Table of Contents

List of acronyms 6
Introduction 9
PART 1 11
Characteristics of the deep-sea-vents 11
1 Geology 11
2 Chemistry 12
3 Biology and Ecology 13
3.1 Chemo synthesis 13
3.2 Food Web 13
3.3 Biogeography 14
3.4 Endemism and species diversity 15
3.5 Hyperthermophile Archeae 16
3.6 Cognate Communities 17
3.6.1 Cold seeps and pockmarks 17
3.6.2 Whale skeletons 18
PART 2 19
Exploitation of Hydrothermal Vent Sites and Threats to Vent Ecosystems 19
1 Potential use conflicts 19
2 Marine Scientific Research 19
3 Seabed Mineral Mining 21
3.1 The most important deep-sea minerals of interest 21
3.2 Timing 21
3.3 Minerals of interest 21
3.3.1 Polymetallic (Manganese) Nodules 21
3.3.2 Methane Hydrates 21
3.3.2 Polymetallic Sulphide Deposit (PMS) 22
3.4 Environmental effects on vent sites 22
4 Oil and Gas Exploitation 23
5 Geothermal Exploitation 23
6 Bioprospecting and Biotechnology 24
7 Tourism 24
Part 3 27
The legal framework for seabed vent sites 27
1 The United Nations Convention on the Law of the Sea (UNCLOS) 27

1.1 The regime for the conduct of marine scientific research 27
1.2 The regime for non-living marine resources beyond national jurisdiction 28
1.3 The regime for living marine resources 29
1.4 The regime for the protection of the marine environment 30
2 The United Nation's Conference on Environment and Development and its instruments 31
2.1 The Rio Declaration of Principles on Environment and Development 31
2.2 The Agenda 21 32
2.3 The Convention on Biological Diversity (CBD) 32
3 Conflicts between the UNCLOS and the CBD 33
PART 4 A 36
Classification of deep-sea vent resources under the UNCLOS 36
1 The distinctions between the status of the seabed and the subsoil 36
2 Classification of non-living vent resources under the UNCLOS 37
3 Classification of living vent resources under the UNCLOS 37
3.1 Sedentary species 38
3.2 Two conflicting claims in respect to access 40
3.2.1 Are vent living resources beyond national jurisdiction "living marine resources" under part VII, falling under the high seas universal use principle? Or are they "resources" under Part XI falling under the common heritage regime ? 40
3.2.2 What does the UNCLOS offer for the genetic resources of the vent organisms ? 43
4 Options to create a legal regime for the Area's genetic resources 44
5 Developing customary law to fill legal gaps 48
6. Global and regional international regulations on the conservation and the sustainable use of hydrothermal vents within the Area 48
PART 4 B 51
The Legal Status of vent activities under UNCLOS 51
1 Marine Scientific Research 51
1.1 Nature of marine scientific research 51
1.2 Classification 52
1.3 Co operation 57
1.4 The urgent need for conservation measures 57
2 Seabed Mining 58
Part 4 C 61
The Legal Status of vent resources and activities under the Convention on Biological Diversity 61
1 Ecosystem approach 61
1.1 Conservation 61

1.2 Sustainable use of the vent living and genetic marine resources 62
1.3 Fair and equitable access to vent living and genetic marine resources 62
2 The zonal approach 62
Part 5 65
Management and Protection of hydrothermal vent sites 65
1 Threat management 65
1.1 Environmental Impact Assessment 65
1.2 Environmental liability provisions 66
1.3 The identification of critical and sensitive sites 67
1.4 The management of scientific activities (deep-sea sanctuaries) 68
1.5 Further recommendations for the management of vent sites 69
2 High-seas marine protected areas (MPAs) 70
2.1 The current international legal regime of MAPs 71
2.2 A future international legal framework for MPA's beyond national jurisdiction 72
2.3 Political obstacles 73
2.4 Current and proposed marine protected areas for specific hydrothermal areas 73
