis from Lithium (Dialkylphosphino)methanide–Borane Complexes and Alkylhalophosphines	122

42.5.1.1.2.3	Variation 3:	Synthesis from Poly(dialkylphosphino)methanides and Dialkylhalophosphines	123
42.5.1.1.2.4	Variation 4:	Synthesis from [(Dialkylphosphino)methyl]silanes or -stannanes and Dialkylhalophosphines	124
42.5.1.1.2.5	Variation 5:	Oxidative Coupling of (Dialkylphosphino)methanides	125
42.5.1.1.2.6	Variation 6:	Synthesis from (Dialkylphosphino)methanides and Polyhaloalkanes or Analogues	127
42.5.1.1.3	Method 3:	Synthesis from Halophosphines and Organometallic Compounds	129
42.5.1.1.3.1	Variation 1:	Synthesis from Dialkylhalophosphines and Dimetalated Alkanes, Alkenes, or Alkynes	129
42.5.1.1.3.2	Variation 2:	Synthesis from Bis(halophosphino)alkanes and Organometallic Compounds	130
42.5.1.1.4	Method 4:	Reduction of Phosphine Oxides	132
42.5.1.1.4.1	Variation 1:	Reduction of Bis(dialkylphosphoryl)alkanes with Silanes	132
42.5.1.1.4.2	Variation 2:	Reduction of Bis(dialkylphosphoryl)alkanes with Lithium Aluminum Hydride	133
42.5.1.1.5	Method 5:	Addition to Double Bonds	135
42.5.1.1.5.1	Variation 1:	Addition of Phosphines to Polyenes and Their Heteroatom Analogues	135
42.5.1.1.5.2	Variation 2:	Addition of Dialkylphosphines to Vinyl- or Allylphosphines	137
42.5.1.1.5.3	Variation 3:	Addition of Polyphosphinoalkanes to C=C or C=X Bonds	139
42.5.1.1.5.4	Variation 4:	Addition of Diphosphines to Alkynes	141
42.5.1.1.6	Method 6:	Decomposition of Phosponium Salts	142
42.5.1.1.6.1	Variation 1:	Reductive Cleavage of Quaternary Phosponium Salts	142
42.5.1.1.6.2	Variation 2:	Alcoholysis of Quaternary Phosponium Salts	143
42.5.1.1.7	Method 7:	Interconversion of Poly(alkylphosphino)alkanes	143
42.5.1.1.7.1	Variation 1:	From Diphosphinomethanides	143
42.5.1.1.8	Method 8:	Di- and Oligomerization by Interaction of Functional Groups of Phosphines	144
42.5.1.1.8.1	Variation 1:	Di- and Oligomerization of Phosphino Alcohols	144
42.5.2	Product Subclass 2: Tetraalkyldiphosphines and Polyalkylpolyphosphines with a P—P Bond		145
42.5.2.1	Synthesis of Product Subclass 2		146
42.5.2.1.1	Method 1:	Synthesis from Dialkylphosphides or Dialkylphosphines and Dialkylhalophosphines	146
42.5.2.1.2	Method 2:	Coupling of Dialkylphosphine Derivatives	147
42.5.2.1.2.1	Variation 1:	Oxidative Coupling of Dialkylphosphines by Transition-Metal Complexes	147
42.5.2.1.2.2	Variation 2:	Reductive Coupling of Dialkylhalophosphines by Alkali Metals	148
42.5.2.1.3	Method 3:	Interconversion of Alkylpolyphosphines	148
42.5.2.1.3.1	Variation 1:	Alkylation of Polyphosphide Anions	148
42.5.2.1.3.2	Variation 2:	Insertion into P—P Bonds	149

42.6 Product Class 6: Cyclic Phosphines

D. Gudat

42.6	Product Class 6: Cyclic Phosphines	155
42.6.1	Product Subclass 1: Phosphiranes	155
42.6.1.1	Synthesis of Product Subclass 1	156
42.6.1.1.1	Method 1: P-Alkylation of Primary Phosphines	156
42.6.1.1.1.1	Variation 1: From Phosphines or Metal Phosphides and 1,2-Dihalides or 1,2-Bis(toluenesulfonates)	157
42.6.1.1.1.2	Variation 2: From Metal Phosphides and Oxiranes	159
42.6.1.1.2	Method 2: P-Alkylation of Dichlorophosphines	160
42.6.1.1.3	Method 3: Cycloaddition Reactions	161
42.6.1.1.3.1	Variation 1: From Electrophilic Phosphinidene Complexes and Alkenes ...	161
42.6.1.1.3.2	Variation 2: From Phosphaalkenes and Diazoalkanes	162
42.6.1.1.3.3	Variation 3: From Phosphaalkenes or Phosphacumulenes and Carbenes or Carbenoids	164
42.6.1.1.4	Methods 4: Miscellaneous Reactions	166
42.6.2	Product Subclass 2: Phosphetanes	166
42.6.2.1	Synthesis of Product Subclass 2	167
42.6.2.1.1	Method 1: P-Alkylation of Primary Phosphines	167
42.6.2.1.1.1	Variation 1: From Phosphines and 1,3-Dihalides or Derivatives of 1,3-Diols	167
42.6.2.1.1.2	Variation 2: From Phosphines and Cyclic Sulfates	169
42.6.2.1.2	Method 2: P-Alkylation of Dichlorophosphines	171
42.6.2.1.2.1	Variation 1: Lewis Acid Induced Cyclization of Dichlorophosphines with Alkenes and Subsequent Reduction	171
42.6.2.1.2.2	Variation 2: P-Alkylation of Dichlorophosphines	173
42.6.2.1.3	Method 3: Transformation of Phosphetanes	173
42.6.2.1.3.1	Variation 1: P-Substitution of <i>P</i> -Halophosphetanes	174
42.6.2.1.3.2	Variation 2: C-Substitution of Protected Phosphetanes and Subsequent Deprotection	174
42.6.2.1.4	Methods 4: Miscellaneous Reactions	176
42.6.3	Product Subclass 3: 1,3-Diphosphetanes	176
42.6.3.1	Synthesis of Product Subclass 3	177
42.6.3.1.1	Method 1: Cycloaddition Reactions	177
42.6.3.1.1.1	Variation 1: Cyclodimerization of Phosphaalkenes	177
42.6.3.1.1.2	Variation 2: Cyclooligomerization of Phosphaalkynes	178
42.6.3.1.1.3	Variation 3: Oxidative Coupling of Polyphospholides	179
42.6.3.1.2	Methods 2: Miscellaneous Reactions	180
42.6.4	Product Subclass 4: Five- and Six-Membered Rings: Phospholanes, Phosphinanes, 2,5-Dihydrophospholes, and 1,2,5,6-Tetrahydro- phosphinines	180
42.6.4.1	Synthesis of Product Subclass 4	181
42.6.4.1.1	Method 1: P-Alkylation of Primary Phosphines	181

42.6.4.1.1.1	Variation 1:	From Phosphines and α,ω -Dihalides or Disulfonates of α,ω -Diols	181
42.6.4.1.1.2	Variation 2:	From Phosphines and Cyclic Sulfates	183
42.6.4.1.2	Method 2:	Alkylation of Dichlorophosphines or Phosphinic Acid O, <i>S</i> -Diesters	186
42.6.4.1.2.1	Variation 1:	From Dichlorophosphines or Phosphinic Acid O, <i>S</i> -Diesters and α,ω -Di-Grignard or Dilithium Reagents	186
42.6.4.1.2.2	Variation 2:	From Dichlorophosphines, Alkenes, and Organometallic Reagents	187
42.6.4.1.3	Method 3:	Hydrophosphination of Double Bonds	188
42.6.4.1.3.1	Variation 1:	Addition of Phosphines to Alkenes	189
42.6.4.1.3.2	Variation 2:	Addition of Phosphine and Primary Phosphines to 1,4-Dien-3-ones	190
42.6.4.1.3.3	Variation 3:	Addition of Phosphines to Carbonyl Compounds	192
42.6.4.1.4	Method 4:	Cycloaddition or Metathesis Reactions	192
42.6.4.1.4.1	Variation 1:	2,5-Dihydrophospholes from Dihalophosphines and Dienes via [4 + 1] Cycloaddition and Reduction	193
42.6.4.1.4.2	Variation 2:	1,2,5,6-Tetrahydrophosphinines from Phosphaalkenes and 1,3-Dienes via [4 + 2] Cycloaddition	195
42.6.4.1.4.3	Variation 3:	7-Phosphanorbornenes from [4 + 2] Cycloaddition of Phosphole Derivatives with Dienophiles	196
42.6.4.1.4.4	Variation 4:	2,5-Dihydrophospholes from Dialkylphosphines via Alkene Metathesis	199
42.6.4.1.5	Method 5:	Transformation of Cyclic Phosphines	200
42.6.4.1.5.1	Variation 1:	Transformation of P-Substituents in Five- and Six-Membered Heterocycles	200
42.6.4.1.5.2	Variation 2:	Lithiation and Electrophilic Substitution at α -C—H Bonds in Cyclic Phosphine Oxides and Borane Complexes	201
42.6.4.1.6	Methods 6:	Miscellaneous Reactions	203
42.6.5	Product Subclass 5: Cyclic Phosphines with Seven-Membered and Larger Rings		204
42.6.5.1	Synthesis of Product Subclass 5		205
42.6.5.1.1	Method 1:	P-Alkylation of Phosphines	205
42.6.5.1.2	Method 2:	P-Alkylation of Dihalophosphines	206
42.6.5.1.3	Method 3:	P-Alkylation of Tertiary Phosphines or Diphosphines and Reduction	207
42.6.5.1.4	Method 4:	Hydrophosphination of Alkenes and Alkynes	210
42.6.5.1.5	Methods 5:	Miscellaneous Reactions	212
42.7	Product Class 7: Dialkylphosphinous Acids and Derivatives K. M. Pietrusiewicz and M. Stankevič		
42.7	Product Class 7: Dialkylphosphinous Acids and Derivatives		221
42.7.1	Product Subclass 1: Dialkylphosphinous Acid Halides		221
42.7.1.1	Synthesis of Product Subclass 1		221
42.7.1.1.1	Method 1:	Synthesis from Phosphorous Halides by P—C Bond Formation	221

42.7.1.1.2	Method 2: Ligand Exchange in Dialkylphosphinous Acid Derivatives	222
42.7.1.2	Applications of Product Subclass 1 in Organic Synthesis	223
42.7.2	Product Subclass 2: Dialkylphosphinous Acids	224
42.7.2.1	Synthesis of Product Subclass 2	224
42.7.2.1.1	Method 1: Synthesis from H-Phosphonates by Substitution	224
42.7.2.1.2	Method 2: Hydrolysis of Dialkylphosphinous Acid Derivatives	226
42.7.2.2	Applications of Product Subclass 2 in Organic Synthesis	226
42.7.3	Product Subclass 3: Dialkylphosphinous Acid Esters	227
42.7.3.1	Synthesis of Product Subclass 3	227
42.7.3.1.1	Method 1: Alcoholysis of Dialkylphosphinous Acid Derivatives	227
42.7.3.1.2	Method 2: Synthesis from Phosphorous Acid Monoester Dihalides by P–C Bond Formation	228
42.7.3.2	Applications of Product Subclass 3 in Organic Synthesis	229
42.7.4	Product Subclass 4: Dialkylthiophosphinous Acids	230
42.7.4.1	Synthesis of Product Subclass 4	230
42.7.4.1.1	Method 1: Synthesis from Dialkylphosphinous Acid Derivatives	230
42.7.4.2	Applications of Product Subclass 4 in Organic Synthesis	230
42.7.5	Product Subclass 5: Dialkylthiophosphinous Acid Esters	231
42.7.5.1	Synthesis of Product Subclass 5	231
42.7.5.1.1	Method 1: Synthesis from Dialkylphosphinous Acid Halides	231
42.7.6	Product Subclass 6: Dialkylselenophosphinous Acids	231
42.7.6.1	Synthesis of Product Subclass 6	232
42.7.6.1.1	Method 1: Synthesis from Dialkylphosphines	232
42.7.7	Product Subclass 7: Dialkylselenophosphinous Acid Esters	232
42.7.7.1	Synthesis of Product Subclass 7	232
42.7.7.1.1	Method 1: Synthesis from Dialkylphosphinous Acid Halides	232
42.7.8	Product Subclass 8: Dialkylphosphinous Acid Amides	233
42.7.8.1	Synthesis of Product Subclass 8	233
42.7.8.1.1	Method 1: Aminolysis of Dialkylphosphinous Acid Derivatives	233
42.7.8.1.2	Method 2: Synthesis from Phosphorous Acid Derivatives by P–C Bond Formation	234
42.7.8.2	Applications of Product Subclass 8 in Organic Synthesis	234
42.8	Product Class 8: Alkylphosphonous Acids and Derivatives K. M. Pietrusiewicz and M. Stankevič	
<hr/>		
42.8	Product Class 8: Alkylphosphonous Acids and Derivatives	243
42.8.1	Product Subclass 1: Alkylphosphonous Acid Dihalides	243
42.8.1.1	Synthesis of Product Subclass 1	244

