

Contents

Chapter 1. Introduction	ix
Chapter 2. Basics	1
Chapter 3. From Product Systems to Random Sets	3
3.1. Product Systems	3
3.2. Random Sets in Product Systems	5
3.3. Measure Types as Invariants	11
3.4. Measure Types Related to Units	13
3.5. Tensor Products (I)	15
Chapter 4. From Random Sets to Product Systems	17
4.1. General Theory	17
4.2. Example 1: Finite Random Sets	20
4.3. Example 2: Countable Random Sets	21
4.4. Example 3: Random Cantor Sets	22
4.5. Tensor Products (II)	24
4.6. The map $\mathcal{E} \mapsto \mathcal{M}^{\mathcal{E}, \mathcal{U}}$ is surjective	27
Chapter 5. An Hierarchy of Random Sets	31
5.1. Factorising Projections and Product Subsystems	31
5.2. Subsystems of $\mathcal{E}^{\mathcal{M}}$	33
5.3. The Lattice of Stationary Factorising Measure Types	38
Chapter 6. Direct Integral Representations	41
6.1. Random Sets and Direct Integrals	41
6.2. Direct Integrals in Product Systems	44
6.3. Characterisations of Type I Product Systems	46
6.4. Unitalising Type III Product Systems	50
Chapter 7. Measurability in Product Systems: An Algebraic Approach	53
7.1. GNS-representations	53
7.2. Algebraic Product Systems and Intrinsic Measurable Structures	55
7.3. Product Systems of W^* -Algebras	66
7.4. Product systems and Unitary Evolutions	70
7.5. Additional Results on Measurability	76
Chapter 8. Construction of Product Systems from General Measure Types	79
8.1. General Results	79
8.2. Product Systems from Random Sets	84
8.3. Product Systems from Random Measures	85
8.4. Product Systems from Random Increment Processes	86

Chapter 9. Beyond Separability: Random Bisets	89
Chapter 10. An Algebraic Invariant of Product Systems	93
Chapter 11. Conclusions and Outlook	97
Bibliography	99
