List of Figures	xv
Prologue	xvii
Introduction: Should We Fear Global Warming?	1
<i>Part One: The 1,500-Year Climate Cycle</i>	
1 How Did We Find Earth's 1,500-year Climate Cycle?	15
2 The Sun-Climate Connection	29
3 Warming and Cooling in Human History	39
4 The Earth Tells Its Own Story of Past Climate Cycles	61
<i>Part Two: Predicting Future Climates</i>	
5 Shattered Glass in the Greenhouse	103
6 Fraud and Deceit in Selling Man-Made Global Warming	115
7 How Far Can We Trust Global Climate Models?	137
<i>Part Three: Baseless Fears about Global Warming</i>	
8 Rising Sea Levels	151

9	Species Extinction	163
10	Famine and Drought	187
11	More Violent Weather	201
12	Human Deaths	213
 <i>Part Four: Responding to Global Warming</i>		
13	The Kyoto Protocol	223
14	Alternative Energy	239
15	Conclusion	253
	Name Index	261
	Subject Index	267
	About the Authors	277

# List of Figures

Figure P.1:	219,000 Years of Temperature Variation	xiv
Figure P.2:	Last 1,000 Years of Earth Temperatures	xv
Figure P.3:	Global Satellite Temperature Record 1979–2004	xvi
Figure I.1:	Solar Influence on Climate	5
Figure 2.1:	Arctic Temperatures and Solar Activity	32
Figure 4.1:	2,000 Years of Chinese Temperature History	66
Figure 4.2	Solar Variability and the Monsoon in Omar	84
Figure 4.3:	2,000 Years of Siberian Temperature History	86
Figure 4.4:	1,000 Years of South African Temperature History	90
Figure 5.1	Global Satellite Temperature Record 1979–2004	106
Figure 6.1:	Last 1,000 Years of Earth Temperatures	127
Figure 6.2:	The Infamous “Hockey Stick” Graph	128