42.8.1.1.1	Method 1:	Electrophilic Alkylation of Phosphorus Trihalides	244
42.8.1.1.2	Method 2:	Nucleophilic Alkylation of Phosphorus Trihalides by Organometallic Reagents	244
42.8.1.1.3	Method 3:	Ligand Exchange Using Alkylphosphines as Substrates	245
42.8.1.2		Applications of Product Subclass 1 in Organic Synthesis	246
42.8.2		Product Subclass 2: Alkylphosphonous Acid Monohalides	247
42.8.2.1		Synthesis of Product Subclass 2	247
42.8.2.1.1	Method 1:	Partial Hydrolysis of Alkyl(dihalo)phosphines	247
42.8.3		Product Subclass 3: Alkylphosphonous Acid Monoester Monohalides	247
42.8.3.1		Synthesis of Product Subclass 3	247
42.8.3.1.1	Method 1:	Ligand Exchange in Alkyl(dihalo)phosphines	247
42.8.4		Product Subclass 4: Alkylthiophosphonous Acid Monohalide Monoesters	248
42.8.4.1		Synthesis of Product Subclass 4	248
42.8.4.1.1	Method 1:	Ligand Exchange of Alkyl(dihalo)phosphines	248
42.8.5		Product Subclass 5: Alkylphosphonous Acid Monoamide Monohalides	249
42.8.5.1		Synthesis of Product Subclass 5	249
42.8.5.1.1	Method 1:	Partial Aminolysis of Alkyl(dihalo)phosphines	249
42.8.5.1.2	Method 2:	Ligand Exchange in Alkyl(amino)phosphine Derivatives	250
42.8.6		Product Subclass 6: Alkylphosphonous Acids	251
42.8.6.1		Synthesis of Product Subclass 6	251
42.8.6.1.1	Method 1:	Hydrolysis of Alkyl(halo)phosphines	251
42.8.6.1.2	Method 2:	Hydrophosphination of Alkenes	252
42.8.6.2		Applications of Product Subclass 6 in Organic Synthesis	252
42.8.7		Product Subclass 7: Alkylphosphonous Acid Monoesters	253
42.8.7.1		Synthesis of Product Subclass 7	253
42.8.7.1.1	Method 1:	Alcoholysis of Alkylphosphines	253
42.8.7.1.2	Method 2:	Esterification of Monoalkylphosphinic Acids	254
42.8.7.1.3	Method 3:	Hydrolysis of Dialkyl Phosphonites and Related Compounds	255
42.8.7.1.4	Method 4:	Hydrophosphination of Alkenes	255
42.8.7.2		Applications of Product Subclass 7 in Organic Synthesis	256
42.8.8		Product Subclass 8: Alkylphosphonous Acid Diesters	256
42.8.8.1		Synthesis of Product Subclass 8	256
42.8.8.1.1	Method 1:	Alcoholysis of Alkylphosphonites	256
42.8.8.1.2	Method 2:	Synthesis from Halophosphonites	257
42.8.8.2		Applications of Product Subclass 8 in Organic Synthesis	258
42.8.9		Product Subclass 9: Alkylthiophosphonous Acid S-Monoesters	258
42.8.9.1		Synthesis of Product Subclass 9	258
42.8.9.1.1	Method 1:	Hydrolysis of Alkyl(alkylsulfanyl)(halo)phosphines	258
42.8.10		Product Subclass 10: Alkylphosphonous Acid Monoamides	259

42.8.10.1	Synthesis of Product Subclass 10	259
42.8.10.1.1	Method 1: Hydrolysis of Alkyl(diamino)phosphines	259
42.8.11	Product Subclass 11: Alkylthiophosphonous Acid O-Monoesters	259
42.8.11.1	Synthesis of Product Subclass 11	260
42.8.11.1.1	Method 1: Synthesis from Alkyl(alkoxy)(halo)phosphines	260
42.8.12	Product Subclass 12: Alkylthiophosphonous Acid Diesters	260
42.8.12.1	Synthesis of Product Subclass 12	260
42.8.12.1.1	Method 1: Alcoholysis of Alkyl(alkylsulfanyl)(halo)phosphines	260
42.8.13	Product Subclass 13: Alkylphosphonous Acid Monoester Monoamides ...	261
42.8.13.1	Synthesis of Product Subclass 13	261
42.8.13.1.1	Method 1: Alcoholysis of Alkylphosphine Derivatives	261
42.8.13.1.2	Method 2: Aminolysis of Alkylphosphonous Acid Derivatives	262
42.8.13.2	Applications of Product Subclass 13 in Organic Synthesis	262
42.8.14	Product Subclass 14: Alkyldithiophosphonous Acid Diesters	263
42.8.14.1	Synthesis of Product Subclass 14	263
42.8.14.1.1	Method 1: Synthesis from Primary Alkylphosphines and Disulfides	263
42.8.14.1.2	Method 2: Thioalcoholysis of Alkyl(dihalo)phosphines	263
42.8.15	Product Subclass 15: Alkylthiophosphonous Acid Monoester Monoamides	264
42.8.15.1	Synthesis of Product Subclass 15	264
42.8.15.1.1	Method 1: Thioalcoholysis of Alkyl(diamino)phosphines	264
42.8.16	Product Subclass 16: Alkyldiselenophosphonous Acid Diesters	265
42.8.16.1	Synthesis of Product Subclass 16	265
42.8.16.1.1	Method 1: Selenoalcoholysis of Alkyl(dihalo)phosphines	265
42.8.17	Product Subclass 17: Alkylphosphonous Acid Diamides	265
42.8.17.1	Synthesis of Product Subclass 17	265
42.8.17.1.1	Method 1: Aminolysis of Substituted Alkylphosphines	265
42.8.17.1.2	Method 2: Synthesis from Diamino(halo)phosphines	266
42.8.17.2	Applications of Product Subclass 17 in Organic Synthesis	266
42.9	Product Class 9: Phosphorous Acid and Derivatives M. Stankevič and K. M. Pietrusiewicz	
42.9	Product Class 9: Phosphorous Acid and Derivatives	275
42.9.1	Product Subclass 1: Phosphorous Acid Monoester Dihalides	275
42.9.1.1	Synthesis of Product Subclass 1	275
42.9.1.1.1	Method 1: Alcoholysis of Phosphorus Trihalides	275
42.9.1.1.2	Method 2: Ligand-Exchange Reactions of Phosphorous Acid Derivatives ·	276
42.9.1.2	Applications of Product Subclass 1 in Organic Synthesis	276
42.9.2	Product Subclass 2: Phosphorothious Acid S-Monoester Dihalides	276

42.9.2.1	Synthesis of Product Subclass 2	277
42.9.2.1.1	Method 1: Thioalcoholysis of Phosphorus Trihalides	277
42.9.2.2	Applications of Product Subclass 2 in Organic Synthesis	277
42.9.3	Product Subclass 3: Phosphorous Acid Monoamide Dihalides	277
42.9.3.1	Synthesis of Product Subclass 3	277
42.9.3.1.1	Method 1: Aminolysis of Phosphorus Trihalides	277
42.9.3.1.2	Method 2: Ligand-Exchange Reactions of Phosphorous Acid Derivatives	278
42.9.3.2	Applications of Product Subclass 3 in Organic Synthesis	279
42.9.4	Product Subclass 4: Phosphorous Acid Monoester Monohalides	279
42.9.5	Product Subclass 5: Phosphorous Acid Diester Monohalides	279
42.9.5.1	Synthesis of Product Subclass 5	280
42.9.5.1.1	Method 1: Alcoholysis of Phosphorous Acid Derivatives	280
42.9.5.1.2	Method 2: Ligand-Exchange Reactions of Phosphorous Acid Derivatives	280
42.9.5.3	Applications of Product Subclass 5 in Organic Synthesis	281
42.9.6	Product Subclass 6: Phosphorothious Acid Diester Monohalides	282
42.9.6.1	Synthesis of Product Subclass 6	282
42.9.6.1.1	Method 1: Amine-Halogen Exchange in Phosphorothious Acid Diester Monoamides	282
42.9.7	Product Subclass 7: Phosphorous Acid Monoester Monoamide Monohalides	282
42.9.7.1	Synthesis of Product Subclass 7	283
42.9.7.1.1	Method 1: Alcoholysis of Phosphorous Acid Monoamide Dihalides	283
42.9.7.1.2	Method 2: Aminolysis of Phosphorous Acid Monoester Dihalides	283
42.9.7.1.3	Method 3: Consecutive Alcoholysis and Aminolysis of Phosphorus Trihalides	283
42.9.7.1.4	Method 4: Ligand-Exchange Reactions of Phosphorous Acid Derivatives	284
42.9.7.2	Applications of Product Subclass 7 in Organic Synthesis	284
42.9.8	Product Subclass 8: Phosphorodithious Acid Diester Monohalides	285
42.9.8.1	Synthesis of Product Subclass 8	285
42.9.8.1.1	Method 1: Thioalcoholysis of Phosphorus Trihalides	285
42.9.8.1.2	Method 2: Ligand-Exchange Reactions of Phosphorous Acid Derivatives	285
42.9.9	Product Subclass 9: Phosphorothious Acid Monoester Monoamide Monohalides	286
42.9.9.1	Synthesis of Product Subclass 9	286
42.9.9.1.1	Method 1: Amine-Halogen Exchange in Phosphorothious Acid Diester Monoamides	286
42.9.10	Product Subclass 10: Phosphorous Acid Diamide Monohalides	287
42.9.10.1	Synthesis of Product Subclass 10	287
42.9.10.1.1	Method 1: Aminolysis of Phosphorous Acid Derivatives	287
42.9.10.1.2	Method 2: Ligand-Exchange Reactions of Phosphorous Acid Derivatives	288

42.9.10.2	Applications of Product Subclass 10 in Organic Synthesis	288
42.9.11	Product Subclass 11: Phosphorous Acid Monoesters	288
42.9.11.1	Synthesis of Product Subclass 11	289
42.9.11.1.1	Method 1: Hydrolysis of Phosphorous Acid Esters	289
42.9.11.1.2	Method 2: Synthesis from Other Phosphorous Acid Derivatives	289
42.9.11.1.3	Method 3: Esterification of Phosphorous Acid	290
42.9.11.2	Applications of Product Subclass 11 in Organic Synthesis	291
42.9.12	Product Subclass 12: Phosphorous Acid Diesters (Secondary Phosphites)	291
42.9.12.1	Synthesis of Product Subclass 12	291
42.9.12.1.1	Method 1: Hydrolysis of Phosphorous Acid Derivatives	291
42.9.12.1.2	Method 2: Alcoholysis of Phosphorous Acid Derivatives	292
42.9.12.1.3	Method 3: Other Syntheses from Phosphorous Acid Derivatives	293
42.9.12.1.4	Method 4: Esterification of Phosphorous Acid Derivatives	293
42.9.12.2	Applications of Product Subclass 12 in Organic Synthesis	294
42.9.13	Product Subclass 13: Phosphorous Acid Triesters (Tertiary Phosphites)	295
42.9.13.1	Synthesis of Product Subclass 13	295
42.9.13.1.1	Method 1: Alcoholysis of Phosphorous Acid Derivatives	295
42.9.13.1.2	Method 2: Transesterification of Phosphorous Acid Triesters	297
42.9.13.2	Applications of Product Subclass 13 in Organic Synthesis	297
42.9.14	Product Subclass 14: Phosphorothious Acid O-Monoesters	298
42.9.14.1	Synthesis of Product Subclass 14	298
42.9.14.1.1	Method 1: Sulfanylation of Phosphorous Acid Diesters	298
42.9.15	Product Subclass 15: Phosphorothious Acid O,O-Diesters	299
42.9.15.1	Synthesis of Product Subclass 15	299
42.9.15.1.1	Method 1: Sulfanylation of Phosphorous Acid Derivatives	299
42.9.15.2	Applications of Product Subclass 15 in Organic Synthesis	300
42.9.16	Product Subclass 16: Phosphorothious Acid Triesters	300
42.9.16.1	Synthesis of Product Subclass 16	300
42.9.16.1.1	Method 1: Alcoholysis of Phosphorothious Acid Derivatives	300
42.9.16.1.2	Method 2: Thioalcoholysis of Phosphorous Acid Derivatives	301
42.9.17	Product Subclass 17: Phosphorodithious Acid S,S-Diesters	301
42.9.18	Product Subclass 18: Phosphorodithious Acid O-Monoesters	301
42.9.19	Product Subclass 19: Phosphorodithious Acid Triesters	302
42.9.19.1	Synthesis of Product Subclass 19	302
42.9.19.1.1	Method 1: Thioalcoholysis of Phosphorous Acid Derivatives	302
42.9.20	Product Subclass 20: Phosphoroselenous Acid O,O-Diesters	303
42.9.20.1	Synthesis of Product Subclass 20	303
42.9.20.1.1	Method 1: Selanylation of Phosphorous Acid Diester Monohalides	303

42.9.21	Product Subclass 21: Phosphorous Acid Monoester Monoamides	303
42.9.21.1	Synthesis of Product Subclass 21	303
42.9.21.1.1	Method 1: Hydrolysis of Phosphorous Acid Derivatives	303
42.9.22	Product Subclass 22: Phosphorous Acid Diester Monoamides	304
42.9.22.1	Synthesis of Product Subclass 22	304
42.9.22.1.1	Method 1: Alcoholysis of Phosphorous Acid Derivatives	304
42.9.22.1.2	Method 2: Aminolysis of Phosphorous Acid Derivatives	306
42.9.22.2	Applications of Product Subclass 22 in Organic Synthesis	306
42.9.23	Product Subclass 23: Phosphorothious Acid Diester Monoamides	307
42.9.23.1	Synthesis of Product Subclass 23	307
42.9.23.1.1	Method 1: Thioalcoholysis of Phosphorous Acid Derivatives	307
42.9.24	Product Subclass 24: Phosphorous Acid Diamides	308
42.9.24.1	Synthesis of Product Subclass 24	308
42.9.24.1.1	Method 1: Hydrolysis of Phosphorous Acid Derivatives	308
42.9.25	Product Subclass 25: Phosphorous Acid Monoester Diamides	309
42.9.25.1	Synthesis of Product Subclass 25	309
42.9.25.1.1	Method 1: Alcoholysis of Phosphorous Acid Derivatives	309
42.9.25.1.2	Method 2: Aminolysis of Phosphorous Acid Derivatives	310
42.9.25.2	Applications of Product Subclass 25 in Organic Synthesis	311
42.9.26	Product Subclass 26: Phosphorotriithious Acid Triesters	311
42.9.26.1	Synthesis of Product Subclass 26	311
42.9.26.1.1	Method 1: Thioalcoholysis of Phosphorous Acid Derivatives	311
42.9.27	Product Subclass 27: Phosphorodithious Acid Diester Monoamides	312
42.9.27.1	Synthesis of Product Subclass 27	312
42.9.27.1.1	Method 1: Aminolysis of Phosphorous Acid Derivatives	312
42.9.28	Product Subclass 28: Phosphorothious Acid Monoester Diamides	312
42.9.28.1	Synthesis of Product Subclass 28	313
42.9.28.1.1	Method 1: Thioalcoholysis of Phosphorous Acid Derivatives	313
42.9.29	Product Subclass 29: Phosphorotriselenous Acid Triesters	313
42.9.29.1	Synthesis of Product Subclass 29	313
42.9.29.1.1	Method 1: Reaction of a Diselenide with Elemental Phosphorus	313
42.9.30	Product Subclass 30: Phosphorous Acid Triamides	313
42.9.30.1	Synthesis of Product Subclass 30	314
42.9.30.1.1	Method 1: Aminolysis of Phosphorous Acid Derivatives	314
42.9.30.2	Applications of Product Subclass 30 in Organic Synthesis	315

42.10 Applications of Tricoordinated Phosphorus Compounds in Homogeneous Catalysis

42.10.1 General Catalytic Methods

M. Toffano

42.10.1	General Catalytic Methods	347
42.10.1.1	Formation of C—C Bonds	347
42.10.1.1.1	Method 1: Palladium-Promoted Cross-Coupling Reactions	347
42.10.1.1.2	Method 2: Catalysis with Phosphonium Salts as Ligand Precursors	352
42.10.1.2	Formation of C—N Bonds	353
42.10.1.2.1	Method 1: Amination of Aryl and Hetaryl Halides or Trifluoromethanesulfonates	353
42.10.1.2.2	Method 2: Amination of Alk-1-enyl Halides or Trifluoromethanesulfonates	360
42.10.1.2.3	Method 3: Intramolecular Amination Reactions	360
42.10.1.3	Formation of C—O Bonds	361
42.10.1.3.1	Method 1: Alkyl Aryl Ether Synthesis	361
42.10.1.3.2	Method 2: Diaryl Ether Synthesis	362
42.10.1.4	Formation of C—P Bonds	363
42.10.1.4.1	Method 1: Formation of Alkylphosphorus Compounds	363
42.10.1.4.2	Method 2: Formation of Alkenylphosphorus Compounds	364
42.10.1.4.2.1	Variation 1: Hydrophosphination of Alkynes	364
42.10.1.4.2.2	Variation 2: Coupling Reactions	366
42.10.1.4.3	Method 3: Formation of Alkynylphosphorus Compounds	368
42.10.1.4.4	Method 4: Formation of Arylphosphorus Compounds	368
42.10.1.5	Formation of C—S Bonds	369
42.10.1.5.1	Method 1: Formation of an Aryl—Sulfur Bond	370
42.10.1.5.2	Method 2: Formation of an Alkenyl—Sulfur Bond	370
42.10.1.5.3	Method 3: Formation of an Alkynyl—Sulfur Bond	371
42.10.1.6	Formation of C—Sn Bonds	372
42.10.1.7	Synthesis with Catalyst Recycling	373
42.10.1.7.1	Method 1: Catalysis with Fluorinated Phosphines	373
42.10.1.7.2	Method 2: Catalysis with Water-Soluble Phosphines	374
42.10.1.7.2.1	Variation 1: Catalysis with Sulfonated and Carboxylated Phosphines	375
42.10.1.7.2.2	Variation 2: Catalysis with Phosphines Bearing Ammonium Groups	376
42.10.1.7.2.3	Variation 3: Catalysis with Carbohydrate-Derived Phosphines	377
42.10.1.7.2.4	Variation 4: Catalysis with Polyether Phosphines	377
42.10.1.7.3	Method 3: Catalysis with Polymer-Supported Phosphines	378
42.10.1.7.3.1	Variation 1: Metal-Promoted Catalysis with Polymer-Supported Phosphines	378
42.10.1.7.3.2	Variation 2: Catalysis with Polymer-Supported Phosphine Reagents	380

42.10.2	Enantioselective Catalytic Methods	391
42.10.2.1	Approaches to Enantioselective Catalysts	391
42.10.2.1.1	Method 1: Approaches to Chiral Cyclic Phosphines	397
42.10.2.1.1.1	Variation 1: Phospholane-Based Chiral Ligands	397
42.10.2.1.1.2	Variation 2: Phosphetane-Based Chiral Ligands	398
42.10.2.1.1.3	Variation 3: Phosphepin-Based Chiral Ligands	399
42.10.2.1.2	Method 2: Approaches to Atropisomeric Biaryl Bisphosphines	399
42.10.2.1.3	Method 3: Approaches to Ferrocenylphosphines with Planar Chirality ..	402
42.10.2.1.4	Method 4: Approaches to Hybrid Phosphorus–Nitrogen Ligands	405
42.10.2.1.4.1	Variation 1: Phosphino-4,5-dihydrooxazole Ligands	405
42.10.2.1.4.2	Variation 2: Phosphinite-4,5-Dihydrooxazole Ligands	408
42.10.2.1.4.3	Variation 3: Phosphino-4,5-dihydro-1 <i>H</i> -imidazole Ligands	408
42.10.2.1.4.4	Variation 4: Phosphinopyridine and Phosphinoquinoline Ligands	408
42.10.2.1.4.5	Variation 5: Pyridylphosphinite and Quinolyphosphinite Ligands	409
42.10.2.1.4.6	Variation 6: Trost Ligands	409
42.10.2.1.5	Method 5: Approaches to Ligands Bearing P–O and P–N Bonds	410
42.10.2.1.5.1	Variation 1: Phosphinite [P(C,C,O)] Ligands	410
42.10.2.1.5.2	Variation 2: Phosphonite [P(C,O,O)] Ligands	410
42.10.2.1.5.3	Variation 3: Phosphite [P(O,O,O)] Ligands	410
42.10.2.1.5.4	Variation 4: Phosphoramidite [P(O,O,N)] Ligands	410
42.10.2.2	Enantioselective C–C Bond-Forming Reactions	411
42.10.2.2.1	Method 1: Metal-Catalyzed Allylic Alkylation (Tsuji–Trost Reaction)	411
42.10.2.2.1.1	Variation 1: Using 1,3-Symmetrically Substituted Allylic Ligands	411
42.10.2.2.1.2	Variation 2: Using Monosubstituted Allylic Ligands	413
42.10.2.2.1.3	Variation 3: Using 1,3-Dissymmetrically Disubstituted Allylic Substrates ..	415
42.10.2.2.2	Method 2: Palladium-Catalyzed Arylation of Alkenes (Heck Reaction) ..	418
42.10.2.2.2.1	Variation 1: Selection of Enantiotopic C=C Bonds of an Achiral Substrate ..	419
42.10.2.2.2.2	Variation 2: Selection of Enantiotopic Faces of an Achiral Alkenic Substrate	420
42.10.2.2.2.3	Variation 3: Selection of Enantiotopic Sites of an Achiral Alkenic Substrate	423
42.10.2.2.3	Method 3: Metal-Catalyzed Coupling Reactions	424
42.10.2.2.4	Method 4: Conjugate Addition Reactions	427
42.10.2.2.4.1	Variation 1: Metal-Catalyzed 1,4-Addition of Organometallic Reagents to Activated Alkenes	427
42.10.2.2.4.2	Variation 2: Copper-Catalyzed Asymmetric 1,4-Addition of Organozinc Reagents	427
42.10.2.2.4.3	Variation 3: Conjugate Addition to Cyclohexa-2,5-dienones	428
42.10.2.2.4.4	Variation 4: Copper-Catalyzed Asymmetric 1,4-Addition of Grignard Reagents	429
42.10.2.2.4.5	Variation 5: Rhodium-Catalyzed Asymmetric 1,4-Addition of Organoboron Reagents	429
42.10.2.2.5	Methods 5: Miscellaneous Methods	431
42.10.2.2.5.1	Variation 1: Metal-Catalyzed Addition of Organometallic Reagents to Unactivated Alkenes	431

42.10.2.2.5.2	Variation 2:	Metal-Catalyzed Addition of Organometallic Reagents to Carbonyl Compounds	432
42.10.2.3		Enantioselective C—H Bond-Forming Reactions	433
42.10.2.3.1	Method 1:	Rhodium-Promoted Hydrogenation of Alkenes	433
42.10.2.3.2	Method 2:	Iridium-Promoted Hydrogenation of Nonfunctionalized Alkenes	438
42.10.2.3.3	Method 3:	Iridium-Promoted Hydrogenation of Imines	441
42.10.2.3.4	Method 4:	Ruthenium-Promoted Hydrogenation of Ketones	444
42.10.2.3.5	Method 5:	Rhodium-Promoted Hydroformylation of Alkenes	451
42.10.2.3.6	Method 6:	Rhodium-Promoted Hydroboration of Alkenes	454

42.11 Applications of Tricoordinated Phosphorus Compounds in Organocatalysis

J. L. Methot and W. R. Roush

42.11		Applications of Tricoordinated Phosphorus Compounds in Organocatalysis	469
42.11.1	Method 1:	Morita–Baylis–Hillman Reactions	469
42.11.1.1	Variation 1:	Tandem Phosphorylsilylation/Ireland–Claisen Rearrangement	472
42.11.1.2	Variation 2:	Intramolecular Morita–Baylis–Hillman Allylic Alkylation	473
42.11.1.3	Variation 3:	α -Arylation of Enones with Hypervalent Bismuth Reagents	474
42.11.1.4	Variation 4:	Phosphine-Mediated Reductive Condensation of Acyloxybutynoates	474
42.11.1.5	Variation 5:	Regioselective Allylic Displacement	475
42.11.1.6	Variation 6:	The Morita–Baylis–Hillman Reaction Using Air-Stable Phosphine Reagents	476
42.11.1.7	Variation 7:	Asymmetric Morita–Baylis–Hillman Reactions	476
42.11.1.8	Variation 8:	The Aza-Morita–Baylis–Hillman Reaction	477
42.11.2	Method 2:	Michael Addition Reactions	479
42.11.3	Method 3:	Nucleophilic Addition Reactions at Nonactivated Positions	481
42.11.3.1	Variation 1:	Chiral Nucleophilic Addition Reactions	484
42.11.3.2	Variation 2:	Nucleophilic Interception at the α -Position	485
42.11.3.3	Variation 3:	Tandem α - or γ -Addition and Michael Addition Reactions	486
42.11.4	Method 4:	[3 + 2]-Cycloaddition Reactions	487
42.11.5	Method 5:	[4 + 2]-Cycloaddition Reactions	492
42.11.6	Method 6:	Acylation and Kinetic Resolution of Alcohols	495
42.11.7	Method 7:	Isomerization of Activated Alkynes to Dienes	497

42.12 Product Class 12: Alkylphosphonium Salts

D. Virieux, J.-N. Volle, and J.-L. Pirat

42.12		Product Class 12: Alkylphosphonium Salts	503
42.12.1		Product Subclass 1: Non-Heteroatom-Substituted Alkylphosphonium Salts	503
42.12.1.1		Synthesis of Product Subclass 1	503
42.12.1.1.1	Method 1:	Alkylation of Phosphines	503
42.12.1.1.1.1	Variation 1:	Alkylation of Tertiary Phosphines	503

42.12.1.1.1.2	Variation 2:	Alkylation of Tertiary Phosphines Using Alcohols or Derivatives	504
42.12.1.1.1.3	Variation 3:	Successive Alkylation of Phosphines, Phosphides, or Polyphosphines	505
42.12.1.1.1.4	Variation 4:	Nucleophilic Addition of Phosphines or Derivatives to Alkenes or Alkynes	505
42.12.1.1.2	Method 2:	Modification of Phosphonium Salts	507
42.12.1.1.2.1	Variation 1:	Diels–Alder Reaction of Triphenyl(vinyl)phosphonium Salts with 1,4-Dienes	507
42.12.1.1.2.2	Variation 2:	Modification of Phosphonium Salts by Reaction of Ylides	507
42.12.1.1.3	Method 3:	Reaction of Phosphaalkenes	508
42.12.2	Product Subclass 2: Hydroxyphosphonium Salts		509
42.12.2.1	Synthesis of Product Subclass 2		509
42.12.2.1.1	Method 1:	Synthesis of α -Hydroxyphosphonium Salts and Derivatives	509
42.12.2.1.1.1	Variation 1:	Addition of Phosphines to Aldehydes or Ketones	509
42.12.2.1.1.2	Variation 2:	Alkylation of (α -Hydroxyalkyl)phosphines or Derivatives	511
42.12.2.1.1.3	Variation 3:	Reaction of Phosphines with Acetals, Ketals, or Hemiacetals	513
42.12.2.1.1.4	Variation 4:	Reaction of Phosphines with Enol Ethers	513
42.12.2.1.2	Method 2:	Synthesis of β -Hydroxyphosphonium Salts and Derivatives	514
42.12.2.1.2.1	Variation 1:	Alkylation of Phosphines with β -Hydroxyalkyl Halides or Derivatives	514
42.12.2.1.2.2	Variation 2:	Alkylation of (β -Hydroxyalkyl)phosphines or Derivatives	517
42.12.2.1.2.3	Variation 3:	Reaction of Phosphines with Epoxides	520
42.12.2.1.2.4	Variation 4:	Reaction of Ylides with Ketones or Aldehydes	522
42.12.2.1.2.5	Variation 5:	Transformation of β -Functionalized Phosphonium Salts	524
42.12.2.1.3	Method 3:	Synthesis of γ -Hydroxyphosphonium Salts and Derivatives	526
42.12.2.1.3.1	Variation 1:	Alkylation of Phosphines with γ -Hydroxyalkyl Halides or Derivatives	526
42.12.2.1.3.2	Variation 2:	Alkylation of γ -Hydroxyphosphines and Derivatives with Alkyl Halides	528
42.12.2.1.3.3	Variation 3:	Reaction of Ylides with Epoxides and 3-Oxaalkyl Halides	529
42.12.2.1.3.4	Variation 4:	Transformation of γ -Functionalized Phosphonium Salts	530
42.12.3	Product Subclass 3: Sulfanyl- and Selanylphosphonium Salts and Derivatives		531
42.12.3.1	Synthesis of Product Subclass 3		531
42.12.3.1.1	Method 1:	Synthesis of α -Sulfanyl and α -Selanylphosphonium Salts and Derivatives	531
42.12.3.1.1.1	Variation 1:	Alkylation of Phosphines with Sulfur- or Selenium-Substituted Alkyl Halides	531
42.12.3.1.1.2	Variation 2:	Alkylation of Phosphines with Bis(sulfanyl)- or Bis(selanyl) Alkyl Halides, or Cationic Derivatives	533
42.12.3.1.1.3	Variation 3:	Transformation of Phosphonium Salts with Anionic Sulfur Nucleophiles	535
42.12.3.1.1.4	Variation 4:	Reaction of Ylides with Sulfur- or Selenium-Containing Electrophiles	536
42.12.3.1.2	Method 2:	Synthesis of β -Sulfanyl- and β -Selanylphosphonium Salts and Derivatives	537

42.12.3.1.2.1	Variation 1:	Alkylation of Phosphines with Sulfur- or Selenium-Containing Alkyl Halides or Sulfonates	538
42.12.3.1.2.2	Variation 2:	Reaction of Phosphines with 1,1,2-Trimethyldisulfanium or 1-Methyl-1,2-diphenyldisulfanium Salts	539
42.12.3.1.2.3	Variation 3:	Reaction of Vinylphosphonium Salts with Sulfur Dioxide, Thiols, or Associated Anions	540
42.12.3.1.2.4	Variation 4:	Reaction of Ylides with Miscellaneous Electrophiles	542
42.12.3.1.3	Method 3:	Synthesis of γ -Sulfanyl- and γ -Selanylphosphonium Salts and Derivatives	543
42.12.3.1.3.1	Variation 1:	Alkylation of Phosphines with Sulfur- or Selenium-Substituted Alkyl Halides or Related Compounds	543
42.12.3.1.3.2	Variation 2:	Transformation of Phosphonium Salts	544
42.12.4	Product Subclass 4: Carbonylphosphonium Salts and Derivatives		545
42.12.4.1	Synthesis of Product Subclass 4		545
42.12.4.1.1	Method 1:	Synthesis of <i>P</i> -Carbonylphosphonium Salts and Derivatives ..	545
42.12.4.1.1.1	Variation 1:	Reaction of Phosphines with Various Carbonyl Electrophiles ..	546
42.12.4.1.1.2	Variation 2:	Alkylation of <i>P</i> -Carbonylphosphines with Alkyl Halides or Sulfonates	548
42.12.4.1.2	Method 2:	Synthesis of α -Carbonylphosphonium Salts and Derivatives ..	550
42.12.4.1.2.1	Variation 1:	Alkylation of Phosphines with α -(Halomethyl)carbonyl Species	550
42.12.4.1.2.2	Variation 2:	Reaction of Ylides with Carbonylated Electrophiles	553
42.12.4.1.2.3	Variation 3:	Reaction of Stabilized Ylides with Other Electrophiles	556
42.12.4.1.2.4	Variations 4:	Miscellaneous Reactions	557
42.12.4.1.3	Method 3:	Synthesis of β -Carbonyl-Substituted Phosphonium Salts and Derivatives	558
42.12.4.1.3.1	Variation 1:	Alkylation of Phosphines with β -Carbonyl-Substituted Alkyl Halides	559
42.12.4.1.3.2	Variation 2:	Reaction of Phosphines with α,β -Unsaturated Carbonyl Species	561
42.12.4.1.3.3	Variation 3:	Alkylation of β -Carbonylphosphines with Alkyl Halides	565
42.12.5	Product Subclass 5: Polyphosphonium Salts		565
42.12.5.1	Synthesis of Product Subclass 5		565
42.12.5.1.1	Method 1:	Synthesis of Multiphosphonium Salts	566
42.12.5.1.1.1	Variation 1:	Reaction with Multihalides	566
42.12.5.1.1.2	Variation 2:	Reaction of Unsaturated Precursors	566
42.12.5.1.1.3	Variation 3:	Recursive Synthesis from a Phosphine	567
42.12.5.1.2	Method 2:	Synthesis of Polymeric Phosphonium Salts	567
42.12.5.1.2.1	Variation 1:	Reaction of Phosphonium Monomers	567
42.12.5.1.2.2	Variation 2:	Functionalization of Polymeric Backbones	569
42.12.6	Product Subclass 6: Cyclic Phosphonium Salts		570
42.12.6.1	Synthesis of Product Subclass 6		570
42.12.6.1.1	Method 1:	Cyclization onto Phosphorus	570
42.12.6.1.1.1	Variation 1:	Reaction of Secondary Phosphines or Derivatives with 1, <i>n</i> -Dielectrophiles	570
42.12.6.1.1.2	Variation 2:	Intramolecular Cyclization of Tertiary Phosphines	571

42.12.6.1.1.3	Variation 3:	Intermolecular Cyclization of Tertiary Phosphines	572
42.12.6.1.1.4	Variation 4:	Reaction of Halophosphines	574
42.12.6.1.1.5	Variation 5:	Reaction of Methylene phosphonium Ions	575
42.12.6.1.2	Method 2:	Cyclization between Two Phosphorus Substituents	576
42.12.7	Product Subclass 7: Heterophosphonium Salts		577
42.12.7.1	Synthesis of Product Subclass 7		577
42.12.7.1.1	Method 1:	Synthesis from Tricoordinate Phosphorus Compounds	577
42.12.7.1.1.1	Variation 1:	Alkylation of Tricoordinate Reagents	577
42.12.7.1.1.2	Variation 2:	Reaction of Phosphines with Heteroatomic Electrophiles	580
42.12.7.1.2	Method 2:	Synthesis from Tetracoordinate Phosphorus Compounds	581
42.12.7.1.2.1	Variation 1:	Modification of Heterophosphonium Salts	581
42.12.7.1.2.2	Variation 2:	Reaction of Electrophiles with Tetracoordinate Phosphorus Derivatives	582
42.12.7.1.2.3	Variation 3:	Reaction of Secondary Phosphine–Borane Complexes	582

42.13 **Product Class 13: Trialkylphosphine Oxides, Sulfides, Selenides, Tellurides, and Imides**

N. L. Kilah and S. B. Wild

42.13	Product Class 13: Trialkylphosphine Oxides, Sulfides, Selenides, Tellurides, and Imides		595
42.13.1	Product Subclass 1: Trialkylphosphine Oxides		595
42.13.1.1	Synthesis of Product Subclass 1		595
42.13.1.1.1	Method 1:	Oxidation of Trialkylphosphines	595
42.13.1.1.1.1	Variation 1:	Oxidation with Hydrogen Peroxide	595
42.13.1.1.1.2	Variation 2:	Oxidation with Sulfur(VI) Oxides	596
42.13.1.1.1.3	Variation 3:	Oxidation by Nitrous Oxide	597
42.13.1.1.1.4	Variation 4:	Oxidation with an Iodosylaryl Sulfone	597
42.13.1.1.2	Method 2:	Oxidation of Phosphonium Salts	598
42.13.1.1.3	Method 3:	Addition of Dialkylphosphine Oxides to Alkenes	599
42.13.1.1.4	Method 4:	Addition of Dialkylphosphine Oxides to Ketones or Aldehydes	600
42.13.1.1.5	Method 5:	Reactions of Dialkylphosphine Oxides with Alkyl Halides	602
42.13.1.1.5.1	Variation 1:	Base-Induced Ionization	602
42.13.1.1.5.2	Variation 2:	Lewis Acid Catalysis	603
42.13.1.1.5.3	Variation 3:	Reduction with Sodium Bis(2-methoxyethoxy)aluminum Hydride	604
42.13.1.1.6	Method 6:	Additions of Dialkyl(chloro)phosphines to Enones	605
42.13.1.1.7	Method 7:	Reactions of Chlorophosphine Oxides with Grignard Reagents	606
42.13.1.1.8	Method 8:	Reactions of Dialkylphosphinites with Alkyl Halides	607
42.13.1.1.9	Method 9:	Isomerization of Dialkylphosphinites	609
42.13.1.1.10	Method 10:	Cycloaddition of Alkyl(dichloro)phosphines with Dienes	610
42.13.1.1.11	Method 11:	Addition of Dialkylphosphine Oxides to Imines	612
42.13.1.1.12	Method 12:	Hydrogenation of Tertiary Arylphosphine Oxides	612
42.13.1.1.13	Method 13:	Conversion of Trialkylphosphine Ylides into Trialkylphosphine Oxides	614
42.13.1.1.14	Method 14:	Oxygenation of Trialkylphosphine Imides	615

42.13.1.1.14.1	Variation 1:	By Reaction with a Ketone	615
42.13.1.1.14.2	Variation 2:	By Reaction with Methanol	615
42.13.1.1.14.3	Variation 3:	By Treatment with an Oxidizing Agent	616
42.13.1.1.15	Method 15:	Oxygenation of Trialkylphosphine Sulfides	616
42.13.1.1.15.1	Variation 1:	Treatment with Phosgene	616
42.13.1.1.15.2	Variation 2:	Treatment with Dimethyldioxirane	617
42.13.1.1.15.3	Variation 3:	Treatment with Trifluoroacetic Anhydride	617
42.13.1.1.15.4	Variation 4:	Treatment with 7-Oxabicyclo[4.1.0]heptane and Trifluoroacetic Acid	617
42.13.1.1.16	Method 16:	Oxygenation of a Trialkylphosphine Selenide	617
42.13.2	Product Subclass 2: Trialkylphosphine Sulfides		618
42.13.2.1	Synthesis of Product Subclass 2		618
42.13.2.1.1	Method 1:	Addition of Dialkylphosphine Sulfides to Alkenes	618
42.13.2.1.1.1	Variation 1:	Base-Promoted Addition	618
42.13.2.1.1.2	Variation 2:	Free-Radical-Initiated Addition	619
42.13.2.1.2	Method 2:	Addition of Dialkylphosphine Sulfides to Aldehydes or Ketones	619
42.13.2.1.3	Method 3:	Sulfurization of Trialkylphosphines with Elemental Sulfur	621
42.13.2.1.4	Method 4:	Reaction of Dialkyl(vinyl)phosphine Sulfides with Nucleophiles	621
42.13.2.1.5	Method 5:	Reaction of Triethylphosphine with a (Phosponio)(phosphoranylidene)methanethiolate	622
42.13.2.1.6	Method 6:	Addition of a 1,3-Diene to an Alkyl(chloro)(methylsulfanyl)phosphine	622
42.13.2.1.7	Method 7:	Sulfurization of Trialkylphosphine Oxides	623
42.13.3	Product Subclass 3: Trialkylphosphine Selenides		623
42.13.3.1	Synthesis of Product Subclass 3		623
42.13.3.1.1	Method 1:	Addition of a Dialkylphosphine Selenide to an Aldehyde	623
42.13.3.1.2	Method 2:	Addition of Potassium Selenocyanate to Trialkylphosphines	624
42.13.3.1.3	Method 3:	Addition of Elemental Selenium to Trialkylphosphines	625
42.13.3.1.4	Method 4:	Catalytic Reaction of Diphenyl Diselenide and Tributylphosphine under Microwave Irradiation	625
42.13.3.1.5	Method 5:	Reaction of a 1,2,3-Selenadiazole with a Trialkylphosphine	626
42.13.4	Product Subclass 4: Trialkylphosphine Tellurides		626
42.13.4.1	Synthesis of Product Subclass 4		626
42.13.4.1.1	Method 1:	Addition of Elemental Tellurium to Trialkylphosphines	626
42.13.5	Product Subclass 5: Trialkylphosphine Imides [Trialkyl(imino)phosphoranes]		627
42.13.5.1	Synthesis of Product Subclass 5		627
42.13.5.1.1	Method 1:	Reaction of an Azide with a Trialkylphosphine (The Staudinger Reaction)	627
42.13.5.1.2	Method 2:	Addition of Base to Aminophosphonium Salts	628
42.13.5.1.3	Method 3:	Addition of an Iodonium Ylide to Tributylphosphine	628

42.14	Product Class 14: Dialkylphosphinic Acids and Derivatives	
	J. Drabowicz, J. Lewkowski, C. V. Stevens, D. Krasowska, and R. Karpowicz	
<hr/>		
42.14	Product Class 14: Dialkylphosphinic Acids and Derivatives	633
42.14.1	Product Subclass 1: Dialkyltrihalophosphoranes and Other Heteroatom-Containing Analogues	634
42.14.1.1	Synthesis of Product Subclass 1	634
42.14.1.1.1	Method 1: Halogenation of Dialkylhalophosphines	635
42.14.1.1.2	Method 2: Electrochemical Fluorination of Secondary Phosphines	636
42.14.2	Product Subclass 2: Dialkylphosphinic Halides	636
42.14.2.1	Synthesis of Product Subclass 2	636
42.14.2.1.1	Method 1: Halogenation of Tri- and Tetracoordinated Phosphorus-Containing Precursors	636
42.14.2.1.1.1	Variation 1: Halogenation of Dialkylphosphinic Acids and Derivatives	636
42.14.2.1.1.2	Variation 2: Halogenation of Dialkylphosphine Oxides	637
42.14.2.1.1.3	Variation 3: Halogenation of Dialkylphosphines and Dialkylphosphinites	638
42.14.2.1.2	Method 2: Oxidation of Dialkylhalophosphines	638
42.14.2.1.3	Method 3: Synthesis from Dialkyltrihalophosphoranes	639
42.14.3	Product Subclass 3: Dialkylphosphinic Acids	640
42.14.3.1	Synthesis of Product Subclass 3	640
42.14.3.1.1	Method 1: Oxidation of Secondary Dialkylphosphines	640
42.14.3.1.2	Method 2: Dealkylation of Alkyl Dialkylphosphinates	640
42.14.3.1.3	Method 3: Alkylation Reactions of Tri- and Tetracoordinated Phosphorus-Containing Precursors	641
42.14.3.1.3.1	Variation 1: Alkylation of Hypophosphorous Acid Salts	641
42.14.3.1.3.2	Variation 2: Alkylation of Bis(trimethylsilyl) Phosphonite	642
42.14.3.1.4	Method 4: Hydrolysis of Tetra- and Pentacoordinated Phosphorus-Containing Precursors	642
42.14.3.1.4.1	Variation 1: Hydrolysis of Dialkylphosphinic Halides	642
42.14.3.1.4.2	Variation 2: Hydrolysis of <i>P,P</i> -Dialkylphosphinic Amides	643
42.14.3.1.4.3	Variation 3: Hydrolysis of Dialkyltrihalophosphoranes	644
42.14.3.1.5	Method 5: Oxidative Cleavage of Tetraalkyldiphosphine Disulfides	644
42.14.3.1.6	Method 6: Reaction of Alkylphosphinic Acids with Alkenes	645
42.14.4	Product Subclass 4: Alkyl/Aryl Dialkylphosphinates	645
42.14.4.1	Synthesis of Product Subclass 4	645
42.14.4.1.1	Method 1: Oxidation of Alkyl/Aryl Dialkylphosphinites	645
42.14.4.1.2	Method 2: Arbuzov Reaction of Dialkyl Alkylphosphonites	646
42.14.4.1.3	Method 3: Reaction of Dialkylphosphinic Halides with Alcohols or Phenols	647
42.14.4.1.4	Method 4: Alkylation of Alkyl Alkylphosphinates	647
42.14.4.1.5	Method 5: Esterification of Dialkylphosphinic Acids and Transesterification of Alkyl Dialkylphosphinates	649
42.14.5	Product Subclass 5: <i>S</i>-Alkyl/Aryl Dialkylphosphinothioates	650
42.14.5.1	Synthesis of Product Subclass 5	650

42.14.5.1.1	Method 1:	S-Alkylation of Dialkylphosphinothioic O-Acids	650
42.14.5.1.2	Method 2:	Reaction of Dialkylphosphinic Halides with Thiols	651
42.14.5.1.3	Method 3:	Reaction of Secondary Phosphine Oxides or Dialkylhalophosphine Derivatives with Disulfides or Thiocarbonyl Derivatives	651
42.14.6	Product Subclass 6: P,P-Dialkylphosphinic Amides		652
42.14.6.1	Synthesis of Product Subclass 6		652
42.14.6.1.1	Method 1:	Reaction of Dialkylphosphinic Halides with Amine Derivatives	652
42.14.6.1.2	Method 2:	Oxidation of Aminophosphines	653
42.14.6.1.3	Method 3:	Reaction of Dialkylhalophosphines with Hydroxylamine Derivatives	654
42.14.7	Product Subclass 7: Dialkylphosphinothioic Halides		654
42.14.7.1	Synthesis of Product Subclass 7		654
42.14.7.1.1	Method 1:	Halogenation of Pentavalent Phosphinothioic Precursors	654
42.14.7.1.1.1	Variation 1:	Halogenation of Dialkylphosphinothioic Acids	654
42.14.7.1.1.2	Variation 2:	Halogenation of Tetraalkyldiphosphine Disulfides	655
42.14.7.1.1.3	Variation 3:	Halogenation of Se-Alkyl Dialkylphosphinoselenothioates	655
42.14.7.1.2	Method 2:	Addition of Sulfur to Dialkylhalophosphines	656
42.14.7.1.3	Method 3:	Reaction of Phosphonothioic Dihalides with Organometallic Reagents	656
42.14.7.1.4	Method 4:	Halogenation of Dialkylphosphinothioic Amides and S-Amino Derivatives of Dialkylphosphinodithioic Acids	657
42.14.8	Product Subclass 8: Dialkylphosphinothioic O-Acids and Their Sulfur and Selenium Analogues		658
42.14.8.1	Synthesis of Product Subclass 8		658
42.14.8.1.1	Method 1:	Hydrolysis of Dialkylphosphinothioic Halides	658
42.14.8.1.2	Method 2:	Preparation of Dialkylphosphinodithioic Acids	658
42.14.8.1.3	Method 3:	Preparation of Dialkylphosphinoselenothioic Se-Acids	659
42.14.9	Product Subclass 9: O-Alkyl/Aryl Dialkylphosphinothioates		659
42.14.9.1	Synthesis of Product Subclass 9		659
42.14.9.1.1	Method 1:	Reaction of Dialkylphosphinothioic Halides with Alcohols or Phenols	659
42.14.9.1.2	Method 2:	Sulfuration of Alkyl Dialkylphosphinites	660
42.14.9.1.3	Method 3:	Alkylation of O-Alkyl Alkylphosphinothioates	661
42.14.9.1.4	Method 4:	Reaction of Tetraalkyldiphosphine Disulfides or Phosphine Sulfides	661
42.14.10	Product Subclass 10: Alkyl/Aryl Dialkylphosphinodithioates and Se-Alkyl/Aryl Dialkylphosphinoselenothioates		662
42.14.10.1	Synthesis of Product Subclass 10		662
42.14.10.1.1	Method 1:	Alkylation of Dialkylphosphinodithioic Acids or Their Salts ...	662
42.14.10.1.2	Method 2:	Arbuzov-Type Alkylation of Alkylphosphonotrithioates	662
42.14.10.1.3	Method 3:	Reaction of Tetraalkyldiphosphine Disulfides with Disulfides and Diselenides	663

42.14.11	Product Subclass 11: <i>P,P</i>-Dialkylphosphinothioic Amides	664
42.14.11.1	Synthesis of Product Subclass 11	664
42.14.11.1.1	Method 1: Reaction of Dialkylphosphinothioic Halides with Amines	664
42.14.11.1.2	Method 2: Sulfuration of Aminophosphines	665
42.14.12	Product Subclass 12: Dialkylphosphinoselenoic Halides	665
42.14.12.1	Synthesis of Product Subclass 12	665
42.14.12.1.1	Method 1: Addition of Selenium to Dialkylhalophosphines	665
42.14.13	Product Subclass 13: Dialkylphosphinoselenoic O-Acids and Dialkylphosphinodiselenoic Acids	666
42.14.13.1	Synthesis of Product Subclass 13	666
42.14.13.1.1	Method 1: Hydrolysis of Dialkylphosphinoselenoic Halides	666
42.14.13.1.2	Method 2: Acidification of Sodium Dialkylphosphinodiselenoates	667
42.14.14	Product Subclass 14: O-Alkyl/Aryl Dialkylphosphinoselenoates	667
42.14.14.1	Synthesis of Product Subclass 14	667
42.14.14.1.1	Method 1: Addition of Selenium to Dialkylphosphinites	667
42.14.14.1.2	Method 2: Reaction of Dialkylphosphinoselenoic Halides with Alcohols	668
42.14.15	Product Subclass 15: S-Alkyl/Aryl Dialkylphosphinoselenothioates	668
42.14.15.1	Synthesis of Product Subclass 15	668
42.14.15.1.1	Method 1: Addition of Selenium to Dialkylphosphinothioites	668
42.14.16	Product Subclass 16: <i>P,P</i>-Dialkylphosphinoselenoic Amides	669
42.14.16.1	Synthesis of Product Subclass 16	669
42.14.16.1.1	Method 1: Addition of Selenium to Aminophosphines	669
42.14.16.1.2	Method 2: Reaction of Dialkylphosphinoselenoic Halides with Amines	669
42.14.17	Product Subclass 17: Anhydrides of Dialkylphosphinic Acids and Their Sulfur and Selenium Analogues	670
42.14.17.1	Synthesis of Product Subclass 17	670
42.14.17.1.1	Method 1: Oxidation of Dialkylphosphine Disulfides	670
42.14.17.1.2	Method 2: Condensation of Dialkylphosphinic Acid Esters with Dialkylphosphinic Halides and Their Sulfur Analogues	671
42.14.17.1.3	Method 3: Self-Condensation of Dialkylphosphinic Halides and Their Sulfur Analogues	671
42.14.17.1.4	Method 4: Oxidation or Sulfuration of Dialkylphosphinous Anhydrides	673
42.15	Product Class 15: Alkylphosphonic Acids and Derivatives J. Drabowicz, P. Kiełbasiński, P. Łyżwa, M. Mikołajczyk, and A. Zajac	
42.15	Product Class 15: Alkylphosphonic Acids and Derivatives	679
42.15.1	Product Subclass 1: Alkylphosphonic Dihalides and Their Sulfur and Selenium Derivatives	680
42.15.1.1	Synthesis of Product Subclass 1	680

42.15.1.1.1	Method 1:	Alkylphosphonic Dihalides from Alkylphosphonic Acids and Their Derivatives	680
42.15.1.1.1.1	Variation 1:	Reaction of Phosphonic Acids with Halogenating Reagents ..	680
42.15.1.1.1.2	Variation 2:	Reaction of Phosphonic Acid Diesters with Halogenating Reagents	681
42.15.1.1.2	Method 2:	Alkylphosphonic Dihalides from Alkyltetrahalophosphoranes	682
42.15.1.1.3	Method 3:	Hydrolytic (or Other) Decompositions of Aluminum Halide Complexes of Alkyltetrahalophosphoranes	682
42.15.1.1.4	Method 4:	Oxidation of Alkyldihalophosphines	683
42.15.1.1.5	Method 5:	Alkylphosphonic Dihalides from Phosphorus Trihalides	684
42.15.1.1.5.1	Variation 1:	Reaction of Phosphorus Trihalides with Aliphatic Hydrocarbons	684
42.15.1.1.5.2	Variation 2:	Other Protocols Based on the Use of Phosphorus Trichloride ..	684
42.15.1.1.6	Method 6:	Alkylphosphonic Dihalides by Miscellaneous Procedures	684
42.15.1.1.7	Method 7:	Synthesis of Alkylphosphonothioic Dihalides	685
42.15.1.1.7.1	Variation 1:	Sulfuration of Alkylphosphonic Dihalides	685
42.15.1.1.7.2	Variation 2:	Sulfuration of Alkyldihalophosphines	685
42.15.1.1.7.3	Variation 3:	Other Protocols	685
42.15.1.1.8	Method 8:	Synthesis of Alkylphosphonoselenoic Dihalides	686
42.15.1.1.8.1	Variation 1:	Addition of Selenium to Alkyldihalophosphines	686
42.15.2	Product Subclass 2: Alkylphosphonic Acids and Their Sulfur and Selenium Analogues		686
42.15.2.1	Synthesis of Product Subclass 2		686
42.15.2.1.1	Method 1:	Hydrolysis of Alkyltetrachlorophosphoranes	686
42.15.2.1.2	Method 2:	Hydrolysis of Alkylphosphonic Dihalides	687
42.15.2.1.3	Method 3:	Alkylphosphonic Acids from Alkylphosphonic Acid Esters	687
42.15.2.1.3.1	Variation 1:	Hydrolysis of Alkylphosphonic Acid Esters	687
42.15.2.1.3.2	Variation 2:	Dealkylation of Dialkyl Alkylphosphonates	688
42.15.2.1.4	Method 4:	Hydrolysis of Alkylphosphonic Acid Amides	689
42.15.2.1.5	Method 5:	Disproportionation of Alkylphosphonous Acids	690
42.15.2.1.6	Method 6:	In Situ Oxidation of Alkylphosphonous Acids	690
42.15.2.1.7	Method 7:	Oxidation of Primary Alkylphosphines	691
42.15.2.1.8	Method 8:	Addition of Phosphorous Acid to Alkenes, Carbonyl Compounds, Imines, and Nitriles	691
42.15.2.1.9	Method 9:	Reaction of Phosphorus Trichloride with Carbonyl Compounds or Carboxylic Acid Derivatives Followed by Hydrolysis	692
42.15.2.1.10	Method 10:	Hydrolysis of 1-Aryl-1-[(4-tolylsulfinyl)amino]methylbis(diethylamino)phosphine-Boranes	693
42.15.2.1.11	Method 11:	Synthesis of Alkylphosphonothioic Acids	694
42.15.3	Product Subclass 3: Alkyl/Aryl Alkylphosphonohalidates		694
42.15.3.1	Synthesis of Product Subclass 3		694
42.15.3.1.1	Method 1:	Reaction of Dialkyl Alkylphosphonates with Halogenating Agents	694
42.15.3.1.2	Method 2:	Reaction of Aluminum Halide Complexes of Alkyltetrachlorophosphoranes with Alcohols	695

42.15.3.1.3	Method 3:	Reaction of Dialkyl Chlorophosphites with Alkyl Halides	695
42.15.3.1.4	Method 4:	Reaction of Alkylphosphonic Dihalides with Alcohols or Phenols	696
42.15.3.1.5	Method 5:	Halogenation of Alkylphosphinates	696
42.15.4	Product Subclass 4: S-Alkyl/Aryl Alkylphosphonohalidothioates and Sulfur Derivatives		696
42.15.4.1	Synthesis of Product Subclass 4		696
42.15.4.1.1	Method 1:	Reaction of Alkylphosphonic Dihalides with Thiols	696
42.15.4.1.2	Method 2:	Reaction of Alkylchlorophosphines with Sulfenyl Chlorides	697
42.15.4.1.3	Method 3:	Chlorination of O,O-Dialkyl Alkylphosphonothioates	697
42.15.4.1.4	Method 4:	Reaction of Alkylphosphonothioic Dihalides with Alkane-/Arenethiols	697
42.15.5	Product Subclass 5: P-Alkylphosphonamidic Halides and Their Sulfur and Selenium Derivatives		698
42.15.5.1	Synthesis of Product Subclass 5		698
42.15.5.1.1	Method 1:	Reaction of Alkylphosphonic Dihalides with Amines	698
42.15.5.1.2	Method 2:	Exchange Reactions of Alkylphosphonic Diamides	699
42.15.5.1.3	Method 3:	Rearrangement of Allyl Dialkylphosphoramidochloridites	699
42.15.5.1.4	Method 4:	Oxidative Conversion of Aminochlorophosphines	700
42.15.5.1.5	Method 5:	Ring Opening of 1-Functionalized Aziridines with Alkylphosphonic Dihalides	701
42.15.5.1.6	Method 6:	Reaction of Alkylphosphonothioic Dihalides with Amines	702
42.15.5.1.7	Method 7:	Addition of Sulfur to Alkyl(dialkylamino)halophosphines	702
42.15.5.1.8	Method 8:	Reaction of Aminesulfenamides with Alkylphosphonic Dichlorides	703
42.15.5.1.9	Method 9:	Reaction of Alkylphosphonoselenoic Dihalides with Amines	703
42.15.5.1.10	Method 10:	Addition of Selenium to Alkyl(chloro)(dialkylamino)phosphines	704
42.15.6	Product Subclass 6: Alkyl/Aryl Hydrogen Alkylphosphonates and Their O-Alkyl/Aryl Sulfur and Selenium Derivatives		704
42.15.6.1	Synthesis of Product Subclass 6		704
42.15.6.1.1	Method 1:	Synthesis from Alkylphosphonic Dichlorides	704
42.15.6.1.2	Method 2:	Hydrolysis of Alkyl/Aryl Alkylphosphonochloridates	707
42.15.6.1.3	Method 3:	Hydrolysis of Diesters of Alkylphosphonic Acids	708
42.15.6.1.4	Method 4:	Esterification of Alkylphosphonic Acids	709
42.15.6.1.5	Method 5:	Dealkylation of Dialkyl Alkylphosphonates	710
42.15.6.1.5.1	Variation 1:	Dealkylation of Dialkyl Phosphonates with Sodium Iodide	711
42.15.6.1.5.2	Variation 2:	Dealkylation of Dialkyl Phosphonates with Sodium Azide	711
42.15.6.1.5.3	Variation 3:	Selective Monodebenzylation of Dibenzyl Phosphonates with Tertiary Amines	712
42.15.6.1.5.4	Variation 4:	Dealkylation of Dialkyl Methylphosphonates with Diphenylguanidine	713
42.15.6.1.5.5	Variation 5:	Silylation–Desilylation Procedure	714
42.15.6.1.6	Method 6:	Alkyl/Aryl Hydrogen Alkylphosphonates by Miscellaneous Methods	714

42.15.6.1.7	Method 7:	Hydrolysis of Dialkyl/Diaryl Alkylphosphonothioates	717
42.15.6.1.8	Method 8:	Synthesis of <i>O</i> -Alkyl Hydrogen Alkylphosphonothioates from Alkylphosphonothioic Dichlorides	719
42.15.6.1.9	Method 9:	Hydrolysis of <i>O</i> -Alkyl Alkylphosphonochloridothioates	719
42.15.6.1.10	Method 10:	Synthesis of <i>O</i> -Alkyl Hydrogen Alkylphosphonothioates from <i>O</i> -Alkyl Alkylphosphonochloridates	720
42.15.6.1.11	Method 11:	Addition of Sulfur to Alkyl Alkylphosphinates	721
42.15.6.1.12	Method 12:	Horner–Wadsworth–Emmons Reaction of Phosphoramidates and Thiophosphoramidates	721
42.15.6.1.13	Method 13:	Oxathiaphospholane Approach for the Synthesis of Nucleoside Methylphosphonothioic Acids	723
42.15.6.1.14	Method 14:	Alcoholysis of Monothiophosphonic Anhydrides	724
42.15.6.1.15	Method 15:	Synthesis of <i>O</i> -Alkyl Hydrogen Alkylphosphonoselenoates ...	725
42.15.7	Product Subclass 7: <i>S</i>-Alkyl/Aryl Hydrogen Alkylphosphonothioates and Their Sulfur and Selenium Derivatives		725
42.15.7.1	Synthesis of Product Subclass 7		725
42.15.7.1.1	Method 1:	Coupling Reaction of Alkylphosphonic Acids with Thiols	725
42.15.7.1.2	Method 2:	Alkylation of Alkylphosphonothioic Acid Anions with Alkyl Halides	726
42.15.8	Product Subclass 8: <i>P</i>-Alkylphosphonamidic Acids and Their Sulfur and Selenium Derivatives		726
42.15.8.1	Synthesis of Product Subclass 8		726
42.15.8.1.1	Method 1:	Reaction of Alkyl/Aryl Alkylphosphonohalidates with Tertiary Amines	726
42.15.8.1.2	Method 2:	Synthesis of <i>P</i> -Ethylphosphonamidothioic Acids	727
42.15.9	Product Subclass 9: <i>O,O</i>-Dialkyl/Diaryl Alkylphosphonates and Their Sulfur and Selenium Derivatives		728
42.15.9.1	Synthesis of Product Subclass 9		728
42.15.9.1.1	Method 1:	Reaction of Alkylphosphonic Dihalides with Alcohols	728
42.15.9.1.2	Method 2:	Reaction of Alkyl/Aryl Alkylphosphonohalidates with Alcohols	728
42.15.9.1.3	Method 3:	Reaction of Phosphites with α -Halo Ketones	728
42.15.9.1.4	Method 4:	Michaelis–Becker Reaction	728
42.15.9.1.5	Method 5:	Michaelis–Arbuzov Reaction	730
42.15.9.1.6	Method 6:	Addition of Tricoordinated Organophosphorus Derivatives to Unsaturated Systems	730
42.15.9.1.6.1	Variation 1:	Addition of Dialkyl Phosphites to Alkenes, Allenes, and Alkynes	730
42.15.9.1.6.2	Variation 2:	Addition of Dialkyl Phosphites to Carbonyl Groups	731
42.15.9.1.6.3	Variation 3:	Addition of Dialkyl Phosphite Anions to Imines	733
42.15.9.1.7	Method 7:	Transesterification Reactions	736
42.15.9.1.8	Method 8:	Reaction of Alkyl/Aryl Hydrogen Phosphonates with Alcohols	737
42.15.9.1.9	Method 9:	Reaction of <i>O</i> -Alkyl/Aryl Alkylphosphonohalidothioates with Alcohols	738
42.15.9.1.10	Method 10:	Reaction of Alkylphosphonothioic Dihalides with Alcoholates	739

42.15.9.1.11	Method 11:	Sulfurization of Tricoordinated Alkylphosphonous Acid Diesters	740
42.15.9.1.12	Method 12:	Miscellaneous Protocols Leading to <i>O,O</i> -Dialkyl/Diaryl Alkylphosphonothioates	741
42.15.9.1.13	Method 13:	Selenation of <i>O,O</i> -Dialkyl/Diaryl Alkylphosphonites	742
42.15.10	Product Subclass 10: <i>O,S</i>-Dialkyl/Diaryl Alkylphosphonothioates and Their Sulfur and Selenium Derivatives		743
42.15.10.1	Synthesis of Product Subclass 10		743
42.15.10.1.1	Method 1:	Reaction of Alkyl/Aryl Alkylphosphonohalidates with Alkali Metal Thiolates	743
42.15.10.1.2	Method 2:	Reaction of Dithiocarboxylic Acids with Dialkyl Chlorophosphites	743
42.15.10.1.3	Method 3:	Reaction of Alkyl/Aryl Alkylphosphonohalidodithioates with Alcohols	743
42.15.10.1.4	Method 4:	Reaction of Alkylphosphonic Dihalides with Alcohols and Thiols, or Sulfanyl Alcohols	743
42.15.10.1.5	Method 5:	Alkylation of <i>O</i> -Alkyl/Aryl Alkylphosphonothioate Anions	745
42.15.10.1.6	Methods 6:	Miscellaneous Procedures	746
42.15.11	Product Subclass 11: <i>S,S</i>-Dialkyl/Diaryl Alkylphosphonodithioates and Their Sulfur and Selenium Derivatives		746
42.15.11.1	Synthesis of Product Subclass 11		746
42.15.11.1.1	Method 1:	Arbuzov Reaction of Trialkyl Trithiophosphites with Alkyl Halides	746
42.15.11.1.2	Method 2:	Preparation of Di- and Trithioesters from Alkylphosphonothioic and Alkylphosphonic Dichlorides	747
42.15.11.1.3	Method 3:	Addition of Phosphonodithiyl and Phosphonotrithiyl Radicals to Alkenes	748
42.15.12	Product Subclass 12: <i>O</i>- and <i>S</i>-Alkyl/Aryl <i>P</i>-Alkylphosphonamidates and Their Sulfur and Selenium Derivatives		749
42.15.12.1	Synthesis of Product Subclass 12		749
42.15.12.1.1	Method 1:	Reaction of Alkyl/Aryl Alkylphosphonohalidates with Amines	749
42.15.12.1.2	Method 2:	Reaction of Alkylphosphonic Dichlorides with Amino Alcohols or with an Alcohol and an Amine	751
42.15.12.1.3	Method 3:	Reaction of <i>P</i> -Alkylphosphonamidic Halides with Alcohols	752
42.15.12.1.4	Method 4:	Reaction of Dialkyl Amidophosphites with Alkyl Halides	753
42.15.12.1.5	Method 5:	Oxidation of Alkylphosphonamidous Acid Esters	754
42.15.12.1.6	Method 6:	Aminolysis of Dialkyl Alkylphosphonates	755
42.15.12.1.7	Method 7:	Perkov-Type Reaction	755
42.15.12.1.8	Method 8:	Reaction of Alkylphosphonothioic Dihalides with Amino Alcohols	755
42.15.12.1.9	Method 9:	Reaction of <i>O</i> -Alkyl/Aryl Alkylphosphonohalidodithioates with Amines	756
42.15.12.1.10	Method 10:	Sulfuration or Selenation of Alkylphosphonamidites	757
42.15.13	Product Subclass 13: <i>P</i>-Alkylphosphonic Diamides and Their Sulfur and Selenium Derivatives		757

42.15.13.1	Synthesis of Product Subclass 13	757
42.15.13.1.1	Method 1: Reaction of Alkylphosphonic Dihalides with Amines	757
42.15.13.1.2	Method 2: Reaction of <i>O</i> -Alkyl Phosphorous Diamides with Alkyl Halides	758
42.15.13.1.3	Method 3: Reaction of <i>N,N,N',N'</i> -Tetraalkylphosphorodiamidic Chlorides with Organometallic Reagents	758
42.15.13.1.4	Method 4: Transamination of <i>P</i> -Alkylphosphonic Diamides	759
42.15.13.1.5	Method 5: Oxidation of <i>P</i> -Alkylphosphonous Diamides	759
42.15.13.1.6	Method 6: Sulfurization of Bis(dialkylamino)phosphines	760
42.15.13.1.7	Method 7: Reaction of Alkyl Phosphorodiamidothioites with Alkyl Halides	760
42.15.13.1.8	Method 8: Selenation of Bis(dialkylamino)phosphines	761
42.15.14	Product Subclass 14: Anhydrides of Alkylphosphonic Acids and Their Derivatives	761
42.15.14.1	Synthesis of Product Subclass 14	761
42.15.14.1.1	Method 1: Reaction of Dialkyl Alkylphosphonates with Halides of Oxoacids of Phosphorus	761
42.15.14.1.2	Method 2: Reaction of Alkylphosphonic Acids and Their Sulfur Analogues with Carbodiimides	762
42.15.14.1.2.1	Variation 1: Reaction of Alkylphosphonic Acids with Carbodiimides	762
42.15.14.1.2.2	Variation 2: Reaction of <i>O</i> -Alkyl/Aryl Alkylphosphonothioic Acids with Carbodiimides	762
42.15.14.1.3	Method 3: Reactions of Alkyl/Aryl Alkylphosphonohalidates and <i>N,N,P</i> -Trialkylphosphonamidic Halides	763
42.15.14.1.3.1	Variation 1: Reactions of Alkyl/Aryl Alkylphosphonohalidates with Nucleophiles	763
42.15.14.1.3.2	Variation 2: Reactions of <i>N,N,P</i> -Trialkylphosphonamidic Halides with Nucleophiles	763
42.15.14.1.4	Method 4: Synthesis of Oligomers of Alkylphosphonic and Alkylphosphonothioic Anhydrides	764
42.15.14.1.5	Methods 5: Miscellaneous Procedures	766
42.16	Product Class 16: Phosphoric Acid and Derivatives C. E. McKenna, B. A. Kashemirov, and K. M. Błażewska	
42.16	Product Class 16: Phosphoric Acid and Derivatives	779
42.16.1	Product Subclass 1: P=O Phosphates	780
42.16.1.1	Synthesis of Product Subclass 1	780
42.16.1.1.1	Mixed Anhydrides of Phosphoric Acid and Esters of Phosphoric Acid with Non-Phosphorus-Containing Acids	780
42.16.1.1.1.1	Method 1: Reaction of Phosphates with Anhydrides of Carboxylic Acids ..	780
42.16.1.1.1.2	Method 2: Reaction of Phosphate Esters with Anhydrides of Strong Carboxylic Acids	781
42.16.1.1.1.3	Method 3: Reaction of Phosphates or Phosphate Esters with Amino Acids in the Presence of Diisopropylcarbodiimide or Dicyclohexylcarbodiimide	781
42.16.1.1.2	Alkyl Dihydrogen Phosphates	782

42.16.1.1.2.1	Method 1:	Phosphorylation of Alcohols with Phosphoryl Chloride	782
42.16.1.1.2.1.1	Variation 1:	Phosphorylation of Unprotected Nucleosides	782
42.16.1.1.2.1.2	Variation 2:	Phosphorylation of Other Alcohols	783
42.16.1.1.2.2	Method 2:	Catalytic Condensation of Phosphoric Acid with Alcohols	784
42.16.1.1.2.3	Method 3:	Phosphoramidites as Phosphorylating Agents	784
42.16.1.1.2.3.1	Variation 1:	5'-Phosphorylation of Solid-Supported Oligonucleotides by <i>tert</i> -Butyl 2-Cyanoethyl Diisopropylphosphoramidite	785
42.16.1.1.2.3.2	Variation 2:	Solid-Phase Phosphoramidites for Selective Monophosphorylation of Carbohydrates and Nucleosides	786
42.16.1.1.2.4	Method 4:	Disodium 2-({2-[Bis(4-methoxyphenyl)(phenyl)methoxy]ethyl}sulfonyl)ethyl Phosphate as a Phosphorylating Agent for Primary and Secondary Alcohol Functions in Nucleosides	788
42.16.1.1.3		S-Alkyl Dihydrogen Phosphorothioates	789
42.16.1.1.3.1	Method 1:	Selective Dealkylation	789
42.16.1.1.3.2	Method 2:	S-Alkylation of Phosphorothioic Acid	790
42.16.1.1.4		Alkyl Trihydrogen Diphosphates	791
42.16.1.1.4.1	Method 1:	Phosphorylation by Tris(tetrabutylammonium) Hydrogen Pyrophosphate	791
42.16.1.1.4.1.1	Variation 1:	Phosphorylation of Homoallylic 4-Toluenesulfonates or Allylic Halides	791
42.16.1.1.4.1.2	Variation 2:	Phosphorylation of 5'-Tosyl Nucleosides	792
42.16.1.1.4.2	Method 2:	Phosphorylation of Activated 5'-Nucleoside Monophosphates	793
42.16.1.1.4.2.1	Variation 1:	Activation by Imidazolides	793
42.16.1.1.4.2.2	Variation 2:	Activation by Conversion into Phosphorodichloridates	795
42.16.1.1.5		S-Alkyl Trihydrogen Thiodiphosphates	795
42.16.1.1.5.1	Method 1:	Thiophosphorylation of 4-Toluenesulfonates or Bromides	796
42.16.1.1.6		Alkyl Tetrahydrogen Triphosphates	797
42.16.1.1.6.1	Method 1:	The Ludwig One-Pot, Three-Step Procedure	797
42.16.1.1.6.2	Method 2:	The Ludwig-Eckstein Procedure	798
42.16.1.1.6.3	Method 3:	Enzymatic Approaches	799
42.16.1.1.6.4	Method 4:	Synthesis via a Reactive Pyrrolidinium Phosphoramidate Zwitterion Intermediate	801
42.16.1.1.6.5	Method 5:	Solid-Phase Synthesis of Nucleoside β -Triphosphates	802
42.16.1.1.7		Anhydrides of Phosphoric Acid: Nucleoside Triphosphate Analogues	804
42.16.1.1.7.1	Method 1:	Synthesis of β,γ -Methylene Nucleoside Triphosphate Analogues through Activation by Trihaloacetic Anhydrides and 1-Methylimidazole	804
42.16.1.1.7.2	Method 2:	Synthesis of β,γ -Methylene Deoxynucleoside Triphosphate Analogues via Morpholidates	806
42.16.1.1.7.3	Method 3:	Synthesis of α,β -Methylene Deoxynucleoside Triphosphate Analogues by Enzymatic Phosphorylation of the Corresponding α,β -Methylene Deoxynucleoside Diphosphate Analogues	807
42.16.1.1.8		Alkyl/Aryl Phosphorohalidates	809

42.16.1.1.8.1	Method 1:	Phosphorylation with Phosphoryl Chloride	809
42.16.1.1.8.2	Method 2:	Synthesis of Alkyl/Aryl Phosphorodifluoridates	809
42.16.1.1.8.2.1	Variation 1:	Fluorination of Alkyl or Aryl Phosphorodichloridates	809
42.16.1.1.8.2.2	Variation 2:	Fluorination of P–N Imidazole Derivatives	810
42.16.1.1.9		<i>S</i> -Alkyl/ <i>S</i> -Aryl Phosphorodihalidothioates	811
42.16.1.1.10		Dialkyl/Diaryl Hydrogen Phosphates	811
42.16.1.1.10.1	Method 1:	Stepwise Esterification of Phosphoryl Chloride	812
42.16.1.1.10.2	Method 2:	Selective Hydrolysis of Triesters of Phosphoric Acid	812
42.16.1.1.10.3	Method 3:	Solid-Phase Synthesis of Dinucleoside and Nucleoside–Carbohydrate Phosphodiester	813
42.16.1.1.11		<i>O,S</i> -Dialkyl/ <i>O,S</i> -Diaryl Hydrogen Thiophosphates	814
42.16.1.1.11.1	Method 1:	Alkylation of Sulfur in Phosphorothioate Derivatives	815
42.16.1.1.11.2	Method 2:	Oxidation of <i>O,S</i> -Disubstituted Phosphonothiolates	816
42.16.1.1.11.3	Method 3:	Selective Dealkylation of Triesters Bearing a P–S–C Bond System	817
42.16.1.1.12		<i>S,S</i> -Dialkyl/ <i>S,S</i> -Diaryl Hydrogen Phosphorodithioates	818
42.16.1.1.12.1	Method 1:	Reaction of Phosphorodichloridates with Alkane- or Arenethiols	818
42.16.1.1.12.2	Method 2:	Reaction of Elemental Phosphorus with Benzenethiol	818
42.16.1.1.12.3	Method 3:	Reaction of <i>N</i> -(Alkylsulfanyl)phthalimides with Phosphinates in the Presence of Hexamethyldisilazane	819
42.16.1.1.13		Dialkyl Dihydrogen Diphosphates	820
42.16.1.1.13.1	Method 1:	Synthesis of Dialkyl Dihydrogen Diphosphates by Morpholidate Coupling	820
42.16.1.1.13.2	Method 2:	Triphenylphosphine and Di-2-pyridyl Disulfide as Coupling Agents in One-Pot Syntheses of Symmetrical Dinucleoside 5',5''-Pyrophosphates	821
42.16.1.1.13.3	Method 3:	Sugar Nucleoside Diphosphates via a Reactive Zwitterionic Phosphoramidate Intermediate	822
42.16.1.1.13.4	Method 4:	Solid-Phase Synthesis of Symmetrical Nucleoside Phosphodiester	823
42.16.1.1.14		Dialkyl/Diaryl Phosphorohalidates	825
42.16.1.1.14.1	Method 1:	Chlorination of Phosphites with 1,3,5-Trichloro-1,3,5- triazinane-2,4,6-trione or <i>tert</i> -Butyl(chloro)cyanamide	825
42.16.1.1.14.2	Method 2:	Halogenation of Bis(fluoroalkyl) Phosphites	826
42.16.1.1.15		Trialkyl/Triaryl Phosphates	827
42.16.1.1.15.1	Method 1:	Addition of Hydrogen Chloride to Vinyl Phosphates	827
42.16.1.1.15.2	Method 2:	Phosphorylation	828
42.16.1.1.15.2.1	Variation 1:	Phosphorylation with Diphenyl Phosphorochloridate	828
42.16.1.1.15.2.2	Variation 2:	Phosphorylation with (2-Oxo-5,5-diphenyloxazolidin- 3-yl)phosphonates	829
42.16.1.1.15.2.3	Variation 3:	Phosphorylation Catalyzed by a Low-Molecular-Weight Peptide-Based Catalyst	832
42.16.1.1.15.3	Method 3:	Phosphite Oxidation in the Presence of Alcohols	833

42.16.1.1.15.4	Method 4: Phosphate Esterification Promoted by Silver(I) Oxide	833
42.16.1.1.16	<i>O,O,S</i> -Trialkyl/ <i>O,O,S</i> -Triaryl Phosphorothioates	834
42.16.1.1.16.1	Method 1: Synthesis of Phosphorothioates Containing an α,β -Unsaturated Carbonyl Moiety	834
42.16.1.1.16.2	Method 2: Redox Reaction of a Phosphite with Tellurium Tetrachloride ..	836
42.16.1.1.16.3	Method 3: Solvent-Free <i>S</i> -Alkylation of Phosphites	836
42.16.1.1.17	<i>O,O,Se</i> -Trialkyl/ <i>O,O,Se</i> -Triaryl Phosphoroselenoates	837
42.16.1.1.17.1	Method 1: Reaction of Potassium <i>O,O</i> -Dialkyl Phosphoroselenoates with Alkenyl(phenyl)iodonium Salts	837
42.16.1.1.17.2	Method 2: Selenophosphorylation of Silyl Enol Ethers	838
42.16.1.1.18	Tetraalkyl/Tetraaryl Diphosphates	839
42.16.1.1.18.1	Method 1: <i>N</i> -[Chloro(dimethylamino)methylene]- <i>N</i> -methylmethan- aminium Chloride as the Condensing Reagent	839
42.16.1.1.18.2	Method 2: Synthesis from a Phosphorochloridate	840
42.16.1.1.19	<i>O,O,O,O</i> -Tetraalkyl/ <i>O,O,O,O</i> -Tetraaryl Thiodiphosphates	841
42.16.1.1.19.1	Method 1: Reaction of Phosphites with Sulfur Dichloride	841
42.16.2	Product Subclass 2: P=S Phosphorothioates	842
42.16.2.1	Synthesis of Product Subclass 2	842
42.16.2.1.1	<i>O</i> -Alkyl Dihydrogen Phosphorothioates	842
42.16.2.1.1.1	Method 1: Thiophosphorylation with Thiophosphoryl Chloride	843
42.16.2.1.1.2	Method 2: Sulfurization of Monoalkyl <i>H</i> -Phosphonates	844
42.16.2.1.1.2.1	Variation 1: Sulfurization of Monoalkyl <i>H</i> -Phosphonates with Elemental Sulfur	844
42.16.2.1.1.2.2	Variation 2: Sulfurization of a Bis(trimethylsilyl) Phosphite Ester	844
42.16.2.1.1.3	Method 3: Sulfurization of Trialkyl Phosphites	845
42.16.2.1.2	<i>O</i> -Alkyl/ <i>O</i> -Aryl Dihydrogen Phosphorodithioates	847
42.16.2.1.2.1	Method 1: Oxidation of <i>O</i> -Alkyl Hydrogen Phosphonodithioates	847
42.16.2.1.2.2	Method 2: Sulfurization of Alkyl Phosphonothioates	849
42.16.2.1.2.2.1	Variation 1: Sulfurization of Deoxynucleotide Analogues	849
42.16.2.1.2.2.2	Variation 2: Sulfurization of Peptide Analogues	851
42.16.2.1.2.3	Method 3: Synthesis from Sulfidodithiaphospholanes	853
42.16.2.1.2.3.1	Variation 1: Synthesis of Nucleoside 3'- <i>O</i> -Phosphorodithioates	853
42.16.2.1.2.3.2	Variation 2: Synthesis of Nucleoside 5'- <i>O</i> -Phosphorodithioates	854
42.16.2.1.3	<i>O</i> -Alkyl/ <i>O</i> -Aryl Trihydrogen Thiodiphosphates	854
42.16.2.1.3.1	Method 1: Phosphorylation of an <i>O</i> -Alkyl Phosphorothioate	855
42.16.2.1.3.2	Method 2: Synthesis via Imidazolides	855
42.16.2.1.3.3	Method 3: Ring Opening of a 5'-(1-Thiocyclotriphosphate) with Ethane-1,2-diamine	856
42.16.2.1.4	<i>O</i> -Alkyl Tetrahydrogen Thiotriphosphates	858
42.16.2.1.4.1	Method 1: Phosphorylation with 2-Chloro-4 <i>H</i> -1,3,2-benzodioxaphos- phinin-4-one and Subsequent Reaction with Pyrophosphate .	858

42.16.2.1.4.2	Method 2:	Thiophosphorylation and Subsequent Reaction with Pyrophosphate	859
42.16.2.1.4.2.1	Variation 1:	Direct Thiophosphorylation of the Hydroxy Group	860
42.16.2.1.4.2.2	Variation 2:	Thiophosphorylation of Tributylstannyl Ethers	861
42.16.2.1.4.2.3	Variation 3:	Enzymatic Phosphorylation	861
42.16.2.1.5		O-Alkyl Tetrahydrogen 1,1-Dithiotriphosphates	862
42.16.2.1.5.1	Method 1:	Ring Opening of a 5'-(1-Sulfidocyclotriphosphate) with Lithium Sulfide	862
42.16.2.1.5.2	Method 2:	Synthesis via 2-Sulfido-1,3,2-Dithiaphospholanes	863
42.16.2.1.6		Anhydrides of Phosphoric Acid: Nucleoside Triphosphate Analogues	865
42.16.2.1.7		O-Alkyl Tetrahydrogen 1,2,3-Trithiotriphosphates	866
42.16.2.1.8		O-Alkyl/O-Aryl Phosphorofluoridothioates	868
42.16.2.1.8.1	Method 1:	Sulfurization of Phosphorofluoridites	868
42.16.2.1.8.2	Method 2:	Oxidation and Fluorination of Thio- and Dithiophosphonates ..	871
42.16.2.1.9		O-Alkyl Phosphorodifluoridothioates	871
42.16.2.1.9.1	Method 1:	Sulfurization of a Difluoridophosphite	871
42.16.2.1.9.2	Method 2:	Synthesis from a Bis(1<i>H</i>-imidazol-1-yl)phosphinothioate	872
42.16.2.1.10		O,O-Dialkyl/O,O-Diaryl Hydrogen Phosphorothioates	873
42.16.2.1.10.1	Method 1:	Stereocontrolled Synthesis via 2-Sulfido-1,3,2-oxathia-phospholanes	874
42.16.2.1.10.2	Method 2:	Stereocontrolled Synthesis via Cyclic <i>N</i>-Acylphosphoramidites ..	876
42.16.2.1.10.3	Method 3:	Stereocontrolled Synthesis via 3'-<i>O</i>-Oxazaphospholidines	877
42.16.2.1.10.4	Method 4:	Sulfurization of Phosphite Triester	880
42.16.2.1.10.4.1	Variation 1:	Sulfurization with 3<i>H</i>-1,2-Benzodithiol-3-one 1,1-Dioxide (Beaucage's Reagent)	880
42.16.2.1.10.4.2	Variation 2:	Sulfurization with Phenylacetyl Disulfide	882
42.16.2.1.10.4.3	Variation 3:	Sulfurization with 1,1',1'',1'''-[Disulfanedylbis(carbonothioylnitri)]tetraethane	882
42.16.2.1.10.4.4	Variation 4:	Sulfurization with Lawesson's Reagent	882
42.16.2.1.10.5	Method 5:	Direct Sulfurization of Dialkyl <i>H</i>-Phosphonates	883
42.16.2.1.10.6	Method 6:	Polymerization Catalyzed by Uranyl Ion	884
42.16.2.1.11		O,O-Dialkyl/O,O-Diaryl Hydrogen Phosphorodithioates	885
42.16.2.1.11.1	Method 1:	Sulfurization of Disubstituted Phosphonodithioates	885
42.16.2.1.11.1.1	Variation 1:	From Phosphorochloridites	886
42.16.2.1.11.1.2	Variation 2:	Solid-Phase Synthesis of O,O-Dialkyl Phosphorodithioates	886
42.16.2.1.11.2	Method 2:	The Dithiaphospholane Method	888
42.16.2.1.11.2.1	Variation 1:	From <i>N,N</i>-Diisopropyl-1,3,2-dithiaphospholan-2-amine	888
42.16.2.1.11.2.2	Variation 2:	From 2-Chloro-1,3,2-dithiaphospholane	890
42.16.2.1.11.3	Method 3:	Dithiophosphorylation of Alcohols and Hydrolysis of the Triester	891
42.16.2.1.11.4	Method 4:	Reduction and Subsequent Sulfurization of O,O-Dialkyl Phosphorochloridothioates	893
42.16.2.1.11.5	Method 5:	Solid-Phase Sulfurization of Phosphoramidothioites	893
42.16.2.1.12		O,O-Dialkyl/O,O-Diaryl Phosphorofluoridothioates	895

42.16.2.1.12.1	Method 1:	Sulfurization of Phosphorofluoridites	895
42.16.2.1.12.2	Method 2:	Fluorination of <i>O,O</i> -Dialkyl Phosphonothioates	896
42.16.2.1.12.3	Method 3:	Desulfurization of Phosphorodithioates	897
42.16.2.1.13		<i>O,O,O</i> -Trialkyl/ <i>O,O,O</i> -Triaryl Phosphorothioates	898
42.16.2.1.13.1	Method 1:	Sulfurization of Trivalent Phosphorus Compounds	898
42.16.2.1.13.1.1	Variation 1:	Sulfurization with Thiirane	899
42.16.2.1.13.1.2	Variation 2:	Sulfurization with Dibenzoyl Tetrasulfide	899
42.16.2.1.13.1.3	Variation 3:	Sulfurization with Bis[3-(triethoxysilyl)propyl] Tetrasulfide ...	899
42.16.2.1.13.2	Method 2:	Methanolysis of Phosphoramidothioates	900
42.16.2.1.14		<i>O,O,S</i> -Trialkyl/ <i>O,O,S</i> -Triaryl Phosphorodithioates	901
42.16.2.1.14.1	Method 1:	Thiophosphorylation of Silyl Enol Ethers	901
42.16.2.1.14.2	Method 2:	Alkylation of <i>O,O</i> -Dialkyl Phosphorodithioates	902
42.16.2.1.14.3	Method 3:	<i>S</i> -Alkynylation of Potassium <i>O,O</i> -Dialkyl Phosphorodithioates	902
42.16.2.1.14.4	Method 4:	Sulfurization of Phosphoro-chloridothioates	903
42.16.3	Product Subclass 3: P=Se Phosphates		903
42.16.3.1		Synthesis of Product Subclass 3	904
42.16.3.1.1		<i>O,O</i> -Dialkyl Phosphoroselenoates	904
42.16.3.1.1.1	Method 1:	Synthesis via Phosphoramidites	904
42.16.3.1.1.2	Method 2:	Synthesis via <i>H</i> -Phosphonates	906
42.16.3.1.1.2.1	Variation 1:	Oxidation of <i>O,O</i> -Dialkyl Phosphonates with Potassium Selenocyanate	906
42.16.3.1.1.2.2	Variation 2:	Oxidation of <i>O,O</i> -Dialkyl <i>H</i> -Phosphonates with Triphenylphosphine Selenide	907
42.16.3.1.1.2.3	Variation 3:	Oxidation of <i>O,O</i> -Dialkyl <i>H</i> -Phosphonates with 3 <i>H</i> -1,2-Benzothiaselenol-3-one	907
42.16.3.1.1.2.4	Variation 4:	Oxidation of <i>O,O</i> -Dialkyl <i>H</i> -Phosphonates with 3-(Phthalimidose-lanyl)propanenitrile	909
42.16.3.1.1.3	Method 3:	Synthesis via 1,3,2-Oxathiaphospholane 2-Selenides	911
42.16.3.1.2		<i>O,O,O</i> -Trialkyl Phosphoroselenoates	913
42.16.3.1.2.1	Method 1:	The Phosphoramidite Approach	913
42.17	Product Class 17: Phosphazenes		
	S. Urgaonkar and J. G. Verkade		
<hr/>			
42.17	Product Class 17: Phosphazenes		923
42.17.1	Product Subclass 1: Schwesinger Bases		923
42.17.1.1		Synthesis of Product Subclass 1	924
42.17.1.1.1	Method 1:	Synthesis from Phosphonium Salts	924
42.17.1.2		Applications of Product Subclass 1 in Organic Synthesis	925
42.17.1.2.1	Method 1:	Deprotonation Reactions	925
42.17.1.2.2	Method 2:	Addition of <i>O</i> - and <i>N</i> -Nucleophiles to Alkynes	930
42.17.1.2.3	Method 3:	Activation of Arene–Silicon Bonds	930
42.17.1.2.4	Method 4:	Halogen–Zinc Exchange Reactions of Aryl Iodides	931

42.17.1.2.5	Method 5: Sigmatropic Rearrangement of Allylic Amines and Alcohols	932
42.17.1.2.6	Method 6: Synthesis of Diaryl Ethers and Sulfides	933
42.17.1.2.7	Method 7: Michael Addition	934
42.17.2	Product Subclass 2: Proazaphosphatrane Sulfides	934
42.17.2.1	Synthesis of Product Subclass 2	934
42.17.2.1.1	Method 1: Reaction of Proazaphosphatranes with Sulfur	934
42.17.2.2	Applications of Product Subclass 2 in Organic Synthesis	935
42.17.2.2.1	Method 1: Baylis–Hillman Reaction	935
42.17.3	Product Subclass 3: Proazaphosphatrane Oxides	935
42.17.3.1	Synthesis of Product Subclass 3	936
42.17.3.1.1	Method 1: Reaction of Proazaphosphatranes with Bis(trimethylsilyl) Peroxide	936
42.17.3.2	Applications of Product Subclass 3 in Organic Synthesis	936
42.17.3.2.1	Method 1: Silylation of Alcohols	936
42.17.3.2.2	Method 2: Transformation of Isocyanates into Carbodiimides	937
42.17.4	Product Subclass 4: Phosphoramides	937
42.17.4.1	Synthesis of Product Subclass 4	938
42.17.4.1.1	Method 1: Synthesis by Oxidation	938
42.17.4.1.2	Method 2: Synthesis by Nucleophilic Substitution	938
42.17.4.2	Applications of Product Subclass 4 in Organic Synthesis	939
42.17.4.2.1	Method 1: Asymmetric Aldol Reactions	939
42.17.4.2.2	Method 2: Enantioselective Allylation Reactions	940
42.17.4.2.3	Method 3: Asymmetric Diels–Alder Reaction	941
42.17.4.2.4	Method 4: Borane Reduction of Ketones	941
42.17.4.2.5	Method 5: Oxidation Reactions	941
42.17.4.2.6	Method 6: Reduction Reactions	942
42.17.4.2.7	Method 7: Conjugate Addition Reactions	943
42.17.5	Product Subclass 5: Linear and Cyclic Organophosphazenes	944
42.17.5.1	Synthesis of Product Subclass 5	944
42.17.5.1.1	Method 1: Reaction of Phosphorus Pentachloride with Ammonium Chloride or Tris(trimethylsilyl)amine	944
42.17.5.2	Applications of Product Subclass 5 in Organic Synthesis	946
42.17.5.2.1	Method 1: Synthesis of Poly(dichlorophosphazene)	946
42.18	Product Class 18: Pentacoordinated Phosphoranes T. Kawashima and J. Kobayashi	
42.18	Product Class 18: Pentacoordinated Phosphoranes	953
42.18.1	Synthesis of Product Class 18	954
42.18.1.1	Method 1: Nucleophilic Substitution on Pentacoordinated Phosphoranes	954
42.18.1.1.1	Variation 1: Addition of Alcohols to Phosphoranes	954

42.18.1.1.2	Variation 2:	Addition of Amines to Halophosphoranes	954
42.18.1.1.3	Variation 3:	Reaction of Alkoxy- or Aminosilanes with Halophosphoranes ..	955
42.18.1.1.4	Variation 4:	Reaction of Unsaturated Compounds with Halophosphoranes	955
42.18.1.2	Method 2:	Addition to Tetracoordinated Phosphorus Compounds	956
42.18.1.2.1	Variation 1:	Addition of Carbonyl Compounds to Phosphorus Ylides	956
42.18.1.2.2	Variation 2:	Addition of 1,3-Dipoles to Phosphorus Ylides	958
42.18.1.2.3	Variation 3:	Addition to Phosphonium Salts	959
42.18.1.2.4	Variation 4:	Addition to Alkylated Iminophosphoranes	962
42.18.1.3	Method 3:	Oxidation of Tricoordinated Phosphorus Compounds	963
42.18.1.3.1	Variation 1:	Reaction with Dihalogens	963
42.18.1.3.2	Variation 2:	Reactions with Other Halogenating Reagents	964
42.18.1.3.3	Variation 3:	Reaction with Peroxides	965
42.18.1.3.4	Variation 4:	Reaction with α -Diketones	965
42.18.1.3.5	Variation 5:	Reaction with α,β -Unsaturated Carbonyl Compounds	967
42.18.1.4	Method 4:	Condensation Reactions	968
42.18.1.4.1	Variation 1:	Dehydrative Condensation	968
42.18.1.4.2	Variation 2:	Reaction of Carbonyl Compounds with Tricoordinated Phosphorus	970
42.18.1.5	Method 5:	Insertion Reactions	971
42.18.1.5.1	Variation 1:	Insertion of Tricoordinated Phosphorus	971
42.18.1.5.2	Variation 2:	Insertion into the P—H Bond of Hydrophosphoranes	972

42.19 Product Class 19: Hexacoordinated Phosphates

D. Linder and J. Lacour

42.19	Product Class 19: Hexacoordinated Phosphates	977
42.19.1	Product Subclass 1: Anionic Hexacoordinated Phosphorus Derivatives with P—O Bonds Only	978
42.19.1.1	Synthesis of Product Subclass 1	978
42.19.1.1.1	Method 1: Direct Synthesis from Phosphorus Pentachloride	978
42.19.1.1.2	Method 2: Stepwise Synthesis from Phosphorus(III) Compounds	980
42.19.1.1.2.1	Variation 1: From Phosphites	981
42.19.1.1.2.2	Variation 2: From Phosphorous Triamides	982
42.19.2	Product Subclass 2: Anionic Hexacoordinated Phosphorus Derivatives with P—O and P—C Bonds	986
42.19.2.1	Synthesis of Product Subclass 2	986
42.19.2.1.1	Method 1: Stepwise Synthesis from Phosphorus(V) Adducts	986
42.19.2.1.2	Method 2: Direct Oxidation of Phosphorus(III) Adducts	988
